Federal Register

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 50 FR 12345.

Title 3—

The President

Executive Order 12525 of July 12, 1985

Termination of Emergency Authority for Export Controls

By the authority vested in me as President by the Constitution and laws of the United States of America, including section 203 of the International Emergency Economic Powers Act (50 U.S.C. 1702) (hereinafter referred to as "IEEPA"), 22 U.S.C. 287c, and the Export Administration Act of 1979, as amended (50 U.S.C. App. 2401 *et seq.*) (hereinafter referred to as "the Act"), it is hereby ordered as follows:

Section 1. In view of the extension by Public Law 99–64 (July 12, 1985) of the authorities contained in the Act, Executive Order No. 12470 of March 30, 1984, which continued in effect export control regulations under IEEPA, is revoked, and the declaration of economic emergency is rescinded.

Sec. 2. The revocation of Executive Order No. 12470 shall not affect any violation of any rules, regulations, orders, licenses, and other forms of administrative action under that Order that occurred during the period that Order was in effect. All rules and regulations issued or continued in effect under the authority of the IEEPA and that Order, including those published in Title 15, Chapter III, Subchapter C, of the Code of Federal Regulations, Parts 368 to 399 inclusive, and all orders, regulations, licenses, and other forms of administrative action issued, taken or continued in effect pursuant thereto, shall remain in full force and effect, as if issued, taken or continued in effect pursuant to and as authorized by the Act or by other appropriate authority until amended or revoked by the proper authority. Nothing in this Order shall affect the continued applicability of the provision for the administration of the Act and delegations of authority set forth in Executive Order No. 12002 of July 7, 1977, and Executive Order No. 12214 of May 2, 1980.

Sec. 3. All rules, regulations, orders, licenses, and other forms of administrative action issued, taken or continued in effect pursuant to the authority of the IEEPA and Executive Order No. 12470 relating to the administration of Section 38(e) of the Arms Export Control Act (22 U.S.C. 2778(e)) shall remain in full force and effect until amended or revoked under proper authority.

Sec. 4. This Order shall take effect immediately.

Rules and Regulations

Federal Register
Vol. 50, No. 136
Tuesday, July 16, 1985

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 3015

Uniform Federal Assistance Regulations; Subpart I—Audits

AGENCY: Department of Agriculture (USDA).

ACTION: Interim rulemaking, with comments invited.

SUMMARY: This Interim final rule amends 7 CFR Part 3015, Subpart I, Audits, to implement the Office of Management and Budget (OMB) Circular A–128 "Audits of State and Local Governments," dated April 12, 1985, and issued pursuant to the Single Audit Act of 1984, (Pub. L. 98–502). It establishes audit requirements for State, local, and Indian Tribal governments that receive USDA Federal assistance and defines USDA responsibilities for implementing and monitoring those requirements.

EFFECTIVE DATE: July 16, 1985.

DATE: Comments must be received on or before September 16, 1985.

ADDRESS: Interested persons should submit comments to Ms. Lyn Zimmerman, Office of Finance and Management, USDA, Room 2117, Auditors Building, 201 14th Street, SW., Washington, D.C. 20250. Comments will be available for inspection at the above address from 9:00 a.m. to 5:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Ms. Lyn Zimmerman, Office of Finance and Management, Financial Management Division, 201 14th Street, SW., Room 2117, Auditors Building, Washington, D.C. 20250, on (202) 382–1553.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291

This rule has been reviewed under Executive Order 12291 and Departmental Regulation No. 1512–1 and it is determined that this rule is "not major." The rule will not have an annual effect on the economy of $100 million or more, nor is it likely to result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions. This rule will not result in significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

This rule has also been reviewed with regard to the requirements of Pub. L. 96–354, and John E. Carson, Director, Office of Finance and Management, has certified that it will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), any applicable reporting and recordkeeping provisions required by this rule will be submitted to OMB and will not be effective until OMB has approved them.

Proposed rulemaking

It is determined that the Administrative Procedure Act public participation requirements are not applicable to this rulemaking because: (i) That portion of the rule that embodies OMB Circular No. 128 has been subject to notice and comment and thus further notice and comment is unnecessary in view of the fact that the USDA is obliged pursuant to section 7505 of the Single Audit Act of 1984, Pub. L. 98–502, to follow the Circular, and (ii) to the extent that the rule does not embody the Circular, the rule is a matter of internal agency management. Nevertheless, to assure uniformity with the approach adopted by other Departments and agencies with respect to rules to be issued under the Single Audit Act of 1984, the USDA has decided to promulgate this rule as an interim rule and seeks public comment.

Background

Over $100 billion in Federal financial assistance is provided to State and local governments each year and the Federal Government relies on auditing as one of the principal means of assuring accountability for its use. Traditionally, recipients were required to obtain financial and compliance audits of funds on a grant-by-grant basis. Studies showed that such grant-by-grant auditing was uncoordinative, inefficient, and ineffective, often producing duplicative and overlapping results.

In response to this criticism, there arose the concept of a single, organizationwide audit that would be acceptable to all funding organizations. Such an audit would assure that a recipient's financial records and controls were adequate and would check for compliance with important terms of grants received. The audits would be made periodically and funding organizations would be free to perform additional audits of economy and efficiency and program results, as deemed necessary.

To accommodate this concept, OMB issued Attachment P to Circular A–102, which required each State, local and Indian Tribal government receiving Federal financial assistance to obtain an organizationwide financial and compliance audit of its operations at least once every two years. The audits were to be conducted in accordance with guidelines and standards established by the General Accounting Office (GAO), OMB, and the American Institute of Certified Public Accountant. To this effect, GAO issued the "Guidelines for Financial and Compliance Audits of Federally Assisted Programs," which was a Governmentwide audit guide intended to replace about 80 individual audit guides previously used by Federal agencies. Additionally, to assist auditors in testing Federal programs for compliance, OMB issued a listing of the major compliance requirements of 60 Federal assistance programs. These programs represented approximately 90 percent of total Federal assistance to State and local governments. Attachment P also prescribed a cognizant audit agency system to administer the single audit process. This role is currently being performed by the Office of Inspector General.

A GAO evaluation report on implementation of Attachment P

Subpart I—Audits

§ 3015.72 Definitions.

audit firms owned and controlled by

(5) *Subrecipients.* Each State, local, or

VOL 50 ISS 136 JL 16 1985 UMI

A GAO evaluation report on implementation of Attachment P indicated that the transition to a single audit had met with slow progress. The report concluded that the principal problems hampering implementation of Attachment P were disagreement among Federal, State, and local officials on the scope and purpose of the single audit; diffusion of responsibility in the current cognizant agency system; and conflicts between the provisions of Attachment P and existing statutory grant audit requirements. At that time, GAO recommended the adoption of single audit legislation to correct these problems.

Purpose

The Single Audit Act of 1984 (Pub. L. 98–502) builds upon earlier efforts to improve audits of Federal programs. The Act requires State or local governments and Indian tribes that receive more than $100,000 a year in Federal funds to have an audit made for that year. Circular A–128 was issued pursuant to section 7505 of the Act, which requires OMB to issue implementing guidelines. This rule amends 7 CFR Part 3015, Subpart I, to implement OMB Circular A–128. It is intended to improve the financial management of Federal assistance programs; promote the efficient use of audit resources; relieve State, local and Indian Tribal governments of cost and paperwork burdens due to conflicting, redundant, and unreasonable audit requirements of Federal assistance; and provide for the establishment of consistent and uniform requirements for financial audits of State, local and Indian Tribal governments, and other recipients of Federal assistance.

List of Subjects in 7 CFR Part 3015

Grant programs (agriculture), Intergovernmental relations.

Issued at Washington, D.C. July 10, 1985.

Approved: July 10, 1985.

John J. Franke, Jr.,

Assistant Secretary for Administration.

John R. Block,

Secretary of Agriculture.

PART 3015—[AMENDED]

Accordingly, USDA amends 7 CFR Part 3015 as follows:

1. The authority citation for Part 3015 is revised to read as follows:

Authority: 5 U.S.C. 301 Subpart I, 31 U.S.C. 7505.

2. Subpart I is revised to read as follows:

Subpart I—Audits

Sec.

3015.70 Audits of State, local, and Indian Tribal governments.
3015.71 Policy.
3015.72 Definitions.
3015.73 Audits arrangements and requirements.
3015.74 Cognizant agencies.
3015.75 Reporting requirements.
3015.76 Audit costs.
3015.77 Audits of institutions of higher education, hospitals and other nonprofit organizations.
Appendix B–OMB Circular A–128, "Audits of State and Local Governments".

Authority: Single Audit Act of 1984, Pub. L. 98–502.

* * * * *

§ 3015.70 Audits of State, local and Indian Tribal governments.

(a) This subpart establishes audit requirements for State, local and Indian Tribal governments that receive Federal assistance and defines Federal responsibilities for implementing and monitoring those requirements. Additionally, this subpart implements the audit requirements and policies for government organizations contained in the following documents, which are incorporated into this subpart by reference and/or as an appendix:

(1) Single Audit Act of 1984, (Pub. L. 98–502);

(2) The Office of Management and Budget (OMB) Circular A–128, and any subsequent revisions;

(3) Standards for Audit of Governmental Organizations, Programs, Activities and Functions issued by the Comptroller General of the United States in 1981 (GAO Standards), and any subsequent revisions;

(4) Generally Accepted Auditing Standards issued by the American Institute of Certified Public Accountants (AICPA);

(5) AICPA Industry Audit Guide, Audits of State and Local Governmental Units, Federally Assisted Programs;

(6) Compliance Supplements for Single Audits of State and Local Governments issued by OMB in April 1985, and any subsequent revisions; and

(7) Federal cognizant agency assignments issued by OMB on October 6, 1980, and any subsequent revisions.

(b) All of the requirements contained in paragraphs (a) (1) through (5) must be met by a recipient before an audit can be accepted as a Federal audit by the respective cognizant agencies referenced in paragraph (a)(7). The auditor may use the Compliance Supplement for Single Audits of State and Local Governments, published by OMB, or ascertain compliance requirements by researching the statutes, regulations, and agreements governing individual Federal programs.

§ 3015.71 Policy

(a) Under OMB Circular A–128, included herein as Appendix B, OMB has established uniform audit requirements for State, local and Indian Tribal governments, or their subdivisions, that receive Federal financial assistance. The Circular requires recipients and subrecipients of Federal financial assistance to arrange for independent audits of financial operations, including compliance with certain provisions of Federal laws and regulations, and to assure that single audits are made in accordance with Circular A–128.

(b) A State, local, or Indian Tribal government which receives less than $25,000 in Federal assistance is exempt from the requirements contained herein, but shall have an audit made in accordance with State or local law or regulations for any fiscal year in which it receives less than $25,000 in Federal financial assistance.

(c) A single audit in accordance with Circular A–128 and this subpart shall be in lieu of any audit required under individual USDA Federal assistance programs. A single audit should provide USDA agencies with the information they need to carry out their responsibilities and they shall rely upon and use that information. Any additional audits needed by USDA shall be conducted or arranged by the Office of Inspector General in such a way as to avoid duplication of effort. Audit requirements in USDA individual agency regulations and directives for assistance programs administered in cooperation with State, local, and Indian Tribal governments shall be limited to requiring compliance with OMB Circular A–128 and this subpart.

(d) State, local and Indian Tribal governments for which OMB has assigned USDA as the "cognizant agency" shall apply the audit requirements set forth in Circular A–128 and this subpart.

(e) State, local and Indian Tribal governments that receive financial assistance from USDA, and have been assigned a cognizant agency other than USDA, shall follow the audit requirements established by the respective cognizant agency. If the designated cognizant agency has not established Circular A–128 audit requirements, or if OMB has not designated a cognizant agency, those units of government shall follow the audit requirements contained in Circular A–128, and this subpart.

§ 3015.72 Definitions.

(a) "Cognizant agency" means the Federal agency assigned by OMB to carry out the responsibilities described in OMB Circular A–128. Within USDA the Secretary has designated the Office of Finance and Management (OFM) as the "cognizant agency." OFM further has the responsibility to delegate cognizant agency responsibilities to those USDA awarding agencies that provided the major portion of Federal funds or services to the recipient and monitoring the agencies implementation of the Single Audit Act of 1984 and OMB Circular A–128. In those instances where USDA is designated as the cognizant agency, the USDA Office of Inspector General (OIG) shall act for the Department in accordance with § 3015.74 of this subpart.

(b) "OIG" means the Office of Inspector General, United States Department of Agriculture.

(c) "Regional Inspector General" means the OIG official in the United States Department of Agriculture who is responsible for audit-related matters in one of the designated regions covered by a Regional Audit Office.

(d) Other definitions applicable to this subpart are set forth in Appendix B.

§ 3015.73 Audit arrangements and requirements.

(a) *Arrangements.* (1) State, local and Indian Tribal governments shall use their own procedures to arrange for and prescribe the scope of independent audits, provided that such audits comply with the requirements set forth in this subpart and Circular A–128.

Note.—It is not intended that audits required by this subpart be separate and apart from audits performed in accordance with State and local laws. To the extent feasible, the audit work required by this subpart should be done in conjunction with those audits.

(2) In arranging for audits, USDA awarding agencies and recipients shall coordinate proposed audit plans and related documents with the appropriate USDA Regional Inspector General prior to initiating the audit. The purpose of coordinating the proposed audit plans and related documents is to enable the Regional Inspectors General to provide timely technical assistance and assure that satisfactory audit coverage is planned.

(3) Provisions shall be included in audit contracts requiring the audit organization to retain audit working papers and reports in accordance with § 3015.75(b).

(b) *Use of small and minority audit firms.* As set forth in Circular A–128, paragraph 19 small audit firms and audit firms owned and controlled by socially and economically disadvantaged individuals shall have the maximum practicable opportunity to participate in the performance of contracts awarded to fulfill the audit requirements of Circular A–128 and this subpart.

(c) *Requirements.* (1) *Scope of audit.* (i) Each audit shall cover the entire operations of a State or local government or, at the option of that government, it may cover departments, agencies or establishments that received, expended, or otherwise administered Federal financial assistance during the year. However, if a State or local government receives over $25,000 in General Revenue Sharing funds in a fiscal year, it shall have an audit of the entire organization. A series of audits of individual departments, agencies, and establishments for the same fiscal year may be considered a single audit.

(ii) The single audit may exclude public hospitals and public colleges and universities. Such audits, if excluded from the scope of the single audit, shall be made in accordance with § 3015.77.

(iii) The audit shall determine and report in accordance with OMB Circular A–128 and § 3015.75.

(2) *Frequency of audit.* Audits shall be made annually unless the State or local government has, by January 1, 1987, a constitutional or statutory requirement for less frequent audits. For those governments, USDA shall permit biennial audits, if the government so requests. USDA shall also honor requests for biennial audits by governments that have an administrative policy calling for audits less frequent than annual, but only for fiscal years beginning prior to January 1, 1987.

(3) *Internal control and compliance reviews.* Internal control and compliance reviews shall be conducted in accordance with OMB Circular A–128, paragraph 8.

(4) *Other testing.* The recipient's independent auditor is responsible for:

(i) Reviewing the recipient's system for monitoring subrecipients and obtaining and acting on subrecipient audit reports;

(ii) Testing to determine whether these systems are functioning in accordance with prescribed procedures;

(iii) Commenting on the recipient's monitoring procedures, if warranted by the circumstances; and

(iv) Considering whether subrecipient audits require adjustment of the recipient's financial statements, footnote disclosure, or modification of the auditor's report.

(5) *Subrecipients.* Each State, local, or Indian Tribal government that receives Federal financial assistance and provides $25,000 or more of it in a fiscal year to a subrecipient shall follow the requirements set forth in Circular A–128, paragraph 9.

(6) *Relation to other audit requirements.*

(i) Audits made in accordance with Circular A–128 and this subpart shall be in lieu of any audit required under individual USDA Federal assistance programs. This paragraph applies to State, local, or Indian Tribal governments that make audits in accordance with Circular A–128 and this subpart, even though not required to do so.

(ii) USDA or its designee shall arrange for or make any additional audits that are necessary to carry out its responsibilities under Federal law or regulation. The provisions of Circular A–128 and this subpart do not authorize any State, local, or Indian Tribal government (or subrecipient thereof) to constrain, in any manner, USDA or its designee from carrying out such additional audits.

(iii) When the Office of Inspector General or USDA agencies make or contract for audits or evaluations in addition to the audits made by recipients pursuant to OMB Circular A–128 and this subpart, consistent with other applicable laws and regulations, the cost of such additional reviews shall be paid by USDA "unless applicable laws and regulations provide for payment by the recipient". Such additional reviews include economy and efficiency audits, program results audits, and program evaluations.

§ 3015.74 Cognizant agencies.

(a) *Cognizant agency assignments.* In accordance with Circular A–128, OMB assigns cognizant agencies for State and larger local governments. In order to fulfill the cognizant responsibilities, other Federal agencies may participate with an assigned cognizant agency. Smaller governments not assigned a cognizant agency should contact the Federal agency that provides them the most funds to work out a cognizant agency agreement.

(b) *USDA responsibilities.* When USDA is assigned as the cognizant agency, the OIG shall have the following responsibilities:

(1) Work with USDA awarding agencies to ensure that audits are made in a timely manner and in accordance with the requirements of Circular A–128 and this subpart;

(2) Provide the liaison between the Federal audit organizations, USDA awarding agencies and the recipient

programs of a single Federal agency shall be the responsibility of the

(2) Provide the liaison between the Federal audit organizations, USDA awarding agencies and the recipient entities and independent auditors;

(3) Provide technical advice to State, local, and Indian Tribal governments, USDA awarding agencies, and independent auditors;

(4) Obtain or make quality control reviews of individual audits made by non-Federal audit organizations, and provide the results to other interested organizations, when appropriate;

(5) Inform other affected Federal organizations of any reported illegal acts or irregularities. The Federal organizations, in turn, shall inform appropriate Federal law enforcement officials. State or local government law enforcement and prosecuting authorities, if not advised by the recipient, may also be informed of any violation of law within their jurisdiction by the OIG;

(6) Advise the USDA awarding agency and the recipient of any audit reports that do not meet the audit standards and requirements set forth in Circular A–128 and this subpart. In such instances, the recipient shall work with the auditors to take corrective action. If corrective action is not taken, OIG, as the cognizant agency, shall notify the Federal awarding agencies and the recipient of the facts and make recommendations, if appropriate. Major inadequacies or repetitive substandard performance of independent auditors shall be referred to appropriate professional bodies for disciplinary action;

(7) Coordinate, to the extent practicable, audits made by or for Federal agencies that are in addition to the audits made pursuant to Circular A–128 and this subpart, and ensure that any additional audits build upon such audits; and

(8) Assure that all recipient audit reports affecting Federal assistance programs are received, reviewed, and distributed to the proper Federal cognizant agencies. These agencies (including USDA OIG) are responsible for distributing audit reports to their respective program officials.

(9) Assure that necessary audits are performed of indirect cost proposals submitted by governmental units for which USDA is cognizant under the provisions of OMB Circular A–87.

(c) *Audit resolution.* OIG shall be responsible for overseeing and assigning responsibility to the appropriate USDA awarding agency for the resolution of crosscutting audit findings that affect the programs of more than one USDA or non-USDA awarding agency. Resolution of findings that relate solely to the programs of a single Federal agency shall be the responsibility of the recipient and that agency. Alternate arrangements may be made on a case-by-case basis by agreement between the agencies concerned. Resolution shall be made within six months after issuance of the report by the departments and agencies that provide Federal assistance funds to State and local governments. Corrective action should proceed as rapidly as possible.

§ 3015.75 Reporting requirements.

(a) *Audit reports.* Audit reports must be prepared at the completion of the audit and shall be in accordance with the provisions of Circular A–128, paragraph 13.

(b) *Audit workpapers and reports.* Workpapers and reports shall be retained for a minimum of three years from the date of the audit report, unless the auditor is notified in writing by OIG to extend the retention period. Audit workpapers shall be made available upon request to OIG, or its designee, or the General Accounting Office, at the completion of the audit.

(c) *Illegal acts or irregularities.* If the auditor becomes aware of illegal acts or other irregularities, *prompt* notice shall be given to recipient management officials above the level of involvement. The recipient, in turn, shall promptly notify OIG of the illegal acts or irregularities and of proposed and actual actions, if any. Illegal acts and irregularities include such matters as conflicts of interest, falsification of records or reports, and misappropriation of funds or other assets.

§ 3015.76 Audit costs.

(a) The costs of audits made in accordance with the provisions of Circular A–128, paragraph 16, are allowable charges to USDA Federal assistance programs.

(b) If the recipients or subrecipients fail to arrange for the required audits set forth in OMB Circular A–128, or fail to assure that an acceptable audit is performed, the USDA awarding agency may arrange for the performance of the required audits. If USDA arranges for the required audits because of these circumstances, the recipients and/or subrecipients shall reimburse USDA for the cost of these single audits.

§ 3015.77 Audits of institutions of higher education, hospitals and other non-profit organizations.

(a) *Non-Federal audits.* If not included within the scope of a single audit as set forth in § 3015.73(c)(1), institutions of higher education, hospitals and other nonprofit organizations that receive USDA Federal assistance shall comply with the requirements for non-Federal audits set forth in OMB Circular A–110, including any amendments to those requirements published in the **Federal Register** by OMB.

(1) Each recipient must arrange for a financial and compliance audit annually, but not less frequently than every two years.

(2) The recipient's audits must comply with the GAO "Standards for Audit of Governmental Organizations, Programs, Activities and Functions," including the standards for auditor independence and any subsequent revisions to the standards.

(3) The audit shall be conducted on an organizationwide basis to test the fiscal integrity of financial transactions, as well as compliance with the terms and conditions of the Federal grants and other agreements. Such tests shall include an appropriate sampling of Federal agreements. USDA awarding agencies may not impose grant-by-grant (or subgrant-by-subgrant) audit requirements except as may be prescribed by law.

(4) Recipients must establish a system for:

(i) Assuring that subrecipients meet the requirements of these regulations;

(ii) Evaluating acceptability of subrecipient audits;

(iii) Following up on results of subrecipient audits.

(5) Subrecipient audit reports shall be transmitted by the subrecipient to the applicable primary recipient. These reports shall not be routinely transmitted to OIG. Instead the recipient shall retain all subrecipient audit reports on file and make them available to OIG and GAO officials, or their designees, upon request.

(6) The recipient is responsible for taking appropriate action on subrecipient audits and incorporating the results of these audits into their financial records and related reports. The recipient's auditors shall state in the audit report the amount of funds at the subrecipient level that were audited by the subrecipient's auditors and make any pertinent comments concerning those audits. Questioned costs at the subrecipient level may be contingent liabilities as far as the recipient is concerned and should be reported as such, when appropriate.

(7) Each recipient shall establish a systematic method to assure timely and appropriate resolution of audit findings and recommendations.

(b) *Federal audit responsibilities.* (1) Audits of Federal contracts and assistance programs at institutions of higher education are performed periodically by the Federal agencies designated as cognizant agencies in OMB Circular A–88. In addition, OIG may perform audits of USDA programs at Land Grant Institutions from time to time. Such audits shall be coordinated in advance with the cognizant agency and shall, to the extent possible, not duplicate work done by the Federal cognizant agency, or by independent auditors in accordance with OMB Circular A–110.

(2) OIG reserves the right to perform audits of USDA assistance programs and other nonprofit organizations as determined by OIG to be necessary. In performing such audits, OIG shall rely to the extent feasible on audit work performed by other Federal and non-Federal auditors.

Executive Office of the President

Office of Management and Budget

Appendix B

Circular No. A–128

April 12, 1984

To the Heads of Executive Departments and Establishments.

Subject: Audits of State and Local Governments.

1. *Purpose.* This Circular is issued pursuant to the Single Audit Act of 1984, Pub. L. 98–502. It establishes audit requirements for State and local governments that receive Federal aid, and defines Federal responsibilities for implementing and monitoring those requirements.

2. *Supersession.* The Circular supersedes Attachment P, "Audit Requirements," of Circular A–102, "Uniform requirements for grants to State and local governments."

3. *Background.* The Single Audit Act builds upon earlier efforts to improve audits of Federal aid programs. The Act requires State or local governments that receive $100,000 or more a year in Federal funds to have an audit made for that year. Section 7505 of the Act requires the Director of the Office of Management and Budget to prescribe policies, procedures and guidelines to implement the Act. It specifies that the Director shall designate "cognizant" Federal agencies, determine criteria for making appropriate charges to Federal programs for the cost of audits, and provide procedures to assure that small firms or firms owned and controlled by disadvantaged individuals have the opportunity to participate in contracts for single audits.

4. *Policy.* The Single Audit Act requires the following:

a. State or local governments that receive $100,000 or more a year in Federal financial assistance shall have an audit made in accordance with this Circular.

b. State or local governments that receive between $25,000 and $100,000 a year shall have an audit made in accordance with this Circular, or in accordance with Federal laws and regulations governing the programs they participate in.

c. State or local governments that receive less than $25,000 a year shall be exempt from compliance with the Act and other Federal audit requirements. These State and local governments shall be governed by audit requirements prescribed by State or local law or regulation.

d. Nothing in this paragraph exempts State or local governments from maintaining records of Federal financial assistance or from providing access to such records to Federal agencies, as provided for in Federal law or in Circular A–102, "Uniform requirements for grants to State or local governments."

5. *Definitions.* For the purposes of this Circular the following definitions from the Single Audit Act apply:

a. "Cognizant agency" means the Federal agency assigned by the Office of Management and Budget to carry out the responsibilities described in paragraph 11 of this Circular.

b. "Federal financial assistance" means assistance provided by a Federal agency in the form of grants, contracts, cooperative agreements, loans, loan guarantees, property, interest subsidies, insurance, or direct appropriations, but does not include direct Federal cash assistance to individuals. It includes awards received directly from Federal agencies, or indirectly through other units of State and local governments.

c. "Federal agency" has the same meaning as the term 'agency' in section 551(1) of Title 5, United States Code.

d. "Generally accepted accounting principles" has the meaning specified in the generally accepted government auditing standards.

e. "Generally accepted government auditing standards" means the *Standards For Audit of Government Organizations, Programs, Activities, and Functions,* developed by the Comptroller General, dated February 27, 1981.

f. "Independent auditor" means:

(1) A State or local government auditor who meets the independence standards specified in generally accepted government auditing standards; or

(2) A public accountant who meets such independence standards.

g. "Internal controls" means the plan of organization and methods and procedures adopted by management to ensure that:

(1) Resource use is consistent with laws, regulations, and policies;

(2) Resources are safeguarded against waste, loss, and misuse; and

(3) Reliable data are obtained, maintained, and fairly disclosed in reports.

h. "Indian tribe" means any Indian tribe, band, nations, or other organized group or community, including any Alaskan Native village or regional or village corporations (as defined in, or established under, the Alaskan Native Claims Settlement Act) that is recognized by the United States as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

i. "Local government" means any unit of local government within a State, including a county, a borough, municipalitity, city, town, township, parish, local public authority, special district, school district, intrastate district, council of governments, and any other instrumentality of local government.

j. "Major Federal Assistance Program," as defined by Pub. L 98–502, is described in the Attachment to this Circular.

k. "Public accountants" means those individuals who meet the qualification standards included in generally accepted government auditing standards for personnel performing government audits.

l. "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam American Samoa, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands, any instrumentality thereof, and any multi-State, regional, or interstate entity that has governmental functions and any Indian tribe.

m. "Subrecipient" means any person or government department, agency, or establishment that receives Federal financial assistance to carry out a program through a State or local government, but does not include an individual that is a beneficiary of such a program. A subrecipient may also be a direct recipient of Federal financial assistance.

6. *Scope of audit.* The Single Audit Act provides that:

a. The audit shall be made by an independent auditor in accordance with generally accepted government auditing standards covering financial and compliance audits.

b. The audit shall cover the entire operations of a State or local government or, at the option of that government, it may cover departments, agencies or establishments that received, expended, or otherwise administered Federal financial assistance during the year. However, if a State or local government receives $25,000 or more in General Revenue Sharing Funds in a fiscal year, it shall have an audit of its entire operations. A series of audits of individual departments, agencies, and establishments for the same fiscal year may be considered a single audit.

c. Public hospitals and public colleges and universities may be excluded from State and local audits and the requirements of this Circular. However, if such entities are excluded, audits of these entities shall be made in accordance with statutory requirements and the provisions of Circular A–110, "Uniform requirements for grants to universities, hospitals, and other nonprofit organizations."

d. The auditor shall determine whether:

(1) The financial statements of the government, department, agency or establishment present fairly its financial position and the results of its financial operations in accordance with generally accepted accounting principles;

(2) The organization has internal accounting and other control systems to provide reasonable assurance that it is managing Federal financial assistance programs in compliance with applicable laws and regulations; and

(3) The organization has complied with laws and regulations that may have material effect on its financial statements and on each major Federal assistance program. To the extent that a single audit provides Federal agencies with information and assurances they need to

—The amounts reported as expenditures were for allowable services, and

—The records show that those who received

awarding agencies of the facts and make recommendations for followup action. Major

b. The three parts of the audit report may be bound into a single report, or presented at

Circular are allowable charges to Federal

50
ISS
136
JL
16
1985
UMI

(3) The organization has complied with laws and regulations that may have material effect on its financial statements and on each major Federal assistance program.

7. *Frequency of audit.* Audits shall be made annually unless the State or local government has, by January 1, 1987, a constitutional or statutory requirement for less frequent audits. For those governments, the cognizant agency shall permit biennial audits, covering both years, if the government so requests. It shall also honor requests for biennial audits by governments that have an administrative policy calling for audits less frequent than annual, but only for fiscal years beginning before January 1, 1987.

8. *Internal control and compliance reviews.* The Single Audit Act requires that the independent auditor determine and report on whether the organization has internal control systems to provide reasonable assurance that it is managing Federal assistance programs in compliance with applicable laws and regulations.

a. *Internal control review.* In order to provide this assurance the auditor must make a study and evaluation of internal control systems used in administering Federal assistance programs. The study and evaluation must be made whether or not the auditor intends to place reliance on such systems. As part of this review, the auditor shall:

(1) Test whether these internal control systems are functioning in accordance with prescribed procedures.

(2) Examine the recipient's system for monitoring subrecipients and obtaining and acting on subrecipient audit reports.

b. *Compliance review.* The law also requires the auditor to determine whether the organization has complied with laws and regulations that may have a material effect on each major Federal assistance program.

(1) In order to determine which major programs are to be tested for compliance, State and local governments shall identify in their accounts all Federal funds received and expended and the programs under which they were received. This shall include funds received directly from Federal agencies and through other State and local governments.

(2) The review must include the selection and testing of a representative number of charges from each major Federal assistance program. The selection and testing of transactions shall be based on the auditor's professional judgment considering such factors as the amount of expenditures for the program and the individual awards; the newness of the program or changes in its conditions; prior experience with the program, particularly as revealed in audits and other evaluations (e.g., inspections, program reviews); the extent to which the program is carried out through subrecipients; the extent to which the program contracts for goods or services; the level to which the program is already subject to program reviews of other forms of independent oversight; the adequacy of the controls for ensuring compliance; the expectation of adherence or lack of adherence to the applicable laws and regulations; and the potential impact of adverse findings.

(a) In making the test of transactions, the auditor shall determine whether:

—The amounts reported as expenditures were for allowable services, and

—The records show that those who received services or benefits were eligible to receive them.

(b) In addition to transaction testing, the auditor shall determine whether:

—Matching requirements, levels of effort and earmarking limitations were met,

—Federal financial reports and claims for advances and reimbursements contain information that is supported by the books and records from which the basic financial statements have been prepared, and

—Amounts claimed or used for matching were determined in accordance with OMB Circular A–87, "Cost principles for State and local governments," and Attachment F of Circular A–102, "Uniform requirements for grants to State and local governments."

(c) The principal compliance requirements of the largest Federal aid programs may be ascertained by referring to the *Compliance Supplement for Single Audits of State and Local Governments*, issued by OMB and available from the Government Printing Office. For those programs not covered in the Compliance Supplement, the auditor may ascertain compliance requirements by researching the statutes, regulations, and agreements governing individual programs.

(3) Transactions related to other Federal assistance programs that are selected in connection with examinations of financial statements and evaluations of internal controls shall be tested for compliance with Federal laws and regulations that apply to such transactions.

9. *Subrecipients.* State or local governments that receive Federal financial assistance and provide $25,000 or more of it in a fiscal year to a subrecipient shall:

a. Determine whether State or local subrecipients have met the audit requirements of this Circular and whether subrecipients covered by Circular A–110, "Uniform requirements for grants to universities, hospitals, and other nonprofit organizations," have met that requirement;

b. Determine whether the subrecipient spent Federal assistance funds provided in accordance with applicable laws and regulations. This may be accomplished by reviewing an audit of the subrecipient made in accordance with this Circular, Circular A–110, or through other means (e.g., program reviews) if the subrecipient has not yet had such an audit;

c. Ensure that appropriate corrective action is taken within six months after receipt of the audit report in instances of noncompliance with Federal laws and regulations;

d. Consider whether subrecipient audits necessitate adjustment of the recipient's own records; and

e. Require each subrecipient to permit independent auditors to have access to the records and financial statements as necessary to comply with this Circular.

10. *Relation to other audit requirements.* The Single Audit Act provides that an audit made in accordance with this Circular shall be in lieu of any financial or financial compliance audit required under individual Federal assistance programs. To the extent that a single audit provides Federal agencies with information and assurances they need to carry out their overall responsibilities, they shall rely upon and use such information. However, a Federal agency shall make any additional audits which are necessary to carry out its responsibilities under Federal law and regulation. Any additional Federal audit effort shall be planned and carried out in such a way as to avoid duplication.

a. The provisions of this Circular do not limit the authority of Federal agencies to make, or contract for audits and evaluations of Federal financial assistance programs, nor do they limit the authority of any Federal agency Inspector General or other Federal audit official.

b. The provisions of this Circular do not authorize any State or local government or subrecipient thereof to constrain Federal agencies, in any manner, from carrying out additional audits.

c. A Federal agency that makes or contracts for audits in addition to the audits made by recipients pursuant to this Circular shall, consistent with other applicable laws and regulations, arrange for funding the cost of such additional audits. Such additional audits include economy and efficiency audits, program results audits, and program evaluations.

11. *Cognizant agency responsibilities.* The Single Audit Act provides for cognizant Federal agencies to oversee the implementation of this Circular.

a. The Office of Management and Budget will assign cognizant agencies for States and their subdivisions and larger local governments and their subdivisions. Other Federal agencies may participate with an assigned cognizant agency, in order to fulfill the cognizance responsibilities. Smaller governments not assigned a cognizant agency will be under the general oversight of the Federal agency that provides them the most funds whether directly or indirectly.

b. A cognizant agency shall have the following responsibilities:

(1) Ensure that audits are made and reports are received in a timely manner and in accordance with the requirements of this Circular.

(2) Provide technical advice and liaison to State and local governments and independent auditors.

(3) Obtain or make quality control reviews of selected audits made by non-Federal audit organizations, and provide the results, when appropriate, to other interested organizations.

(4) Promptly inform other affected Federal agencies and appropriate Federal law enforcement officials of any reported illegal acts or irregularities. They should also inform State or local law enforcement and prosecuting authorities, if not advised by the recipient, of any violation of law within their jurisdiction.

(5) Advise the recipient of audits that have been found not to have met the requirements set forth in this Circular. In such instances, the recipient will be expected to work with the auditor to take corrective action. If corrective action is not taken, the cognizant agency shall notify the recipient and Federal awarding agencies of the facts and make recommendations for followup action. Major inadequacies or repetitive substandard performance of independent auditors shall be referred to appropriate professional bodies for disciplinary action.

(6) Coordinate, to the extent practicable, audits made by or for Federal agencies that are in addition to the audits made pursuant to this Circular; so that the additional audits build upon such audits.

(7) Oversee the resolution of audit findings that affect the programs of more than one agency.

12. *Illegal acts or irregularities.* If the auditor becomes aware of illegal acts or other irregularities, prompt notice shall be given to recipient management officials above the level of involvement. (See also paragraph 13(a)(3) below for the auditor's reporting responsibilities.) The recipient, in turn, shall promptly notify the cognizant agency of the illegal acts or irregularities and of proposed and actual actions, if any. Illegal acts and irregularities include such matters as conflicts of interest, falsification of records or reports, and misappropriations of funds or other assets.

13. *Audit Reports.* Audit reports must be prepared at the completion of the audit. Reports serve many needs of State and local governments as well as meeting the requirements of the Single Audit Act.

a. The audit report shall state that the audit was made in accordance with the provisions of this Circular. The report shall be made up of at least:

(1) The auditor's report on financial statements and on a schedule of Federal assistance; the financial statements; and a schedule of Federal assistance, showing the total expenditures for each Federal assistance program as identified in the *Catalog of Federal Domestic Assistance*. Federal programs or grants that have not been assigned a catalog number shall be identified under the caption "other Federal assistance."

(2) The auditor's report on the study and evaluation of internal control systems must identify the organization's significant internal accounting controls, and those controls designed to provide reasonable assurance that Federal programs are being managed in compliance with laws and regulations. It must also identify the controls that were evaluated, the controls that were not evaluated, and the material weaknesses identified as a result of the evaluation.

(3) The auditor's report on compliance containing:

—A statement of positive assurance with respect to those items tested for compliance, including compliance with law and regulations pertaining to financial reports and claims for advances and reimbursements;

—Negative assurance on those items not tested;

—A summary of all instances of noncompliance; and

—An identification of total amounts questioned, if any, for each Federal assistance award, as a result of noncompliance.

b. The three parts of the audit report may be bound into a single report, or presented at the same time as separate documents.

c. All fraud abuse, or illegal acts or indications of such acts, including all questioned costs found as the result of these acts that auditors become aware of, should normally be covered in a separate written report submitted in accordance with paragraph 13f.

d. In addition to the audit report, the recipient shall provide comments on the findings and recommendations in the report, including a plan for corrective action taken or planned and comments on the status of corrective action taken on prior findings. If corrective action is not necessary, a statement describing the reason it is not should accompany the audit report.

e. The reports shall be made available by the State or local government for public inspection within 30 days after the completion of the audit.

f. In accordance with generally accepted government audit standards, reports shall be submitted by the auditor to the organization audited and to those requiring or arranging for the audit. In addition, the recipient shall submit copies of the reports to each Federal department or agency that provided Federal assistance funds to the recipient. Subrecipients shall submit copies to recipients that provided them Federal assistance funds. The reports shall be sent within 30 days after the completion of the audit, but no later than one year after the end of the audit period unless a longer period is agreed to with the cognizant agency.

g. Recipients of more than $100,000 in Federal funds shall submit one copy of the audit report within 30 days after issuance to a central clearinghouse to be designated by the Office of Management and Budget. The clearinghouse will keep completed audits on file and follow up with State and local governments that have not submitted required audit reports.

h. Recipients shall keep audit reports on file for three years from their issuance.

14. *Audit Resolution.* As provided in paragraph 11, the cognizant agency shall be responsible for monitoring the resolution of audit findings that affect the programs of more than one Federal agency. Resolution of findings that relate to the programs of a single Federal agency will be the responsibility of the recipient and that agency. Alternate arrangements may be made on case-by-case basis by a case-by-case basis by agreement among the agenices concerned.

Resolution shall be made within six months after receipt of the report by the Federal departments and agencies. Corrective action should proceed as rapidly as possible.

15. *Audit workpapers and reports.* Workpapers and reports shall be retained for a minimum of three years from the date of the audit report, unless the auditor is notified in writing by the cognizant agency to extend the retention period. Audit workpapers shall be made available upon request to the cognizant agency or its designee or the General Accounting Office, at the completion of the audit.

16. *Audit Costs.* The cost of audits made in accordance with the provisions of this Circular are allowable charges to Federal assistance programs.

a. The charges may be considered a direct cost or an allocated indirect cost, determined in accordance with the provision of Circular A–87, "Cost principles for State and local governments."

b. Generally, the percentage of costs charged to Federal assistance programs for a single audit shall not exceed the percentage that Federal funds expended represent of total funds expended by the recipient during the fiscal year. The percentage may be exceeded, however, if appropriate documentation demonstrates higher actual cost.

17. *Sanctions.* The Single Audit Act provides that no cost may be charged to Federal assistance programs for audits required by the Act that are not made in accordance with this Circular. In cases of continued inability or unwillingness to have a proper audit, Federal agencies must consider other appropropriate sanctions including:

—Withholding a percentage of assistance payments until the audit is completed satisfactorily,

—Withholding or disallowing overhead costs, and

—Suspending the Federal assistance agreement until the audit is made.

18. *Auditor Selection.* In arranging for audit services State and local governments shall follow the procurement standards prescribed by Attachment O of Circular A–102, "Uniform requirements for grants to State and local governments." The standards provide that while recipients are encouraged to enter into intergovernmental agreements for audit and other services, analysis should be made to determine whether it would be more economical to purchase the services from private firms. In instances where use of such intergovernmental agreements are required by State statutes (e.g., audit services) these statutes will take precedence.

19. *Small and Minority Audit Firms.* Small audit firms and audit firms owned and controlled by socially and economically disadvantaged individuals shall have the maximum practicable opportunity to participate in contracts awarded to fulfill the requirements of this Circular. Recipients of Federal assistance shall take the following steps to further this goal:

a. Assure that small audit firms and audit firms owned and controlled by socially and economically disadvantaged individuals are used to the fullest extent practicable.

b. Make information on forthcoming opportunities available and arrange timeframes for the audit so as to encourage and facilitate participation by small audit firms and audit firms owned and controlled by socially and economically disadvantaged individuals.

c. Consider in the contract process whether firms competing for large audits intend to subcontract with small audit firms and audit firms owned and controlled by socially and economically disadvantaged individuals.

d. Encourage contracting with small audit firms or audit firms owned and controlled by socially and economically disadvantaged individuals which have traditionally audited

government programs and, in such cases where this is not possible, assure that these firms are given consideration for audit

government programs and, in such cases where this is not possible, assure that these firms are given consideration for audit subcontracting opportunities.

e. Encourage contracting with consortiums of small audit firms as described in paragraph (a) above when a contract is too large for an individual small audit firm or audit firm owned and controlled by socially and economically disadvantaged individuals.

f. Use the services and assistance, as appropriate, of such organizations as the Small Business Administration in the solicitation and utilization of small audit firms or audit firms owned and controlled by socially and economically disadvantaged individuals.

20. *Reporting.* Each Federal agency will report to the Director of OMB on or before March 1, 1987, and annually thereafter on the effectiveness of State and local governments in carrying out the provisions of this Circular. The report must identify each State or local government or Indian tribe that, in the opinion of the agency, is failing to comply with the Circular.

21. *Regulations.* Each Federal agency shall include the provisions of this Circular in its regulations implementing the Single Audit Act.

22. *Effective date.* This Circular is effective upon publication and shall apply to fiscal years of State and local governments that begin after December 31, 1984. Earlier implementation is encouraged. However, until it is implemented, the audit provisions of Attachment P to Circular A–102 shall continue to be observed.

23. *Inquiries.* All questions or inquiries should be addressed to Financial Management Division, Office of Management and Budget, telephone number 202/395–3993.

24. *Sunset review date.* This Circular shall have an independent policy review to ascertain its effectiveness three years from the date of issuance.

David A. Stockman,

Director.

Definition of Major Program as Provided in Pub. L. 98–502

"Major Federal Assistance Program," for State and local governments having Federal assistance expenditures between $100,000 and $100,000,000, means any program for which Federal expenditures during the applicable year exceed the larger of $300,000, or 3 percent of such total expenditures.

Where total expenditures of Federal assistance exceed $100,000,000, the following criteria apply:

Total expenditures of Federal financial assistance for all programs		Major federal assistance program means any program that exceeds
More than	But less than	
$100 million	$1 billion	$3 million
1 billion	2 billion	4 million
2 billion	3 billion	7 million
3 billion	4 billion	10 million
4 billion	5 billion	13 million
5 billion	6 billion	16 million
6 billion	7 billion	19 million
Over 7 billion		20 million

BILLING CODE 3410–23–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 84–NM–127–AD; Amdt. 39–5102]

Airworthiness Directives; Israel Aircraft Industries, Ltd. Westwind Models 1123, 1124, and 1124A Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: On March 20, 1981, the FAA issued an airworthiness directive (AD), effective upon receipt, by air mail letter to all known operators of Israel Aircraft Industries, Ltd. Westwind Models 1123, 1124, and 1124A airplanes, which requires modification of the intercom system. That action was prompted by an incident in which a resistor in the intercom system overheated and caused a fire. This action publishes that AD in the **Federal Register** and makes it effective to all persons.

EFFECTIVE DATE: August 5, 1985. This AD was effective earlier to all recipients of airmail letter AD 81–07–07 issued March 20, 1981.

ADDRESSES: The applicable service information may be obtained from Israel Aircraft Industries International, Inc., 50 West 23rd Street, New York, New York 10010, or may be examined at the Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Harold N. Wantiez, Standardization Branch, ANM–113; telephone (206) 431–2909. Mailing address: FAA, Northwest Mountain Region, Seattle Aircraft Certification Office, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: On March 20, 1981, the FAA issued by air mail letter Airworthiness Directive (AD) 81–07–07, applicable to Israel Aircraft Industries, Ltd. Westwind Models 1123, 1124, and 1124A airplanes. The AD requires installation of placards prohibiting the use of the intercom system and setting procedures for microphone switches until a resistor in the intercom system is replaced. An operator of a Westwind 1124 airplane had reported an incident in which a resistor in the intercom system overheated and caused a fire on the ground. During subsequent investigation of another Westwind airplane, deformation of shielding as a result of the resistor overheating was detected.

This final rule is revised from the air mail letter only in that the interim procedure of installing a placard has been deleted. The interim procedure would not be required for modification of airplanes being imported.

This airplane model is manufactured in Israel and type certificated in the United States under the provisions of § 21.29 of the Federal Aviation Regulations and the applicable airworthiness bilateral agreement.

Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to public interest, and good cause existed to make the AD effective immediately by individual letters issued March 20, 1981, to all known U.S. owners and operators.

Since this condition may still exist on airplanes of this model registered in the United States, this action publishes the AD in the **Federal Register** as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations to make it effective to all persons.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 16, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required).

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends Section 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.89; and 49 CFR 1.47.

2. By adding the following new airworthiness directive:

Israel Aircraft: Applies to Israel Aircraft Industries Ltd. Westwind Models 1123, 1124, and 1124A (S/N 151 thru 315 except S/N 294, 196, 197, 309, 310, and 314) airplanes, certificated in any category. Compliance is required within the next 100 flight hours after the effective date of this amendment, unless previously accomplished.

A. To prevent fire due to overheating of the intercom system, replace the intercom system audio load R–61 resistor with an RH–25 resistor in a manner approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, or in accordance with IAI Service Bulletin WW–25 for the Model 1123 and IAI Service Bulletin WW–24–23 for the Models 1124 and 1124A.

B. Airplanes may be flown in accordance with FAR 21.197 and 21.199 to a maintenance base for accomplishment of the modification required by this AD.

It was effective earlier to all recipients of air mail letter AD 81–07–07, issued March 20, 1981, which contained this amendment.

Issued in Seattle, Washington, on July 9, 1985.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

[FR Doc. 85–16828 Filed 7–15–85; 8:45 am]

BILLING CODE 4910–13–M

DEPARTMENT OF COMMERCE

Bureau of the Census

15 CFR Part 90

[Docket No. 50221–5088]

Release of Estimates; Amendment to Challenge Procedure for Certain Population and Per Capita Income Estimates

AGENCY: Bureau of the Census, Commerce.

ACTION: Final rule.

SUMMARY: This action modifies the procedure to be followed in releasing certain population and per capita income estimates. The estimates affected are the figures for subcounty areas covered in 15 CFR Part 90. That regulation stipulates a challenge procedure for use by local officials. The only provision of the original rule that is altered by this action is the way in which the estimates are released.

EFFECTIVE DATE: July 16, 1985. The regulation is being made effective upon publication.

FOR FURTHER INFORMATION CONTACT: Roger A. Herriot, Chief, Population Division, Bureau of the Census, (301) 763–7646.

SUPPLEMENTARY INFORMATION: Rulings were made in 1979 that established standard procedures by which localities could challenge the population and income estimates made by the Bureau of the Census. The regulations: (1) Require that an informal challenge be filed no more than 180 days after the release of the estimates by the Bureau of the Census, (2) require a locality to complete an informal review jointly with the Census Bureau before a formal challenge may be filed, (3) specify the appointment of a qualified hearing officer during the formal challenge stage to receive both written and oral evidence under oath, (4) provide for a formal hearing, and (5) provide for a final decision by the Director of the Census Bureau. These rules require that the Census Bureau release the estimates by sending individual mailings of the figures to each local government and simultaneous publication of release notification in the **Federal Register.**

On March 25, 1985, a Notice of Proposed Rule Making was published in the **Federal Register** (50 FR 11708) that proposed to revise the procedure used by the Bureau of the Census to release the estimates. It was proposed that the estimates be released through the standard Census Bureau publication and release procedures used for all other Census Bureau data, with simultaneous notification of the release published in the **Federal Register**, rather than by sending individual mailings of the figures to each of the 39,000 local governments.

Two letters were received commenting on the proposed rule, both opposing the change. One letter was sent by a county planning agency and the other by a state agency.

Discussion of Comments

The two letters did not overlap in their objections to the change. One letter raised the concern that the release of the estimates might be lost in the large number of publications issued by the Federal Government. However, the estimates are published in a separate Census Bureau report series (*Current Population Reports*, Series P–28) that is devoted solely to the release of figures for local areas. The separate series of reports sets these estimates apart from other Bureau of the Census releases and can be monitored easily for the availability of new estimates. The regularly scheduled release of the new estimates in the summer of odd-numbered years makes it relatively easy to find the new figures when they are published. Notification of the release also is carried in the **Federal Register**, the Census Bureau news releases, the Census Bureau's newsletters such as Data User News, the Census Bureau's nationwide electronic publishing service, and two Census Bureau electronic bulletin boards. Localities also are often notified about new estimates by the Federal agencies using the figures in their programs.

The other letter was concerned that intergovernmental cooperation would be damaged by the change, and that local governments would not have the same opportunity that they have now to challenge the Census Bureau's estimates. However, no provisions of the challenge procedure other than the release process are affected by the change. Even if local governments learn of the population or income estimates through their use by another Federal agency, the other Federal agencies, without exception, refer all challenges of the estimates to the Bureau of the Census to be processed through the standard challenge procedure. Federal programs also often allow for later adjustments to their payments when the timing of a challenge and the initial allotments under the program are a problem.

Under Executive Order 12291 the Department must judge whether a regulation is major within the meaning of section 1 of the Order and, therefore, subject to the requirement that a Regulatory Impact Analysis be prepared. This rule is not a major rule because it is not likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, state, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or in the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, a Regulatory Impact Analysis will not be prepared.

This rule does not contain a collection of information for purposes of the Paper Work Reduction Act.

The General Counsel has certified to the Small Business Administration that pursuant to the provisions of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354) the change in the regulation will retain all of the provisions in the

current challenge process and would alter only the way in which the data are

SUMMARY: The Food and Drug Administration (FDA) is amending the

Animal drugs, Oral use

animal drug regulations to reflect approval of a supplemental new animal

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

settle and pay not more than $25,000 for a claim against the Government made

current challenge process and would alter only the way in which the data are released and, therefore, will not have a significant economic effect on a substantial number of small entities.

The Director of the Census Bureau, pursuant to section 553(d)(3) of the Administrative Procedure Act, finds that because of the time constraints in implementing a number of Federal programs that rely on these data, good cause exists for making the rule immediately effective.

List of Subjects in 15 CFR Part 90

Administrative practice and procedure, Census data.

PART 90—[AMENDED]

1. The Authority Citation for 15 CFR Part 90, continues to read as follows:

Authority: 13 U.S.C. 4, unless otherwise noted.

2. 15 CFR Part 90, is amended by revising § 90.5 to read as follows:

§ 90.5 When an informal challenge may be filed.

An informal challenge to the population or per capita income estimates may be filed any time up to 180 days after the release of the estimates by the Bureau of the Census. Publication by the Bureau of the Census and simultaneous publication of a release notification in the **Federal Register** shall constitute release. A challenge to any estimate may also be filed any time up to 180 days from the date the Census Bureau, on its own initiative, revises that estimate.

If, however, a state or unit of local government has sufficiently meritorious reason for not filing in a timely manner, the Census Bureau has the discretion to accept the challenge.

Dated: June 4, 1985.

John G. Keane,

Director, Bureau of the Census.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 520

Oral Dosage Form New Animal Drugs Not Subject to Certification; Diethylcarbamazine Citrate and Oxibendazole Chewable Tablets

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Norden Laboratories, Inc., providing for use of chewable tablets containing diethylcarbamazine citrate and oxibendazole for prevention of heartworm disease (*Dirofilaria immitis*) and hookworm infection (*Ancylostoma caninum*) in dogs.

EFFECTIVE DATE: July 16, 1985.

FOR FURTHER INFORMATION CONTACT: Marcia K. Larkins, Center for Veterinary Medicine (HFV–112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3430.

SUPPLEMENTARY INFORMATION: Norden Laboratories, Inc., Lincoln, NE 68521, filed NADA 136–483 providing for use of Filaribits Plus Chewable Tablets (diethylcarbamazine citrate/oxibendazole, 60/45 milligrams (mg) per tablet or 180/136 mg per tablet) for prevention of heartworm disease (*Diorfilaria immitis*) and hookworm infection (*Ancylostoma caninum*) in dogs. The NADA is approved and the regulations are amended to reflect the approval. The basis for approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and §514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The Agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. FDA's regulations implementing the National Environmental Policy Act (21 CFR Part 25) have been replaced by a rule published in the **Federal Register** of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would require an abbreviated environmental assessment under 21 CFR 25.31a(b)(4).

List of Subjects in 21 CFR Part 520

Animal drugs, Oral use.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 520 is amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 520 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

2. Part 520 is amended by adding new §520.623 to read as follows:

§ 520.623 Diethylcarbamazine citrate, oxibendazole chewable tablets.

(a) *Specifications.* Each tablet contains 60 milligrams of diethylcarbamazine citrate with 45 milligrams of oxibendazole or 180 milligrams of diethylcarbamazine citrate with 136 milligrams of oxibendazole.

(b) *Sponsor.* See 011519 in §510.600(c) of this chapter.

(c) *Conditions of use in dogs*—(1) *Amount.* Administer orally to dogs at a dosage level of 6.6 milligrams of diethylcarbamazine citrate per kilogram of body weight (3 milligrams per pound of body weight) and 5.0 milligrams of oxibendazole per kilogram of body weight (2.27 milligrams per pound of body weight).

(2) *Indications for use.* For prevention of heartworm disease (*Dirofilaria immitis*) and hookworm infection (*Ancylostoma caninum*) in dogs.

(3) *Limitations.* Orally administer daily during heartworm season. For free-choice feeding or broken and placed on or mixed with feed. Do not use in dogs that may harbor adult heartworms. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Dated: July 5, 1985.

Lester M. Crawford,

Director, Center for Veterinary Medicine.

BILLING CODE 4160–01–M

21 CFR Part 558

New Animal Drugs for use in Animal Feeds; Tylosin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed for Custom Feed Blenders Corp., providing for the manufacture of 5-, 10-, and 20-gram-per-pound tylosin premixes used to make complete feeds for swine, beef cattle, and chickens.

EFFECTIVE DATE: July 16, 1985.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Center for Veterinary Medicine (HFV–135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1414.

SUPPLEMENTARY INFORMATION: Custom Feed Blenders Corp., 540 Hawkeye Ave., Fort Dodge, IA 50501, is the sponsor of a supplement to NADA 106–507 submitted on its behalf by Elanco Products Co. The supplement provides for the manufacture of new 5- and 20-gram-per-pound tylosin premixes used to make complete feeds for swine, beef cattle, and chickens for use as in 21 CFR 558.625(f)(1) (i) through (vi). The use of the currently approved 10-gram-per-pound premix is revised to include additional uses in swine, and use in beef cattle and chickens. The supplement is approved and the regulations are amended to reflect the approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(i) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 558 is amended as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

1. The authority citation for Part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b; 21 CFR 5.10 and 5.83).

2. Section 558.625 is amended by revising paragraph (b)(63) to read as follows:

§ 558.625 Tylosin.

* * * * *

(b) * * *

(63) To 046987: 5, 10, 20, and 40 grams per pound, paragraph (f)(1) (i) through (vi) of this section.

BILLING CODE 4160–01–M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

28 CFR Part 0

Appendix to Subpart R, Redelegation of Functions; Section 5, Legal Functions; Delegation of Authority to DEA Officials

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Final rule.

SUMMARY: The Drug Enforcement Administration [DEA], U.S. Department of Justice, is amending its regulations relating to the redelegation of legal functions. The Chief Counsel is currently authorized to settle any employee claims filed under the Military Personnel and Civilian Employee's Claims Act in an amount not to exceed $15,000. This final rule vests this function in the Controller of DEA. This final rule also changes the maximum amount for which such a claim may be settled to $25,000 in conformity with the 1983 amendments to that Act, Pub. L. 97–452.

EFFECTIVE DATE: July 8, 1985.

FOR FURTHER INFORMATION CONTACT: James J. Hogan, Controller, Drug Enforcement Administration, U.S. Department of Justice, 1405 I St., NW., Washington, D.C., 20537, (202) 633–1477.

SUPPLEMENTARY INFORMATION: The Military Personnel and Civilian Employees' Claims Act, 31 U.S.C. 3721 et seq., authorizes the head of an agency to settle and pay not more than $25,000 for a claim against the Government made by an officer or employee of the agency for damage to, or loss of, personal property incident to service. The head of the U.S. Department of Justice is the Attorney General. 28 CFR Subpart R vests this function of the Attorney General in the Administrator of DEA. The Administrator of DEA is authorized by 28 CFR 0.104 to redelegate to his subordinates any of the powers vested in him by 28 CFR Subpart R.

By virtue of the authority vested in me as the Administrator of DEA by 28 CFR 0.100 and 0.104, the following amendment is made to Title 28, Appendix to Subpart R, Redelegation of Functions, of the Code of Federal Regulations:

List of Subjects in 28 CFR Part 0

Organization and functions (Government agencies).

PART 0—ORGANIZATION OF THE DEPARTMENT OF JUSTICE

1. The authority citation for 28 CFR Part 0 continues to read as follows:

Authority: 5 U.S.C. 301; 28 U.S.C. 509, 510, unless otherwise noted.

Subpart R—Drug Enforcement Administration

Appendix to Subpart R, Redelegation of Functions [Amended]

2. Section 5, Legal functions, of the Appendix to Subpart R, Part 0, is amended by deleting from the first sentence of the section, which authorizes the Chief Counsel of DEA to perform certain functions, the following clause: "to settle any employee claims filed under the Military Personnel and Civilian Employees' Claims Act in an amount not to exceed $15,000."

3. The following section is added to the Appendix to Subpart R: "Section 8. *Financial functions.* The Controller of the DEA is authorized to settle any employee claims filed under the Military Personnel and Civilian Employees' Claims Act in an amount not to exceed $25,000."

Dated: July 5, 1985.

Utah State Plan; Approval of Revised Compliance Staffing Benchmarks and Final Approval Determination

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Approval of revised compliance staffing benchmarks and final state plan approval.

SUMMARY: This document amends Subpart E of 29 CFR Part 1952 to reflect the Assistant Secretary's decision approving revised compliance staffing benchmarks and granting final approval to the Utah State plan. As a result of this affirmative determination under section 18(e) of the Occupational Safety and Health Act of 1970, Federal OSHA standards and enforcement authority no longer apply to occupational safety and health issues covered by the Utah plan, and authority for Federal concurrent jurisdiction is relinquished. Federal enforcement jurisdiction is retained over maritime employment in the private sector and on the Hill Air Force Base. Federal jurisdiction remains in effect with respect to Federal government employers and employees.

EFFECTIVE DATE: July 16, 1985.

FOR FURTHER INFORMATION CONTACT: James Foster, Director, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N-3637, 200 Constitution Avenue, NW., Washington, D.C. 20210. Telephone (202) 523-8148.

SUPPLEMENTARY INFORMATION:

Introduction

Section 18 of the Occupational Safety and Health Act of 1970 (the "Act") provides that States which desire to assume responsibility for the development and enforcement of occupational safety and health standards may do so by submitting, and obtaining Federal approval of a State plan. Procedures for State plan submission and approval are set forth in regulations at 29 CFR Part 1902. If the Assistant Secretary, applying the criteria set forth in section 18(c) of the Act and 29 CFR 1902.3 and 1902.4, finds that the plan provides or will provide for State standards and enforcement which are "at least as effective" as Federal standards and enforcement, initial approval is granted.

A State may commence operations under its plan after this determination is made, but the Assistant Secretary retains discretionary Federal enforcement authority during the initial approval period as provided by section 18(e) of the Act. A State plan may receive Initial approval even though, upon submission, it does not fully meet the criteria set forth in 29 CFR 1902.3 and 4 if it includes satisfactory assurances by the State that it will take the necessary "developmental steps" to meet the criteria within a 3-year period. 29 CFR 1902.2(b). The Assistant Secretary publishes a notice of "certification of completion of developmental steps" when all of a State's developmental commitments have been satisfactorily met. 29 CFR 1902.34.

When a State plan that has been granted initial approval is developed sufficiently to warrant a suspension of concurrent Federal enforcement activity, it becomes eligible to enter into an "operational status agreement" with OSHA. 29 CFR 1954.3(f). A State must have enacted its enabling legislation, promulgated State standards, achieved an adequate level of qualified personnel, and established a system for review of contested enforcement actions. Under these voluntary agreements, concurrent Federal enforcement will not be initiated with regard to Federal occupational safety and health standards in those issues covered by the State plan, where the State program is providing an acceptable level of protection.

Following the initial approval of a complete plan, or the certification of a developmental plan, the Assistant Secretary must monitor and evaluate actual operations under the plan for a period of at least one year to determine, on the basis of actual operations under the plan, whether the criteria set forth in section 18(c) of the Act and 29 CFR 1902.3, 1902.4 and 1902.37 are being applied. An affirmative determination under section 18(e) of the Act (usually referred to as "final approval" of the State plan) results in the relinquishment of authority for Federal concurrent jurisdiction in the State with respect to occupational safety and health issues covered by the plan. 29 U.S.C. 667(e).

An additional requirement for final approval consideration is that a State must meet the compliance staffing levels, or benchmarks, for safety and health compliance officers established by OSHA for that State. This requirement stems from a 1978 Court Order by the U.S. District Court for the District of Columbia (*AFL-CIO* v. *Marshall*, C.A. No. 74-406), pursuant to a U.S. Court of Appeals decision, that directed the Assistant Secretary to calculate for each State plan State the number of enforcement personnel needed to assure a "fully effective" enforcement program.

History of the Utah Plan and its Compliance Staffing Benchmarks

Utah Plan

On September 20, 1972, Utah submitted an occupational safety and health plan in accordance with section 18(b) of the Act and 29 CFR Part 1902, Subpart C, and on October 21, 1972, a notice was published in the **Federal Register** (37 FR 22781) concerning submission of the plan, announcing that initial Federal approval was at issue and offering interested persons an opportunity to submit data, views and arguments concerning the plan. Comments were received from the American Federation of Labor and Congress of Industrial Organizations (AFL-CIO), Utah Manufacturers Association, United States Steel Corporation, Associated General Contractors of America, and the Horne Construction Corporation. No requests for a hearing were received. In response to these comments as well as to OSHA's review of the plan submission, the State made changes in its plan, which were discussed in the notice of initial approval (38 FR 1178). On January 10, 1973, the Assistant Secretary published a notice granting initial approval of the Utah plan as a developmental plan under Section 18(b) of the Act (38 FR 1178). The plan provides for program patterned in most respects after that of the Federal Occupational Safety and Health Administration. The plan covers all issues except safety and health in private sector maritime employment and the State does not enforce its standards on the Hill Air Force Base.

The Utah Industrial Commission is designated as having responsibility for administering the plan throughout the State. The day-to-day administration of the plan is directed by the Utah Division of Occupational Safety and Health within the Industrial Commission. The plan provides for the adoption by Utah of occupational safety and health standards which are generally identical to the Federal standards including emergency temporary standards. Utah also has promulgated under its plan independent State standards for oil, gas, geothermal and related services, lock-out and tag-out procedures, industrial railroads and explosive masterials.

The plan requires employers to furnish employees employment and a place of employment free from recognized hazards that are causing or likely to cause death or physical harm and to comply with the standards promulgated under the Utah Act. Employees are likewise required to comply with the standards, orders, rules, and regulations promulgated under the Utah Act applicable to their conduct.

The plan contains provisions similar to Federal procedures for, among others, imminent danger proceedings, employee discrimination protection, variances, safeguards to protect trade secrets, and employer and employee rights to participate in inspection and review proceedings. Appeals of citations and penalties are heard by the Occupational Safety and Health Review Commission. Decisions of the Review Commission may be appealed to the State District Court.

The notice of initial approval noted a few distinctions between the Federal and Utah programs. The State plan does not cover safety and health in private sector maritime employment nor employment on Hill Air Force Base. Utah's time period for contesting enforcement actions is 30 calendar days compared to 15 working days under the Federal law. Unlike the Federal program, the Utah Industrial Commission rather than the courts may initially restrain employee discrimination and afford the employee any appropriate relief through the issuance of an order.

The Assistant Secretary's initial approval of the developmental plan for Utah, a general description of the plan, a schedule of required developmental steps, and a provision for discretionary concurrent Federal enforcement during the period of initial approval were codified in the Code of Federal Regulations (29 CFR Part 1952, Subpart E; 38 FR 1178 (January 10, 1973)).

In accordance with the State's developmental schedule, all major structural components of the plan were put in place and appropriate documentation submitted for OSHA approval during the three-year period ending January 3, 1978. These "developmental steps" included enactment of enabling legislation; promulgation of State occupational safety and health standards; adoption of Federal standards and revocation of existing State standards; adoption of program regulations equivalent to 29 CFR Parts 1903, 1904, and 1905; and the development of a management information system.

These submissions were carefully reviewed by OSHA; after oportunity for public comment and modification of State submissions where appropriate, the major plan elements were approved by the Assistant Secretary as meeting the criteria of section 18 of the Act and 29 CFR 1902.3 and 1902.4. The Utah subpart of 29 CFR 1952 was amended to reflect each of these approval determinations (see 29 CFR 12952.114).

During 1974, OSHA entered into an operational status agreement with the State of Utah. A **Federal Register** notice was published on October 10, 1974 (39 FR 36474), announcing the signing of the agreement. Under the terms of that agreement, OSHA voluntarily suspended the application of concurrent Federal enforcement authority with regard to Federal occupational safety and health standards in all issues covered by the Utah plan.

On November 19, 1978, in accordance with procedures at 29 CFR 1902.34 and 1902.35, the Assistant Secretary certified that Utah had satisfactorily completed all developmental steps (41 FR 51014). In certifying the plan, the Assistant Secretary found the structural features of the program—the statute, standards, regulations, and written procedures for administering the plan—to be at least as effective as corresponding Federal provisions. Certification does not, however, entail findings or conclusions by OSHA concerning adequacy of actual plan performance. As has already been noted, OSHA regulations provide that certification initiates a period of evaluation and monitoring of State activity to determine, in accordance with section 18(e) of the Act, whether the statutory and regulatory criteria for State plans are being applied in actual operations under the plan and whether final approval should be granted.

Utah Benchmorks

In 1978, the Assistant Secretary was directed by the U.S. District Court for the District of Columbia (*AFL-CIO* v. *Marshall*, C.A. No. 74-406), pursuant to a U.S. Court of Appeals decision, to calculate for each State plan State the number of enforcement personnel (compliance staffing benchmarks) needed to assure a "fully effective" enforcement program. In 1980, OSHA submitted a *Report to the Court* containing the benchmarks and requiring Utah to allocate 15 safety compliance officers and 23 industrial hygienists to conduct inspections under the plan.

In September 1984 the Utah State designee in conjunction with OSHA completed a review of the components and requirements of the 1980 compliance staffing benchmarks established for Utah. Pursuant to an initiative begun in August 1983 by the State plan designees as group with OSHA and in accord with the formulas and general principles established by that group for individual State revision of the benchmarks, Utah reassessed the staffing necessary for a "fully effective" occupational safety and health program in the State. This reassessment resulted in a proposal to OSHA contained in comprehensive documents of revised compliance staffing benchmarks of 10 safety and 9 health compliance officers.

History of the Present Proceedings

Procedures for final approval of State plans are set forth at 29 CFR Part 1902, Subpart D. On January 16, 1985, the Occupational Safety and Health Administration published notice of its proposal to approve revised compliance staffing benchmarks for Utah and the resultant eligibility of the Utah State plan for determination under section 18(e) of the Act as to whether final approval of the plan should be granted (50 FR 2483). The determination of eligibility was based on monitoring of State operations for at least one year following certification, State participation in the Federal-State Unified Management Information System, and staffing which meets the proposed revised State staffing benchmarks.

The January 16 **Federal Register** notice set forth a general description of the Utah plan and summarized the results of Federal OSHA monitoring of State operations during the period from October 1982 through March 1984. In addition to the information set forth in the notice itself, OSHA submitted, as part of the record in this rulemaking proceeding, extensive and detailed exhibits documenting the plan, including copies of the State legislation, administrative regulations and procedural manuals under which Utah operates its plan, and copies of all previous **Federal Register** notices regarding the plan.

A copy of the October 1982-March 1984 Evaluation Report of the Utah plan ("18(e) Evaluation Report"), which was extensively summarized in the January 16 proposal and which provided the principal factual basis for the proposed 18(e) determination, was included in the record (Ex. 4-12). Copies of all OSHA evaluation reports on the plan since its certification as having completed all developmental steps were made part of the record.

The January 16 **Federal Register** also contained notice of the Occupational Safety and Health Administration's proposal to approve revised compliance staffing benchmarks for Utah. A detailed description of the methodology and State-specific information used to develop the revised compliance staffing

benchmarks for Utah was included in the notice. In addition, OSHA submitted

benchmarks for Utah was included in the notice. In addition, OSHA submitted, as a part of the record (Docket No. T-013). Utah's detailed submission containing both a narrative explanation and supporting data. A summary of the benchmark revision process was likewise set forth in a separate Federal Register notice on January 16, 1985, concerning the Wyoming State plan (50 FR 2491). An informational record was established in a separate docket (No. T-018) and contained background information relevant to the benchmark issue in general and the current benchmark revision process.

To assist and encourage public participation in the benchmark revision process and 18(e) determination, copies of the complete record were maintained in the OSHA Docket Office in Washington, D.C., the OSHA Region VIII Office in Denver, Colorado, and the office of the Utah Industrial Commission in Salt Lake City. Summaries of the January 16 proposal, with an invitation for public comments were published in Utah on February 1, 1985. (Ex. 5).

The January 16 proposal invited interested persons to submit, by February 20 (subsequently extended to March 22, 1985, 50 FR 6956, in response to a request from James N. Ellenberger, Department of Occupational Safety, Health and Social Security, AFL-CIO), written comments and views regarding the Utah plan, whether the proposed revised compliance staffing benchmarks should be approved, and whether final approval should be granted. Opportunity to request an informal public hearing on the issue of final approval was likewise provided. Five comments from organized labor were received in response to these notices. No requests for an informal hearing were received.

Summary and Evaluation of Comments Received

During this proposed rulemaking OSHA has encouraged interested members of the public to provide information and views regarding operations under the Utah plan, to supplement the information already gathered during OSHA monitoring and evaluation of plan administration and regarding the proposed revised compliance staffing benchmarks for Utah.

In response to the January 16 Federal Register notice, OSHA received comments from the Utah State American Federation of Labor and Congress of Industrial Organizations (AFL-CIO), Ed Mayne, President, Secretary-Treasurer (Ex. 2-2); United Steelworkers of America, Geneva Local Union No. 2701, Kay Mitani, Safety-Health Director (Ex. 2-2a); Utah Building and Construction Trades Council (AFL-CIO), Franklin L. Fry, Safety Director (Ex. 2-2b); American Federation of Labor and Congress of Industrial Organizations, Department of Occupational Safety, Health and Social Security, Margaret Seminario, Associate Director (Ex. 2-3); United Steelworkers of America, Mary Win O'Brien, Assistant General Counsel (Ex. 2-4). Mr. Douglas McVey, Administrator of the Utah plan, responded to the public comments (Ex. 2-5).

The Utah State AFL-CIO objected to Utah's proposed revised benchmarks and final approval and submitted comments it had solicited from United States Steelworkers' Local Union No. 2701 and the Utah Building and Construction Trades Council.

Although the Utah State Building and Construction Trades Council and the United Steelworkers of America Local No. 2701 commented that they believe State plan enforcement activities have not been effective because the staff benchmark is "low," both commented positively on several aspects of the Utah program as discussed in the relevant portions of the Findings and Conclusions section of this notice.

The Utah State AFL-CIO suggests in its comments that OSHA should delay Utah's final approval for one year to ensure that there is a "continual demonstration of conscientious effort toward worker safety and health." However, neither OSHA's evaluation findings nor any of the comments received provide evidence that the effectiveness of State performance will diminish in the future; and, OSHA's decision on granting final approval of the Utah plan must be based on the record established in this proceeding, as described in the Findings and Conclusions section of this notice. Furthermore, the State AFL-CIO's concern is addressed by the fact that if Utah in the future fails to maintain a level of performance at least as effective as the Federal OSHA program, the final approval determination can be revoked.

The national AFL-CIO also indicated opposition to the approval of the proposed revised benchmarks for Utah and therefore opposed the granting of State plan final approval. Some of the comments of the AFL-CIO were directed toward OSHA's system for monitoring and evaluating State plans and the requirements that a State must meet to be eligible for final approval.

The evaluation of the Utah plan was conducted in accordance with OSHA's new State plan monitoring and evaluation system. This system uses statistical data to compare Federal and State performance on a number of criteria, or measures. Significant differences between the two are evaluated to determine whether these differences, viewed within the framework of overall State plan administration, detract from the State's effectiveness and potentially render it less effective than the Federal program.

The AFL-CIO expressed concern that Federal OSHA's monitoring system with its reliance on statistical indicators fails to accurately reflect the overall conduct of the State program and tries to limit those areas of State performance which exceed OSHA's enforcement efforts in several areas. However, OSHA never intended that superior performance would result in any negative conclusion. Statistical outliers display differences, not necessarily deficiencies. If further review related to an outlier determines stronger State performance, clearly no negative determination will be made.

The AFL-CIO also commented on specific State performance issues as did the Utah State AFL-CIO, Utah Building and Construction Trades Council, and USWA Local 2701. These comments are addressed in the appropriate sections of the Findings and Conclusions portion of this notice. Mr. Douglas McVey, Administrator of the Utah State plan, responded to the concerns expressed on both the benchmarks and State specific performance issues.

The United Steelworkers of America (USWA) commented on the benchmark revision process in general with particular reference to Utah's benchmarks. The USWA indicated that Utah's benchmark submission appears better in comparison to some of the other States; however, the union opposes approval of the revised benchmarks for Utah and final approval of the State plan, although the union indicates that its members are not "unhappy" with the plan.

Comments by the unions addressing the proposed revised benchmarks for Utah reflected for the most part the commenters' concerns regarding the benchmark revision process generally. Thus, the comments question whether the benchmarks formula as applied in Utah should have assumed a need for routine, general schedule inspections at all covered workplaces; whether the proposed staffing levels will be sufficient to respond to new hazards or future standards; and question the appropriateness of the inclusion or exclusion of various industry groups in Utah's general inspection universe unless corresponding industries are treated identically in other States. As was specifically discussed in the

Federal Register notice of June 13, 1985, dealing with approval of revised benchmarks for the Kentucky State plan (50 FR 24884), the concept of general schedule coverage has been replaced by more sophisticated targeting systems which deploy enforcement resources where they are most needed, and universal coverage is as inappropriate a concept for benchmarks formulation as it is for inspection scheduling. The possible effect of new hazards or future standards cannot be ascertained with any precision, and in any case both OSHA and the States have generally been able to effectively enforce new standards with no additions to staff for that purpose. As to the need for "uniformity," OSHA believes that the greatest strength of the current formula is that it takes into account actual State program needs as shown by State data and experience. OSHA has found that the formula used to derive benchmarks for Utah and other States involved in the 1984 revision process employs the best information and techniques currently available; properly takes into account each of the factors set forth in the District Court Order in *AFL-CIO* v. *Marshall;* and is an appropriate means of establishing fully effective benchmarks which provide proper program coverage in the context of each State's specific program needs. A more detailed discussion of the general concerns raised by the AFL-CIO and the Steelworkers can be found in the June 13, 1985, Federal Register notice approving revised benchmarks and granting final approval of the Kentucky State plan (50 FR 24884).

Comments filed by the unions also addressed issues relating more specifically to the calculation of benchmarks for Utah. The AFL-CIO objected to the fact that some but not all non-manufacturing industries with lost workday case rates above the State average had been added to the initial safety inspection universe. Utah's response pointed out that establishment-specific workers' compensation data were utilized in the selection of non-manufacturing firms for inclusion in the State's general schedule inspection universe for safety. The State's analysis of site-specific information resulted in the addition of 519 non-manufacturing firms, whose lost workday case rates based on Workers' Compensation injury reports exceeded the overall State rate, to the safety inspection universe. It should also be noted that assumptions made in determining a State's theoretical workload for benchmark purposes are not binding on the State in terms of scheduling specific employers for enforcement visits. A State's general schedule inspection universe is not in itself a targeting system but rather a method for determining a reasonable estimate of workplaces with industrial exposures likely to produce hazards.

The AFL-CIO made a similar comment with regard to the State health inspection universe, asserting that Utah has improperly excluded "many industries with serious health hazards." As was true in safety, the State used a detailed establishment-specific approach enabling it to identify the specific firms, as opposed to industries, which are likely to present enforcement-preventable health hazards, and excluded those which are less likely to present such hazards. Thus, the State added almost 450 establishments to its initial health inspection universe based upon establishment-level inspection histories which indicated repeated health violations requiring continued program surveillance. Establishments not included in the initial inspection universe continue, of course, to be subject to complaint inspections.

With regard to the construction industry, the AFL-CIO objected that not enough resources were projected for coverage of health hazards, stating a belief that asbestos and other hazards had not been "adequately covered" by Utah in the past. The union's comments on the Utah plan and revised benchmarks do not provide any data in support of this conclusion. The results of OSHA monitoring of State plan enforcement, set forth elsewhere in this notice, do not support the assumption and, indeed, generally show that State inspections effectively identify and require the correction of health hazards. As is noted in Administrator McVey's response, Utah's safety compliance specialists in construction are well trained to identify asbestos and other health hazards. Safety inspections in construction account for 40% of all general schedule inspections in the State. The 1.1% of total health inspections projected as necessary for construction and other mobile industry are the State's best estimate, based on experience, of the resources needed to respond to requests by construction specialists for more sophisticated industrial hygiene studies. OSHA believes the State's calculation of the resources necessary for health enforcement is adequate to provide proper program coverage in construction. In related comments, the Building and Construction Trades Council stated that Utah's revised staffing levels for construction safety (as opposed to health) were inadequate, supporting this conclusion by stating an opinion that two construction specialists, as presently provided by the plan, were an insufficient number for construction industry coverage. However, as Administrator McVey indicated, these two specialists are devoted primarily to "high rise" heavy construction. All of Utah's safety inspectors are qualified to perform trenching, excavation, and other routine construction inspections, and thus the supposition that the needs of the State's entire construction industry must be met by only two specialists is not correct. With regard to the AFL-CIO's criticisms regarding Utah's health coverage of the public sector, the State responded that the public sector is afforded the same protections and coverage as the private sector. The State added 53 public sector establishments to its health inspection universe. In addition, health hazards in the public sector are frequently cited as the result of referral or health complaint inspections.

The Building Trades Council also mention slow response time to complaints as a possible indicator of inadequate staffing.

The suggestion that certain complaints have been handled in an untimely manner seems to be based exclusively on informal conversations with an unknown number of unidentified construction workers, and OSHA is reluctant to draw conclusions about enforcement resource needs based on this information. A better and more reliable basis for evaluation is OSHA's monitoring data, discussed elsewhere in this notice, which generally show the State to be responding to complaints in an effective manner within acceptable time limits. Data supplied by the State in its response show that since April 1, 1983, all formal complaints concerning construction sites have been investigated within four working days, and telephone complaints alleging serious hazards are addressed on the same day if possible, but in all cases within one to two days. Finally, the Building Trades Council submits that injury rates in the State require a greater enforcement emphasis in construction than contemplated by the revised benchmarks. In Utah, as in the nation as a whole, injury rates in construction are high compared with most other industries. As shown in data discussed elsewhere in this notice, the downward trend of injury rates in Utah indicates effective action by the State under its plan, particularly in heavy construction where Administrator McVey indicates the State injury rate was reduced by 17% during the period covered by the

evaluation. In the construction industry

geothermal and related services; lock

granted (Evaluation Report, p. 4);

enforcement tool. The State also uses

VOL 50 ISS 136 JL 16 1985 UMI

evaluation. In the construction industry overall, the State further asserts that in 1983 the rate decreased 10%. The State's calculations for benchmarks provide sufficient staff for a proper emphasis on this high hazard industry. OSHA finds that the resources devoted to construction under the revised benchmarks are sufficient to provide for proper program coverage in that industry.

The United Steelworkers commented that although Utah's safety and health inspection universes (in terms of number of establishments) are somewhat similar in size to those in Maryland and Kentucky, the revised benchmark staffing levels for Utah are lower than those for the other two States. The Steelworkers' comment assumes a drastically different and more simplistic methodology for calculating benchmarks than was used, one which merely establishes a ratio between covered worksites in the universe and the number of compliance staff. Such a methodology would perpetuate one of the principal shortcomings of the 1980 benchmarks, which was the failure to take into account not only the differences among the States in industrial mix, geography, etc., but in the resultant differences in program structure and methodology. The State-specific input into the benchmark formula will differ significantly between a Western State with a less concentrated and/or complex industrial base and a highly industrialized Eastern State. The requirements for proper program coverage will also necessarily vary as a result.

Finally, both the AFL–CIO and the Steelworkers allege that the number of enforcement personnel now found appropriate for a fully effective program in Utah and other States is lower than the staffing levels allocated by the States in 1980 or projected in the benchmarks issued by OSHA during its first effort to implement the *AFL–CIO* v. *Marshall* Court Order in 1980.

However, the District Court Order on which the revision process has been based does not assume or require that revised benchmarks must provide a comparative increase over past levels. The adequacy of the revised benchmarks cannot be determined by whether they are greater or smaller than the 1980 benchmarks or earlier enforcement levels. Such direct numerical comparison of staffing levels is no more valid than was the direct comparison of State to Federal staffing levels under the "at least as effective" test rejected by the Court of Appeals in 1978. The objective assigned to OSHA by the Court of Appeals decision and District Court order was, in sum, to measure the workload assumed by each State under its plan and to determine, using the best available information and techniques, but avoiding direct numerical comparisons, the staffing levels needed for fully effective coverage. This is precisely what has been done in the present revision process. The review of each State's illness and injury data, industrial mix, demographics and enforcement history has been far more detailed than was the case when benchmarks were first issued in 1980. As discussed above, the concept of universal routine inspections has been replaced by far more sophisticated targeting, devoting resources to the relative minority of industries where enforcement-preventable injuries occur. These factors have resulted in the more realistic enforcement staffing requirements embodied in the revised benchmarks for Utah.

For these reasons OSHA believes application of the current benchmark formula for Utah has resulted in staffing levels which result in fully effective enforcement in the State of Utah.

Findings and Conclusions

Utah Benchmarks

As provided in the 1978 Court Order in *AFL–CIO* v. *Marshall*, Utah, in conjunction with OSHA, has undertaken to revise the compliance staffing benchmarks originally established in 1980 for Utah. OSHA has reviewed the State's proposed revised benchmarks and supporting documentation and carefully considered the public comments received with regard to this proposal, and determined that compliance staffing levels of 10 safety and 9 health compliance officers meet the requirements of the Court and provide staff sufficient to ensure a fully effective enforcement program.

Utah Final Approval

As required by 29 CFR 1902.41, in considering the granting of final approval to a State plan, OSHA has carefully and thoroughly reviewed all information available to it on the actual operation of the Utah State plan. This information has included all previous evaluation findings since certification of completion of the State plan's developmental steps, especially data for the period of October 1982 through March 1984, and information presented in written submissions. Findings and conclusions in each of the areas of performance are as follows:

(1) *Standards.* Section 18(c)(2) of the Act requires State plans to provide for occupational safety and health standards which are at least as effective as Federal standards. Such standards where not identical to the Federal must be promulgated through a procedure allowing for consideration of all pertinent factual information and participation of all interested persons (29 CFR 1902.4(b)(2)(iii)); must, where dealing with toxic materials or harmful physical agents, assure employee protection throughout his or her working life (29 CFR 1902.4(b)(2)(i)); must provide for furnishing employees appropriate information regarding hazards in the workplace through labels, posting, medical examinations, etc. (29 CFR 1902.4(b)(2)(vi)); must require suitable protective equipment, technological control, monitoring, etc. (29 CFR 1902.4(b)(2)(vii)); and where applicable to a product must be required by compelling local conditions and not pose an undue burden on interstate commerce (29 CFR 1902.3(c)(2)).

As documented in the approved Utah State plan and OSHA's evaluation findings made a part of the record in this 18(e) determination proceeding, and as discussed in the January 16 notice, the Utah plan provides for the adoption of standards and amendments thereto which are generally identical to Federal standards. The State's law and regulations, previously approved by OSHA and made a part of the record in this proceeding (Exs. 3–2 and 3–3), include provisions addressing all of the structural requirements for State standards set out in 29 CFR Part 1902.

In order to qualify for final State plan approval, a State program must be found to have adhered to its approved procedures (29 CFR 1902.37(b)(2)); to have timely adopted identical or at least as effective standards, including emergency temporary standards and standards amendments (29 CFR 1902.37(b)(3)); to have interpreted its standards in a manner consistent with Federal interpretations and thus to demonstrate that in actual operation State standards are at least as effective as the Federal (29 CFR 1902.37(b)(4)); and, to correct any deficiencies resulting from administrative or judicial challenge of State standards (29 CFR 1902.37(b)(5)).

As noted in the "18(e) Evaluation Report" and summarized in the January 16, 1985 **Federal Register** notice, Utah adopts standards that are generally identical to Federal standards. Utah has adopted a Hazard Communication Standard identical to the Federal. In addition, Utah has adopted State standards for conditions not covered by Federal standards such as oil, gas, geothermal and related services; lock out and tag out procedures; industrial railroads; and, explosive materials.

Utah's response to adoption of Federal standards is timely; during the period covered by the 18(e) Evaluation Report, Utah adopted all applicable standards within the six-month time frame (Evaluation Report, p. 3). Local No. 2701, USWA, and the Utah Building and the Construction Trades Council, in their written comments, have stated that Utah has adopted standards in a timely fashion and in some cases has gone beyond that which the Federal OSHA standards have required (Exs. 2–2a; 2–2b). No challenges to standards have occurred in Utah.

When a State adopts Federal standards, the State's interpretation and application of such standards must ensure consistency with Federal interpretation and application. As noted above, the Utah plan provides for the adoption of standards which are generally identical to the Federal standards. The State likewise adopts standards interpretations which are also identical to the Federal. OSHA's monitoring has found that the State's application of its standards is comparable to Federal standards application.

Therefore, in accordance with section 18(c)(2) of the Act and the pertinent provisions of 29 CFR 1902.3, 1902.4 and 1902.37, OSHA finds the Utah program in actual operation to provide for standards adoption, correction when found deficient, interpretation and application, in a manner at least as effective as the Federal program.

(2) *Variances.* A State plan is expected to have the authority and procedures for the granting of variances comparable to those in the Federal program (29 CFR 1902.4(b)(2)(iv)). The Utah State plan contains such provisions in both law and regulations which have been previously approved by OSHA. In order to qualify for final State plan approval, permanent variances granted must assure employment equally as safe and healthful as would be provided by compliance with the standard (29 CFR 1902.37(b)(6)); temporary variances granted must assure compliance as early as possible and provide appropriate interim employee protection (29 CFR 1902.37(b)(7)). As noted in the 18(e) Evaluation Report and the January 16 notice, Utah granted two permanent variances during the evaluation period. The report notes that equivalent protection for affected employees is assured in both cases (Evaluation Report, p. 4). During the evaluation period, no temporary variances were granted (Evaluation Report, p. 4); however, past years' experience indicates that the State's procedures were properly applied when granting temporary variances.

Accordingly, OSHA finds that the Utah program effectively grants variances from its occupational safety and health standards.

(3) *Enforcement.* Section 18(c)(2) of the Act and 29 CFR 1902.3(d)(1) require a State program to provide a program for enforcement of State standards which is and will continue to be at least as effective in providing safe and healthful employment and places of employment as the Federal program. The State must require employer and employee compliance with all applicable standards, rules and orders (29 CFR 1902.3(d)(2)) and must have the legal authority for standards enforcement including compulsory process (29 CFR 1902.4(c)(2)).

The Utah law (Utah Statutes 35–9–1 through 35–9–21, UCA) and implementing regulations previously approved by OSHA establish employer and employee compliance responsibility and contain legal authority for standards enforcement in terms substantially identical to those in the Federal Act. In order to be qualified for final approval, the State must have adhered to all approved procedures adopted to ensure an at least as effective compliance program (29 CFR 1902.37(b)(2)). The "18(e) Evaluation Report" shows no lack of adherence to such procedures.

(a) *Inspections.* A plan must provide for inspection of covered workplaces, including in response to complaints, where there are reasonable grounds to believe a hazard exists (29 CFR 1902.4(c)(2)(i)).

Although the National AFL–CIO commented favorably on Utah's record in responding to complaints (Ex. 2–3), the State AFL–CIO in its written comments (Ex. 2–2) asserted that the major problem with the State plan is that there are few inspections at their plants or construction sites because Utah spends more time responding to complaints than to general schedule inspections and developing preventative programs. The 18(e) Evaluation Report shows that for both safety and health, Utah does exceed the Federal experience in the percentage of complaints resulting in inspections (Utah: Safety—52.6%; Health—50%). However, this is a result of State policy to respond to complaints with inspections rather than by letter. Letters are used only for de minimis type violations. Utah believes complaint inspections are an important enforcement tool. The State also uses health complaints as a means to get their health staff into a wider variety of establishments than general schedule inspections (Evaluation Report, p. 11). Further, as Utah State plan Administrator McVey points out in his response to the public comments (Ex. 2–5), complaints actually make up only a small percentage, about 5% to total inspections. The written comments of the Utah Building and Construction Trades Council assert that in response to complaints from workers in the construction trades, Utah's response time is too slow; the only time that the response time is faster is when there has been a serious accident on a project (Ex. 2–2b). Utah State plan Administrator McVey responds that since April 1, 1983, the State received five formal complaints on construction sites, none of which were of serious problems, yet all were investigated within four working days (Ex. 2–5). Local No. 2701, USWA, in its written comments indicates that Utah has responded to complaints from workers in a timely fashion during the last year (Ex. 2–2a). OSHA's monitoring has found that Utah is effective in handling and responding to employee complaints (Evaluation Report, p. 12) and that State policy in this regard has not diminished its coverage of other high-hazard workplaces.

In order to qualify for final approval, the State program, as implemented, must allocate sufficient resources toward high-hazard workplaces while providing adequate attention to other covered workplaces (29 CFR 1902.37(b)(8)).

Utah's scheduling system for safety and health inspections is generally the same as OSHA's except that it uses workers' compensation data to supplement the safety scheduling. The State does not conduct records inspections, a policy with which the National AFL–CIO expresses agreement in its written comments. Ninety-eight percent (98.0%) of Utah's programmed safety inspections and 98.9% of programmed health inspections are conducted in high hazard industries. The 18(e) Evaluation Report indicates that the percent of total inspections that were general schedule for safety and health is 76.7% and 57.1%, respectively. The percent is slightly lower than the Federal and is due to Utah's practice of conducting more follow-ups (15.6% safety and 10.8% health) (Evaluation Report, p. 9).

(b) *Employee Notice and Participation in Inspections.* In conducting inspections the State plan must provide an opportunity for employees and their

representatives to point out possible violations through such means as exercising their rights under the State's to elapse between denial of entry and

Report, pp. 15 and 16). The AFL–CIO in its written comments [illegible] procedures. Appeals of citations, to 1983, and that the increase from 1981

representatives to point out possible violations through such means as employee accompaniment or interviews with employees (29 CFR 1902.4(c)(2)(ii)). The AFL–CIO comments that there is a very low percentage of worker participation in walk-around inspections in the state (Ex. 2–3). The evaluation report acknowledges that the percentage of inspections where an employer actually accompanied the walk-around is low. However, employees were interviewed in all inspections conducted. In sum, employee representatives either accompanied inspectors or employees were interviewed on 100% of inspections during the evaluation period (Evaluation Report, p. 15). The 18(e) Evaluation Report concludes that the State's overall performance in this area is satisfactory. Local No. 2701, USWA, and the Utah Building and Construction Trades Council affirm in their written comments that workers and unions have been given the opportunity to participate in inspections (Ex. 2–2a; 2–2b).

In addition, the State plan must provide that employees be informed of their protections and obligations under the Act by such means as the posting of notices (29 CFR 1902.4(c)(2)(iv)) and provide that employees have access to information on their exposure to regulated agents and access to records of the monitoring of their exposure to such agents (29 CFR 1902.4(c)(vi)).

To inform employees and employers of their protections and obligations, Utah requires that a poster, which was previously approved by OSHA (41 FR 1904), be displayed in all covered workplaces. Requirements for the posting of the poster and other notices such as citations, contests, hearings and variance applications, are set forth in the previously approved State law and regulations which are substantially identical to Federal requirements. Information on employee exposure to regulated agents and access to medical and monitoring records is provided through State standards, including the Access to Employee Exposure and Medical Records standard. The 18(e) Evaluation Report indicates posting violations were cited in 200 inspections. Written comments from Local No. 2701, USWA, and the Utah Building and Construction Trades Council, affirm that workers and unions have been given complete access to information (Exs. 2–2a; 2–2b). Federal OSHA concludes that the State's performance is satisfactory.

(c) *Nondiscrimination.* A State is expected to provide appropriate protection to employees against discharge or discrimination for exercising their rights under the State's program including provision for employer sanctions and employee confidentiality (29 CFR 1902.4(c)(2)(v)). As discussed earlier in this notice, the Utah State plan provides authority to protect employees from being discriminated against for exercising their rights thereunder in terms similar to section 11(c) of the Federal Act, except that the Utah Industrial Commission rather than the courts may initially restrain employee discrimination and afford the employee appropriate relief through the issuance of an order. Past monitoring of Utah's plan has disclosed effective application of the State's approved discrimination protection provisions (Evaluation Report, p. 24).

(d) *Restraint of Imminent Danger; Protection of Trade Secrets.* A State plan is required to provide for the prompt restraint of imminent danger situations (29 CFR 1902.4(c)(2)(vii)), and to provide adequate safeguards for the protection of trade secrets (29 CFR 1902.4(c)(2)(viii)). The State has provisions concerning imminent danger and protection of trade secrets in its law, regulations and field operations manual which are similar to the Federal. The 18(e) Evaluation Report indicates that there were no imminent danger situations identified nor any Complaints About State Program Administration (CASPA's) received concerning trade secrets during the reporting period.

(e) *Right of Entry; Advance Notice.* A State program is expected to have authority for right of entry to inspect and compulsory process to enforce such right equivalent to the Federal program (section 18(c)(3) of the Act and 29 CFR 1902.3(e)). Likewise, a State is expected to prohibit advance notice of inspection, allowing exception thereto no broader than in the Federal program (29 CFR 1902.3(f)). Under the Utah plan, the Industrial Commission is authorized to petition for a court order to permit entry into places of employment that have refused entry for the purpose of inspection or investigation. In order to be found qualified for final approval, a State is excepted to take action to enforce its right of entry when denied (29 CFR 1902.37(b)(9)) and to adhere to its advance notice procedures. During this evaluation period, Utah had 10 denials of entry and obtained warrants in all cases where warrants were necessary. Utah's average time from date of denial to date of warrant application is 7.1 days (Evaluation Report, p. 14).

The AFL–CIO asserts in its written comments that the average time allowed to elapse between denial of entry and application for warrant is significantly higher then the Federal average. However, in measuring State performance from date of denial to date of entry, Utah has an average of 11.7 days which is significantly shorter than the Federal average. This shows that the State does respond in a very prompt and effective manner when refused entry (Evaluation Report, p. 14).

Utah's procedures for advance notice generally parallel OSHA's during the evaluation period, Utah issued no advance notice of inspection (Evaluation Report, p. 15).

(f) *Citations, Penalties, and Abatement.* A State plan is expected to have authority and procedures for promptly notifying employers and employees of violations identified during inspection, for the proposal of effective first-instance sanctions against employers found in violation of standards and for prompt employer notification of such penalties (29 CFR 1902.4(c)(2) (x) and (xi)). The Utah plan through its law, regulations and field operations manual, which have all been previously approved by OSHA, has established a system similar to the Federal for promptly issuing citations to employers delineating violations and establishing reasonable abatement periods, requiring posting of such citations for employee information and proposing penalties.

In order to be qualified for final approval, the State, in actual operation, must be found to conduct competent inspections in accordance with approved procedures and to obtain adequate information to support resulting citations (29 CFR 1902.37(b)(10)), to issue citations, proposed penalties and failure-to-abate notifications in a timely manner (29 CFR 1902.37(b)(11)), to propose penalties for first instance violations that are at least as effective as those under the Federal program (29 CFR 1902.37(b)(12)), and to ensure abatement of hazards including issuance of failure to abate notices and appropriate penalties (29 CFR 1902.37(b)(13)).

Utah has adopted a Compliance Operation Manual and also follows established inspection procedures, including documentation procedures, which are generally identical to Federal procedures. The 18(e) Evaluation Report indicates that the State adheres to these approved procedures. Utah's lapse time from inspection to issuance of citations has averaged 9 days for safety and 7 for health. The State percent of serious violations for safety and health is 5.1% and 12.7%, respectively (Evaluation Report, pp. 15 and 16). The AFL–CIO in its written comments expresses concern that Utah issues fewer citations for serious violations resulting from scheduled inspections in both safety and health than the federal average (Ex. 2–3). The 18(e) Report, however, indicates that Utah historically has had a serious citation rate below Federal levels, primarily due to the lack of large, complex, and heavy industry in the State. In addition, although there was a smaller percentage of violations classified as serious, Utah cites a higher number of total violations per initial inspection (2.2) than does OSHA. Past monitoring efforts have always shown that few violations were found to be improperly classified (Evaluation Report: p. 17; Appendix A, p. 14). Neither the data nor comments demonstrate that the State has any problem in adequately identifying and citing violations or documenting inspections to support citations. Utah's procedures for penalty calculation and adjustment are generally identical to the Federal. The average proposed penalties for serious safety ($320.00) and serious health ($346.00) are somewhat higher than OSHA's (Evaluation Report, pp. 20–21).

Utah conducted more follow-up inspections to assure abatement of violations (15.6% safety and 10.8% health) than the Federal average, because the State has a policy which generally provides for reinspection on all citations for serious, willful or repeated violations. Utah's percent of open inspections (safety) 30 days after the last abatement is 22.5%. Since Utah has corrected a procedural error in coding case closing data, a later review indicates that virtually no safety cases are open 30 days after the last abatement date (Evaluation Report, p. 18).

(g) *Contested Cases.* In order to be considered for initial approval and certification, a State plan must have authority and procedures for employer contest of citations, penalties and abatement requirements at full administrative or judicial hearings. Employees must also have the right to contest abatement periods and the opportunity to participate as parties in all proceedings resulting from an employer's contest (29 CFR 1902.4(c)(2)(xii)). Utah's procedures for employer contest of citations, penalties and abatement requirements and for ensuring employee rights are contained in the law, regulations and field operations manual made a part of the record in this proceeding and are substantially identical to the Federal procedures. Appeals of citations, penalties and abatement periods are heard by the Occupational Safety and Health Review Commission and may be further appealed to the State District Court. Fifteen cases during October 1982 through March 1984 resulted in contests. OSHA evaluation of these cases supports the conclusion that the State's enforcement actions are adequately supported (Evaluation Report, p. 23). Local No. 2701, USWA, and the Utah Building and Construction Trades Council both commented that workers and unions have been kept informed of and participate in settlements of contested cases between employers and the State (Exs. 2–2a; 2–2b).

To qualify for final approval, the State must seek review of any adverse adjudications and take action to correct any enforcement program deficiencies resulting from adverse administrative or judicial determinations (29 CFR 1902.37(b)(14)). There were no such adverse adjudications in Utah during the evaluation period. However, past monitoring has shown that the Utah plan effectively reviews contested cases.

(h) *Enforcement Conclusion.* In summary, the Assistant Secretary finds that enforcement operations provided under the Utah plan are competently planned and conducted, and are overall at least as effective as Federal OSHA enforcement.

(4) *Public Employee Program.* Section 18(c)(6) of the Act requires that a State which has an approved plan must maintain an effective and comprehensive occupational safety and health program applicable to all employees of public agencies of the State and its political subdivisions, which program must be as effective as the standards contained in an approved plan. 29 CFR 1902.3(j) requires that a State's program for public employees be as effective as the State's program for private employees covered by the plan.

The Utah plan provides a program for the public sector which is identical to its private sector program, except the State does not assess monetary penalties. The AFL–CIO in its written comments (Ex. 2–3) notes that there was an increase in lost work day case rates from 1981 to 1982 in the public sector. However, the 18(e) Evaluation Report (p. 8) indicates that the public sector rates in Utah are very low in absolute terms and still well below the private sector rates. Further, in his April 22, 1985 response (Ex. 2–5) to the AFL–CIO comments, Utah State Plan Administrator Douglas McVey indicates that there was no change in the public sector lost workday case rate from 1982 to 1983, and that the increase from 1981 to 1982 was likely due to reporting errors by a major public employer in 1981, as postulated in the 18(e) Evaluation Report. Utah conducted 5.5% of its total inspections in the public sector during the evaluation period (104 inspections) and cited 286 violations. The proportion of inspections dedicated to the public sector was considered appropriate to the needs of public employees (Evaluation Report, p. 8).

Because the State treats the public sector in the same manner as the private sector, with the exception of assessing monetary penalties, as evidenced by its written procedures, which are applicable to all covered employees, public or private, and since monitoring indicates similar performance in the public and private sectors, OSHA concludes that the Utah program meets the criterion in 29 CFR 1902.3(j).

(5) *Staffing and Resources.* Section 18(c)(4) of the Act requires State plans to provide the qualified personnel necessary for the enforcement of standards. In accordance with 29 CFR 1902.37(b)(1), one factor which OSHA must consider in evaluating a plan for final approval is whether the State has a sufficient number of adequately trained and competent personnel to discharge its responsibilities under the plan.

Utah has committed itself to funding the State share of salaries for 10 safety inspectors and 9 health enforcement officers as evidenced by the amended FY 1984 Application for Federal Assistance (Ex. 3–6) as well as its subsequent FY 1985 application. These compliance staffing levels meet the revised benchmarks proposed for Utah.

As noted in the **Federal Register** notice announcing certification of the completion of developmental steps for Utah (39 FR 28154), all personnel under the plan meet civil service requirements under the State merit system, which was found to be in substantial conformity with the Standards for a Merit System of Personnel Administration by the U.S. Civil Service Commission.

The 18(e) Evaluation Report indicates that Utah recognizes the importance of training its staff and sets up sessions when a need surfaces for training in a particular area. Federal OSHA personnel have taught several of the training courses given to all Utah compliance personnel. Utah also makes good use of the OSHA Training Institute and EPA courses (Evaluation Report, p. 7). The United Steelworkers of America, in its written comments (Ex. 2–4), expressed concern that "approximately 4 of the Utah health inspectors are cross-trained safety inspectors." This

assertion is misleading, however, because while these health inspectors have a background in safety inspection, they are not assigned safety inspections. Rather, they are assigned health inspections and are trained to recognize safety hazards while conducting health inspections. Utah has committed itself to providing reports on its activities to OSHA.

Comparison of Utah's occupational injury and illness data with Federal data indicates that the Utah program is at least as effective as the Federal program. The Utah lost workday injury and illness rate (8.9) was slightly higher than in Federal States and the all industry lost workday

the Federal program and meets the statutory criteria for State plans in

propose civil penalties or initiate criminal proceedings for violations of

Section 18(f) and regulations at 29 CFR

VOL 50 ISS 136 JL 16 1985 UMI

assertion is misleading, however, because while these health inspectors have a background in safety inspection, all have received the same basic training at the OSHA Training Institute as OSHA industrial hygienists and also have received extensive on-the-job training and follow-up courses. Utah State Plan Administrator Douglas McVey, in responding to the public comments (Ex. 2–5), points out that the selection of these former safety inspectors was based on the quality of their education and experience. Furthermore, the Utah Building and Construction Trades Council and Local 2701, USWA, point out that all of the State compliance personnel have been properly trained and are competent in their field of assignment (Exs. 2–2a; 2–2b).

Because Utah has allocated sufficient enforcement staff to meet the revised benchmarks for that State, and personnel are trained and competent, the requirements for final approval set forth in 29 CFR 1902.37(b)(1), and in the 1978 Court Order and in *AFL–CIO* v. *Marshall, supra*, are being met by the Utah plan.

Section 18(c)(5) of the Act requires that the State devote adequate funds to administration and enforcement of its standards. The Utah plan was funded at $1,588,488 in FY 1984. (50% of the funds were provided by Federal OSHA and 50% were provided by the State.)

As noted in the Evaluation Report, Utah's funding appears sufficient. Moreover, the State compares favorably to Federal OSHA with respect to expenditures per covered employee (Evaluation Report, p. 26). On this basis, OSHA finds that Utah has provided sufficient funding for the various activities carried out under the plan.

(6) *Records and Reports.* State plans must assure that employers in the State submit reports to the Secretary in the same manner as if the plan were not in effect (section 18(c)(7) of the Act and 29 CFR 1902.3(k)). The plan must also provide assurances that the designated agency will make such reports to the Secretary in such form and containing such information as he may from time to time require (section 18(c)(8) of the Act and 29 CFR 1902.3(1)).

Utah's employer recordkeeping requirements are substantially identical to those of Federal OSHA, and the State participates in the BLS Annual Survey of Occupational Illnesses and Injuries. As noted in the January 16 proposal, the State participates and has assured its continuing participation with OSHA in the Federal-State Unified Management Information System as a means of providing reports on its activities to OSHA.

For the foregoing reasons, OSHA finds that Utah has met the requirements of sections 18(c) (7) and (8) of the Act on employer and State reports to the Secretary.

(7) *Voluntary Compliance Program.* A State play is required to undertake programs to encourage voluntary compliance by employers by such means as conducting training and consultation with employers and employees (29 CFR 1902.4(c)(2)(xiii)).

During the 18(e) evaluation period, Utah provided training to 2,824 employers and supervisors and 18,156 employees. Of the employees trained, 25.5% were in high hazard industries (Evaluation Report, p. 6). Written comments from Local 2701, USWA, and the Utah Building and Construction Trades Council indicate that full and appropriate health and safety training and education for covered workers has been accomplished, although the Building and Construction Trades Council believes that more should be done for construction. Utah State plan Administrator McVey's April 22, 1985 response to the public comments indicates that the State annually trains about 2,000 workers within construction or about 10% of the total trained, and about 10% of the total construction workforce, despite seldom receiving requests for assistance from the Utah Building and Construction Trades Council, which conducts training under its own grant from OSHA. Utah's Job Safety and Health Consultation Service (JSHCS) operates a private-sector consultation program in the State under a 7(c)(1) contract with OSHA. While the JSHCS is a part of the Utah Industrial Commission, it is entirely separate from the Division of Occupational Safety and Health although the working relationship and interaction between them complements both of these programs. Utah's State plan does not include an onsite consultation program in the public sector because this type of activity is not authorized by the Utah enabling legislation (Evaluation Report, p. 5).

OSHA finds that Utah has established and is administering an effective voluntary compliance program.

(8) *Injury and Illness Statistics.* As a factor in its 18(e) determination, OSHA must consider the Bureau of Labor Statistics Annual Occupational Safety and Health Survey and other available Federal and State measurements of program impact on worker safety and health (29 CFR 1902.37(b)(15)). As noted in the 18(e) Evaluation Report, in 1982 the all industry all case rate for Utah (8.9) was slightly higher than in Federal States and the all industry lost workday case rate for the year was the same (3.4). However, from 1981 to 1982, the percent of reduction in the all industry lost workday case rate in Utah (–10.5%) was greater than the reduction for that rate in Federal States.

The National and State AFL–CIO's comments, as well as comments from the Utah Building and Construction Trades Council, expressed concern that the rates in construction are particularly high in Utah. Specifically, the Trades Council stated that the injury and illness rate for Utah in heavy construction has remained at a high level, above the national average, from 1975 through 1983.

As noted in Utah State plan Administrator McVey's April 22, 1985 response to the public comments, the rates the union presents appear to apply only to heavy construction or SIC Code 1600; and, in this category, Utah improved from 28.5 in 1982 to 17.0 in 1983, a 17.1% reduction. Further, the overall incidence rate in Utah for construction in 1983 was 16.7, down 10% from 18.4 in 1982. Moreover, Utah's rate for construction lost work days of 6.4 in 1983 is only slightly higher than the Federal average; and, the overall construction rate in Utah dropped by 4.6% during this period. Thus while the Utah rate is slightly above the Federal rate, Utah is showing greater improvement.

Considering the overall decline in Utah's injury and illness rates since initiation of the State plan, OSHA finds a favorable comparison between Utah's trends in injury and illness statistics and those in States with Federal enforcement.

Decision

OSHA has carefuly reviewed the record developed during the above described proceedings, including all comments received thereon. The present **Federal Register** document sets forth the findings and conclusions resulting from this review.

In light of all the facts presented on the record, the Assistant Secretary has determined that (1) the revised compliance staffing levels proposed for Utah meet the requirements of the 1978 Court Order in *AFL–CIO* v. *Marshall* in providing the number of safety and health compliance officers necessary for a "fully effective" enforcement program, and (2) the Utah State plan for occupational safety and health in actual operation, which has been monitored for at least one year subsequent to certification, is at least as effective as the Federal program and meets the statutory criteria for State plans in section 18(e) of the Act and implementing regulations at 29 CFR 1902. Therefore, the revised compliance staffing benchmarks of 10 safety and 9 health are approved and the Utah State plan is hereby granted final approval under section 18(e) of the Act and implementing regulations at 29 CFR Part 1902, effective July 16, 1985.

Under this 18(e) determination, Utah will be expected to maintain a State program which will continue to be at least as effective as operations under the Federal program in protecting employee safety and health at covered workplaces. This requirement includes submitting all required reports to the Assistant Secretary as well as submitting plan supplements documenting State initiated program changes, changes required in response to adverse evaluation findings, and responses to mandatory Federal program changes. In addition, Utah must continue to allocate sufficient safety and health enforcement staff to meet the benchmarks for State staffing established by the Department of Labor, or any revision to those benchmarks.

Effect of Decision

The determination that the criteria set forth in section 18(c) of the Act and 29 CFR Part 1902 are being applied in actual operations under the Utah plan terminates OSHA authority for Federal enforcement of its standards in Utah, in accordance with section 18(e) of the Act, in those issues covered under the State plan. Section 18(e) provides that upon making this determination "the provisions of sections 5(a)(2), 8 (except for the purpose of carrying out subsection (f) of this section), 9, 10, 13, and 17, and standards promulgated under section 6 of this Act, shall not apply with respect to any occupational safety or health issues covered under the plan, but the Secretary may retain jurisdiction under the above provisions in any proceeding commenced under section 9 or 10 before the date of determination."

Accordingly, Federal authority to issue citations for violation of OSHA standards (sections 5(a) (2) and (9)); to conduct inspections (except those necessary to conduct evaluations of the plan under section 18(f), and other inspections, investigations or proceedings necessary to carry out Federal responsibilities which are not specifically preempted by section 18(e)) (section 8); to conduct enforcement proceedings in contested cases (section 10); to institute proceedings to correct imminent dangers (section 13); and to propose civil penalties or initiate criminal proceedings for violations of the Federal Act (section 17) is relinquished as of the effective date of this determination. (Because of the effectiveness of the Utah plan, there has been no exercise of concurrent Federal enforcement authority in issues covered by the plan since the signing of the Operational Status Agreement in November 1974.)

Federal authority under provisions of the Act not listed in section 18(e) are unaffected by this determination. Thus, for example, the Assistant Secretary retains his authority under section 11(c) of the Act with regard to complaints alleging discrimination against employees because of the exercise of any right afforded to the employee by the Act although such complaints may be initially referred to the State for investigation. Jurisdiction over any proceeding initiated by OSHA under sections 9 and 10 of the Act prior to the date of this final determination remains a Federal responsibility. The Assistant Secretary also retains his authority under section 6 of the Act to promulgate, modify or revoke occupational safety and health standards which address the working conditions of all employees, including those in States which have received an affirmative 18(e) determination. In the event that a State's 18(e) status is subsequently withdrawn and Federal authority reinstated, all Federal standards, including any standards promulgated or modified during the 18(e) period, would be Federally enforceable in the State.

In accordance with section 18(e), this determination relinquishes Federal OSHA authority only with regard to occupational safety and health issues covered by the Utah plan, and OSHA retains full authority over issues which are not subject to State enforcement under the plan. Thus, for example, Federal OSHA retains its authority to enforce all provisions of the Act, and all Federal standards, rules or orders which relate to safety or health in private-sector maritime employment and on Hill Air Force Base, since these issues are excluded from coverage under the Utah plan. In addition, Federal OSHA may subsequently initiate the exercise of jurisdiction over any issue (hazard, industry, geographical area, operation or facility) for which the State is unable to provide effective coverage for reasons not related to the required performance or structure of the State plan.

As provided by section 18(f) of the Act, the Assistant Secretary will continue to evaluate the manner in which the State is carrying out its plan. Section 18(f) and regulations at 29 CFR Part 1955 provide procedures for the withdrawal of Federal approval should the Assistant Secretary find that the State has substantially failed to comply with any provision or assurance contained in the plan. Additionally, the Assistant Secretary is required to initiate proceedings to revoke an 18(e) determination and reinstate concurrent Federal authority under procedures set forth in 29 CFR 1902.47. *et seq.*, if his evaluations show that the State has substantially failed to maintain a program which is at least as effective as operations under the Federal program, or if the State does not submit program change supplements to the Assistant Secretary as required by 29 CFR Part 1953.

Explanation of Changes to 29 CFR Part 1952

29 CFR Part 1952 contains, for each State having an approved plan, a subpart generally describing the plan and setting forth the Federal approval status of the plan. 29 CFR 1902.43(a)(3) requires that notices of affirmative 18(e) determination be accompanied by changes to Part 1952 reflecting the final approval decision. This notice makes several changes to Subpart E of Part 1952 to reflect the final approval of the Utah plan.

A new paragraph § 1952.113, Compliance staffing benchmarks, has been added to reflect the approval of the 1984 revised benchmarks for Utah.

A new paragraph § 1952.114, Final approval determination, has been added to reflect the determination granting final approval of the plan. The new paragraph contains a more accurate description of the scope of the plan than the one contained in the initial approval decision.

A newly redesignated paragraph § 1952.115, Level of Federal enforcement, has been revised to reflect the State's 18(e) status. The new paragraph replaces former § 1952.112, which described the relationship of State and Federal enforcement under an Operational Status Agreement which was entered into on October 4, 1974. Federal concurrent enforcement authority has been relinquished as part of the present 18(e) determination for Utah, and the Operational Status Agreement is no longer in effect. § 1952.115 describes the issues where Federal authority has been terminated and the issues where it has been retained in accordance with the discussion of the effects of the 18(e) determination set forth earlier in the present **Federal Register** notice.

While most of the existing Subpart E has been retained, paragraphs within §§ 1952.111, 1952.112, 1952.113, and 1952.114 [Redesignated as 1952.116, certification of completion of

criminal proceedings for violations of the Federal Act under section 17. The covered by the finally approved plan, and shall be subject to Federal promulgated or modified during the 18(e) period, would be Federally enforceable

VOL

1985
UMI

While most of the existing Subpart E has been retained, paragraphs within the subpart have been rearranged and renumbered so that the major steps in the development of the plan (initial approval, developmental steps, certification of completion of developmental steps and final plan approval) are set forth in chronological order. Related editorial changes to the subpart include modification of the heading of § 1952.110, to clearly identify the 1973 initial plan approval decision to which it relates, and deletion of former § 1952.115, which pertains to approval of miscellaneous, unrelated plan changes. The addresses of locations where State plan documents may be inspected have been updated and are found in § 1952.116.

Regulatory Flexibility Act

OSHA certifies pursuant to the Regulatory Act of 1980 (5 U.S.C. 601, *et seq.*) that this rulemaking will not have a significant economic impact on a substantial number of small entities. Final approval will not place small employers in Utah under any new or different requirements nor would any additional burden be placed upon the State government beyond the responsibilities already assumed as part of the approved plan. A certification to this effect previously was forwarded to the Chief Counsel for Advocacy, Small Business Administration.

List of Subjects in 29 CFR Part 1952

Intergovernmental relations, Law enforcement, Occupational safety and health.

Signed at Washington, D.C. this 16th day of July 1985.

Patrick R. Tyson,

Acting Assistant Secretary.

PART 1952—[AMENDED]

Accordingly, Subpart E of 29 CFR Part 1952 is hereby amended as follows:

1. The authority citation for Part 1952 continues to read:

Authority: Sec. 18, 84 Stat. 1608 (29 U.S.C. 667); 29 CFR Part 1902, Secretary of Labor's Order No. 9–83 (48 FR 35736).

§ 1952.115 [Removed]

2. Section 1952.115, Changes to approved plans, is removed.

3. Section 1952.110 is amended by revising the heading to read:

§ 1952.110 Description of the plan as initially approved.

* * * * *

8. The Table of contents for Part 1952, Subpart E, is revised to read as follows:

Subpart E—Utah

Sec.

1952.110 Description of the plan as initially approved.
1952.111 Developmental schedule.
1952.112 Completion of developmental steps and certification.
1952.113 Compliance staffing benchmarks.
1952.114 Final approval determination.
1952.115 Level of Federal enforcement.
1952.116 Where the plan may be inspected.

9. New §§ 1952.113 and 1952.114 are added to read as follows:

§ 1952.113 Compliance staffing benchmarks.

Under the terms of the 1978 Court Order in *AFL–CIO* v. *Marshall*, compliance staffing levels (benchmarks) necessary for a "fully effective" enforcement program were required to be established for each State operating an approved State plan. In September 1984, Utah, in conjunction with OSHA, completed a reassessment of the levels initially established in 1980 and proposed revised compliance staffing benchmarks of 10 safety and 9 health compliance officers. After opportunity for public comments and service on the AFL–CIO, the Assistant Secretary approved these revised staffing requirements effective July 16, 1985.

§ 1952.114 Final approval determination.

(a) In accordance with section 18(e) of the Act and procedures in 29 CFR Part 1902, and after determination that the State met the "fully effective" compliance staffing benchmarks as revised in 1984 in response to a Court Order in *AFL–CIO* v. *Marshall* (CA 74–406), and was satisfactorily providing reports to OSHA through participation in the Federal-State Unified Management Information System, the Assistant Secretary evaluated actual operations under the Utah State plan for a period of at least one year following certification of completion of developmental steps (41 FR 51014). Based on the 18(e) Evaluation Report for the period of October 1, 1982 through March 31, 1984, and after opportunity for public comment, the Assistant Secretary determined that in operation the State of Utah's occupational safety health program is at least as effective as the Federal program in providing safe and healthful employment and places of employment and meets the criteria for final State plan approval in section 18(e) of the Act and implementing regulations at 29 CFR Part 1902. Accordingly, the Utah plan was granted final approval and concurrent Federal enforcement authority was relinquished under section 18(e) of the Act effective July 16, 1985.

(b) The plan which has received final approval covers all activities of employers and all places of employment in Utah except safety and health coverage in private-sector maritime employment and on Hill Air Force Base.

(c) Utah is required to maintain a State program which is at least as effective as operations under the Federal program; to submit plan supplements in accordance with 29 CFR Part 1953; to allocate sufficient safety and health enforcement staff to meet the benchmarks for State staffing established by the U.S. Department of Labor, or any revisions to those benchmarks; and, to furnish such reports in such form as the Assistant Secretary may from time to time require.

10. Newly designated §§ 1952.115 and 1952.116 are revised to read as follows:

§ 1952.115 Level of Federal enforcement.

(a) As a result of the Assistant Secretary's determination granting final approval of the Utah plan under section 18(e) of the Act, effective July 16, 1985, occupational safety and health standards which have been promulgated under section 6 of the Act do not apply with respect to issues covered under the Utah plan. This determination also relinquishes concurrent Federal OSHA authority to issue citations for violations of such standards under sections 5(a) (2) and (9) of the Act; to conduct inspections and investigations under section 8 (except those necessary to conduct evaluation of the plan under section 18(f) and other inspections, investigations, or proceedings necessary to carry out Federal responsibilities not specifically preempted by section 18(e)); to conduct enforcement proceedings in contested cases under section 10; to institute proceedings to correct imminent dangers under section 13; and to propose civil penalties or initiate

criminal proceedings for violations of the Federal Act under section 17. The Assistant Secretary retains jurisdiction under the above provisions in any proceeding commenced under sections 9 or 10 before the effective date of the 18(e) determination.

(b) In accordance with section 18(e), final approval relinquishes Federal OSHA authority only with regard to occupational safety and health issues covered by the Utah plan. OSHA retains full authority over issues which are not subject to State enforcement under the plan. Thus, Federal OSHA retains its authority relative to safety and health in private sector maritime activities and will continue to enforce all provisions of the Act, rules or orders, and all Federal standards, current or future, specifically directed to private-sector maritime employment (29 CFR Part 1915, shipyard employment; Part 1917, marine terminals; Part 1918, longshoring; Part 1919, gear certification; as well as provisions of general industry standards (29 CFR Part 1910) appropriate to hazards found in these employments). Federal jurisdiction is also retained on the Hill Air Force Base, and with respect to all Federal government employers and employees. In addition, any hazard, industry, geographical area, operation or facility over which the State is unable to effectively exercise jurisdiction for reasons not related to the required performance or structure of the plan shall be deemed to be an issue not covered by the finally approved plan, and shall be subject to Federal enforcement. Where enforcement jurisdiction is shared between Federal and State authorities for a particular area, project, or facility, in the interest of administrative practicability, Federal jurisdiction may be assumed over the entire project or facility. In either of the two aforementioned circumstances, Federal enforcement may be exercised immediately upon agreement between Federal and State OSHA.

(c) Federal authority under provisions of the Act not listed in section 18(e) is unaffected by final approval of the plan. Thus, for example, the Assistant Secretary retains his authority under section 11(c) of the Act with regard to complaints alleging discrimination against employees because of the exercise of any right afforded to the employee by the Act, although such complaints may be referred to the State for investigation. The Assistant Secretary also retains his authority under section 6 of the Act to promulgate, modify or revoke occupational safety and health standards which address the working conditions of all employees, including those in States which have received an affirmative 18(e) determination, although such standards may not be Federally applied. In the event that the State's 18(e) status is subsequently withdrawn and Federal authority reinstated, all Federal standards, including any standards promulgated or modified during the 18(e) period, would be Federally enforceable in that State.

(d) As required by section 18(f) of the Act, OSHA will continue to monitor the operations of the Utah State program to assure that the provisions of the State plan are substantially complied with and that the program remains at least as effective as the Federal program. Failure by the State to comply with its obligations may result in the revocation of the final determination under section 18(e), resumption of Federal enforcement and/or proceedings for withdrawal of plan approval.

§ 1952.116 Where the plan may be inspected.

A copy of the principal documents comprising the plan may be inspected and copied during normal business hours at the following locations: Office of State Programs, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N3476, Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, U.S. Department of Labor, 1961 Stout Street, Room 1554, Denver, Colorado 80294; and, the Office of the Utah Industrial Commission, Utah Occupational Safety and Health, 160 East Third South, Salt Lake City, Utah 84110–5800.

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

7 CFR Parts 1930, 1944 and 1965

Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients

AGENCY: Farmers Home Administration, USDA.

ACTION: Proposed rule.

SUMMARY: The Farmers Home Administration (FmHA) proposes to amend its regulations governing the management and supervision of FmHA Multiple Family Housing loan and grant recipients. This action is taken to incorporate changes required by the Housing and Urban Rural Recovery Act of 1983 (83–Act). The changes closely align FmHA's methodology governing tenant income calculation and tenant contribution with the Department of Housing and Urban Development's (HUD) methodology and make administrative revisions and clarifications.

The intended effect of this action is to establish: new priority rules for rental assistance; rules requiring management policy that permit persons in housing for the elderly to keep a pet; rules that establish priority levels for very low-income tenants; and rules affecting rent increases, management fees, and rental assistance for manufactured housing.

DATE: Comments must be received by September 16, 1985.

ADDRESSES: Submit written comments in duplicate to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6348, South Agriculture Building, 14th and Independence Avenue SW, Washington, DC 20250

All written comments made pursuant to this notice will be available for public inspection during regular work hours at the above address. The collection of information requirements contained in this rule have been submitted to OMB for review under section 3504(h) of the Paperwork Reduction Act of 1980. Submit comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Farmers Home Administration, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: James D. Tucker, Branch Chief, Multiple Family Housing Servicing and Property Management Division, FmHA, USDA, Room 5321, South Agriculture Building, 14th Street and Independence Avenue SW, Washington, DC 20250, telephone (202) 382–1618.

SUPPLEMENTARY INFORMATION:

Classification

This action has been reviewed under USDA procedures established in Departmental Regulation 1512–1 which implements Executive Order 12291, and has been determined "nonmajor." It will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, or significant adverse effects on competition, employment investment, productivity, innovation, or on the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

Environmental Impact Statement

This document has been reviewed according to 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment and according to the National Environmental Policy Act of 1969, Pub. L. 91–190, and Environmental Impact Statement is not required.

Intergovernmental Review

This instruction does not directly affect any FmHA programs or projects which are subject to intergovernmental consultation.

The Administrator, Farmers Home Administration, USDA, has determined that this action will not have a significant economic impact on a substantial number of small entities because it contains normal business recordkeeping requirements and minimal essential reporting requirements.

The following Catalog of Federal Domestic Assistance Programs are affected: 10.405, Farm Labor Housing Loans and Grants; 10.411, Rural Housing Site Loans; 10.415, Rural Rental Housing Loans; and 10.427, Rural Assistance Payments.

General Information

Background and Statutory Authority

On November 18, 1983, the Ninety-Eighth Congress passed legislation known as the Housing and Urban-Rural Recovery Act of 1983, hereinafter referred to as the "83–Act." The legislation was enacted November 30, 1983, upon signature by the President. Only the language of the 83–Act is available; there are no known congressional committee minutes available to provide a background discussion to the provisions of the 83–Act. Due to the imminent need to promulgate regulations to implement the 83–Act, FmHA has developed these proposed regulations internally except for occasional contracts, primarily with the Department of Housing and Urban Development (HUD) concerning HUD's regulations. A major thrust of the 83–Act is to require alignment of the FmHA definitions of low-income families or persons and very low-income families or persons with those established by HUD in implementing the provisions of the United States Housing Act of 1937. Closely related is the requirement that FmHA's definitions of income and adjusted income be consistent with those established by Congress under sections 3(b)(4) and 3(b)(5) respectively of the United States Housing Act of 1937, which are described in this rulemaking. Another requirement of the 83–Act is the establishment of rules prohibiting denial of common household pets in federally financed housing for the elderly.

Other proposed changes are corrective and clarifying in nature in response to questions raised by the public and FmHA staff after the December 19, 1983, issuance of 7 CFR Part 1930–C.

HUD Related Changes

Definitions

The proposed definition changes are discussed hereafter in generally alphabetical order as found in Exhibit B to Subpart C of Part 1930.

Adjustments to annual income are changed in paragraph II A of Exhibit B. Previously, they were 5 percent of annual income and $300 for each minor person. The deduction will become $480 for each person under 18 years of age or who is 18 years of age or older and is disabled, handicapped, or a full-time student. This deduction will not be available for foster children or unborn children. Other permissible deductions to annual income will be $400 for any elderly family plus medical expenses in excess of 3 percent of annual household income for any elderly family, and the amount paid by a family for the care of minors under 13 years of age, or for the care of disabled or handicapped persons when such care enables a household member to be gainfully employed or to further their education.

The definition of annual income in paragraph II C of Exhibit B, previously included the planned income of all residing household members for an ensuing 12 month period. The proposed definition includes anticipated income for all adult members who will reside during the 12 months following the effective date of proposed Form FmHA 1944–8, "Tenant Certification." The discussions about exempted income and income deductions to determine annual income are restated and include substantially the same provisions as the previous regulations. The major changes are removing the $400 per month limits on child and nursing type care deductions and permitting total medical expense deductions in excess of 3 percent of annual elderly family income and the total cost of care of minors to permit a family member to be gainfully employed or to facilitate further education.

By adopting the same definition as HUD of annual income and adjusted annual income, several other definitions or factors affecting the calculation of eligibility determination and subsidy qualification need to be adopted by FmHA. The proposed definition of elderly in paragraph II I of Exhibit B replaces the previous definition of senior citizen. Wherever the term senior citizen appears in FmHA regulations, it shall mean elderly. The proposed definition restates the definition for senior citizen and now includes a definition for handicap and also adds inclusively a definition of disability as defined in the "Development Disabilities Assistance and Bill of Rights Act"; Pub. L. 95–602. Thus, the term elderly includes persons 62 years of age and older, handicapped and disabled persons.

The term elderly family in paragraph II J of Exhibit B, is found in HUD regulations and is proposed in FmHA regulations for the first time. An elderly family may include a tenant household where the tenant or co-tenant is 62 years of age or older, or handicapped or disabled. It may also include a tenant household where a person(s) younger than 62 is a member who is essential to the elderly, handicapped, or disabled person's care and well-being.

Eligibility income in paragraph II K of Exhibit B, is another proposed term in FmHA regulations for multiple family housing (MFH). This is the calculated adjusted gross income that is compared to an established income limit to determine if a tenant applicant is eligible for occupancy or continued occupancy.

The definition of minor in paragraph II U of Exhibit B, is proposed to make FmHA and HUD regulations compatible. The term minor includes persons under 18 years of age who are not the tenant or co-tenant. The term minor does, however, include persons aged 18 or older who are full-time students.

The term net family assets in paragraph II W of Exhibit B, is a proposed addition to the list of definitions. New family assets include household savings and checking accounts market value of stocks and bonds, equity in real property, and other capital investments. Explanation that any income derived from such assets is treated as annual income is included in the definition. Further explanation describes that when such assets exceed $5,000, the value of the net family assets will be used in determining the eligibility income described above. The calculation takes an applicant's net family assets into consideration, commonly known as an "assets test." If net family assets are less than or equal to $5,000, eligibility income is the equivalent of annual income. If net family assets are greater than $5,000, eligibility income will be the greater of: (1) Annual income or (2) annual income less income from assets plus an amount equal to bank passbook savings rates on net family assets.

In the discussion of rent that a tenant pays, especially when rents are subsidized, HUD distinguishes between project rent and the portion of project rent paid by a tenant as shelter cost and tenant contribution respectively. Definitions are proposed for each of these terms. Shelter cost in paragraph II HH of Exhibit B is described as the basic and/or market rent plus any utility allowances, when required. Tenant contribution in paragraph II KK of Exhibit B, is described as the portion of approved shelter cost paid by the tenant. To complete this discussion, a definition for rental assistance (RA) in paragraph II CC of Exhibit B is added. Rental assistance is the portion paid by FmHA to compensate for the difference between the approved shelter cost and tenant contribution.

Increase in Tenant Contribution

Section 517 of the Act stipulates that when RA is provided, the rent contibution for tenants receiving RA shall not exceed the highest of (1) 30 percent of monthly *adjusted*, (2) 10 percent of gross monthly income, or (3) if the person or family is receiving payments for welfare assistance from a public agency, the portion of such payments which is specifically designed by such agency to meet the person's or family's housing costs. Section 517 of the 83–Act further stiplulates that when interest credits are provided, a tenant's rent contribution shall not exceed the highest of (1) 30 percent of monthly *adjusted* income, (2) 10 percent of gross monthly income, or (3) if the person or family is receiving payments for welfare assistance from a public agency, the portion of such payments which is specifically designated by such agency to meet the person's or family's housing costs, or, where no RA authority is available, the rent level established on a basis of a 1 percent interest rate on debt service. (FmHA interprets this requirement to also apply to Plan I projects with a 3 percent interest rate when RA is not available.) These stipulations replace the previous requirements that tenants pay no more than 25 percent of monthly adjusted income as rent contribution including utilities when RA is available. FmHA proposes to implement the change of tenant contribution in paragraph IV A 2 c of Exhibit B to Subpart C to Part 1930 from 25 percent to 30 percent with this rulemaking subject to a provision of the 83–Act which limits the increase of tenant contribution as a result of this 83–Act or by other revision of Federal law or Federal regulation to no more than 10 percent during any twelve-month period unless the income above 10 percent is attributable to an increase in income. The details of tenant contribution calculation are contained in the revised Form FmHA 1944–8, "Tenant Certification" and the associated Forms Manual Insert.

Section 530 of Title V of the Housing Act of 1949 is amended by the 83–Act to replace 25 percent with 30 percent of

by reason of ownership of such pets by, or the presence of such pets in the

highest percentage of adjusted annual income for approved shelter cost and

amendments are described in paragraph VI C of Exhibit C to Subpart C to Part

District Offices while still meeting regulatory requirements.

This Administrative Notice provided clarification of Agency policy of when

VOL

16
1985
UMI

Section 530 of Title V of the Housing Act of 1949 is amended by the 83–Act to replace 25 percent with 30 percent of monthly adjusted income for the purpose of requiring application for RA as a result of a rent increase. Accordingly, FmHA proposes this change in paragraph III C of Exhibit C to Subpart C to Part 1930.

By electing to adopt HUD's income and eligibility determination criteria, there is some impact on FmHA's occupancy standard. The HUD criteria refer to unborn children and foster children, where FmHA regulations have not. FmHA is also cognizant that HUD has eliminated its numerical occupancy standard and has adopted a narrative type of occupancy policy. With this rulemaking, in paragraph VI B 2 of Exhibit B to Subpart C to Part 1930, FmHA is proposing to adopt much of HUD's occupancy policy. Borrowers will be required to establish their own occupancy policies following the FmHA occupancy policy guideline and with FmHA approval. FmHA is retaining the numerical occupancy standard as a desired goal and guideline rather than as a mandatory standard. The numerical occupancy standard will remain, however, until borrowers have adopted their own occupancy policy.

Other Related Changes

Other changes in 7 CFR Parts 1930 and 1944 are proposed to correlate with the changes proposed to definitions, tenant contribution, and occupancy policy. These changes are generally confined to changed reference and a change or addition of termonology. For example, the term "very low-income" is proposed in numerous places where income levels are discussed. This change is found in 7 CFR Part 1930 topic areas of tenant eligibility, maintenance of waiting list, notification of eligibility or rejection, tenant selection, form of lease, required lease clauses, other lease provisions, occupancy rules, security deposits, and in Exhibits B–1, B–3, C, C–2, and E; and in 7 CFR Part 1944, Subpart D and E.

Pet Policy

Section 227 of the 83–Act stipulates that no owner or manager of any federally assisted rental housing for the elderly or handicapped may: (1) As a condition of tenancy or otherwise prohibit or prevent any tenant in such housing from owning common household pets or keeping common household pets in the dwelling accommodations of such tenants or (2) restrict or discriminate against any person in connection with admission to, or continued occupancy of, such housing by reason of ownership of such pets by, or the presence of such pets in the dwelling accommodation of such person. This rulemaking contains proposed regulations in paragraph VIII F 6 establishing guidelines under which an owner or manager of FmHA financed rental housing for the elderly or handicapped may prescribe reasonable rules for the keeping of pets by tenants in such housing. The regulations require borrowers (owners) to establish project rules pertaining to the keeping of commonly accepted pets by tenants in projects designed for the elderly, handicapped or disabled within 12 months of the effective date of this rulemaking. Borrowers with operational projects must consult with the tenants of each project when establishing the pet rules and document for FmHA how the consultation process was conducted. Borrowers with new projects must establish pet rules prior to occupancy, but may revise those rules based on tenant comments and suggestions after occupancy occurs. The definition of Pet is proposed in paragraph II Z of Exhibit B to Subpart C to Part 1930 to mean a commonly accepted domesticated animal such as a dog, cat, bird, etc. Security deposits for animal maintenance are allowed in paragraph VIII G 1 of Subpart C to Part 1930 for all pets except seeing eye and hearing ear animals. These animals are not considered pets. The Pet Food Institute in Washington, D.C., the National Center for Law and the Deaf, and FmHA National Office staff were consulted in developing the proposed definition.

Rental Assistance (RA)

Priorities

Sections 512, 516 and 517 of the 83-Act include changes or additions that affect the administration of RA by FmHA. Only those RA provisions involving actual allocation of RA are addressed in this proposed rulemaking.

In Section 512, Congress mandated that when RA is available as described in paragraph XI C of Exhibit E to Subpart C to Part 1930, at least 75 percent of RA vacancy shall be filled by very low-income tenants in projects made operational before November 30, 1983. For projects made operational on or after November 30, 1983, Congress mandated that when RA is available, at least 95 percent of the RA will be assigned to very low-income tenants. To achieve this mandate, FmHA is proposing rules in paragraph XI B of Exhibit E to Subpart C to Part 1930, governing priority in assigning RA to tenants. First, RA will be assigned to very low-income tenants paying the highest percentage of adjusted annual income for approved shelter cost and then to very low-income applicants on the waiting list selected on a first come, first served basis. Second priority will go to eligible low-income tenants in residence paying the highest percentage of adjusted annual income for approved shelter cost and then to low-income applicants on the waiting list selected on a first come, first served basis.

Section 517 of the 83-Act establishes a new priority system for allocating RA to projects. Under the previous regulations, RA priority was extended to projects which limited RA usage to no more than 40 percent of the units contained in the project, although RA could be used in up to 70 percent of the project units, except for rental housing financed for the elderly or handicapped where 100 percent of the units could benefit from RA.

FmHA received in FY 1984 a split RA appropriation; part for servicing and another for new construction. The new priority system stipulates that projects with expiring RA contracts shall receive first priority. Regulations addressing the first priority were in effect when the 83-Act was enacted. The second priority is to serve new construction with RA funded through the new construction RA appropriation. The third priority of the Act is for servicing operations projects to the extent any RA funds remain after meeting the first priority. Proposed revisions are made to paragraph IV A 2 and 3 of Exhibit E to Subpart C of Part 1930 to identify the priorities.

RA for Manufactured Housing

Section 517 of the 83-Act added a provision where RA may be used where manufactured housing has been purchased. Paragraph II B 4 of Exhibit E to Subpart C to Part 1930 is proposed to clarify when borrowers may provide RA under this provision.

Other Provisions

Rent Increases

Section 512 of the 83-Act amended section 515 of the Housing Act of 1949 to limit rent increases in certain situations. Rent changes to cover project operating and maintenance costs occurring in newly constructed or substantially rehabilitated rental housing projects approved on or after November 30, 1983, may be approved provided, (1) the cost changes are actual costs, and (2) the amount of cost change incurred is comparable to costs incurred in comparable projects in the project's maket area or to the best available cost information. These proposed

amendments are described in paragraph VI C of Exhibit C to Subpart C to Part 1930. The Agency is particularly interested in the public's comment concerning the impact of this proposed change in rent increase requirements.

Management Fees

Section 512 of the Act amended section 515 of the Housing Act of 1949 by adding (j) forbidding excessive management fees in rental housing projects managed by a developer or an affiliate of the developer. Regulations published on December 19, 1983, in the **Federal Register** address this concern.

Administrative Changes

Annual Reports

Annual reports, including audit reports, are presently due from borrowers within 45 days following close of the borrower's project fiscal year. In response to comment from the public, since issuance of this regulation on December 19, 1983, especially from project accountants and FmHA staff, the Agency proposes changing the requirement to 60 days. The Agency considered a longer submission period. The Agency believes, however, that project annual reports and audits are vital sources of compliance and performance information that warrant review as early in the following operational year as possible to make any needed changes effective without delay. These proposed changes are found as follows:

1. Section 1930.124 (b).
2. Exhibit A–1, IV B 1 c; Evaluation Checklist for Audit Reports, item no. 5; Example Audit Review Letter, item no. 3.
3. Exhibit b. XIII C 2.
4. Exhibit B–7, "Due Date" column 6 of the 7 listed report items.

Changing Project Designation

A new § 1930.125 is proposed to describe conditions and requirements that will permit the redesignation of use of a multiple family housing project. This will permit administrative flexibility for FmHA and borrowers to respond to changing rental market conditions.

Delegation of Authority

FmHA proposes to expand its administrative delegation authority in § 1930.143 by permitting the Administrator to authorize State Directors on an individual State basis to contract out selected multiple family housing loan servicing actions. The Agency is investigating the possibility of contracting selected loan servicing actions to reduce the workload on District Offices while still meeting regulatory requirements.

Site Manager's Compensation

FmHA proposes clarification of paragraph V E 1 of Exhibit B to Subpart C of Part 1930. Correct calculation of the site manager's compensation where the site manager's apartment unit is provided at no cost or at a reduced cost has been confusing to FmHA staff and borrowers. The discussion has been expanded to describe calculation scenarios of no rent or reduced rent. The discussion emphasizes that costs associated with providing a rent-free or reduced rent apartment are reflected in the expenses of the project budget while income from the same unit is either reduced or is zero.

Tenant Eligibility

FmHA proposes clarification of paragraph VI B 1 by stating that tenant households are eligible for occupancy when a household member is disabled if adequate care and assistance is provided by the tenant household for the safety and well-being of the disabled household member.

Tenant Recertification

FmHA proposes paragraph VII F 4 to Exhibit B to Subpart C of Part 1930 to clarify that "mid-year" recertification of tenant income and/or household size is permitted.

Tenant Income Verification

FmHA proposes paragraph VII F 5 to Exhibit B to Subpart C of Part 1930 to permit the borrower to provide a tenant's social security number to the District Director to verify the tenant's incomes on record with the appropriate state employment agency. This proposed change is included in response to recommendations to the Agency by the USDA Office of Inspector General based on their findings of incorrect reporting and verification of tenant income.

Tenant Guest Policy

FmHA proposes paragraph VIII F 9 to Exhibit B to Subpart C of Part 1930 to establish a policy for tenant guests. This policy is entered in response to recurring questions raised by FmHA field staff. The specific number of 14 days and nights in a 45-day period are taken from a 1983 consent decree in the State of Texas.

Advance of Funds to Cover Project Operating Shortfalls

On March 24, 1983, FmHA issued FmHA Administrative Notice No. 824 (1930) to its State Directors, Rural Housing Chiefs and District Directors. This Administrative Notice provided clarification of Agency policy of when payback of funds provided from outside a MFH project could or could not be permitted to cover shortfalls in project operations. This policy statement is now proposed in paragraph XII C of Exhibit B to Subpart C of Part 1930. Advances for operational shortfalls are discouraged but may be permitted conditionally with prior written approval by an FmHA District Director.

Separate Maintenance of Project Funds

FmHA currently requires borrowers to maintain separation of a project's funds from funds of another project owned by the borrower or managed by the borrower's management agent. This requirement is cited in paragraph XIII B 1 d of Exhibit B to Subpart C of Part 1930. The Agency adopted this policy for fiscal control of project funds. Some borrowers, management agents, and FmHA staff maintain that fiscal control can be maintained through proper bookkeeping and auditing procedures while permitting the commingling of different project funds. They further maintain that commingling of funds simplifies bookkeeping and permits better investment yield on deposits of reserve and surplus funds. The Agency invites the public to express its viewpoint and to provide reasons for and against maintaining the current policy.

Notice of Tenancy Termination

FmHA proposes revision of paragraph XIV B 3 of Exhibit B to Subpart C of Part 1930. The present regulation refer the District Director to Subpart L of Part 1944 of 7 CFR for guidance in reviewing a notice of tenancy termination. Reference to Subpart C of Part 1944 of 7 CFR is incorrect. The revised language directs the District Director to review paragraph XIV of Exhibit B to Subpart C of Part 1930 for guidance in reviewing a notice of tenancy termination.

Fidelity Bonds

Paragraph XV A of Exhibit B to Subpart C of Part 1930 contains a proposed revision to clarify borrower and management agent fidelity bond requirements. The present requirements result in duplicate coverage in situations where there is a management agent in addition to borrower officials. The proposed revision to the regulation will require fidelity bond coverage of the person, persons, or firm with exclusive access to project assets.

Paragraph XV A 12 of Exhibit B to Subpart C of Part 1930 contains a proposed revision to clarify fidelity bond deductible requirements. The

phrase "initial to clarify investment" is changed to "initial project contribution for operating capital." Some confusion

The Department of Agriculture through Farmers Home Administration (FmHA) finds it is necessary and desirable to minimize

phrase "initial to clarify investment" is changed to "initial project contribution for operating capital." Some confusion has emerged from the present language. Some people think of "initial project investment" as the value of total project development cost. The correct meaning is the amount of contribution made by the borrower "up-front" as an initial investment into the project.

Rent Change Meeting with FmHA District Director

FmHA proposes to change its requirement in Exhibit C to Subpart C of Part 1930 that all borrowers desiring an increase of project rents must first meet with the District Director. Paragraph IV A is revised to permit the District Director to use discretion in exercising this requirement. The District Director may allow rent change information to be submitted in lieu of a meeting not needed. The borrower will be permitted to post a notice of rent change 15 days after submitting the rent change information to the District Office.

Notice of Approved Rent Change

Revision of Exhibit C–2 to Subpart C of Part 1930, "NOTICE OF APPROVED RENT CHANGE," is proposed to remove confusion in its use. References to 30-day notice have been removed and a fill-in date has been inserted. This change will permit compatibility with use of Exhibit C–1 to Subpart C of Part 1930, "NOTICE TO TENANTS OF PROPOSED RENT CHANGE." The Exhibit C–1 provides notice to tenants of pending rent increase at least 60 days prior to effective date of increase. FmHA approval/rejection of a rent increase must be given to a borrower by the 45th day of the 60-day period. Hence there is only 15 days remaining. The revised Exhibit C–2, as proposed, will confirm the effective date and fact of rent increase stated in the Exhibit C–1 issued 45 days earlier. In paragraph V B 1 a of Exhibit C to Subpart C of Part 1930, proposed discussion is added to clarify that the Exhibit C–2 notice will be mailed or it can be hand-delivered to each tenant. It must also be posted in a conspicuous place for all tenants to view.

In addition, Farmers Home Administration (FmHA) has determined it necessary to consider including in Exhibit C, "Rent Changes" of Part 1930, Subpart C of this chapter, a rent preemption regulation and invites comments. The added paragraph is proposed as follows, but final language would be developed and published as a final rule.

The Department of Agriculture through Farmers Home Administration (FmHA) finds it is necessary and desirable to minimize defaults by the mortgagor in its financial obligations with regard to projects covered by this subpart, and to assist mortgagors to preserve the continued viability of those projects as a housing resource for low- and moderate-income families. The Department also finds that it is necessary and desirable to protect the substantial economic interest of the Federal Government in those projects. Therefore, the Department concludes that it is in the national interest to preempt, and it does hereby preempt, the entire field of rent regulation by local rent control boards (hereinafter referred to as board), or other authority acting pursuant to State or local law as it affects projects covered by this subpart.

Furthermore, we invite comments on a proposal that Farmers Home Administration (FmHA) permit computerization of data gathering forms which are used by Multiple Family Housing Borrowers on a regular basis. Regulations would be amended to allow computerization of FmHA data gathering forms as long as the content was neither increased or decreased.

List of Subjects

7 CFR Part 1930

Accounting, Administrative practice and procedure, Grant programs—Housing and community development, Loan programs—Housing and community development, Low and moderate income housing—Rental, Reporting requirements.

7 CFR Part 1944

Administrative practice and procedure, Aged, Farm labor housing, Grant programs—Housing and community development, Handicapped, Loan programs—Housing and community development, Low and moderate income housing—Rental, Migrant labor, Mortgages, Nonprofit organizations, Public housing, Rent subsidiaries, Rural housing.

7 CFR Part 1965

Administrative practice and procedure, low and moderate income housing—Rental, Mortgages.

Accordingly, FmHA proposes to amend Part 1930, Subpart C; Part 1944, Subparts D and E; and Part 1965, Subpart B, Chapter XVIII, Title 7, Code of Federal Regulations as follows:

PART 1930—GENERAL

1. The authority citation for Part 1930 is revised to read as follows:

Authority: 42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70.

Subpart C—Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients

§ 1930.101 [Amended]

2. Section 1930.101(d)(1) is amended by changing the reference "Form FmHA 444–8" to read "Form FmHA 1944–8."

§ 1930.102 [Amended]

3. Section 1930.102(h) is amended in the first sentence by removing the words "located on the same or contiguous site(s) and" and inserting the words "in one community such as a densely settled area, town or village" and by adding the words "under § 1965.68 of Subpart B of Part 1965 of this chapter" at the end of the last sentence.

§ 1930.109 [Amended]

4. Section 1930.109 is amended in the last sentence by inserting the word "actions" beteen the words "servicing" and "will" and by placing a period after the word "chapter" and removing the remainder of the sentence.

§ 1930.110 [Amended]

5. Section 1930.110 introductory text is amended by inserting the words "Periodic group meetings with borrower;" between the words "meetings;" and "analysis."

6. Section 1930.110(a)(4) is amended in the first sentence by inserting the word "and" between the words "plan" and "to."

7. Section 1930.110(a)(5) is amended by changing the spelling of "personal" to "personnel."

§ 1930.117 [Amended]

8. Section 1930.117(b)(3) is amended by inserting the words "and conduct" between "Develop" and "training" and by adding the letter "s" to the word borrower.

9. Section 1930.117(b)(5) is amended in the second sentence by changing the spelling of "benefitting" to "benefiting" and by replacing the words "made available to" with the words "offered to or accessible by."

10. Section 1930.117(b)(6) is amended by replacing the words "to assure" with the word "for."

11. Section 1930.117(c) introductory text is amended in the first sentence by replacing the word "officers" with "chiefs."

12. Section 1930.119(a) introductory text is amended in the first sentence by inserting the words "or other FmHA authorized persons" between the words "officials" and "will."

13. Section 1930.119(b)(1) is amended in the second sentence by adding the words "or other FmHA authorized

person" between the words "person" and "will."

14. Section 1930.119(b)(2) is amended in the first sentence by inserting the words "or other FmHA authorized person" between the words "Director" and "will" and by removing the words "a biennial" and inserting "an" in that place and inserting words "at least once every three years" between the words "Project" and "with."

15. Section 1930.119, paragraphs (d) and (e) are redesignated as (e) and (f), paragraph (c) is revised and a new paragraph (d) is added to read as follows:

§ 1930.119 Supervisory visits and inspections.

* * * * *

(c) *Preparation.* The person planning to make the visit and inspection will review the most recent monthly or annual reports, the running records, correspondence and other District Office records to be fully aware of the supervisory needs of the project. This awareness should be developed into an informal visit plan and include, but not be limited to such things as; payment status, subsidy status, due dates of taxes and insurance, adequacy of fidelity bond, and any known maintenance problems.

(d) *Conducting visit or inspection.* The person making the visit or inspection should spend sufficient time at the project to accomplish the visit plan and any additional needs that are observed or brought out by the tenants or management staff.

* * * * *

16. In Section 1930.119 paragraph (f) is amended in the first sentence by adding the words "or other FmHA authorized person" between the words "member" and "will."

§ 1930.124 [Amended]

17. Section 1930.124 introductory text is amended at the end of the last sentence by removing the period (.) and inserting a colon (:) in its place.

18. Section 1930.124(a)(3) is amended in the first sentence by removing the words "full fiscal year of" and inserting in their place the words "six months of successful."

19. Section 1930.124(b) introductory text is amended in the first sentence by deleting the words "and will consist of" and inserting the punctuation and words ", or any extension authorized in writing by the District Director. The report will consist of:".

20. Section 1930.124(c) introductory text is amended in the fourth sentence by inserting the words "through the State Office" between the words "referred" and "to."

21. Section 1930.124(c)(1) is amended in the first sentence by placing a period (.) after "1970" and by deleting the remainder of the sentence and by removing the word "closely" from the second sentence.

22. Section 1930.124(d)(1)(iii) is amended by changing the reference "§ 1930.119 (b)" to read "§ 1930.119(b)(2)."

23. Section 1930.124(f)(1) is amended by deleting the last sentence and replacing it with the sentence "In cases where the Dirtrict Director does not have delegated authority, the State Director or state staff delegate will approve Form FmHA 1930–7."

24. Section 1930.125 is added to read as follows:

§ 1930.125 Changing project designation.

Generally projects designated for families, elderly or handicapped persons will be used for the original purpose throughout the life of the FmHA loan. However, if it becomes necessary to change the designation of a project due to housing market changes which inhibit the borrower's ability to maintain occupancy levels sufficient to sustain the project, the State Director may change the designation with the prior written concurrence of the National Office. No change in the plan of operation (limited profit, nonprofit or full profit) will be authorized in conjunction with the change in project designation. Project design must meet elderly housing requirements when changing the designation to elderly. The National Office will only consider such requests on a case by case basis when all of the following information has been provided:

(a) The complete borrower case files have been submitted together with the State Director's specific recommendations and analysis of the present and long term situation.

(b) A market needs survey which substantiates the rationale for the change has been provided by the borrower. (The market survey must clearly indicate the long term marketability of the project and include the appropriate demographic information which reflects the population trends in the area.)

(c) A summary of all servicing actions taken by FmHA to aid the borrower in maintaining the present designation.

(d) A summary of all actions taken by the borrower to effectively market the units to potential eligible tenants.

(e) A summary of the impact the change will have on any existing tenants, rent subsidy needs, and the community as a whole.

§ 1930.141 [Amended]

25. Section 1930.141 (i)(6) is amended by changing the reference "Form FmHA 444–8" to read "Form FmHA 1944–8."

26. Section 1930.143 is amended by redesignating the text as paragraph (b) and by adding a new paragraph (a) to read as follows:

§ 1930.143 Delegation of responsibility and authority.

(a) The Administrator may on an individual state basis, authoize the State Director to contract out selective fact gathering, non-decision making servicing actions in this Subpart.

* * * * *

27. Exhibit A is amended in paragraph III D by adding the prefix "ex" to "penditures."

28. Exhibit A is amended in the last paragraph entitled "Summary" by placing "VIII" before the word "Summary."

29. Exhibit B is revised to read as follows:

Multiple Housing Management Handbook

I. Purpose

This management handbook prescribes the Farmers Home Administration (FmHA) regulations, policies and procedures for management of RRH and LH projects to be used by multiple housing borrowers (owners) and applicants and their management agents and site managers. Several exhibits are included to provide clarification and guidance. These regulations are intended to assist borrowers in the successful operation of FmHA-financed rental projects.

II. Definitions

A. *Adjusted Annual Income.* This is the income of the household members who live or propose to live in the rental unit for the next 12 months (including spouse or children of an elderly family in nursing homes or hospitals who would otherwise live in the unit), excluding:

1. $480 for each member of the family residing in the household (other than the tenant or co-tenant or spouse of either) who is under 18 years of age or who is 18 years of age or older and is disabled, handicapped or a full-time student.

2. $400 for any elderly family;

3. Total medical expenses in excess of 3 percent of annual family income may be deducted for any elderly family.

a. The term "total medical expenses" includes:

(1) Medical expenses the tenant anticipates incurring over the 12 months following the effective date of the certification;

(2) Medical expenses not covered by insurance; and

b. Examples of medical expenses are dental expenses, prescription medicines, medical insurance premiums, eyeglasses, hearing aids and batteries, the cost of a live-in resident assistant, monthly payments required on accumulated major medical bills including that portion of the spouse's or children's nursing home care paid from tenant family income(s).

4. Reasonable attendant care and auxiliary apparatus expenses for each handicapped member of any family to the extent necessary to enable any member of such family (including such handicapped member) to be employed.

5. The amounts paid by the family for the care of minors under 13 years of age or for the care of disabled or handicapped household members may be deducted. Deductions for these expenses are permitted only when such care is necessary to enable a family member to further his or her education or to be gainfully employed, including the gainful employment of the disabled or handicapped family member. When the deduction is to enable gainful employment the amount may not exceed the amount of income received from such employment. When the deduction is to facilitate further education the amount must not exceed a sum reasonably expected to cover class time and travel time to and from classes. (Child support payments made on behalf of a minor child who does not reside in the unit may not be deducted as a child care expenses.)

B. *Adjusted Monthly Income.* This is the amount obtained by dividing the adjusted annual income by 12.

C. *Annual Income.* Annual income is the gross amount of income to be received by all members of the household to be in residence during 12 months following the effective date of Form FmHA 1944-8, "Tenant Certification."

1. *INCOME INCLUDED.* The following are included when determining annual income:

a. The gross amount (before any payroll deductions) of wages and salaries, overtime pay, commissions, fees, tips, and bonuses of all members of the household. A deduction from the gross amount may be made in the same manner as outlined in IRS regulations for necessary work-related expenses actually paid by the employee in excess of the amount reimbursed by the employer. Deductions, however, are not permitted for the following:

(1) Transportation to and from work.

(2) Educational expenses except for those incurred to meet the minimum requirements for the employee's present position.

(3) Fines and penalties for violation of laws.

(4) Any other deduction not permitted by IRS.

b. The *net* income from operations of a business or profession or from rental or real or personal property. Expenditures for business expansion or amortization of indebtedness are not considered in the computation of net income. Net losses will be computed as zero. Deductions from gross business, professional, or rental income to arrive at net income may be made in the same manner as outlined in IRS regulations for the exhaustion, wear and tear, and obsolescence of depreciable property used in the trade or business of the adult household members. An itemized schedule must be provided showing the depreciation claimed. The schedule should be consistent with the amount of depreciation actually claimed for these items for Federal income tax purposes.

c. Interest, dividends, and other income from net family assets as defined in paragraph II W of this Exhibit. On contracts for sale of real estate, deeds of trust or mortgages held by the applicant or tenant, only the interest portion of the monthly or annual payments received by the applicant or tenant is included as income.

d. The full amount of periodic payments received from Social Security (including Social Security payment received by adults on behalf of minors or by minors intended for their own support), annuities, insurance policies, retirement funds, pensions, disability or death benefits (except lump sum settlements) and other similar types of periodic receipts. Include any payments that will begin during the next 12 months.

e. Payments in lieu of earnings, such as unemployment and disability compensation, worker compensation and severance pay.

f. Periodic and determinable allowances, such as alimony and child support payments, which the applicant or tenant can reasonably expect to receive.

g. Regularly recurring contributions or gifts received from persons not residing in the dwelling.

h. Any amount of education grants or scholarships or Veterans Administration benefits on behalf of tenant, co-tenant or applicant available for subsistence after deducting expenses for tuition, fees, books and equipment.

i. All regular pay, special pay (except for persons exposed to hostile fire), and allowances of a member of the armed forces who is head of the family or spouse, whether or not that family member lives in the unit.

j. Public Assistance. If the public assistance payment includes an amount specifically designated for shelter and utilities and that amount is subject to adjustments by the Public Assistance Agency according to the actual cost of shelter and utilities, the amount of public assistance income to be included as income shall consist of:

(1) The total amount of the public assistance, minus the amount specifically designated for shelter and utilities; plus

(2) The maximum amount which the Public Assistance Agency could in fact allow the family for shelter and utilities.

EXAMPLE:

Total grant	$300
Amount specifically designated for shelter and utilities	−150
Amount of grant excluding shelter and utility allowance	150
The maximum the agency could provide for this family for shelter and utility allowance	+180
Amount per month to be included in annual income	330

2. *EXEMPTED INCOME.* The following are not included in annual income:

a. Income of dependent minors under 18 years of age except as specified in paragraph II C 1 d of this Exhibit. (Tenant or co-tenant or spouse of either may never be considered minors.)

b. In the case of contracts for sale of real estate, mortgages or deeds of trust held by the tenant or co-tenant, the principal portion of the payments received by the tenant or co-tenant.

c. The value of coupon allotments for the purchase of food pursuant to the Food Stamp Act of 1964 which is in excess of the amount actually charged the eligible household.

d. Foster child care payments.

e. Casual, sporadic or irregular gifts.

f. Lump-sum additions to household assets such as inheritances, capital gains, insurance payments included under health, accident, hazard or worker compensation policies, and settlements for personal or property losses.

g. Amounts which are granted specifically for, or in reimbursement of, the cost of medical expenses. Medical expenses may include those expenses incurred by disabled or handicapped residents so that they may live independently (e.g., attendant care).

h. Amounts of education scholarships paid directly to the student or to the educational institution, and amounts paid by the Government to a veteran for use in meeting the costs of tuition, fees, books, and equipment. Any amounts of such scholarships or veterans payments, which are not used for above purposes and are available for subsistence, are considered to be income of tenant, co-tenant or applicant.

i. Student loans.

j. The special military pay to a service person head of a household or spouse away from home and exposed to hostile fire.

k. Payments received pursuant to participation in the following programs:

(1) Older Americans Volunteer Programs (OAVP) of the Federal Action Agency.

(i) Retired Senior Volunteer Program (RSVP).

(ii) Foster Grandparent Program (FGP).

(iii) Senior Companion Program (SCP).

(2) National Volunteer Programs such as VISTA and Service Learning Program.

(3) Small Business Administration Programs such as the National Volunteer Program to Assist Small Business Experience, Service Corps of Retired Executives (SCORE) and Active Corps of Executives (ACE), and

(4) Title V—Community Service Employment for Older Americans which include:

(i) Senior Community Service Employment Program

(ii) National Caucus Center on Black Aged

(iii) National Urban League

(iv) Association National Pro Personas Mayores

(v) National Council on Aging

(vi) American Association of Retired Persons

(vii) National Council of Senior Citizens

(viii) Green Thumb.

l. Relocation payments made pursuant to Title II of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970.

D. *Borrowers.* "Borrowers" means owners who may be individuals, partnerships, cooperatives, trusts, public agencies, private or public corporations and other organizations and have received a loan or grant from FmHA for LH, RRH, RCH, or RHS purposes.

E. *Caretaker.* The individual(s) employed by the borrower or the management agent as specified in the management plan to handle normal maintenance and upkeep of the project.

F. *Chore Service Worker.* An individual who provides intermittent assistance essential to the well being of a tenant whose services are compensated by a Federal, State, or local assistance program. A chore service worker will not be a resident of the tenant's living unit.

G. *Congregate Housing.* Housing that affords an assisted independent living environment that offers the elderly, disabled or handicapped person who may be functionally impaired or socially deprived, but in good health (not acutely physically ill), the residential accommodations, central dining facilities, related facilities, and supporting service(s) required to achieve, maintain, or return to a semi-independent life style and prevent prmature or unnecessary institutionalization as they grow older. Congregate housing also includes:

1. Housing which has complete kitchen facilities in each unit. However, some or all of the units may have limited kitchen facilities such as a cooktop with a small oven and a refrigerator. In the case of group living arrangements, each single family dwelling is considered a unit.

2. A group living arrangement where one or more elderly, disabled or handicapped persons may share living space within a rental unit and in which a resident assistant is required. Such housing may be one or more single family dwellings or a multi-unit structure.

H. *Domestic Farm Laborers.* Persons who receive a substantial portion of their income as laborers on farms in the United States, Puerto Rico, or the Virgin Islands and either (1) are citizens of the United States, or (2) reside in the United States, Puerto Rico, or the Virgin Islands after being legally admitted for permanent residence, and may include the immediate families or such persons, and as further defined in Subpart D of Part 1944 of this chapter.

I. *Elderly (Senior Citizen).* A person who is 62 years of age or older. The term elderly (senior citizen) also means persons with the following handicaps or disabilities, regardless of age:

1. *Handicapped.*

a. Inability to engage in any substantially gainful activity by reason of any medically determinable physical or mental impairment which:

(1) Can be expected to result in death, or which has lasted or can be expected to last for a continuous period of not less than 12 months;

(2) Substantially impedes the ability to live independently; and

(3) Is of such a nature that such ability could be improved by more suitable housing conditions.

b. In the case of an individual who has attained the age of 55 and is blind (within the meaning of "blindness" as determined in section 223 of the Social Security Act),

inability by reason of such blindness to engage in substantial gainful activity requiring skills or abilities comparable to

reasonable management activities of the project such as: (1) Developing and modifying operation budgets, (2) renting the units, (3)

BB. *Rental Agent.* The individual responsible for the leasing of the units. If other than the borrower, this individual may

vary according to the type of subsidy provided to the household.

agreements. FmHA will hold the borrower ultimately responsible for management of the

When they are presently a full profit operation they must convert to Plan II by

inability by reason of such blindness to engage in substantial gainful activity requiring skills or abilities comparable to those of any gainful activity in which he/she has previously engaged with some regularity and over a substantial period of time.

2. *Disobled.* In the case of developmental disability, a person with a severe, chronic disability which:

a. Is attributable to a mental or physical impairment or combination of mental or physical impairment;

b. Is manifested before the person attains age 22;

c. Is likely to continue indefinitely;

d. Results in substantial functional limitations in three (3) or more of the following areas of major life activity:

(1) Self care,

(2) Receptive and expressive language,

(3) Learning,

(4) Mobility,

(5) Self-direction,

(6) Capacity for individual living,

(7) Economic self-sufficiency; and

e. Reflects the person's need for a continuation and sequence of special, interdisciplinary or generic care, or treatment, or for other services which are of lifelong or extended duration and are individually planned and coordinated.

J. *Elderly Family.* A household where the tenant or co-tenant is 62 years of age or older, disabled or handicapped as defined in paragraph III of this Exhibit. An elderly family may include a person(s) younger than 62 years of age who is essential to the elderly, handicapped or disabled person's care and well-being. (To receive an elderly family deduction the elderly, disabled or handicapped person must be the tenant or co-tenant.)

K. *Eligibility Income.* The calculated adjusted gross income which is compared to the income limits in Exhibit C to Subpart A of Part 1944 of this chapter.

L. *Forms Manuol Insert (FMI).* A type of directive which includes a sample of the form and complete instructions for its preparation, use and distribution.

M. *Household.* One or more persons who maintain or will maintain residency in one rental unit, but not including a resident assistant or chore service worker.

N. *LH* means Farm Labor Housing loans and/or grants.

O. *Low-Income Household.* A household having an adjusted annual income within the maximum low-income limit stated in Exhibit C of Subpart A of Part 1944 of this chapter.

P. *Management Agent.* The firm or individual engaged by the borrower to manage the project in accordance with a written agreement.

Q. *Management Agreement.* The written agreement between the borrower and management agent setting forth the management agent's responsibilities and fees for management services.

R. *Management Fee.* The compensation for providing overall management services for a MFH project. The fee is compensation for the time, expertise and knowledge required to direct and oversee the present and future operation of the project. Project management fees may include the cost of day to day reasonable management activities of the project such as: (1) Developing and modifying operation budgets, (2) renting the units, (3) collecting the rent, (4) preparing reports to FmHA, (5) normal bookkeeping, (6) maintaining tenant records, (7) arranging for the proper maintenance of the project, and (8) making inspections, etc. A management fee does not include the compensation paid to a site manager.

S. *Management Plon.* The primary management charter, constituting a comprehensive description of the detailed policies and procedures to be followed in managing a project.

T. *Migrant.* A domestic farm laborer who works in any given local area on a seasonal basis and relocates his or her place of residence as farm work is obtained in other areas during the year.

U. *Minor.* The term *minor* includes persons under 18 years of age other than the tenant or co-tenant. Persons aged 18 and over who are full-time students are treated as minors. The tenant or co-tenant may never be counted as a minor.

V. *Moderate-Income Household.* A household having an adjusted annual income within the maximum moderate-income limit stated in Exhibit C of Subpart A of Part 1944.

W. *Net Family Assets.* Net Family Assets is the sum of the household's savings and checking accounts, market value of stocks and bonds, equity in real property and other capital investments excluding farm and non-farm business assets. Equity is the difference between the estimated market value of the property and the total of any loans secured by the property. The value of personal property such as furniture or automobiles, and vehicles specially equipped for the handicapped, is excluded. Income from Net Family Assets which is included in Annual Income is determined as follows:

1. If Net Family Assets equal $5,000 or less Annual Income includes the actual income derived from the Net Family Assets.

2. If Net Family Assets exceed $5,000 Annual Income includes the greater of:

a. Actual income derived from all Net Family Assets, or

b. A percentage of the value of such assets based on the Bank Passbook annual savings rate.

X. *New Housing.* Newly constructed or substantially rehabilitated RRH, RCH or LH project financed by FmHA. For Rental Assistance purposes, it further means before any units are occupied.

Y. *Operational Housing.* A completed RRH, RCH or LH Project financed by FmHA which has been opened for occupancy and has at least been partially occupied by tenants.

Z. *Pet.* A commonly accepted domesticated household animal (such as a dog, cat, bird, etc.) owned or kept by a Tenant.

AA. *Project.* A project is the total number of rental housing units in one community such as a densely settled area, town or village operated under one management plan with one loan agreement/resolution. The rental units may have been developed originally with separate initial loans and separate loan agreements/resolutions, now consolidated into one operational project according to § 1965.68 of Subpart B of Part 1965 of this chapter.

BB. *Rental Agent.* The individual responsible for the leasing of the units. If other than the borrower, this individual may be hired by the borrower, or the management agent as specified in the management plan.

CC. *Rental Assistance (RA).* RA, as used in this Exhibit, is the portion of the approved shelter cost paid by FmHA to compensate for the difference between the approved shelter cost and the monthly tenant contribution as calculated according to paragraph IV of this Exhibit. When the monthly gross tenant contribution is less than the approved utility allowance which is billed directly to and paid by the tenant, the owner will pay the tenant that difference according to paragraph IX A 2 of Exhibit E to his Subpart.

DD. *Resident Assistant.* A person(s) residing in a housing unit who is essential to the well-being and care of the elderly, disabled or handicapped person(s) residing in the unit and who is not related by blood, marriage or operation of the law to these tenants. The resident assistant is not considered to be part of the household and is not subject to the eligibility requirements of a tenant. The resident assistant receives compensation from sources other than FmHA. A resident assistant is not a chore service worker.

EE. *RCH* means Rural Cooperative Housing Loans.

FF. *RHS* means Rural Housing Site Loans.

GG. *RRH* means Rural Rental Housing Loans.

HH. *Shelter Cost.* The approved shelter cost consists of basic and/or market rent plus any utility allowance, when required. Basis and/or market rent must be shown on the project budget for the year and approved according to § 1930.124 of this Subpart. Utility allowances, when required, are determined and approved according to Exhibit A–5 to Subpart E of Part 1944 of this Subpart. Any change in rental rates or utility allowances must be processed according to Exhibit C of this Subpart.

II. *Site Manager.* The individual employed by the borrower or the managment agent who lives at or near the project site and is responsible for the day-to-day operations of the project. A site manager residing at the project site may also be referred to as a resident manager.

JJ. *Tenant.* A tenant also includes a co-tenant and is a person(s) who has signed a lease and will be, or is an occupant of a unit in an RRH, RCH or LH project. A person who has ceased to be an occupant, but whose personal property remains in the rental unit will be considered a tenant until such personal property is removed voluntarily or by legal court proceedings.

KK. *Tencnt Contribution.* The portion of the approved shelter cost paid by the tenant household (tenant rent). For tenants not receiving HUD Section 8, this amount will be calculated according to Form FmHA 1944–8, "Tenant Certification." For tenants receiving HUD Section 8, this will be the amount referred to on HUD Form 50059 (or other HUD approved Form), as family contribution. The proportion of tenant income and adjusted income paid as the tenant contribution will vary according to the type of subsidy provided to the household.

LL. *Very Low-Income Household.* A household having an adjusted annual income within the maximum very low-income limit stated in Exhibit C of Subpart A of Part 1944 of this chapter.

III. Borrower Responsibilities

A. *General.* All borrowers are responsible for:

1. Understanding the distinction between FmHA supervised credit and the credit provided by other Federal, State, or conventional sources.

2. Meeting the objectives for which the loan and/or grant was made and complying with the respective program requirements.

3. Understanding the unique characteristics and function of their particular type of borrower entity as provided by charter, articles of incorporation, by-laws, and/or statute.

4. Assuring that a site manager or contact person is in close proximity to their MFH project.

5. Complying with the provisions of their security instruments and any directive issued by FmHA.

B. *Borrowers Without a Loan Agreement.* Unless otherwise specified, these borrowers are exempt from the requirements of this Subpart, except for Exhibit C (Rent Changes), as long as the borrower is not in default of any program requirement, security instrument, payment, or any other agreement with FmHA. However, these borrowers must provide evidence of tenant income eligibility by properly completing a Form FmHA 1944–8 for each tenant as required by the FMI.

C. *Borrowers With a Loan and/or Grant Agreement.* These borrowers are responsible for meeting the requirements and conditions of their agreement/resolution and the requirements of this Subpart.

D. *Borrowers With Government Bodies.* The elected or appointed officials comprising the governing body of the borrower are responsible for:

1. Maintaining records of all current members and maintaining membership at the required level.

2. Holding meetings as required by the organizational documents, and as otherwise necessary, to provide proper control and mangement of its operations, and to keep the membership informed.

E. *Borrowers With a Membership.* Members of a membership type borrower are responsible for full support of the project and operation by:

1. Promptly paying any dues, fees and other required charges.

2. Electing responsible officials.

3. Complying with organization rules and regulations.

4. Participating in annual and special meetings.

F. *Delegation of Responsibility and Authority.* The borrower may delegate or assign management responsibilities to a property manager such as a management agent, a site manager, or as appropriate, a caretaker. Delegations or assignments of duties and responsibility will be included in written documents such as management agreements. FmHA will hold the borrower ultimately responsible for management of the project. FmHA may require a borrower to change the plan of project management and/or make appropriate redelegations of project management responsibility to achieve program objectives.

IV. Rent Subsidy Opportunities

The available subsidy programs should be considered at the time of developing a project proposal and during project operation as they may be available to meet the tenant's needs. These subsidy programs are as follows:

A. *FmHA Interest Credit—RRH and RCH Loans.* Regulations are contained in Exhibit B to Subpart E of Part 1944 of this chapter and include:

1. Plan I—Only those borrowers who received this type of interest subsidy prior to October 27, 1980, may continue to utilize this Interest Credit Plan. Those broadly-based nonprofit corporations and consumer cooperatives may continue operating under this plan provided:

a. Occupancy is limited to very low- or low-income non-elderly; very low-, low- and moderate-income elderly, disabled or handicapped persons.

b. Budgets and rental rates are based on a 3 percent loan amortization. The rent schedule consists only of "market" rental rates.

2. Plan II—This interest subsidy is available to broadly-based nonprofit corporations, consumer cooperatives, State or local public agencies, or to other organizations and individuals operating on a limited profit basis.

a. Occupancy is limited to very low, low- and moderate-income persons except as noted in paragraph VI B 2 c (8) of this Exhibit.

b. Budgets are prepared for two rental rates, basic and market. The minimum (basic) rental rate for tenants not receiving rental assistance is based on a 1 percent loan amortization. The maximum (market) rental rate is based on the loan amortized at the interest rate shown in the promissory note.

c. Tenant's contribution for shelter cost, calculated according to the FMI for Form FmHA 1944–8, may not exceed the *highest* of:

(1) Thirty (30) percent of monthly *adjusted* income, or

(2) Ten (10) percent of gross monthly income, or

(3) If the household is receiving payments for public assistance from a public agency, the portion of such payments which is specifically designated by that agency to meet the household's shelter costs (Example in paragraph II C 1 j (2) of this Exhibit), or

(4) The basic rent where no rental assistance is available.

d. Any tenant contribution increase caused by the change from 25 percent of the household adjusted income to the greater of c (1), (2), or (3) or by other provision of Federal Law or Federal regulation is restricted to not more than 10 per centum in any 12 month period unless the increase above 10 per centum is attributable to an increase in income.

e. Rural rental housing borrowers whose loans were approved on or after August 1, 1968, may convert from Plan I to Plan II. When they are presently a full profit operation they must convert to Plan II by executing a new or amended loan resolution or loan agreement and an interest credit and rental assistance agreement according to Exhibit B of Subpart E of Part 1944 of this Chapter.

B. *Rental Assistance (RA) Program—FmHA.* This is a subsidy program available to RRH, RCH and LH borrowers to assist very low- and low-income tenants in paying their shelter cost. RA is not authorizd for tenants whose adjusted income is above the low-income level. RA is not available to LH borrowers who are individual farmowners, partnerships, family corporations, or association of farmers. RRH borrowers with loans approved on or after August 1, 1968, must be operating under, or change to, Interest Credit Plan II to receive RA. Full Profit borrowers may utilize rental assistance by converting to a Limited Profit operation. The provisions of the RA program are covered in detail in Exhibit E of this Subpart.

C. *Department of Housing and Urban Development (HUD)—Section 8 Housing Assistance Payments Program.* This subsidy program is administered by HUD or the local public housing agency. Projects operating under the Memorandum of Understanding between FmHA and HUD (Exhibit H to Subpart E of Part 1944 of this Chapter) will also be subject to the requirements of the Housing Assistance Payments (HAP) Contract executed by the borrower. Projects accepting tenants utilizing Section 8 assistance assigned by a local public housing agency will also comply with any requirements imposed by such agency. However, in all cases tenants receiving Section 8 assistance must meet the eligibility requirements specified in paragraph VI B of this Exhibit. Requirements that conflict with FmHA requirements should be referred to the District Director for guidance. (Generally, the most restrictive HUD or FmHA requirements or limitations will apply.) Additional information on the HUD Section 8 program is contained in Exhibits G and H to Subpart E of Part 1944 of this Chapter.

V. Management Operations

A. *Management Plan.* A comprehensive management program is essential to the successful operation of a project. A written plan is the primary ingredient which should describe the detailed policies and procedures in managing the project. *Unless progrom regulations specifically permit an exception, a management plan is required for:* (1) All proposed multiple housing projects; (2) existing projects in which the loan, transfer, or reamortization, was approved after October 27, 1980; and (3) any other multiple housing projects where the State Director determines a management plan is needed because of loan delinquency or default, neglected maintenance, or known landlord-tenant problems. The plan should be developed in detail commensurate to project size and complexity and should be reviewed annually and updated by the borrower at least biennially. Exhibit B–1 of this Subpart outlines the requirements of the plan. The

following items, as a minimum, should be addressed in the plan.

between the owner and the management agent. The amount of compensation must be

owner (either as the individual borrower or

project's management plan. The rental rate will then be determined as follows:

Housing loan programs. With the prior approval of the State Director, owners may

a. SIGNS, BROCHURES, ETC. Any radio, TV or newspaper advertisement, signs,

VOL 50 ISS 136 JL 16 1985 UMI

following items, as a minimum, should be addressed in the plan.

1. The relationship between owner and management agent (when applicable).
2. Personnel policy and staffing arrangements.
3. Publicizing and achieving early occupancy and affirmative marketing.
4. Tenant certification and verification of income.
5. Tenant admissions policies and leasing policies.
6. Rent collection.
7. Rent changes.
8. Maintenance.
9. Records Maintenance and reports.
10. Energy conservation measures.
11. Tenant participation in project operations and tenants' relationship with management.
12. Termination of leases and evictions.
13. Management of Support Services to congregate and/or group home projects.
14. Management Background and/or Experience.
15. Management agreement (when applicable).
16. Management compensation.
17. Occupancy policy.

B. *Management Agreement.* The management agreement is the primary document by which the management agent is guided, evaluated, and compensated. It bears a close relationship to the management plan. A management agreement is required except in cases where the borrower (owner) fills the role of manager. Requirements of a management agreement are listed in Exhibit B–2 of this Subpart. Exhibit B–3 of this Subpart is a suggested management agreement. The two types of agreements acceptable to FmHA, are described as follows:

1. The owner hires a professional management agent to oversee and operate the project. The management agent may provide a site manager for onsite management and/or caretaker when justified by the size of the project. A qualifications statement by the management agent is required by the borrower and FmHA. Exhibit B–4 of this subpart provides a guideline for preparing the statement.

2. The owner maintains all or a part of the management role. The owner may use the services of a site manager in providing onsite management and/or services of a caretaker when justified by the size of the project. FmHA requires a qualifications statement by the owner who proposes to personally provide the management to determine management capability. Exhibit B–5 of this Subpart provides a guideline for preparing the statement.

C. *Responsibility.* The management plan and management agreement must be based on applicable provisions of local, State, and Federal statues and the regulatory requirements of the loan used to finance the project, regardless of the management system used. The owner remains totally responsible to FmHA for the project, regardless of the authority delegated by the owner to the management agent.

D. *Compensation.*

1. *Projects with management agent.* The amount of compensation is to be negotiated between the owner and the management agent. The amount of compensation must be reasonable, typical when compared with similar services available in the area, and earned. The amount of compensation or "fee" should generally be stated on a monthly per occupied unit or as a percentage of rents collected for each occupied unit. Rents collected could include any rental assistance and/or interest credit subsidy. The fee should vary from project to project depending upon size, complexity, services to be provided, type of project, age of loan and other relevent factors, such as comparable fees for similar projects in the area in which the project is located. The State and District Offices shall assemble data on comparable management fees in the District and State to be used as a basis for determining the fairness of fees negotiated between borrowers and management agents.

a. The management agreement must specifically define any project services to be provided that are to be paid directly from the Owner's Operating and Maintenance Account by the management agent; but not included in the agent's management fee. These costs may include the following budget line items:

(1) Cost of salary and wages of the project's site manager and/or caretaker. (These persons will be hired and/or dismissed by the management agent.) The management plan must specify the duties of the site manager.

(2) Legal fees for the project.

(3) Auditing fees for the project.

(4) Repair and maintenance costs for the project.

b. The management agreement must also define costs that accure to the management agent, but not directly to the project. The management fee will include cost such as:

(1) Monitoring project operations, training and supervision of on-site staff.

(2) Establishing a system to keep project books, reports, records, and accounts.

(3) Preparation and distribution of monthly reports.

(4) Preparation and distribution of annual reports of operations and maintenance.

(5) Preparation of requests for reserve withdrawal, rent adjustment, rehibilitation and energy conservation proposals, plans and specification.

(6) Review of tenant certifications and submission of monthly RA requests. Assure protection of project receipts and make project invoice and payment disbursements.

(7) Management agent's office overhead including office space and utilities, clerical staff and training, agent's office bookeeping, office supplies and equipment, transportation and telephone calls to projects, office data processing systems and postage.

(8) Supervision by management agent (time, knowledge, and expertise) of overall operations and capital improvements.

(9) Meeting with owners, investors, and/or lending agency.

(10) Development, preparation, and revision of management plans and/or agreements.

2. *Owner monaged projects.* The owner will be authorized to manage the project only when FmHA detemines in writing that the owner (either as the individual borrower or as a part of an organizational/borrower) has the necessary management capabilities.

Projects with owners having identity-of-interest relationships to the management agent will *not* be considered as an owner managed project. A typical management fee may be charged as an expense to the project. The compensation must be according to the provisions of paragraph V D of this Exhibit and be reasonable, earned, and not exceed the normal cost of similar services, had such services been provided by an independent management agent.

3. *Initial Rent-Up Fees.* Payment of fees for a one-time effort to achieve initial rent-up of a newly constructed project is permitted when it is determined necessary and documented by the FmHA loan approval official and the loan applicant. Rent-up fees should be paid on a per-unit basis only after each unit has been occupied by the initial tenant. Payment of the rent-up fee and other project management start-up expenses should generally be made from the 2 percent initial operation and maintenance fund as follows:

a. In owner managed projects or when there is an identity of interest as defined in § 1924.4(h) of Subpart A of Part 1924 of this Chapter between the management agent and the borrower, such as the owner or the owner's principals or family members owning an interest in the management firm (or vice versa), initial rent-up fees may be allowed but only up to reasonable actual cash expenditures.

b. When there is not an identify of interest, a person or firm, preferably the management agency, may be compensated at a rate negotiated with the applicant/borrower that represents reasonable compensation for the incurred marketing cost and project management start-up expenses.

E. *Site Manager and/or Caretaker Services.* The onsite services of a site manager and/or caretaker may be used when jusitifed by the size, composition and location of a project, whether the project is managed by a management agent or by the owner. There should be a written agreement between the owner or the management agent and the site manager to define the role and duties of the site manager and to provide a basis for evaluating the site manager. FmHA may require an onsite resident manager and/or caretaker to assure that the loan objectives are met and/or to protect the tenant's or government's interests. It is desirable but not mandatory the site manager and/or caretaker meet the tenant eligibility requirements for occupancy in the project.

1. *Calculation of rental rate for site manager or caretaker.* The associated cost of the unit occupied by the site manager or caretaker will always be reflected in the project budget the same as the cost for other non-revenue producing portions of the project. When a unit for the site manager or caretaker was authorized by the State Director according to the requirements of § 1944.212(g) of Subpart E of Part 1944, the unit may or may not be designated as part of the non-revenue producing facilities. This determination will be reflected in the project's management plan. The rental rate will then be determined as follows:

a. If the unit is planned or designated as a revenue producing unit, the compensation paid to the site manager and/or caretaker will be reflected in the operation and maintenance expenses of the project and will be included in the annual income of the site manager and/or caretaker. The site manager and/or caretaker's rent contribution will be based on their total income from all sources.

b. When a living unit is provided at a reduced cost to the site manager and/or caretaker in a Plan II project, the rental value of the unit will be considered to be basic rent. The portion of rent furnished by the project in the form of rent reduction below the basic rent will be reflected in the operation and maintenance expenses of the project. Debt payment will be as if the unit were rented at basic rent.

c. When a living unit was planned as a revenue producing unit but is provided at no cost to the site manager and/or caretaker in a Plan II project, the rental value of the unit will be considered to be basic rent. The associated cost of the unit will be treated the same as those of other non-revenue producing portions of the project. Project rental rates will be established as if the unit did not exist as living quarters. Debt payment will be as if the unit were rented at basic rent.

d. When a living unit is provided at no cost or reduced cost to the site manager and/or caretaker in a Plan I or profit type operations project, the rental value of the unit will be considered to be the FmHA approved "market" rental rate.

e. When the site manager and/or caretaker resides in a living unit and pays rent, the rental rate will be calculated as follows:

(1) If the site manager and/or caretaker meets the tenant eligibility requirements for the type of project being occupied, the appropriate rental rate will be the rate established for an eligible tenant in accordance with paragraph VI B of this Exhibit.

(2) If the site manager and/or caretaker does not meet the tenant eligibility requirements for the type of project being occupied because the site manager's and/or caretaker's adjusted annual income exceeds the maximum income limits, the site manager's and/or caretaker's appropriate rental rate for all projects except those operating under interest credit Plan I will be the FmHA approved market rental rate for the size of unit occupied. For interest credit Plan I projects, the appropriate rental rate will be the FmHA approved market rental rate for the size of unit occupied, plus 25 percent.

f. If the unit was planned and designated as a non-revenue producing unit, it will be treated as any other essential facility for which loan funds were authorized so long as it is used according to the approved management plan. The operating costs, reserve payment and debt service for the manager or caretaker's unit will be budgeted as a part of the overall cost of operation.

2. *Owner Occupancy.* Homeownership is not an objective of the FmHA Mulitple Housing loan programs. With the prior approval of the State Director, owners may occupy a unit in the project when the owner will manage the project rather than hiring a management agent or a site manager. The size, composition, and location of the project must justify the services of a site manager or caretaker, and the State Director must determine the owner is capable of performing these services. The rental rate will be included as described in paragraph V E 1 of this Exhibit.

F. *Projects Without a Site Manager and/or Caretaker.* Projects without a site manager and/or caretaker must have, at a minimum, a tenant who will serve as a contact person or have a person who is easily accessible to the project who is able to represent the project manager or owner on maintenance and management matters.

VI. Renting Procedure

Preparations for initial rent-up, occupancy and maintenance will begin 90–120 days ahead of the projected completion date of the project. This procedure will include a prerent-up conference between the FmHA District Director, the borrower, and the person(s) responsible for project management. Decisions to be made concern the advertisement of available units, affirmative marketing practices, tenant eligibility, and tenant selection criteria.

A. *Affirmative Fair Housing Marketing Plan.* All borrowers with *five* or more rental units must meet the requirements of § 1901.203(c) of Subpart E of Part 1901 of this Chapter by preparing and submitting an Affirmative Fair Housing Marketing Plan on HUD Form 935.2. Records must be maintained by the borrower reflecting efforts to fulfill the plan and will be subject to review by FmHA during compliance reviews for Title VI of the Civil Rights Act of 1964. *The approved plan will be made available by the borrower for public inspection upon request at the borrower's place of business, rental office, or at any other location where tenant applications are received for the project.* In developing the plan, the following items should be considered:

1. *Direction of Marketing Activity.* The plan should be designed to attract applications for occupancy from all potentially eligible groups of people in the housing marketing area regardless of race, color, religion, sex, age, marital status, national origin, or physical or mental handicap (must possess capacity to enter into legal contract). The plan must show that efforts will be made to reach very low-income, low-income and minority persons who traditionally would not be expected to apply for such housing without special outreach efforts.

2. *Marketing Program.* The applicant or borrower should determine which methods of marketing such as radio, newspaper, TV, signs, etc. are best suited to reach those very low-income, low-income and minority persons who otherwise might not apply for occupancy in the project. The aging network such as the State and Area Agencies on Aging should be contacted to assist in reaching elderly persons.

a. SIGNS, BROCHURES, ETC. Any radio, TV or newspaper advertisement, signs, pamphlets, or brochures used must contain appropriate equal opportunity statements. A copy of this proposed material should be submitted along with the HUD Form 935.2 for approval. The nondiscrimination poster entitled, "And Justice For All" and/or the "Fair Housing" poster must be displayed in the rental office. If the rental office is not on site, the posters must be displayed in a common conspicuous place on the site.

b. COMMUNITY CONTACT. Special interest groups such as social and religious organizations should be contacted in small communities without formal communication media aimed at minorities. Community contacts should also be used in reaching specific elements of the community such as the elderly or particular ethnic groups.

c. RENTAL STAFF. All staff persons responsible for renting the units will be instructed in the procedures and requirements of the Affirmative Fair Housing Marketing Plan and in those actions necessary to carry out the plan promoting equal housing opportunity.

3. *Marketing Records.* The borrower will be required to provide data according to Subpart E of Part 1901 of this Chapter, pertaining to compliance reviews, to indicate to what extent minority groups are being benefited.

B. *Tenant Eligibility.* The rental agent of the project must be knowledgeable about the FmHA tenant eligibility requirements as they relate to a particular project. FmHA loans require occupany of the units by eligible tenants. Except for migrant farm worker tenants, tenant/applicants must certify on their application that the housing they will occupy is/will be their permanent residence. They will further certify that they do/will not maintain a separate subsidized rental unit in a different location.

1. ELIGIBLE TENANTS. The following tenant eligibility criteria will apply where appropriate, unless otherwise authorized:

a. To determine eligibility for occupancy the applicant's income must be a defined in paragraph II K and include net family assets as defined in paragraph II W of this Exhibit.

b. The adjusted annual income must meet the defintion of very low-, low- or moderate-income as defined in this Exhibit as required for that specific project for applicant selection, tenant contribution and continued occupancy.

c. To determine eligibility for continued occupancy, the tenant's Adjusted Annual Income must be determined at least once every 12 months. When the tenant's Adjusted Annual Income exceeds the moderate-income limit established for the area in which the project is located, the tenant is no longer eligible and will be required to vacate the project according to the terms of the lease and paragraph VI B 5 of this Exhibit.

d. In RRH projects operating on a Plan I basis, tenants will:

(1) Be a very low-, low-, or moderate-income elderly, disabled or handicapped person.

(2) Be a very low or low-income non-elderly, non-disabled or non-handicapped

k. For LH projects and units in RRH projects specifically designed and designated

1985
UMI

(2) Be a very low or low-income non-elderly, non-disabled or non-handicapped person.

e. In RRH project operating on a non-profit or limited profit Plan II basis, tenants will be a very low-, low-, or moderate-income persons regardless of age, disability or handicapped condition.

f. In RRH projects operating on a full-profit basis, tenants will:

(1) Be an elderly, disabled or handicapped person of any income.

(2) Be a very low-, low-, or moderate-income non-elderly, non-disabled or non-handicapped person.

g. In labor housing (LH) projcets designed and operated either for year-round or seasonal occupancy, tenants will be domestic farm laborers.

h. Occupancy in RRH projects or those portions of RRG projects designated by FmHA as:

(1) Family housing may be by any combination of elderly, disabled or handicapped, and/or non-elderly, non-disabled or non-handicapped tenants.

(2) Elderly housing must be by elderly, disabled and/or handicapped tenants but not restricted exclusively for us by disabled and/or handicapped tenants.

i. Tenant households must generally be capable of caring for themselves and must meet the following criteria:

(1) Not be totally dependent on others to be able to vacate the unit for their own safety in emergency situations. Tenant households are eligible for occupancy when a member of the household is disabled if adequate care and assistance is provided by the tenant household for the safety and well-being of the disabled household member.

(2) Possess the legal capacity to enter into a lease agreement, except in the case of tenants residing in a congregate housing project who have a legal guardian.

(3) Persons meeting the definition of elderly in paragraph II I of this Exhibit may be considered an eligible tenant or co-tenant if more suitable housing will improve their ability to live independently. The disability or handicap must be supported by a doctor's certificate and must meet one of the definitions in paragraph II I of this Exhibit. Receipt of veterans benefits for disability, whether service-oriented or otherwise, does not automatically establish disability. The owner-manager must make the determination based upon evaluation of the applicant's condition and the documentation presented.

j. In congregate housing projects, eligible tenants will include elderly, disabled or handicapped persons who require some supervision and central services, but are otherwise able to care for themselves. They must be able to provide for their own sustenance in projects that provide less than a full meal program. The borrower will regularly assess the level of function and degree of competence of the tenant and/or co-tenant's ability in performing daily living activities. This assessment should enable the borrower to determine whether or not the tenant can maintain relatively independent occupany given the supportive services in the project (see Exhibit B–10 to this Subpart). The tenants must also meet the criteria found in paragraph VI B 1 h above.

k. For LH projects and units in RRH projects specifically designed and designated for the elderly, disabled and/or handicapped as defined by FmHA, occupancy is limited solely to those meeting the eligibility requirements for the specific type of project (i.e., domestic farm laborers, elderly, disabled and/or handicapped). Eligible occupants in these projects may also include other persons who are usually household members of the domestic farm laborer, elderly, disabled or handicapped persons. Resident assistants or chore workers will not be considered to be members of the tanant household.

l. In a group home situation, a Resident Assistant may occupy separate living space of appropriate size without regard to income.

m. A student or other seemingly temporary resident of the community who is otherwise eligible and seeks occupancy in a RRH project may be considered an eligible tenant when all of the following conditions are met:

(1) Is either of legal age in accordance with applicable State law or is otherwise legally able to enter into a binding contract under State law.

(2) The person seeking occupancy has established a household separate and distinct from the person's parents or legal guardians.

(3) The person seeking occupancy is no longer claimed as a dependent by the person's parents or legal guardians pursuant to Internal Revenue Service regulations, and evidence is provided to this effect.

(4) The persons seeking occupancy signs a written statment indicating whether or not the person's parents, legal guardians, or others provide any financial assistance and such financial assistance is considered as part of current annual income and is verified in writing by the borrower.

n. A former domestic farm laborer may continue occupancy of a LH project after retirement or after becoming disabled if the farm laborer was an eligible tenant living in the project prior to the event.

o. A tenant who does not personally reside in a unit for a period exceeding 60 days, for reasons other than health or emergency, shall be required to pay market rent in Plan II projects or 125 perecnt of rent in Plan I projects for the period of absence exceeding 60 days.

(1) If the tenant continues to be absent from the unit, the borrower must notify the tenant by certified mail at least 30 days prior to the end of the leasing period, to occupy the living unit by the end of the lease period or the borrower will start eviction proceedings.

(2) In those cases existing before the issuance of this Subpart on *December 19, 1983*, where the tenant's lease does not contain the lease clause in paragraph VIII B 3c of this Exhibit, the tenant will be advised that the lease will not be renewed.

2. OCCUPANCY POLICY: Occupancy policy in FmHA financed projects shall have the objective of effective utilization of space without overcrowding or providing more space than is needed by the number of people in the household.

a. Each borrower must develop an occupancy policy tailored to the design, location and intended occupants for each specific project by adopting the following guidelines or by developing a more detailed policy and obtaining Farmers Home Administration written approval.

b. The following should be considered when adopting the policy outlined in paragraph c of this section or in developing a detailed project occupancy policy:

(1) The size of each bedroom and common living area in each unit.

(2) the amount of open space and/or recreation area in the project and the number of tenants who could reasonably use this area without overcrowding or underoccupying the units.

c. Management shall assign units based upon the number of persons in the household and the relationship and sex of those persons. In matching unit size with household need, management must balance the need to avoid overcrowding with the objective of maximizing use of space and avoiding unnecessary tenant subsidy cost.

(1) Every member of the household, regardless of age, shall be counted as a person. An unborn child may, at the discretion of management, be counted for purposes of determining the appropriate size unit for an eligible household.

(2) Foster children may be counted *only* for determining the appropriate size unit.

(3) It is expected that two children of the same sex will share a bedroom and that usually, only two children will be assigned to a bedroom. However, in projects with more spacious bedrooms, management may permit three children to occupy one bedroom if units with more bedrooms are not available in the project or if the tenant wishes to put three children in one bedroom to avoid the additional rent associated with a larger unit. (Consideration must always be given to the amount of common living area available to accommodate a larger family.)

(4) Units should be assigned so that it will not be necessary for persons of the opposite sex, other than tenant and co-tenant, to occupy the same bedroom. However, if the tenant requests that children of the opposite sex or a parent and a young child be permitted to occupy the same bedroom, management may honor the request.

(5) Without FmHA approval, management may assign a larger or smaller unit than the household needs if all the following conditions are met:

(i) No household, otherwise eligible and having the number of members appropriate to the unit, is available to occupy the unit and management has made a diligent effort to reach tenants who qualify for the larger or smaller size unit;

(ii) The tenant agrees to transfer to the first correctly-sized unit if and when it becomes available in the project;

(iii) The tenant agrees to pay all costs associated with the subsequent move; and

(iv) The agreements in (ii) and (iii) above are included in the tenant's lease.

(6) Borrowers with RRH projects specifically built for the elderly prior to October 27, 1980, with only a few or no one-bedroom units, may permit occupancy of two bedroom units by single eligible tenants if this provision is included in the project occupancy policy. The occupancy policy should reflect the needs of the local market area. This eligibility determination made by management must be included in the tenant's lease and will entitle such tenant to all benefits without need for further FmHA approval.

(7) When a unit cannot be rented under the provisions in paragraphs (5) and (6) above, the State Director may authorize an exception according to paragraph VI B 6 of this Exhibit.

(8) A tenant who was determined eligible and allowed to occupy under regulations in effect prior to (*effective date of this regulation*) who does not meet eligibility requirements regarding income or borrower occupancy policy as prescribed in these regulations may be permitted continued occupancy in the same unit.

(9) The following table represents the occupancy standards that were required prior to the issuance of this regulation on (*dote of final rule*) and will continue in effect for projects approved before that date until the owner meets the requirements of paragraph A of this section. Further, it will serve as the desirable occupancy level for all Multiple Family Housing projects:

	Occupants	
	Min	Max
No. bedrooms:		
0	1	2
1	1	2
2	2	4
3	4	6
4	6	8
5	8	10

(10) Owner of migrant farm labor housing will comply with local or State design requirements and occupancy standards.

d. For each RRH project specifically built for the elderly, the borrower or management may not:

(1) Prohibit, prevent, restrict or discriminate against any tenant who owns or keeps a pet in their apartment unit, with respect to continued occupancy in the project unless the approved project pet rules are violated.

(2) Prohibit, prevent, restrict or discriminate against any applicant who owns a pet with respect to obtaining occupancy to the project.

3. OTHER ITEMS THE RENTAL AGENT SHOULD CONSIDER IN DETERMINING ELIGIBILITY OF APPLICANTS FOR ADMISSION TO THE PROJECT.

a. Credit reports to reflect the applicant's past record of meeting obligations.

b. Prior landlord references to determine if the tenant was responsive to meeting rent payment obligations, care, and maintenance of the unit.

c. Verification of income and/or employment according to paragraph VII of this Exhibit. This item is a requirement in all cases.

d. The applicant's financial capability to meet other basic living expenses and the rental charge, taking into consideration any subsidy assistance that could be made available to the tenant. Where rental assistance is not available, any very-low or low-income household that would be required but unable to pay the approved rent, including utilities, may be eligible for some form of rent subsidy described in paragraph IV of this Subpart if it is available in the area.

4. SURVIVING MEMBERS OF ELIGIBLE TENANT HOUSEHOLD.

a. Surviving members of an elderly, disabled and/or handicapped tenant's household may continue occupancy of the unit even though they may not meet the definition of an elderly, disabled or handicapped person stated in paragraph II of this Exhibit, provided:

(1) They are eligible occupants in all other respects,

(2) They occupied the unit at the time that the original tenant ceased to occupy the unit, and

(3) The District Director determines on a yearly review basis that their continued occupancy will not be detrimental to the integrity of the project in the community.

b. Surviving members of a domestic farm laborer household may continue to occupy when they meet the definition of a domestic farm laborer as defined in paragraph II of this Exhibit. When they do not meet the definition, the provisions for formerly eligible tenants in paragraph VI B 5 of this Exhibit will apply.

5. FORMERLY ELIGIBLE TENANTS. Unless authorized by paragraph VI B 2 c (8), formerly eligible tenants will be required to vacate their unit within 30 days (7 days for migrant farm labor tenants with week-to-week lease agreements) or the end of the term of their lease agreement, whichever is longer, when an eligible applicant is on the waiting list and is available for occupancy. If vacating the unit in the time period described creates an undue hardship on the family, the District Director may permit continued occupancy for a reasonable period of time. The following "formerly eligible" situations apply to this paragraph:

a. Tenants who no longer meet FmHA income eligibility requirements. (This includes tenants receiving Rental Assistance or Section 8 assistance.)

b. Tenants in LH projects who no longer meet the farm labor occupation requirement, except retired or disabled domestic farm laborers who are eligible tenants at the time of their retirement or becoming disabled may continue to occupy a project that they initially occupied as an eligible domestic farm laborer.

c. Tenants who no longer meet the occupancy policy for the project. These tenants must either move to a unit of appropriate size in the project, or when none is available, vacate the project at the termination of their lease.

6. STATE DIRECTOR AUTHORITY TO PERMIT AN RRH OR LH BORROWER TO RENT TO INELIGIBLE TENANTS.

a. The State Director may authorize the borrower in writing, upon receiving the borrower's written request with the necessary documentation, to rent *units* to ineligible persons for temporary periods to protect the financial interest of the Government. This authority will be for periods not to exceed one year. Within the period of the lease the tenant may not be required to move for any reasons of ineligibility. When the District Director has been redelegated the authority, according to § 1930.143 of this Subpart, a copy of the authorization to rent to ineligibles will be forwarded to the State Office. The following determinations must be made by the authorizing FmHA Official.

(1) There are no eligible persons on a waiting list.

(2) The borrower provided evidence that a diligent but unsuccessful effort to rent any vacant unit(s) to an eligible tenant household has been made. Such evidence may consist of advertisements in appropriate publications, posting notices in several public places, and other places where persons seeking rental housing would likely make contact; holding open houses, making appropriate contacts with public housing agencies and authorities (where they exist), State and local agencies and organizations, Chamber of Commerce, and real estate agencies.

(3) The borrower will continue with aggressive efforts to locate eligible tenants and submt to the District Office, along with Form FmHA 1944–29, "Project Worksheet for Interest Credit and Rental Assistance," a report of efforts made. The required followup should be posted in the District Office on Form FmHA 1905–6, "Management System Card—Multifamily Housing."

(4) To protect the security interest of the Government the units may be rented for no more than a year after which the lease must convert to a monthly lease. The monthly lease must require that the unit be vacated when an eligible prospective tenant is available. The ineligible tenant will then be given 30 days to vacate.

(5) Tenants who are ineligible, because their household income exceeds the maximum for the project, will be charged the FmHA approved market rental rate for the size of unit occupied in a Plan II RRH project. In projects operated under Plan I, ineligible tenants will be charged rental surcharge of 25 percent of the approved market rental rate.

(6) Tenants who are ineligible for reasons other than income may benefit from rental assistance and/or intereet credit if they are otherwise eligible in the same manner as an eligible tenant.

b. Examples of situations where the State Director may consider authorizing a borrower to rent units to ineligible persons when units cannot be returned to eligible persons are:

(1) Permitting occupancy by other eligible families in a project designed for, designated as, and limited to occupancy by eligible elderly, disabled, and/or handicapped persons.

(2) A household that does not meet eligibility requirements regarding income, i.e., an above moderate-income household.

c. When the State Director or District Director determines that a borrower may rent to an ineligible tenant, the written authorization must contain the appropriate clauses which must be inserted into the ineligible tenant's lease. At a minimum it should include:

(1) The reason for ineligibility.

(2) The term of ineligible occupancy.

(3) Any conditions under which the tenant will be required to vacate the unit.

(4) The length of notice the tenant will be given to vacate.

C. *Maintenance of Inquiry and Waiting*

application process and the dates of project operation.

5. A Letter of Priority Entitlement (LOPE)

"The following information is requested by the apartment owner in order to assure the Federal Government, acting through its

1. Applicants determined eligible will be selected on a first come first-served basis

contain a clause "subject to verification of income."

E. *Use of HUD Certification Form for Section 8 Recipients.* HUD Form 50059,

(4) The length of notice the tenant will be given to vacate.

C. *Maintenance of Inquiry and Waiting Lists.*

1. When a prospective tenant inquires (by telephone, letter or visit) concerning the availability of a rental unit, the borrower or rental agent will place the prospect's name chronologically on an inquiry list. The list should contain enough information for future contact by mail or telephone. THIS LIST DOES NOT ESTABLISH ANY PRIORITY.

2. When a prospective tenant files an application for occupancy the borrower or rental agent will place the prospect's name chronologically on the appropriate written waiting list. An application is a written document(s) prescribed by the management providing sufficient information for the rental agent to complete the steps necessary to determine eligibility. the action determination of eligibility will be conducted according to the application process described in paragraph VI D of this Exhibit.

3. Separate waiting lists by categories and/or a master waiting list with income levels identified (very low, low and moderate), and categories or priorities indicated will be maintained for rural rental and year-round occupancy farm labor housing. Each list must be maintained in chronological order. When there are separate lists, they must be cross-referenced for prospective tenants who fit more than one category or priority.

a. Separate lists may be maintained for:

(1) Income levels (very low, low, moderate, ineligible).

(2) Various size units.

(3) Units for elderly, disabled or handicapped persons, families, or any other combination as planned for the project according to the borrower's loan agreement or resolution.

(4) Persons who require the special design features of the handicapped units in the project such as persons confined to a wheelchair. Persons on this list have priority for these units.

(5) Displacees, such as victims of natural disasters and eminent domain, to whom priority consideration may be given.

(6) In congregate housing projects, priority will be given to the frail or impaired eligible applicants to sustain an occupancy level of 25% to 35% of the project units. After this occupancy level is attained, priority will be given to non-frail or non-impaired applicants.

b. Separate waiting lists will be maintained for very low-income households who *are* eligible for rental assistance. This list may be compiled from the filed applications or extracted from the master list.

4. For seasonal farm labor housing a waiting list should be chronologically compiled as in paragraphs VI C 1, VI C 2 and VI C 3 of this exhibit. these lists should be maintained for the season in which the project will be operating. Prospective tenants should be advised that the waiting list will terminate on the closing date of the project in any given season.

a. Seasonal LH management plans should identify a date when applications will be accepted for a new operating season and a waiting list compiled.

b. A process should be specified in the plan for advising prospective tenants of the application process and the dates of project operation.

5. A Letter of Priority Entitlement (LOPE) issued by FmHA according to § 1965.90 of Subpart B of Part 1965 of this Chapter entitles prospective tenants to move to the top of any waiting list for that appropriate unit size for which the applicant qualifies.

6. Each list by category will be available for inspection by prospective tenants on the waiting list. When prospective tenants are first assigned to the waiting list, they will be notified of the category(s) to be assigned to their application.

7. Borrowers may establish a procedure for purging the inquiry and waiting list(s) periodically of prospective tenants who are no longer interested in occupancy. The borrower must inform each prospective tenant of this procedure and any actions they must take to maintain their priority position on the waiting list. When a name is removed from the waiting list the prospective tenant must be informed in writing at their last known address. The letter must include appeal rights under Subpart L of Part 1944 of this Chapter.

D. *Notification of Eligibility or Rejection.*

1. *Application Status for Determining Eligibility.* All persons desiring to apply for occupancy will be provided the opportunity to submit a complete application. The borrower or rental agent will provide prospective tenants with a written list of all information required for a complete application.

a. After the potential tenant has submitted all required forms and information but additional information is required, the borrower or rental agent must notify the applicant within 10 days of the items needed to complete a review of eligibility. The application file will be documented on the action taken.

b. When an operational project has few or no vacancies, and there are sufficient active applications from households determined eligible to fill expected vacancies, the borrower may postpone verification of eligibility for new applicants.

c. While application fees are discouraged, any fee charged to a prospective tenant must be reasonable and limited to actual costs for obtaining necessary information.

2. *Application Requirements.* At a minimum to be considered complete, applications must include the following information for each prospective tenant household:

a. Name and present address.

b. Household income and eligibility income information, verified and certified according to paragraph VII of this Exhibit.

c. Age and number of household members.

d. Handicap status, if applicable.

e. Race or ethnic group and sex designation.

(1) The borrower or management agent will request that each prospective tenant provide this information on a voluntary basis for statistical purposes only. When the applicant does not provide this information, the rental agent will complete this item based on personal observation or surname.

(2) The following disclosure notice shall appear on the tenant application form or on an amendment to the application:

"The following information is requested by the apartment owner in order to assure the Federal Government, acting through its Farmers Home administration, that Federal Laws prohibiting discrimination against tenant applicants on the basis of race, national origin, and sex are complied with. You are not required to furnish this information, but are encouraged to do so. This information will not be used in evaluating your application or to discriminate against you in any way. However, if you choose not to furnish it, the owner is required to note the race/national origin and sex of individual applicants on the basis of visual observation or surname."

3. *Notification to Applicant.* The applicant who has submitted a *completed* application will be notified in writing that he or she has been selected, rejected, or placed on a waiting list.

4. *Applicants Determined Ineligible.* Applicants determined ineligible will be notified in writing of the specific reasons for rejection.

a. The rejection letter must also outline the applicant's rights under the FmHA tenant Grievance and Appeals Procedures in Subpart L of Part 1944 of this chapter.

b. When the rejection is based on information from a Credit Bureau, the source of the Credit Bureau report must be revealed to the applicant in accordance with the Fair Credit Reporting Act.

c. Applicants may be rejected due to:

(1) A history of unjustified and chronic nonpayment of rent and financial obligations.

(2) A history of violence and harassment of neighbors.

(3) A history of disturbing the quiet enjoyment of neighbors.

(4) A history of violations of the terms of previous rental agreement such as the destruction of a unit or failure to maintain a unit in a sanitary condition.

d. Rejection of applicants on an arbitrary basis is prohibited. Examples of such arbitrary rejections are:

(1) Race, color, religion, sex, age, marital status, national origin, physical or mental handicap (except in those projects or portions of projects designated for elderly, disabled and/or handicapped, where occupancy by non-elderly, non-disabled or non-handicapped can be prohibited).

(2) Receiving income from public assistance.

(3) Familes with children of undetermined parentage.

(4) Participation in tenant organizations.

e. In the case of Labor Housing projects, no organization borrower other than an association of farmers or family farm corporation or partnership will be permitted to require that an occupant work on any particular farm or for any particular owner or interest as a condition of occupancy of the housing.

f. Rejected applications must be kept on file by the borrower or management agent until a compliance review has been conducted by FmHA in accordance with Subpart E of Part 1901 of this Chapter.

E. *Tenant Selection.*

1. Applicants determined eligible will be selected on a first come first-served basis according to the chronological order of each categorized waiting list or by chronological order of each income group identified on a master waiting list in the following priority:

a. Very low-income.

b. Low-income.

c. Moderate-income.

d. Ineligible.

2. When RA is available:

a. Very low-income applicants eligible for RA have a priority over all other applicants on each type of waiting list maintained by the borrower in accordance with paragraph XI of Exhibit E to this Subpart.

b. Low-income applicants may be selected provided no very low-income applicants remain on the waiting list.

c. Moderate-income applicants may not be selected where the number of unassigned RA units equals or exceeds the number of vacant units. (Borrowers unable to use RA may consider requesting a transfer of RA authority according to paragraph XV of Exhibit E.)

3. Selections will be made from the waiting list maintained for the particular unit size and/or unit type in which a vacancy exists. If the applicant cannot accept the unit at that time, the reason for not accepting the living unit will be documented. The applicant's name will then be removed from the waiting list unless the rental agent determines that hardship exists for reasons such as health problems or high cost of rent without rental assistance in which case the applicant's name will remian on the list in chronological order. An applicant whose name has been removed from the waiting list may reapply. Applicants who give *written* reasons why they cannot accept the living unit at the time it is offered forfeit their right to appeal the borrowers decision to remove their name from the waiting list.

4. When there is no applicant named on the waiting list for the size and/or type of vacant living unit, a name may be selected from the waiting list of another size and/or type of living unit according to the date order of the application on the master waiting list. The selected tenant will be subject to the provisions for ineligible tenants found in paragraph VI B 6 of this exhibit.

F. *Tenant Record File.* A separate file must be maintained for each tenant. This file will include items such as application, income verification forms, lease agreement and attachments, inspection reports for moving in and moving out, correspondence and notices to the tenant, and any other necessary information. The income verification, tenant eligibility certification and recertification information must be retained for a least 3 years while the tenant is living in the unit and for 3 years after the tenant has moved out.

VII Verification and Certification of Tenant Income and/or Employment

The incomes reported by the tenants (and employment in the case of LH tenants) selected for occupancy must be verified by the borrower or rental agent before the tenant is determined eligible. If in unusual circumstances a tenant is allowed to move in before income is verified, the lease should contain a clause "subject to verification of income."

A. *Verification of Income from Employment.* Verification of income from employment, authorized by the tenant/applicant, must be obtained from the employer in writing and filed in the "Tenant Record File." A suggested Employment Inquiry form is attached as Exhibit B-9.

B. *Verification of Income from Other Sources.* Any income from other than employment (e.g., social security, Veterans Administration, public assistance) must be verified in writing by the income source. Verification of income must be documented and filed in the "Tenant Record File." When it is not immediately possible to obtain the written verification from the income source, the income may be temporarily verified by actually examining the income checks, check stubs, or other reliable data the tenant possesses which indicates the tenant's gross income. Temporary verification may also be obtained through contacts with individuals who may be knowledgeable of the tenant's income. When no other verifiable source is available, a notarized affidavit from the tenant attesting to his/her gross annual income may be accepted.

C. *Verification of Income and/or Employment for LH Tenants.*

1. Verification of income is required for those domestic farm laborers, including migrants, who will receive the benefits of rental assistance. When the tenants do not have easily verifiable income, the borrower may project monthly income expected to be received by the tenant during occupancy for determining eligibility and subsidy assistance.

2. Verification that all LH tenants have sufficient income from farm labor employment, that meets the definition of domestic farm labor, is required for all domestic farm laborers, including migrants. Employment verification is an addition to income verification for those tenants described in paragraph VII C 1 above. Verification must be documented and filed in the "Tenant Record File."

D. *Random Sample of Tenant Income and/or Employment Verification.* District Directors are required to make a random sample of tenant income verifications; in the case of LH tenants, employment verifications. The random sample can be derived from information on the tenant certification forms that will be submitted to the District Office in accordance with paragraph VI F of this Exhibit. The random sample should be representative of very low-, low-and moderate-income persons in the project, including those receiving subsidy assistance, those paying in excess of the contribution level cited in paragraph IV A 2c (1) or (2) or: (3) of this exhibit for the costs of rent and utilities, and those paying the market rent. The District Director will conduct the random sample in the borrower's office during supervisory visits and at any time he/she may be knowledgeable of discrepancies in income and/or employment verifications. If the random sample discloses discrepancies, the District Director will be required to investigate further or report to the State Director to obtain the assistance of the Office of Audit or the Office of Investigations.

E. *Use of HUD Certification Form for Section 8 Recipients.* HUD Form 50059, "Certification and Recertification of Tenant Eligibiity," or another HUD form approved by HUD for this purpose, may be used in lieu of Form FmHA 1944-8 for the tenants receiving Section 8 assistance. However, the tenant's income cannot exceed FmHA limits for the type of housing project involved if it has been calculated according to the formula contained in Form FmHA 1944-8.

F. *Certification of Tenant Income.*

1. The borrower must initially submit Form FmHA 1944-8, or for tenants receiving Section 8 assistance the acceptable Department of Housing and Urban Development (HUD) tenant cetification form to the District Office for each tenant. The initial tenant certification must be submitted to the FmHA District Office on or before the day the tenant occupies the unit. The District Office will review the tenant certification and verify that the information contained on the form is complete and correctly computed based on information contained on the form.

2. Each tenant must be recertified within twelve months of the previous certification. Tenants receiving Section 8 assistance will be recertified according to HUD regulations.

a. Ninety (90) days prior to the required recertification, the District Office will notify the borrower in writing that a tenant recertification is required and specify the due date. The due date will be the first day of the month following the expiration date of the tenant certification. Failure to receive the notification does not relieve the borrower of responsibility to provide the recertification under the requirements of this regulation and Covenant 3 of Form FmHA 1944-7, "Multiple Family Housing Interest Credit and Rental Assistance Agreement."

b. The borrower must:

(1) Notify the tenant that a current tenant certification and income verification is required before the due date and explain the procedure necessary to accomplish recertification;

(2) Process the appropriate tenant certification and verification of income; and

(3) Submit the signed recertification to the District Office by the due date.

c. The borrower must provide a second written notice to the tenant 30 days prior to the due date if the tenant has not responded. The second notice must advise the tenant that without a current tenant certification, the tenant will be required to pay market rent and that eviction proceedings may be started as of the due date since an annual recertification is required for continued occupancy. If the tenant has rental assistance (RA), the tenant must be advised that without a current certification, the tenant's RA will be cancelled and may not be immediately available for reinstatement should a proper tenant certification be provided at a later date.

3. The borrower must submit Form FmHA 1944-29, "Project Worksheet for Interest Credit and Rental Assistance," to the District Office with each payment, report of overage or request for RA as required in paragraph XIII C 1 b of this Exhibit. The calculations on Part II of the form must be for tenants in

residence on the first day of the month for which the payment or request is submitted. All calculations will be made as if the tenant

Director. When submitting a lease form for FmHA approval, it must be accompanied by

amount of benefits to which I was not entitled."

amount of benefit to which I was not entitled. I also understand and agree that my monthly

shall be determined and redetermined including:

notice required for the tenant to exercise the right to terminate.

residence on the first day of the month for which the payment or request is submitted. All calculations will be made as if the tenant will be in residence for the full month. ADJUSTMENTS WILL NOT BE MADE TO THE BORROWER'S SUBSIDY PAYMENT OR CHARGES FOR OVERAGE FOR TENANTS MOVING IN OR OUT AFTER THE FIRST OF THE MONTH.

4. Paragraph VIII B 3 b of this exhibit is a required lease provision requiring tenants to notify the management of any permanent change in adjusted monthly income or size of household. Upon receipt of such notice, the borrower must obtain a new tenant certification and income verification. The new tenant certification will be submitted to the District Ofiice with the next payment transmittal reflecting the revised tenant contribution, if applicable.

5. When a borrower/agent believes that an applicant/tenant certification and income verification is inaccurate, they may provide the information including the tenant's social security number to the District Office requesting a further verification through the appropriate state employment agency. The District Office will forward the request to the State Director for submission to the state agency that keeps records on the incomes of wage earners. The State Director will develop a method of obtaining the information from the state agency.

VIII. Lease Agreements

A Lease Agreement is a written contract between the tenant and landlord assuring the tenant quiet, peaceful enjoyment and exlcusive possession of a specific dwelling unit in return for payment of rent and reasonable use and protection of the property.

A. *Form of Lease.* Each State Director is encouraged to prepare a sample lease form complying with individual State laws and FmHA requirements. The State Director may incorporate clauses which meet a specific need in compliance with State law. Any sample lease must be reviewed and approved by the OGC before being provided to borrowers as a guide for preparing an acceptable project lease.

1. All leases will be in writing and must cover a period of at least 30 days but not more than 1 year, except that leases for labor housing may be weekly where occupancy is typically seasonal. In areas where there is a concentration of non-English-speaking individuals, leases and the established rules and regulations for the project written in both plain English and the non-English concentration language must be available to the tenants. The tenant should have the opportunity to examine and execute either form of lease.

2. Annual leases should contain an appropriate escalation clause permitting changes in basic and/or market rents prior to the expiration of the lease. Rent changes would normally be necessary due to changing utility and other operating costs. Any changes must be approved by FmHA according to Exhibit C of this Subpart.

3. The form of lease to be used by the borrower and any modifications of the lease form must be approved by the FmHA District Director. When submitting a lease form for FmHA approval, it must be accompanied by a letter from the borrower's attorney regarding its legal sufficiency and compliance with State law and FmHA regulations.

4. A copy of a properly completed and approved Exhibit A–5, "Housing Allowances for Utilities and Other Public Services," of Subpart E of Part 1944 (when the tenant will pay utilities) and a copy of the established rules and regulations for the project will be provided to the tenant as attachments to the lease.

5. A copy of a properly completed and signed Form FmHA 1944–8, "Tenant Certification," or HUD 50059, "Certification and Recertification of Tenant Eligibility," for those tenants receiving HUD Section 8 tenant subsidy, will be used to calculate each tenant's contribution and will be provided to the tenant as an attachment to the lease.

B. *Required Lease Clauses.* The following clauses will be required in leases used in connection with FmHA financed housing projects.

1. All lease agreements must include a statement indicating that the project is financed by the Farmers Home Administration and is subject to the Title VI nondiscrimination provisions, and that all complaints are to be directed to the Secretary of Agriculture or to the Office of Equal Opportunity, USDA.

2. All lease agreements must also specify that should the tenant no longer meet the eligibility requirements of the project during the term of the lease agreement, he/she will be required to vacate the unit unless an exception is authorized by the State Director.

3. All leases used in FmHA financed RRH projects must include the following clauses except for elderly, disabled and handicapped persons in a full profit plan project:

a. "I understand that I will no longer be eligible for occupancy in this project if my income exceeds the maximum allowable adjusted income as defined periodically by the Farmers Home Administration for the (State/Territory)."

b. "I agree to immediately notify the lessor of any permanent change in the adjusted monthly income or change in the number of persons living in the household."

c. "I understand that if I do not personally reside in the unit for a period exceeding 60 days, for reasons other than health or emergency, my net monthly tenant contribution shall be raised to $ ——— per month (market rent for Plan II projects or 125 percent of rent in Plan I projects) for the period of my absence exceeding 60 days. I also understand that should any rental assistance be suspended or reassigned to other eligible tenants, I am not assured that it will still be available to me upon my return. I also understand that if my absence continues, that as landlord you may take the appropriate steps to terminate my tenancy at the end of the lease period."

d. "I understand that should I receive rental benefits to which I an not entitled due to my/our failure to provide information or due to incorrect information provided by me or on my behalf by others, or for any other household member, I may be required to make restitution and I agree to pay any amount of benefits to which I was not entitled."

e. "I agree to promptly provide any certifications and income verifications required by the owner to permit determination of eligibility and, when applicable, the monthly tenant contribution to be charged."

4. Leases used by borrowers participating in the FmHA rental assistance program will contain the following clauses. (These clauses can be made an addendum to the lease and they must be signed by the lessor and lessee):

"I understand and agree that as long as I receive rental assistance, my gross monthly tenant contribution (as determined on the latest Form FmHA 1944–8, which must be attached to this lease) for rent and utilities will be $———. If I pay any or all utilities directly (not including telephone or cable TV), a utility allowance of $——— will be deducted from my gross monthly tenant contribution will be $———. If my net monthly tenant contribution would be less than zero, the lessor will pay me $———.

"I also understand and agree that my monthly tenant contribution under this lease may be raised or lowered, based on changes in the household income, changes in the number and age of persons living in the household, and on the escalation clause in this lease. Should I no longer receive rental assistance as a result of these changes, or the rental assistance agreement executed by the owner and FmHA expires, I understand and agree that my monthly tenant contribution may be adjusted to no less than $——— (Basic Rental) nor more than $——— (Market Rental) during the remaining term of this lease, except that based on the escalation clause in this lease these rental rates may be changed by a Farmers Home Administration approved rent change."

[Note: Eligible borrowers with LH loans and grants, direct RRH loans, or insured RRH loans approved before August 1, 1968, may omit the words "no less than $——— (Basic Rental) nor more than" from the last sentence of the above statement.]

"I understand that every effort will be made to provide rental assistance so long as I remain eligible and the rental assistance agreement between the owner and FmHA remains in effect. However, should this assistance be terminated I may arrange to terminate this lease, giving proper notice as set forth elsewhere in this lease."

5. For leases with borrowers operating under Plan II Interest Credit Only:

"I understand and agree that my gross monthly tenant contribution as determined on the latest Form FmHA 1944–8, which must be attached to this lease, for rent and utilities will be $———.

"If I pay any or all utilities directly (not including telephone or cable TV), a utility allowance of $——— will be deducted from my gross monthly tenant contribution except that I will pay not less than the basic rent nor more than the market rent stated below. My net monthly tenant contribution will be $———. I understand that should I receive rental subsidy benefits (interest credit) to which I am not entitled, I may be required to make restitution and I agree to pay any amount of benefit to which I was not entitled. I also understand and agree that my monthly tenant contribution under this lease may be raised or lowered based on changes in the household income, changes in the number and age of persons living in the household, and on the escalation clause in this lease. My tenant contribution will not, however, be less than $——— (Basic Rental) nor more than $——— (Market Rental) during the term of this lease, except that based on the escalation clause in this lease, these rental rates may be changed by a Farmers Home Administration approved rent change."

6. Leases used by borrowers with farm labor housing loans and/or grants will use the following additional clauses:

a. "I understand that the project is operated and maintained for the purpose of providing housing for domestic farm laborers and their immediate families. I do hereby certify that a substantial portion of my immediate family income is and will be derived from farm labor. I further understand that domestic farm labor means persons who receive a substantial portion of their income as laborers on farms in the United States and either: (1) Are citizens of the United States, or (2) reside in the United States, Puerto Rico, or the Virgin Islands, after being legally admitted for permanent residence therein, and may include the immediate families of such persons. Laborers on farms may include laborers engaged in handling agricultural commodities while in the unprocessed stage, provided the place of employment, such as a packing shed, is on or near the farm where the commodity is produced. It also includes labor for the production of aquatic organisms under a controlled or selected environment."

b. "I agree that if my household income ceases to be substantially from farm labor for reasons other than disability or retirement, I will promptly vacate my dwelling after proper notification by the owner."

7. The lease agreement in congregate housing cases must include the following statement: "I understand that my ability to live independently in the project with the support services available will be evaluated on a periodic basis. I may be requested to vacate if a determination is made that I am no longer able to live in the project without additional assistance." This involves cases where the tenant has progressed or regressed to a state of health that requires, in the opinion of the management, a level of care not available in the congregate housing facility.

C. Other Lease Provisions. All leases must contain provisions covering:

1. Names of the parties to the lease and all individuals to reside in the unit and the identification of the premises leased.

2. The amount and due date of monthly tenant contributions.

3. Any penalty for late payment of monthly tenant contribution according to paragraph IX B of this Exhibit.

4. The utilities and quantities thereof and the services and equipment to be furnished to the tenant by the management and the tenant's responsibility to pay utility charges promptly when due.

5. The process by which tenant contribution and eligibility for occupancy shall be determined and redetermined including:

a. The frequency of such tenant contribution and eligibility determinations.

b. The information which the tenant shall supply to permit such determinations: usually, income verification; names and ages of household members; and, in congregate facilities, information that permit management to determine the tenant's or co-tenant's level of function and degree of competence in performing daily living activities.

c. The standards by which rents, eligibility, and appropriate dwelling unit size shall be determined.

d. Tenant's household agreement to move to a unit of appropriate size if the household size changes.

e. The circumstances under which a tenant may request a redetermination of tenant contribution.

f. The effect of misrepresentation by the tenant of the facts upon which tenant contributions or eligibility determinations are based.

g. The time at which shelter cost changes, tenant contribution changes, or notice of ineligibility shall become effective.

6. The limitation upon the tenant of the right to the use and occupancy of the dwellings.

7. The responsibilities of the tenant in the maintenance of the dwelling and the obligation for intentional or negligent failure to do so.

8. Agreement of management to accept a tenant contribution without regard to any other charges owed by tenant to management and to seek separate legal remedy for the collection of any other charges which may accrue to management from tenant(s).

9. The responsibility of management to maintain the buildings and any common areas in a decent, safe, and sanitary condition in asccordance with local housing codes and FmHA regulations, and its liabilities for failure to do so.

10. The responsibility of management to provide the tenant with a written statement of the condition of the dwelling unit (when the tenant initially enters into occupancy and when vacating the dwelling unit), and the conditions under which the tenant may participate in the inspection of the premises which is the basis for such statement.

11. The circumstances under which management may enter the premises during the tenant's possesion thereof, including a periodic inspection of the dwelling unit as a part of a preventive maintenance program.

12. Responsibility of tenant to advise management of any planned absence for an extended period, usually 2 weeks or more.

13. Agreement that tenant may not let or sublet all or any part of the premises.

14. Understanding that should the project be sold to a buyer approved by FmHA, the lease will be transferred to the new owner.

15. The formalities that shall be observed by management and the tenant in giving notice one to the other as may be called for under the terms of the lease.

16. The circumstances under which management may terminate the lease, all limited to good cause, and the length of notice required for the tenant to exercise the right to terminate.

17. The procedure for handling tenant's abandoned property as provided by State law.

18. Disposition of lease if building becomes untenantable because of fire or other disaster. Right of owner to repair or rehabilitate the building within a certain period or terminate the lease.

19. The agreement that any tenant grievance or appeal from management's decision shall be resolved in accordance with procedures consistent with FmHA regulations covering such procedures which are posted in the rental office.

20. The usual signature clause attesting that the lease has been executed by the parties.

D. Prohibited Lease Clauses. Lease clauses in the classifications listed below shall not be included in any lease.

1. CONFESSION OF JUDGEMENT. Prior consent by tenant to any lawsuit the landlord may bring against the tenant in connection with the lease and to a judgment in favor of the landlord.

2. DISTRAINT FOR RENTAL OR OTHER CHARGES. Authorization to the landlord to take property of the tenant and hold it as a pledge until the tenant performs any obligation which the landlord has determined the tenant has failed to perform.

3. EXCULPATORY CLAUSE. Agreement by tenant not to hold the landlord or landlord's agents liable for any acts or omissions whether intentional or negligent on the part of the landlord or the landlord's authorized representative or agents.

4. WAIVER OF LEGAL NOTICE BY TENANT PRIOR TO ACTIONS FOR EVICTION OR MONEY JUDGMENTS. Agreement by tenant that the landlord may institute suit without any notice to the tenant that the suit has been filed.

5. WAIVER OF LEGAL PROCEEDINGS. Authorization to the landlord to evict the tenant or hold or sell the tenant's possessions whenever the landlord determines that a breach or default has occurred.

6. WAIVER OF JURY TRAIL. Authorization to the landlord's lawyer to appear in court for the tenant and to waive the tenant's right to trial by jury.

7. WAIVER OF RIGHT TO APPEAL JUDICIAL ERROR IN LEGAL PROCEEDINGS. Authorization to the landlord's lawyer to waive the tenant's right to appeal on the ground of judicial error in any suit or the tenant's right to file a suit in equity to prevent the execution of a judgment.

8. TENANT CHARGEABLE WITH COSTS OR LEGAL ACTIONS REGARDLESS OF OUTCOME. Agreement by the tenant to pay attorney's fees or other legal costs whenever the landlord decides to take action against the tenant even though the court finds in favor of the tenant. (Omission of this clause does not mean that the tenant, as part to a lawsuit, may not be obligated to pay attorney's fees or other costs if the tenant loses the suit.)

E. *Modificotion of Lease—Notification to Tenants.* The landlord may modify the terms and conditions of the lease, effective at the end of the initial term or a successive term,

by serving an appropriate notice on the tenant, together with the tender of a revised lease or an addendum revising the existing

6. For each RRH project specifically built for the *elderly*, the borrower must establish

h. Map showing location of community facilities including schools, health care,

4. Borrowers may assess fair and reasonable charges to the security deposit for

the tenant's rent to recoup the improper rental subsidy. The borrower will inform the

availability and property characteristics. Also included are janitorial tasks performed

VOL 50 ISS 136 JL 16 1985 UMI

by serving an appropriate notice on the tenant, together with the tender of a revised lease or an addendum revising the existing lease. This notice and tender shall be delivered to the tenant either by first-class mail, properly stamped and addressed or hand delivered to the premises to an adult member of the household.

The date on which the notice shall be deemed to be received by the tenant shall be the date on which the first-class letter is mailed or the date on which the copy of the notice is delivered to the premises. The notice must be received at least 30 days prior to the last date on which the tenant has the right to terminate the tenancy without executing the revised lease. The notice must advise the tenants that they may appeal modifications to the lease in accordance with the FmHA tenant grievance and appeals procedure (Subpart L of Part 1944 of this Chapter) if the modification will result in a denial, substantial reduction, or termination of benefits being received.

The same notification will be applicable to any changes in the rules and regulations for the project.

F. *Occupancy Rules.* Occupancy rules establish the basis for the management-tenant relationship. Occupancy rules and regulations must be provided and explained by the project management to enable the tenant to understand the purposes, objectives, and standards of the project. The rules will be approved by the FmHA State Director or designee, generally together with the project management plan, management agreement, and lease form.

1. All rules for occupancy and rent structures will be in writing posted conspicuously in the borrower's and/or manager's offices and provided to each tenant with the lease agreement.

2. Proposed changes of any rules for occupancy must be made available to each tenant at least 30 days in advance of implementation, and tenants must be advised that they may appeal changes in accordance with the FmHA tenant grievance and appeals procedure (Subpart L of Part 1944 of this Chapter).

3. No rule may infringe on the rights of the tenants to organize an association of tenants. Such associations may be organized to bargain with management, as well as to act socially and/or provide for the welfare of its members. The project management person or organization should be available and willing to work with a tenant organization.

4. Rules may be promulgated that prohibit activities which are detrimental to management and tenants. Such activities include threats to the health or safety of other tenants or the employees of the borrower, interference with the quiet enjoyment of the premises by other tenants, or damage to the physical structure of the project.

5. The borrower may choose to provide rules for *non-elderly* projects that either permit or exclude pets *except* that no rules may be promulgated that would prohibit the tenancy of a tenant household member who requires the services of a trained and certified seeing eye or hearing ear animal to achieve the normal function of that household member.

6. For each RRH project specifically built for the *elderly*, the borrower must establish project rules by (*12 months after effective date of this revision*) permitting elderly, handicapped or disabled tenants to keep commonly accepted household pets. These pet rules are to be established according to the following:

a. Pet rules *must not:*

(1) Prohibit, prevent, restrict or discriminate against any tenant who owns or keeps a pet in their apartment unit, with respect to continued occupancy in the project unless the approved project pet rules are violated.

(2) Prohibit, prevent, restrict or discriminate against any applicant who owns a pet with respect to obtaining occupancy to the project.

b. Borrowers with operational projects must consult with the tenants of the project when establishing pet rules and document to the District Director how the consultation process was conducted.

c. Borrowers with new projects will establish pet rules prior to occupancy, but may revise those rules based on tenant comments and suggestions received after rent-up begins.

d. Pet rules will be approved by FmHA as part of, or an amendment to, the project lease. FmHA approval will be granted when the rules meet the provisions and intent of this subparagraph.

e. Pet rules will be reasonable and will be written to consider at least the following factors:

(1) Density of project units.
(2) Pet Size.
(3) Type of pet.
(4) Potential financial obligations of tenants who own or keep pets.
(5) Standards of pet care.
(6) Pet Exercise Areas.
(7) State and Local animal laws or ordinances.

f. Pet rules must allow the borrower or project manager authorization to remove from the project any pet whose conduct or condition is duly determined to constitute a nuisance or threat to the health or safety of other tenants in the project or persons in the surrounding community.

7. Initial rules will be attached to the lease agreement. Approval by FmHA for changes and additions may be requested annually with submission of annual reports or more frequently only in the case of an emergency situation.

8. The following items illustrate areas that should be addressed in rules developed by management and provided to all tenants prior to move-in:

a. Explanation of rights and responsibilities under the lease. Where a non-English language is common to a project area, a lease written in that language should also be provided.

b. Rent payment policies and procedures should be fully explained.

c. Policy on periodic inspection of units.

d. Responding to tenant complaints.

e. Maintenance request procedure.

f. Project services and facilities available to tenants.

g. Office location, hours, and emergency telephone numbers.

h. Map showing location of community facilities including schools, health care, libraries, parks, etc.

i. Restrictions on storage and prohibition against abandoning vehicles in the project area.

j. A project newsletter, if desired.

k. Community and public transportation schedules.

9. Tenant may be permitted to have a guest(s) visit their household. However, an adult person(s) making reoccurring visits or one continuous visit of 14 days and nights in a 45 day period *without consent* of the management will be counted as a household member(s).

G. *Security Deposits.*

1. Security deposits are encouraged and they should be used when it is reasonable and customary for the area. The amount of security deposits must be reflected in the borrower's management plan and may not be changed without the written consent of the FmHA District Director. When security deposits are used, they should be an amount equal to the tenant contribution for one month or basic rent, whichever is greater. Families receiving a HUD rental subsidy will pay security deposits according to HUD requirements. In an elderly project, the amount of additional security deposit for pets must be reasonable and not designed to prohibit or discourage tenancy. Where a seeing eye or hearing ear animal is necessary for the normal function of a household member, an additional security deposit for the animal may not be charged.

2. Security deposits for persons eligible for Rental Assistance or Section 8 assistance shall be administered in a manner to prevent hardship on the household. If such tenants cannot pay the full amount initially, they may be given terms that should ordinarily:

a. For RRH projects, not exceed a down payment of 25 percent of adjusted monthly income plus $15 per month or that amount needed monthly to complete the security deposit within twelve months, whichever is greater.

b. For low-income farmworkers in a LH project, not exceed $25 down payment and $15 per month until an equivalent of one month's project rent is reached. In the case of migrants who will occupy the units for a short period of time, exception to this policy by FmHA may be made upon written request from the borrower when it is shown that such deposits need to be raised to protect the security interest of the government and it will not create a hardship on the tenants.

3. Security deposits shall be handled in accordance with any State or local laws governing tenant security deposits. Tenant security deposits shall be deposited in a separate account at a Federally insured institution, and shall be handled in accordance with any State or local laws governing tenant security deposits. Funds in the Security Deposit Account shall only be used for authorized purposes as intended and represented by the project management in the management plan, and until so used, shall be held by the borrower in trust for the respective tenants.

4. Borrowers may assess fair and reasonable charges to the security deposit for damage and loss caused or allowed by the tenant. An itemized accounting for such charges must be presented to the tenant after the move-out inspection provided for in paragraph X E 2 of this Exhibit, unless the tenant has abandoned the property and his/her whereabouts are unknown and cannot be ascertained after reasonable inquiry.

H. *Special Lease Supplement.* Borrowers are encouraged to supplement lease agreements, particularly of elderly, disabled and handicapped tenants, to:

1. Permit the borrower, with competent medical or clergical advice, to contact a predetermined sponsor(s) or guardian(s) to effect the transfer of the tenant to other appropriate housing when the tenant is (a) no longer able to functionally make self-determinations or (b) to adequately provide self-care within the facilities and services provided by the project. A sponsor or guardian would be a person(s) designated by the tenant, generally a family member, friend, doctor, or member of the clergy.

2. Provide instruction to the borrower of a person(s) to contact in the event of death of the tenant.

When a lease has been supplemented, the borrower should also obtain an agreement from the designated sponsor(s) or guardian(s) to assume responsibility for the tenant in the event of need as identified in subparagraphs 1 and 2 above.

IX. Rent Collection

A pre-established day of the month should be the designated rental collection day. The time and place of onsite collection and/or the correct address for payment by mail should be well publicized and consideration should be given to an after-hours' depository if needed.

A. *Rental Receipts.* A form of serially-numbered rental receipts should be selected for use and the collection agent held accountable for every receipt. Optional collection services may be considered when they are available.

B. *Delinquent Rents.* A system to identify and detect unpaid rents should be instituted within the project. A penalty of up to $10.00 for late payment of rent after a 10-day grace period, or the grace period prescribed by State law, may be permitted. The borrower should consider the circumstances causing the late payment before assessing any penalty. True hardship cases should not be assessed penalties; however, maintaining a firm and fair policy on rent collection encourages tenants to meet their rental obligations.

C. *Recapture of Improperly Advanced Rental Assistance and Interest Credit.*

1. In cases where a tenant has received rental assistance and/or interest credit benefits to which he/she may not be entitled, because of the tenant's failure to properly report income or changes in the size of the household, the borrower will provide the tenant with a notice of intent to recoup improperly advanced rental subsidy benefits. Such a notice must inform the tenant of the amount improperly advanced and the lump sum or monthly amount that will be added to the tenant's rent to recoup the improper rental subsidy. The borrower will inform the District Office of the agreement made by the tenant for repayment. In the event that collection from the tenant is not achieved by active collection effort, including legal remedy, the borrower will report the facts to the Disctrict Director. The District Director will report the facts to the State Director who will obtain the advice of OGC on further actions.

2. If it appears that the tenant has willingly and knowingly misrepresented his/her income, the borrower will demand restitution of the improper rental subsidy. The case will also be reported to the FmHA District Director who will monitor the borrower's actions. If the tenant fails to make restitution, the District Director will refer the matter to the OGC for further advice.

3. Recapture of rental assistance assigned to the wrong tenant household will be handled according to paragraph XII of Exhibit E of this Subpart.

4. If improper interest credit or rental assistance is paid due to the negligence or ineffectiveness of the borrower or its designee, the borrower is required to make restitution to FmHA without making claim against the tenant. This restitution will not be charged to the project as any part of the budget or operating expense. In the case of a non-profit or public body borrower, when funds from non-project sources are not available, the State Director exclusively, may make an exception if the funds were used for appropriate and justified project expenses and allow project income not required for approved operating budget items to cover the cost of restitution. Restitution may be made by remittance of the excessive payment amount to FmHA, and applied to the project account as an overage in the case of interest credit or the rental assistance account.

5. Or unauthorized rental assistance and/or interest credits derived through inaccurate calculation, the unauthorized amount of subsidy will be determined by the Director. The borrower will be requested to correct the error by remitting the excess subsidy. If it is not repaid, the excess subsidy amount will be deducted by FmHA from subsequent credits or payments.

X. Maintenance

Maintenance is the process by which a project is kept up in all respects and includes land, buildings, and equipment. Maintenance responsibilities will be included in the management plan. Proper maintenance will help to keep a good image for the project, help to minimize vacancies, and help to preserve the project. Plans and policies for inspections, effective maintenance and repair are to be established at the outset and modified periodically as needed. The following types of maintenance are necessary:

A. *Routine Maintenance.* Routine or short-term type maintenance and repairs will be those cost items and services included in the annual budgets to be paid out of the operations and maintenance expense account. It includes regular maintenance tasks of the project that can be prescheduled or planned for, based on equipment availability and property characteristics. Also included are janitorial tasks performed on a regular basis to maintain the appearance of the project and to prevent an accumulation of debris and subsequent deterioration.

B. *Responsive Maintenance.* This includes all maintenance tasks performed in response to either requests for service from tenants or unplanned breakdowns. An essential part of any maintenance system is to plan for requests coming from the dwelling units and for emergencies occurring in the systems serving the apartments. The project manager should develop a plan to focus on: who receives the requests, how they are handled, how specific employees are assigned to the tasks and what kind of records are kept. The capacity of the project manager to respond to requests and emergencies is one of the true tests of a successful maintenance program.

C. *Preventive Maintenance.* This is similar to inspection type maintenance. Regular checking and servicing of equipment and systems is done as required by service information. Preventive maintenance of mechanical systems, building exteriors, elevators, and heating systems in rental projects require specially trained personnel. The project manager should establish biweekly or monthly schedules in which the routine oiling, adjusting, replacing of filters, and the like is done based on manufacturer's manuals and specifications.

D. *Long Term Maintenance.* These are major expense items which normally do not occur on an annual basis. The borrower may request permission to use reserve funds to pay for these expenses when they occur. However, use of funds out of the reserve account must be preapproved by FmHA.

E. *Inspection Maintenance.* These are maintenance inspections performed periodically to discover problems before crisis situations develop. The following inspections of each tenant's apartment should be made at appropriate times:

1. MOVE-IN INSPECTION. Before move-in occurs, the management and the applicant accepted for tenancy should together inspect the unit to be occupied and agree upon any repairs needed. A written inspection report shall be prepared and a copy retained in the tenant's file. Any of the identified deficiencies not corrected prior to occupancy should be noted on the lease or inspection move-in report and signed by the tenant and borrower's representative.

2. MOVE-OUT INSPECTION. An inspection should be scheduled with the tenant when the management becomes aware that the tenant is moving out or has vacated the unit. Whenever possible, the inspection should be performed after the furniture has been moved out and before any portion of the security deposit is returned to the tenant. Any repairs or costs to be charged to the tenant will be according to the terms of the lease, local law, and regulations governing security deposits in paragraph VIII G of this Exhibit.

3. PERIODIC INSPECTION. An inspection of this type should be made at least annually. The borrower should make provisions in the lease for periodic inspection of the units as a part of a preventive maintenance program.

XI. Rent Changes

It may be necessary as operating costs

a. A review of the documented circumstances and the project operating

may require the borrower to establish a system capable of accounting for project

(1) *Initial Operating Capital.* The borrower

of Part 1951 of this chapter, may not be paid

(ii) To pay costs of repairs or replacements

XI. Rent Changes

It may be necessary as operating costs and/or revenues fluctuate to consider a change of rental rates to keep the project viable. Before any change of rental rates may occur, *prior written consent* of FmHA *is required.* The procedure to request and implement a rent change is specifically covered in Exhibit C of this Subpart.

XII. Borrower Project Budgets

A. *Budget Development and Preparation.*

1. Borrowers are required to develop an annual budget of project income and expense.

2. Separate budgets will be developed for each project when the borrower owns more than one MFH project.

3. Budgets will cover a 12 month period selected by the borrower to be the project fiscal year of operation.

4. Budgets will be prepared according to the instructions contained in Form FmHA 1930–7, "Statement of Budget and Cash Flow."

B. *Return on Investment as Authorized by Borrower's Loan Agreement/Resolution.*

1. Limited profit borrowers may take the return authorized for the current budget year without further FmHA approval under the following conditions:

a. Payment may be made only once a year at the end of the project fiscal year.

b. Payment must have been approved as part of the borrower's annual budget on Form FmHA 1930–7.

c. The project must have produced adequate income during that year to cover all expenditures in accordance with the approved budget.

d. The balance in the reserve account must be current less any authorized withdrawals.

e. Payment of the return may not produce a year end deficit.

2. If income is not adequate in any given fiscal year to cover payment of the return to owner, FmHA may authorize the return to be paid from:

a. Excess funds available at the end of the following fiscal year of operation provided it does not result in a rent increase and the reserve account is current less authorized withdrawals. (Non-profit losses of the borrower entity do not qualify to be recouped in following years.) This option is authorized only for the year immediately following the year in which the return was not paid.

b. Release of reserve funds with District Director approval, provided:

(1) The Reserve Account will not be reduced below the amount required to be accumulated by that time considering adjustments for any previously authorized withdrawals; and,

(2) During the next 12 months the amount in the Reserve Account will not likely fall below that required to be accumulated by the end of such 12 month period.

C. *Advancement (Loan) of Funds to a Project by the Owner, Member of the Organization, or Agent of the Owner.*

1. Such advances are discouraged but may be allowed when justified, provided the prior written approval of the District Director has been obtained. Justification will be based on the following:

a. A review of the documented circumstances and the project operating budget before any funds are advanced (loaned).

b. Funds are not immediately available from any of the following sources:

(1) Reserve funds.

(2) Initial operating capital.

(3) An imminent rent increase.

2. The funds will be applied to ordinary project operating and maintenance expenses.

3. No interest will be charged or paid on the loan from project income.

4. No lien in connection with the loan will be filed against the property securing the FmHA loan or against project income.

5. The pay-back of the advance (loan) may be permitted by the District Director provided the terms and conditions were mutually agreed to by the borrower and FmHA at the time of the advance and the financial position of the project will not be jeopardized. payback should only be permitted on the advance when the FmHA debt is current and the reserve requirements are being maintained at the required levels.

XIII. Accounting and Reporting Requirements and Financial Management Analysis

A. *General.* RRH, RCH, and LH borrowers are expected to account for all project income and expenses through a bookkeeping or accounting system appropriately reflecting the complexity of project operations.

The degree of sophistication will also reflect such factors as the type of borrower; the size, location and type of project; and the type of finanical management information needed to provide adequate guidance and supervision to assure program objectives are being met.

1. Borrowers with loan agreements or resolutions are subject to the following conditions:

a. All RRH and LH projects with loan agreements or resolutions approved on or after October 27, 1980, are required to comply with the provisions of this paragraph XIII.

b. All RRH and LH projects with loan agreements or resolutions approved prior to October 27, 1980, will be guided by the recordkeeping and reporting requirements of their respective loan agreement or resolution.

(1) They are encouraged, however, to adopt the provisions of this section by amending their existing loan agreement or resolution.

(2) The State Director may require adoption of these provisions when deemed necessary as a loan servicing action.

c. Any amendment to an existing loan agreement, or resolution, requires concurrence of all parties and written approval by the State Director with advice from the OGC prior to enactment of the amendment.

d. Individual farm borrowers with LH units will be considered in general compliance with this paragraph by virtue of completing the recordkeeping and reporting requirements of their farm and home planning with FmHA.

2. Borrowers without loan agreements or resolutions are required to maintain information in sufficient detail to provide the necessary assurance that program objectives are being met. As necessary to protect the integrity of the program, the State Director may require the borrower to establish a system capable of accounting for project operations and reporting.

B. *Accounting System.* A bookkeeping and accounting system provides the financial information needed to effectively plan, control and evaluate project activity. The type of system should be determined prior to loan closing, but it may be revised with FmHA approval to meet program objectives. FmHA may also prescribe the system to be used. Form FmHA 1930–5, "Bookkeeping System—Small Borrower," can be adapted to the bookkeeping needs of small RRH projects. Bookkeeping for MFH projects may be maintained using a cash, modified cash, or accrual type accounting system.

1. *Type of accounts.* As used in this paragraph, the term account is used in interchangeably to mean either a ledger (or bookkeeping account) or an actual banking account. Depending upon the complexity of the accounting system being used, these accounts may be further subdivided into subsidiary ledgers or accounts to assist the borrower in providing the information needed for project financial analysis or reporting requirements. Regardless of the number or types of accounts established, all bookkeeping and accounting systems must meet the following:

a. All project funds shall be held only in accounts insured by an agency of the Federal Government, unless otherwise specifically authorized by the borrower's loan agreement, loan resolution and this paragraph.

b. All funds in any account shall be used only for authorized purposes as described in their loan agreement or resolution and this paragraph.

c. All funds received and held in any account, except the tenant security deposit shall be held in trust by the borrower for the loan obligation until used.

d. All project funds will be maintained separately and distinct from any other project or enterprise of the borrower and/or his/her management agent. Under no circumstances will project funds be commingled with those of another project.

e. Each project will maintain at least one demand deposit or checking account. However, it is not necessary for each bookkeeping account within one project to be maintained as a checking account.

2. *Required Accounts.* All RRH, RCH, and LH borrowers will maintain, as a minimum, the accounts required by their loan agreement or resolution. The following accounts are required for all RRH and RCH loans approved after October 27, 1980, or those who have amended their loan agreements or resolutions to adopt these accounts:

a. *General Operating Account.* This account records all project income and disbursements. Excess project cash held in this account may be combined with other project funds described in this paragraph in temporary (immediate call) interest bearing accounts when separate bookkeeping records are maintained for the individual project accounts. This account may be further subdivided as follows:

(1) *Initial Operating Capital.* The borrower will have deposited the required initial operating capital into this temporary bookkeeping account by the time of the FmHA loan closing or when interim financing funds are obtained, whichever occurs first. The initial operating capital will be deposited in the General Operating Account. After two, but before five full budget years of project operation, the State Director may authorize the borrower to make a onetime withdrawal from project funds, an amount not to exceed the borrower's beginning cash contribution to the Initial Operating Capital as described in the loan agreement or resolution, provided that:

(i) The loan was closed on or after October 27, 1980,

(ii) The loan agreement or resolution signed by the borrower is Form FmHA 1944–33 "Loan Agreement," 1944–34 "Loan Agreement," or 1944–35 "Loan Resolution,"

(iii) The project has achieved at least a 95% occupancy level at time of the withdrawal request,

(iv) The withdrawal will not affect the financial integrity of the project. The borrower must demonstrate that all prudent maintenance is being planned and performed, and payment of necessary project expenses are not being deferred,

(v) The State Director determines that the withdrawal will not necessitate a rent increase during the year of withdrawal or during the next year of operation,

(vi) The State Director has reviewed and approved any required borrower reports before the Initial Operating Capital is withdrawn.

(2) *Deposits.* All income and revenue from the housing project shall, upon receipt, be immediately deposited in the General Operating Account. This will include rent receipts, housing subsidy payments (including HUD Section 8 and FmHA Rental Assitance payments), laundry revenue, or any other project income. The borrower may also deposit other funds at any time which are to be used for purposes authorized by this section including transfers from the Reserve Account.

(3) *Disbursements.* Not later than the 15th of each month, out of the General Operating Account, the borrower shall pay or fund the actual, reasonable and necessary monthly project expenses. Current expenses may include the initial purchase and installation of furnishings and equipment with any other funds deposited in the General Operating Account which are not proceeds of the loan or income or revenue from the project. (However, non-profit borrowers are permitted to use loan funds specified for initial operating capital purposes as authorized in FmHA Instruction 1944–E.) Other authorized disbursements are FmHA approved installments of debt service, real estate tax and insurance escrow, reserve, and return on investment as provided in Section 2 c below. Any balance remaining in the General Operating Account except as authorized above, may be retained in this account or transferred to the Reserve Account.

(4) *Unauthorized Disbursements.* Late fees charged the borrower according to Subpart K of Part 1951 of this chapter, may not be paid from project income. When late fees are deducted by FmHA from payments made from project income, the project General Operating Account must be reimbursed from nonproject income of the owner or mangement agent or deducted from the owner's return on investment. (Added.)

b. *Real Estate Tax and Insurance Escrow Account.* Funds recorded in this account may be deposited in an interest bearing project account. Each month after the payment of actual, reasonable, and necessary current operating and maintenance expenses there shall be transferred from the General Operating Account to the Real Estate Tax and Insurance Escrow Account an amount equal to one-twelfth of the total anticipated real estate tax and insurance payments for the year. Any interest earned shall be prorated based on the amount held in the escrow account at the time the interest is earned and shall accrue and be part of the account.

c. *Reserve Account.* Funds recorded in this account should be held in an interest bearing project account.

(1) Immediately after paying each installment for the orderly retirement of the FmHA loan, as provided in the borrower's promissory note, required reserve installments shall be transferred to the Reserve Account at the monthly rate stipulated by the borrower's loan agreement or resolution. Monthly transfers will continue until the account reaches the total amount specified in the loan agreement or resolution. Monthly transfers shall be resumed the next month following disbursement from the Reserve Account until it is restored to the specified total minimum sum.

(2) Reserve Account funds not immediately needed for authorized purposes may be invested in saving certificates insured by a Federal institution, or invested in readily marketable obligation of the United States Treasury Department, the earings on which shall accrue to the the Reserve Account.

(3) Interest earnings may be used to meet the monthly installments to the Reserve Account and/or to meet a modified and higher reserve level established periodically by an FmHA approved amendment to the borrower's loan agreement or resolution. Such amendment may be made to build reserve for scheduled replacement of depreciable property items in addition to general reserve requirements.

(4) Any amount in the Reserve Account which exceeds the total sum specified in the loan agreement or resolution may be transferred to the General Operating Account for the authorized purposes *only when* it is agreed between the borrower and the FmHA to be in excess of the requirement. However, the FmHA District Director may direct the excess sum to be retained in the Reserve Account when determined necessary to protect the Government's security interest.

(5) With prior written consent of the District Director, funds in the Reserve Account may be used by the borrower or its designee for the following purposes:

(i) To meet payments due on the loan obligations in the event the amount for debt service is not sufficient for that purpose.

(ii) To pay costs of repairs or replacements to the housing, furnishings or equipment caused by catastrophe or long-range depreciation which are not current expenses. Withdrawal for authorized purposes should be approved in advance during the annual budget approval process.

(iii) To make improvements to the housing project without creating new living units.

(iv) For other purposes desired by the borrower, which in the judgment of the Government will promote the loan purposes, strengthen the security, or facilitate, improve, or maintain the orderly collectibility of the loan without jeopardizing the loan or impairing the adequacy of the security.

(v) To pay a return on investment at the end of the borrower's project operating year, provided that after such disbursements the amount in the Reserve Account will not be less than that required by the loan agreement or resolution to be accumulated by that time and the amount in the Reserve Account will likely not fall below that required to be accumulated during the next 12 months.

(A) In the case of borrowers operating on a limited profit basis, to pay a return on the borrower's initial investment as identified in the loan agreement or resolution.

(B) In the case of borrowers operating on a full profit basis, to pay an annual return as specified in the borrower's loan agreement or resolution.

d. *Tenant Security Deposit Account (when applicable).* Upon receipt, all tenant security deposit funds collected shall be recorded in a bookkeeping account that is kept separate from the project bookkeeping accounts. These funds shall be deposited in an account that is kept separate from any project funds and will be handled according to any State or local laws governing tenant security deposits. Funds in the Tenant Security Deposit Account shall be used only for authorized purposes as intended and represented by the project management plan. They shall be held by the borrower in trust for the respective tenants until so used. Any amount of the Tenant Security Deposit Account which is retained by the borrower as a result of lease violations shall be transferred to the General Operating Account and treated as income of the housing.

(1) The owner will follow all state and local requirements governing the handling and disposition of tenant security deposits.

(2) In no case, will interest earned on security deposits accrue to project management or the owner. Any interest earned but not returned to the tenants will accrue to the project's general operating account for disposition as outlined in the management plan.

C. *Borrower Reporting Requirements.* Certain reports are necessary to verify compliance with FmHA requirements and to aid the borrower in carrying out the objectives of the loan. Some reports must be submitted with the FmHA payments and others submitted to FmHA either monthly or annually. Exhibits B–6, B–7, and B–8 of this Exhibit (Management Handbook), are to be used as a guide for determining when reports are due and the number of copies required. (Also see § 1930.124 of this Subpart.) The

following reports will be prepared and submitted by the borrower:

1. MONTHLY REPORTS:

tenants. FmHA will look to the borrower to fulfill its obligation according to the

10. The borrower's fidelity bond premiums

31. Exhibit B–3 is amended by

following reports will be prepared and submitted by the borrower:

1. MONTHLY REPORTS:

a. Submit Form FmHA 1930–8, by the tenth of each month to the District Office to reflect the project operations for the preceding month. Monthly reports will generally be completed on a cash basis, but may also be completed on a modified cash or accrual basis with appropriate modifications made on the form.

b. Submit Form FmHA 1944–29, with the payment to the District Office. This form *must* be submitted each month to report overage and/or request rental assistance, even if a loan payment is not submitted. This form reflects occupancy in the project as of the first day of each month.

c. For LH projects, Form FmHA 1944–29 will be submitted monthly for the LH tenants who receive rental assistance. Otherwise, the Form FmHA 1944–29 covering all LH tenants will be submitted to FmHA at least once annually with the annual reports.

2. ANNUAL REPORTS: Annual reports may be completed on a cash, modified cash, or an accrual basis. Within 60 days following the close of the borrower's fiscal year, the borrower will submit the following reports to the FmHA District Office:

a. Form FmHA 1930–7, showing all planned project income and expenses for the next year as well as actual project income and expense for the past year.

b. Form FmHA 1930–8, "Year End Report and Analysis For Fiscal Year Ending ——.

c. Audit report or verification. All audit reports will be completed according to the booklet, "Instructions to Independent Certified Public Accountants and Licensed Public Accountants Performing Audits for FmHA Borrowers and Grantees." For projects with 25 or more units the audit will be prepared by a LPA licensed on or before December 31, 1970, or a CPA. Borrowers with 24 units or less will need to provide a verification by an individual who is qualified by education and/or experience and who is independent of the borrower or by a committee of the membership not including any officer, director, or employee of the borrower; however, the State Director may also require audits by a CPA or LPA for any project.

d. Copy of the minutes of the annual meeting, when applicable.

e. Energy audit for review according to the provisions of Exhibit D of this Subpart.

f. Any other related material that may be requested by the District Director.

D. *Financial and Monogement Anolysis.* Financial and management analysis provides information on the status of the project's operation. Regular analysis can help identify strengths and weaknesses so that appropriate corrective actions can be taken. Some methods of analysis are:

1. Budget Analysis: Using monthly and annual reports, the borrower or project manager compares actual income and expenses with the budgeted amounts. Any differences between the budget and actual figures indicate areas of the project operation where the manager may need to focus added attention and/or take corrective action.

2. Ratio Analysis: Ratios are an effective tool for financial analysis. They prescribe various measures of actual operating performance. FmHA and borrowers should develop a data base of recorded ratios for comparative analysis. Some useful ratio are:

a. Vacancy Rate equals Total vacancy days for the month divided by Total unit days for the month

b. Resident Turnover Ratio equals Total units becoming vacant during the period divided by Average units occupied for the period

c. Expense Ratio equals Total Expense divided by Total Income

d. Cost Per Unit equals Total Expense (By category) divided by Total No. of Units

e. Working Capital Ratio equals Current Assets divided by Current Liabilities

f. Collection Ratio equals Total Collections divided by Total Rent Rool

g. Percent of revenue from Government sources equals FmHA Rental Assistance or HUD Section 8 Payments divided by Total Market Rent

XIV. Termination of Tenancy and Eviction

Borrowers and project managers should actively develop ways and means to avoid forced terminations of lease and the eviction of tenants by considering the following:

A. *Tenant's Entitlement to Continued Occupancy.*

1. *General.* The borrower or project manager may terminate or refuse to renew any tenancy only for material noncompliance with the lease or other good cause such as:

a. Noneligibility for tenancy.

b. Action or conduct of the tenant which disrupts the liveability of the project by adversely affecting the health or safety of any tenant, or the right of any tenant to the quiet enjoyment of the leased premises and related project facilities, or that has an adverse financial effect on the project.

c. Expiration of the lease period is not sufficient grounds for eviction of a tenant.

2. *Material Noncompliance.* Material noncompliance with the lease includes:

a. One or more substantial violations of the lease; or

b. Repeated nonpayment of rent or any other financial obligation due under the lease (including any portion thereof) beyond any grace period constitutes a substantial violation; or

c. Repeated minor violations of the lease which disrupt the liveability and harmony of the project by adversely affecting the health or safety of any person, or the right of any tenant to the quiet enjoyment of the leased premises and the related project, or that have an adverse financial effect on the project.

3. *Other Good Cause.* Conduct cannot be considered as other good cause unless the borrower or project manager has given the tenant *prior notice* that the conduct will constitute a basis for termination of tenancy.

4. *Rent Overburden.* Any tenant household (except those receiving Section 8 benefits) paying more than the contribution levels cited in paragraphs IV A C (1) or (2) or (3) of this exhibit toward rent, including utilities, is considered to be experiencing rent overburden. Whenever a tenant is experiencing rent overburden, borrowers are encouraged to utilize any available and compatible governmental rental subsidies including FmHA rental assistance and/or interest credit; or to assist tenants in applying for Section 8 housing assistance to minimize termination of tenancy.

B. *Notice of Termination.* Any notice to terminate tenancy must be based on material violation of the lease terms or for other good cause as determined by the borrower or the project manager.

1. The notice of intent to terminate the tenancy will be handled according to the terms of the lease. Tenants will be given prior notice of eviction according to State or local law. The notice must:

a. Refer to relevant provisions in the lease.

b. State the reasons for the termination with enough specificity to enable the tenant to prepare a response. In those cases where the proposed termination of the tenancy is due to the tenant's failure to pay rent, a notice stating the dollar amount of the balance due on the rent account and the date of such computation shall satisfy the requirement of specificity.

c. State that the tenancy is terminated on a date specified.

d. Advise the tenant that if he or she remains in the leased unit on the date specified for termination, the borrower may seek to enforce the termination only by bringing a judicial action, at which time the tenant may present a defense.

2. The notice shall be accomplished by: (a) sending a letter by first class mail, properly stamped and addressed, to the tenant at his or her address at the project, with a proper return address; *and* (b) serving a copy of the notice on any adult person answering the door at the leased dwelling unit, or if no adult responds, by placing the notice under or through the door, if possible, or else by affixing the notice to the door. Service shall not be deemed effective until both notices provided for herein have been accomplished. The date on which the notice shall be deemed to be received by the tenant shall be the date on which the first class letter provided for in this paragraph is mailed, or the date on which the notice provided for in this paragraph is properly given, whichever is later.

3. A copy of any eviction notice will be forwarded to the FmHA District Office. The District Director will review the notice for compliance with this paragraph XIV and any State Supplements that have been issued covering tenant evictions with respect to the proper preparation and handling of the notice. If the notice is found to be properly prepared, no further action is needed. If the notice is found to be improperly prepared, the District Director will notify the borrower to cease the action and will then inform the borrower how the notice is improperly prepared. The District Director will not indicate any opinion on the merits of the eviction to the borrower or project manager at this time.

XV. Security Servicing

Security servicing, as referenced in this Exhibit, concerns the borrower's general responsibilities in relation to the loan agreement or resolution, mortgage, and other loan documents. It does not deal with security items between the borrower and the tenants. FmHA will look to the borrower to fulfill its obligation according to the requirements of the loan agreement or resolution, note, mortgage, and other legal or closing documents. Some items of special emphasis are:

A. *Fidelity Bond.* All projects will be required to obtain Fidelity bond coverage for the borrower officials and all employees entrusted with the receipt, custody, and disbursement of any project funds or negotiable or readily saleable personal property. Fidelity bond coverage should be obtained as soon as there are assets within the organization and must be obtained before any loan funds or interim financing funds are made available to the borrower. Fidelity bonds will be obtained according to the following guidelines:

1. Individual or organizational borrowers will provide a fidelity bond when they have employees with access to project assets as cited in paragraph XV A, other than when a management firm has exclusive access to such assets.

2. Borrowers who use a management firm/individual with exclusive access to project assets as cited in Paragraph XV A will require the firm/individual to provide a fidelity bond. In addition, if the borrower takes possession of or gains access to the cited project assets, the borrower must be covered as stated in paragraph XV A(1).

3. Fidelity bond coverage is not required when a loan is made to an individual (natural person) and that individual will be responsible for such activities.

4. In the case of a Land Trust where the bencficiary is responsible for management, the beneficiary will be treated as an individual.

5. A General partnership will not be required to provide fidelity bond coverage where the partners are responsible for the receipt, custody and disbursement of its funds or any other negotiable or readily saleable personal property.

6. The amount of the bond will at least equal the potential gross project income for two months rental collection or the maximum amount of money the project is expected to have on hand at any one time, including cash on hand, money in reserve and other special accounts, etc., whichever is greater.

7. The United States acting through the Farmers Home Adminstration will be named as co-obligee in the bond when not prohibited by State Law.

8. Form FmHA 440–24, "Position Fidelity Schedule Bond," may be used when permitted by State Law. In those cases where other forms are used, the form of bond must be approved by the State Director only after its is found not to be inconsistent with the intent and general requirements of Form 440–24 and is determined legally acceptable by the OGC.

9. A blanket bond may be accepted from a borrower or management agent when blanket coverage is more advantageous cost-wise for each project on a pro-rata basis, the coverage limit for each project is identified *or* the total coverage limit is at least equal to the sum of all projects and coverage is restricted exclusively to FmHA financed MFH projects.

10. The borrower's fidelity bond premiums may be a project expense when coverage is obtained and paid by the borrower.

11. Fidelity bond premiums for a management agent(s) will be included in the management fee.

12. A fidelity bond may have a deductible figure in an amount equivalent to 2 percent of the initial project contribution for operating capital but not in excess of $2,000.

B. *Insurance.* The minimum amounts and types of insurance required of the borrower will be determined by FmHA in accordance with Subpart A of Part 1806 (FmHA Instruction 426.1) and Subpart B of Part 1806 (FmHA instruction 426.2). All references to County Supervisor shall be construed to mean District Director when applied to the Multiple Housing Program. The borrower or its agent shall obtain:

1. Adequate fire, extended coverage, and earthquake insurance as needed will be required on all buildings including as security for the loan or grant. The amount of coverage will be not less than the amount specified on Form FmHA 426–1, "Valuation of Buildings."

2. Suitable Worker's Compensation Insurance on all its employees. (Worker's Compensation Insurance for employees of a management agent shall be paid out of the agent's management fee.)

3. Adequate liability insurance.

4. Flood insurance when the project is located in designated flood hazard area.

C. *Real Estate and Personal Property Taxes.* All borrowers will be required to pay their taxes before they become delinquent and provide FmHA with proof of payment. An exception to the above may be made if the borrower has formally contested the amount of the property assessment and has escrowed the amount of taxes in question in a manner acceptable to the District Director.

30. Exhibit B–1 is amended by redesignating paragraphs 4d and 4e as 4e and 4f respectively and adding paragraph 4d and revising new paragraph 4e, revising the title to paragraph 11, redesignating paragraphs 17 to 18 and adding a new paragraph 17 to read as follows:

Exhibit B–1—Management Plan Requirements for FmHA Multiple Family Housing Projects

* * * * *

4. * * *

d. What is the occupancy policy for the project?

* * * * *

e. Is the responsible person aware of FmHA guidelines covering family size and needs as they relate to unit size?

* * * * *

11. *Plans for tenant participation in project operations and tenant's relationship with management.*

* * * * *

17. *Occupancy policy.* Attach a copy of the project occupancy policy. See paragraph VI B2 of Exhibit B of this subpart for guidelines in establishing an occupancy policy.

* * * * *

31. Exhibit B–3 is amended by changing the reference in paragraph IV E from "Form FmHA 444–8" to "Form FmHA 1944–8" and in the first sentences of paragraph VB and Paragraph VC by removing the words "a separate" and inserting in their place in word "an."

32. Exhibit B–9 is amended in the heading information by inserting a line between the lines "Employee" and "Address" to read "SSN (optional) ——."

33. Exhibit C is revised to read as follows:

Exhibit C—Rent Changes

I. Objectives

This Exhibit prescribes the method of processing changes in the monthly rental rates for tenants in Farmers Home Administration (FmHA) Rural Rental Hosing (RRH) and Labor Housing (LH) projects. This Exhibit covers all RRH and LH loans, including those approved before the date of this Subpart.

II. Definitions

A. Approval Official. State Director or designated State and District Office staff with delegated authority according to § 1930.143 of this Subpart.

B. Utility. Sewer, water, trash collection, electricity, natural gas, and any other fuel used specifically for cooking, heating, and/or cooling.

III. Initial understanding with borrower

A. All RRH and LH applicants will be informed at the application stage of the agency's rent change procedure. All borrowers will be advised that all proposed rent changes must comply with this Exhibit. This Exhibit will also apply to rent changes resulting from Housing and Urban Development's (HUD) Automatic Annual Adjustment Factors for units receiving Section 8, assistance.

1. Projects approved *prior* to November 30, 1983, may submit a rent change request based on a realistic projected budget for the interim year or the ensuing full year.

2. Projects approved on or *after* November 30, 1983, may submit a rent change request only after cost(s) incurred demonstrate a need.

B. Rental rates in projects financed in whole or in part by an RRH or LH loan may not be raised without FmHA written consent according to requirements in loan agreements, loan resolutions, and other instruments executed in connection with RRH and LH loans. Changes requiring only prior FmHA review are those which are beyond the borrowers' control to cover changes in taxes or utilities, and rent changes which do not result in an increase in the tenants' total shelter cost. Borrowers are encouraged to have the effective date of needed rent changes coincide with the start of their fiscal year or with the start of the season in the case of LH projects occupied on a seasonal basis. Rental change requests normally should be made at least 60 days prior to the end of the borrower's fiscal year.

It is anticipated that rent changes would not be necessary more than once a year.

5. Any other information the borrower believes necessary to justify the proposed

Audit, the District Director shall determine the cost effectiveness and financial impact of

or rental assistance agreement, promissory note, or mortgage.

a. Include in the notice an explanation of the increased costs which necessitated the

area. When no comparable dwelling units exist in the project's market area, the FmHA

It is anticipated that rent changes would not be necessary more than once a year.

C. All borrowers are encouraged to participate in the FmHA Rental Assistance Program. However, unless the Administrator notifies State and District Offices otherwise, all borrowers with projects meeting the eligibility requirements of paragraph II B of Exhibit E of this Subpart, except full profit borrowers, will be *required* according to Section 530 of Title V of the Housing Act of 1949, as amended, to apply for and accept Rental Assistance when it appears that a rent change will cause the very low-and low-income tenants to pay in excess of 30 percent of adjusted monthly income for costs for rent and utilities. If FmHA does not have RA available for this purpose, the borrower is encouraged to use other sources of governmental rent subsidies. The availability or nonavailability of governmental rent subsidies will not preclude FmHA from processing a rent change request.

D. Even though rental assistance is not available, borrowers are encouraged to convert to Interest Credit Plan II to give tenants the most favorable rents possible.

IV. Borrower's Responsibility in Processing Rent Changes Which Increase Housing Costs to Tenants and Require FmHA Approval

A. When a RRH or LH borrower determines that a rental change is needed for reasons other than those specified in paragraph VI, the borrower should meet with the District Director to review the following information before the "Notice of Proposed Rent Change" is posted and delivered to the tenants. In lieu of meeting with the borrower, the District Director may allow the information to be submitted to the District Office for prior review before being posted. The borrower may proceed to post the notice 15 days after the submission or upon receipt of the District Office's response whichever is earlier.

1. Facts demonstrating the need and justification for a rent change in accordance with paragraphs III A 1 or 2 of this Exhibit.

2. A new operating budget for borrower fiscal year showing:

a. Currently approved budget at old rents.

b. Actual income and expenses to date.

c. Proposed budget at proposed new basic rents.

d. Proposed budget at proposed new market rents (when applicable.)

3. An application for Rental Assistance on Form FmHA 1944–25, "Request For Rental Assistance," if the borrower's project is an eligible project and the proposed rent change will cause 20 percent of the very low- and low-income tenants to pay in excess of 30 percent of adjusted monthly income for the costs of rent and utilities. If the low-income tenants are receiving some other form of rent subsidy, such as HUD's existing Section 8, an exception may be made to this requirement.

4. A new energy audit or a listing of deferring improvements identified in a previous energy audit that was performed within the past five-year period according to the requirements of Exhibit D of this Subpart or regulations then extant.

5. Any other information the borrower believes necessary to justify the proposed rent change.

B. Current tenant certifications on Form FmHA 1944–8 "Tenant Certification," or other form approved by FmHA must be on file in the District Office.

C. After the borrower and District Director have reviewed the rent change application, the borrower will notify all affected tenants of any proposed rent change using the format of Exhibit C–1 of this Exhibit. The "Notice to Tenants of Proposed Rent Change" will advise tenants that during a 20-day comment period identified in the posted Notice, they have an opportunity to inspect, copy, and make written comments or objections to all materials which will be made available to them justifying the proposed rental increase. Tenants will be advised that they may also review any subsequent material submitted by the borrower to FmHA to support the rent change. If subsequent material is submitted, the borrower will be required to post a new notice. The Notice will advise the tenants that all written comments or objections should be submitted directly to the FmHA District Director by the end of the 20 day comment period. Tenants must be notified by the following methods:

1. The owner or management agent must mail or hand deliver copies of the Notice to all *affected* tenants and the District Director at least 60 days prior to the anticipated effective date of the rent change. By the end of the 20 day comment period, which is included within the 60 day period, the borrower may submit to the District Director any other information to be considered.

2. The management must also post prominently in common areas around the project (laundry rooms, parking areas, recreation rooms, etc.) copies of the Notice. In addition to plain English, all notices will be published in the other primary languages of the tenants.

D. Notification to the tenant of proposed rent changes will not be required when a change in the utility allowance only is proposed on Exhibit A–5 of Subpart E of Part 1944 of this Chapter, and the utilities are paid directly by the tenants. This does not preclude posting of the FmHA Letter of Approval as provided for in paragraph V B 1 of this Exhibit.

V. Determination by FmHA

A. *Actions by District Director.* The District Director will not consider a rent change application complete and acceptable until the borrower has complied with all terms listed in paragraph IV of this Exhibit. When the application and all attachments for the proposed rent change have been received (including the tenant comments when notification is required), the District Director will:

1. Review all the material submitted.

2. Provide a copy of the borrower's latest Form FmHA 1944–29, "Project Worksheet for Interstate Credit and Rental Assistance."

3. Determine if Rental Assistance is available for an eligible project on behalf of the low-income tenants.

4. When the change is requested for energy savings improvements identified in an Energy Audit, the District Director shall determine the cost effectiveness and financial impact of the proposed improvements from information contained in the energy audit. The District Director's determination will be made according to paragraph VI of Exhibit D of this Subpart.

5. When State Office approval is required, the District Office will submit to the State Director:

a. Appropriate recommendations on the request,

b. An indication of the number of tenants who will need rental assistance as a result of the rent changes,

c. All the material received from the borrower, including tenant comments or objections, at the end of the 20 day comment period.

d. A short narrative describing the general tone of tenant comments and concerns.

6. When a member of the District Office staff is the approval official, the documentation required by V A 5 above, will be attached to the rent change request.

7. When the borrrower has requested rental assistance, complete Form FmHA 1944–25 and forward it to the State Director.

B. *Actions by the Approval Official.* When the application, attachments and comments are received, the approval official will review the material to determine if the rent change is justified. The borrower will be notified by the approval official of the determination within 45 days from the date the "Notice to Tenants of Proposed Rent Change" is posted.

1. *Approval Actions.*

a. When a rent change is approved, the approval official will notify the borrower by using Exhibit C–2 of this subpart. The Notice letter will be prepared using the required and/or optional paragraphs as applicable. The reasons for the approved rent change should be concise. The Notice Letter will be mailed or hand delivered to each tenant *and* posted in a conspicuous place(s).

b. When the borrower's project is operated on a profit basis as defined in § 1944.205(s) of Subpart E to Part 1944, and the purpose of the rent change is for: justified operating and maintenance expense; funding the reserve account; other project expenses; providing or maintaining a profit, the change may be allowed as long as eligible tenants can afford the new rental rate.

2. *Disapproval Actions.* When the approval official determines an application for a proposed rent change is not justified on the basis of the information submitted, the approval official will notify the borrower in writing of the reasons(s) why the rent change is not approved. The borrower will be advised of the right to file an appeal regarding the rent change disapproval according to § 1900.56 of Subpart B of Part 1900 of this Chapter. Rent changes may not be approved when any of the following circumstances exist:

a. The borrower is able but unwilling: to comply with applicable tenant eligibility requirements; the audit and reporting requirements of this Subpart; or, the conditions set forth in the borrower's loan agreement or resolution, interest credit and/or rental assistance agreement, promissory note, or mortgage.

b. The budget for the project reflects sufficient income at the present rent structure to meet operation and maintenance expenses which are appropriate and reasonable in amount, meet the FmHA debt service requirements, meet the required reserve account deposit, and provide a return to the borrower, when appropriate.

c. The borrower's project is operated on a profit basis as defined in § 1944.205(s) of Subpart E to Part 1944 and the proposed rent change is for purposes other than meeting operation and maintenance expenses and debt service; i.e., the purpose is to allow excessive profits and the proposed rent change will result in rental rates in excess of what eligible tenants can afford.

d. The State Director is able to provide rental assistance to the project and the borrower's project is operated on either a nonprofit basis or limited profit basis as defined in § 1944.205(r) of Subpart E of Part 1944; but the borrower has not applied for rental assistance within the most recent period of 180 days prior to the rent change request.

VI. Rent Changes Requiring FmHA Prior Review Only

A. Rent changes caused by increases in operating costs for taxes and utilities, which are beyond the borrower's control, may be implemented with only prior FmHA review. The changes may not be greater than the amount necessary to cover the specific tax or utility increases.

1. Prior to notifying tenants, the borrower must meet or consult with the District Director to review:

a. A new operating budget for borrower fiscal year showing;

(1) Currently approved budget.

(2) Actual income and expenses to date.

(3) Budget at new basic rents.

(4) Budget at new market rents (when applicable).

(5) Proposed Notice of Rent Change (Exb. C–3).

b. A copy of the notification to the borrower from the taxing body or vendor showing that taxes or utilities are being increased. The amount of the change or the basis on which the increased cost can be computed, must be shown in the notice.

c. Detailed calculations showing how the increased operating cost was determined.

d. An updated Exhibit A–5 to Subpart E of Part 1944 when the tenants pay their own utilities and the rent change involves increased utility costs.

e. A new energy audit or listing of deferred improvements identified in a previous energy audit that was performed within the past five-year period according to the requirements of Exhibit D of this Subpart or regulations then extant.

2. The District Director shall review the budget and supporting documentation and when found to be acceptable, notify the borrower in writing that the budget is approved. A copy of the approved budget will be forwarded to the State Director.

3. In addition to notifying each tenant of the new rents as required by State law. The borrower will:

a. Include in the notice an explanation of the increased costs which necessitated the rent change.

b. Mail a copy of the notice to the tenant at least 30 days prior to the effective date of the rent change.

c. Offer the tenants an opportunity to meet with management, discuss the rent change and review all material necessitating the change.

d. Inform the tenants of their right to request a review of the rent change approval decision within 45 days of the date of the notice by writing to the next higher FmHA approval official. Until the request is resolved, the tenants are required to pay the changed amount of rent as indicated in the Notice of Approval.

B. Rent changes decreasing or not increasing tenant's total shelter cost (rent plus utilities), may be implemented with only prior FmHA review provided:

1. Prior to notifying tenants, the borrower must meet with the District Director to review:

a. A new borrower fiscal year operating budget showing:

(1) Currently approved budget.

(2) Actual income and expenses to date.

(3) Budget at new basic rents.

(4) Budget at new market rents (when applicable).

b. Any material contributing to the change and justification for the change.

c. An updated Exhibit A–5 to Subpart E of Part 1944 when the change involves the tenant's utility allowance.

2. The District Director shall review the budget and supporting documentation, and when found to be acceptable, notify the borrower in writing that the budget is approved. A copy of the approved budget will be forwarded to the State Director.

3. In addition to any State requirements, the borrower notifies each tenant of the new rents and/or utility allowance as required by State law, and:

a. Include in the Notice an explanation of the changes and events which necessitated the change. Also, the explanation must specify any adverse and/or positive effect the change may have on the tenants.

b. Mail a copy of the Notice to the tenant at least 30 days prior to the effective date of the rent change.

c. Offer the tenants an opportunity to meet with management to discuss the change and review any material contributing to the change.

d. Inform the tenant of their right to request a review of the rent change approval decision according to paragraph VI A 3 d of this Exhibit.

C. Rent changes to cover project operating and maintenance costs occurring in newly constructed or substantially rehabilitated RRH projects approved after November 30, 1983, may be approved with prior FmHA review only, provided:

1. The limit of rent change shall be the lesser of:

a. The actual operating cost change incurred.

b. The amount of operating cost change incurred with respect to comparable rental dwelling units serving the project's market area. When no comparable dwelling units exist in the project's market area, the FmHA approval official may approve a rent change according to the best available data regarding operating cost changes in rental units.

2. The same requirements of paragraph VI B 1 and 2 above are met.

D. When the budget and supporting documentation for any rent changes authorized by this paragraph are not acceptable to the District Director, and the District Director and the borrower cannot jointly agree on a budget based on acceptable rents, the borrower will be notified in writing to reduce or rescind the proposed rent change. The borrower will be given appeal rights as specified in Subpart B of Part 1900 of this Chapter.

VII. Unauthorized Rent Increases

When a borrower implements a rent change that does not meet the requirements of this Exhibit, the borrower will be notified in writing that: (1) The rent change has not been authorized, and (2) the rents must be rolled back to the last FmHA authorized level. Tenants affected by the unauthorized rent change will be given a rebate or credit for the unauthorized amount retroactive to the date of the unauthorized change. Those borrowers that fail to comply with the provisions of this paragraph will be handled according to § 1965.85(d) of Subpart B of Part 1965 of this Chapter.

VIII. Automatic Annual Adjustment Factors for Section 8 Units

If the approval official disapproves a rental rate change requested as a result of HUD's automatic annual adjustment factors for units receiving Section 8 assistance, or approves a rent change for a lesser amount than the change permitted by HUD, the approval official must require the borrower to deposit any excess funds into the Reserve Account. If this results in an accumulation of funds in the Reserve Account beyond the sum shown in the Loan Agreement or Loan Resolution, the interest reduction on a Section 8/515 project should be adjusted or canceled by memorandum to the Finance Office. The borrower will still be required to operate on a limited profit basis.

IX. Special Problem Cases

Problem cases which cannot be handled under this Subpart should be submitted to the National Office for review with the State Director's recommended plan of action.

34. Exhibit C–2 is revised to read as follows:

Exhibit C–2—Notice of Approved Rent Change

Dear:

You are hereby notified that the Farmers Home Administration (FmHA) has approved a rent change for the XXXXX project(s). The rental changes for all rental units will become effective on XXX, 19X. (Insert effective date shown in Exhibit C–1 or later effective date in accordance with last paragraph of Exhibit C–1.)

(Insert Reasons for Approval)

The approved rent changes are as follows:

Project Name	Unit	Present Rent		Requested Rent		Approved Rent	
		Basic	Market	Basic	Market	Basic	Market

as defined in § 1944.205(r) or Subpart E to Part 1944 of this chapter, or

IV. Priority of Rental Assistance Applications

A. *Operational Projects.*

1. A borrower with an eligible project in

Assistance Agreement," will not be executed or amended until the obligation or transfer is

Project Name	Unit	Present Rent		Requested Rent		Approved Rent	
		Basic	Market	Basic	Market	Basic	Market

(Use the following required and/or optional paragraphs where applicable)

*You must notify the tenants of FmHA's approval of the rent changes by posting this letter in the same manner as the "Notice to Tenants of Proposed Rent Change." This notification must be posted in a conspicuous place and cannot be substituted for the usual written notice to each individual tenant.

*This rent change approval does not authorize you to violate the terms of any lease you currently have with your tenants.

**For those tenants receiving rental assistance (RA), their costs for rent and utilities will continue to be based on the higher of their adjusted monthly income or 10 percent of gross monthly income or if the household is receiving payments for public assistance from a public agency, the portion of such payments which is specifically designated by that agency to meet the households shelter cost. If tenants are receiving Housing and Urban Development (HUD) Section 8 subsidy assistance, their costs for rent and utilities will be determined by the current HUD formula.

**Since RA units are not available, the approved rent change is subject to your acceptance of the units should they become available. Your application for RA units on behalf of eligible tenants has been received.

**This rent change is conditioned on the requirement that you carry out energy conservation measures as detemined necessary by the project energy audit. You will be allowed xx days for completion of the work. FmHA assistance may be available to finance any needed improvements.

*You may file an appeal regarding the rent change as approved within 45 days of the date of this notice. An appeal by you must be in writing to the appropriate hearing officer as specified in Subpart B of Part 1900 of this Chapter.

*You must inform the tenants of their right to request a review of the rent change approval decision within 45 days of the date of this notice by writing to (*insert nome and address of next higher FmHA approval official*). Until the request is resolved, the tenants are required to pay the changed amount or rent as indicated in the Notice of Approval.

*Any tenant who does not wish to pay the FmHA approved rent changes may give the owner 30-days notice that they will vacate. The tenant will suffer no penalty as a result of this decision to vacate, and will not be required to pay the changed rent. However, if the tenant later decides to remain in the unit, the tenant will be required to pay the changed rent from the effective date of the changed rent.

Sincerely,

FmHA Approval Official

*Required

**Optional, as applicable

35. Exhibit D is amended in the first sentence of paragraph V by removing the words "as appropriate" after the fifth comma.

36. Exhibit E is revised to read as follows:

Exhibit E.—Rental Assistance Program

I General

The objective of the rental assistance program is to reduce rents paid by low-income households. This Exhibit sets forth the policies and procedures and delegates authority under which rental assistance (RA) will be extended to eligible tenants occupying eligible Rural Rental Housing (RRH) and Rural Cooperative Housing (RCH) projects financed by FmHA. This Exhibit also applies to Farm Labor Housing (LH) projects when the borrower is a broadly-based nonprofit organization, nonprofit organization of farmworkers, or a State or local public Agency. Rental assistance will supplement the benefits available to tenants under the interest credit program outlined in Exhibit B to Subpart E of Part 1944 of this chapter.

II Definitions

A. *Eligible Tenants.* Any very low-income, or low-income household, elderly, disabled or handicapped person, meeting the following requirements:

1. The household adjusted annual income must not exceed the very low- or low-income limit established for the area as indicated in Exhibit C to Subpart A of Part 1944 of this chapter.

2. The household must be unable to meet the approved rental rate plus utility allowance within a portion of their income described as follows:

(a) 30 percent of their adjusted monthly income; or

(b) 10 percent of gross monthly income, or

(c) If the household is receiving payments for public assistance from a public agency, the portion of such payments which is specifically designated by the agency to meet the household's shelter cost.

3. The household must meet the occupancy policy established for the project and approved by FmHA according to paragraph VI B 2 of Exhibit B of this subpart.

B. *Eligible Project.*

1. All projects must operate under Interest Credit Plan II RA to be eligible to receive RA, except LH loans, direct RRH, and insured RRH loans approved prior to August 1, 1968, which must operate under Plan RA. To be eligible for RA the project must have a:

a. RRH insured or direct loan made to a broadly-based nonprofit organization, or State or local agency, including Senior Citizen Housing (SCH), or

b. RRH insured loan to an individual or organization who has or will execute a Loan Resolution or Loan Agreement agreeing to operate the housing on a limited profit basis as defined in § 1944.205(r) or Subpart E to Part 1944 of this chapter, or

c. RCH insured or direct loan, or

d. LH loan, or an LH loan and grant combination, made to a broadly-based nonprofit organization or nonprofit organization of farmworkers or a State or local public Agency.

2. Borrowers may utilize HUD's Section 8 Housing Assistance Payments Program for existing housing and FmHA RA for other eligible households in the same project.

3. Projects with all or a part of the rental units under contract with the Department of Housing and Urban Development (HUD) developed under the Section 8 program for new construction or rehabilitation, by either the dual or single track processing procedures will not be considered an eligible project for RA.

4. Borrowers may provide RA to only those eligible tenants occupying rental housing units financed by FmHA LH, RCH, or RRH funds.

C. *Operational Project.* A completed RRH, RCH, or LH project financed by FmHA which has been opened for occupancy and has at least been partially occupied by tenants.

D. *New Projects.* Newly constructed or substantially rehabilitated RRH, RCH or LH project financed by FmHA. For Rental Assistance purposes, it further means before any units are occupied.

E. *Rental Assistance (RA).* RA, as used in this Exhibit, is the portion of the approved shelter cost paid by FmHA to compensate for the difference between the approved shelter cost and the monthly tenant contribution as calculated according to paragraph IV A 2 C of Exhibit B to this Subpart. When the monthly net tenant contribution is less than the approved utility allowance which is billed directly to and paid by the tenant, the owner will pay the tenant that difference according to paragraph IX A 2 or this Exhibit.

F. *Shelter Cost.* The approved shelter cost consists of basic or market rent plus utility allowance, when required. Basic and/or market rent must be shown on the project budget for the year and approved according to § 1930.124 of this Subpart. Utility allowances, when required, are determined and approved according to Exhibit A–5 to Subpart E of Part 1944 of this chapter. Any change in rental rates or utility allowances must be processed according to Exhibit C to this Subpart.

G. *Utility Allowonces.* The allowance approved by FmHA according to Exhibit A–5 to Subpart E of Part 1944 of this chapter, to cover the cost of utilities which are payable directly by the households.

H. *Replacement Units.* RA units which replace RA units in RA agreements expiring because obligated funds have been fully disbursed.

III Utilization of Rental Assistance

All borrowers with eligible projects as defined in paragraph II B of this Exhibit are encouraged to utilize the RA program and receive RA payments on behalf of eligible tenants. Generally, the borrower, or the borrower's approved management agent, will initiate the processing of a RA application.

IV Priority of Rental Assistance Applications

A. The National Office may establish a State quota on the number of RA units that may be approved and obligated in any fiscal year. The State Director will limit the approval of RA to no more than the number of units allocated to the State. Unless otherwise stated by the National Office, the State allocation will indicate the number of RA units for operational projects and the number of RA units to be used for new construction. Priority in allocating RA units will be as follows:

B. *Allocation to Projects Within a State.* The State Director will distribute any RA units allocated to the State according to any specific guidance established by the National Office. When no specific guidance is established by the National Office the State Director will approve requests for RA to projects according to the provisions of this Exhibit.

1. *Replacement Units.* The State Director will distribute or reserve RA units and give priority to projects needing replacement units before any initial or additional units are allocated to other new or operational projects. The State Director should ascertain how many RA units are expected to expire in each District Office during the current fiscal year and the first quarter of the following fiscal year.

2. *New Housing.* Any RA units allocated to the State for new construction will be distributed on a priority basis in the following order:

a. Applications for RRH and RCH loans where the market survey information indicates that a large percentage of the prospective tenants need RA. When the number of RA units available is inadequate to cover all such applications, the units will be distributed giving priority to those projects located in areas identified as having the greatest housing needs and selected for funding in accordance with § 1944.231(c) of Subpart E of Part 1944 of this chapter.

b. For LH projects, RA units will be allocated by the National Office from the National Office reserve on a case-by-case basis at the time the projects are considered for funding at the National Office level.

3. *Operational Housing:* When the National Office provides an allocation for servicing RA units, the State Director will distribute them to operational RRH, RCH, and LH projects based on Forms FmHA 1944–25, "Request for Rental Assistance," that have been submitted by eligible borrowers. Priority will be given to projects based on this exhibit and administrative directives issued by the National Office under the annual rental assistance appropriations or other authorizations or guidelines established through the budget process. The National Office will notify the State Director each year of any specific date by which all requests for RA must be submitted to FmHA for consideration.

V Processing of Rental Assistance Applications

All requests for RA will be processed according to this paragraph and may be approved by the State Director.

A. *Operational Projects.*

1. A borrower with an eligible project in which there are tenants paying in excess of 30 percent of their adjusted income for rent is encouraged to file Form FmHA 1944–25 with the District Director. A separate Form FmHA 1944–25 will be submitted for each project. The borrower should include the following with each request.

a. Form FmHA 1944–29, "Project Worksheet for Interest Credit and Rental Assistance," with all columns completed for each tenant in the project. (All Forms FmHA 1944–8, "Tenant Certification," must be current.)

b. Approved or proposed budget for the year on Form FmHA 1930–7, "Statement of Budget and Cash Flow," with Exhibit A–5 to Subpart E of Part 1944 of this chapter attached, when applicable.

2. Prior to the full disbursement of obligated funds on any agreement, a borrower or approved management agent may submit a request for replacement RA units. This request should contain all the material requested in paragarph V A 1 of this Exhibit and should be submitted no later than three (3) months prior to the expected full disbursement of obligated funds, to allow time for processing the request. The number of replacement units may not exceed the number of units that are expiring. Once replacement units have been requested, additional units may not be requested until Form FmHA 1944–51, "Multiple Family Housing Obligation—Fund Analysis", is received obligating the replacement units. Form FmHA 1944–51 requesting the additional units must be coded sequentially as required by paragraph V C 5.

3. The District Director will review the budget, Exhibit A–5, Form FmHA 1944–29, and Form FmHA 1944–25 submitted by the borrower to assure that the items are complete and accurate. The District Director will complete Form FmHA 1944–25 and submit all data provided by the borrower to the State Director with appropriate comments and recommendations.

B. *Projects to be Funded.*

1. Applicants requesting funding for new projects who are planning to utilize the RA program, should submit a completed Form FmHA 1944–25 to the County Supervisor or District Director, as appropriate, when submitting a preapplication or application for funding.

2. The number of units of RA requested should be based on the market data for the area, the proposed rental rates as reflected in a budget for the project, and the income levels of the prospective tenants.

C. *State Director Action on Requests for Rental Assistance.* Only the State Director or delegated members of the State Office staff may approve or disapprove rental assistance requests.

1. *Approval Actions.* When the State Director determines that RA can be obligated or transferred, Part III of Form FmHA 1944–51, "Multiple Family Housing Obligation-Fund Analysis," for obligation, or Form FmHA 1944–55, "Multiple Family Housing Transfer of Rental Assistance," for transfers, will be prepared and distributed according to the FMI. Form FmHA 1944–27, "Rental Assistance Agreement," will not be executed or amended until the obligation or transfer is verified by the Finance Office. The State Office will verify the obligation or transfer via the computer terminal, on the day following the request.

2. *Completing Agreements.* When the State Director verifies that RA units have been obligated or transferred by the Finance Office, the State Director will forward a copy of either Form FmHA 1944–51 or Form FmHA 1944–55 to the District Director. The District Director will complete Form FmHA 1944–27, and attach the appropriate copies of Form FmHA 1944–51 or Form FmHA 1944–55 according to the FMI.

a. *Initial Agreements.* The District Director will prepare an original and two copies of Form FmHA 1944–27. When the project does not have a Form FmHA 1944–7, "Multiple Family Housing Interest Credit and Rental Assistance Agreement" in effect, the District Director will prepare an original and three copies. The District Director and the borrower will then execute the originals and all copies of Form FmHA 1944–27 and Form FmHA 1944–7. The forms will be distributed according to their FMIs.

b. *Replacement or Modified Agreements.* When an RA agreement initiated prior to, is replaced or modified, a new Form FmHA 1944–27 will be prepared and distributed according to the FMI. For every replacement or modification after , the original and all copies of the affected RA agreement will be notated, assembled and distributed by the District Director according to the FMI.

3. *Modification of an Existing Agreement.* After any request for a change in the amount of RA has been obligated by the Finance Office, a copy of Form FmHA 1944–51 or Form FmHA 1944–55 will be attached to Form FmHA 1944–27 and distributed according to the FMI. A new Form FmHA 1944–7 is not required.

4. *Denial of Rental Assistance Request.* If RA cannot be provided, the State Director will inform the borrower, in writing, of the reasons. The borrower will be given appeal rights according to Subpart B of Part 1900 of this chapter in all cases except when RA is not available from the State's allocation or the National Reserve.

5. *Rental Assistance Agreement Numbers.*

a. Each RA agreement will be assigned a six digit Rental Assistance Agreement Number by the Finance Office as follows:

(1) First two digits—Fiscal Year (FY in which the funds were obligated, i.e., 85, 86, etc.

(2) Second two digits—Initial obligation for the project will be coded 01. Rental obligations will be coded sequentially starting with 02.

(3) Third two digits—Initial obligation will be coded 00. Each modification where units are added to the agreement by obligation will be coded sequentially starting with 01.

b. RA agreements with units obligated before FY 1985 will be coded as follows:

(1) First two digits—FY initial obligation was made on the project, i.e., 78, 79, 80, etc.

(2) Second two digits—Will always be "00."

(3) Third two digits—Indicate the number of modifications plus 1. (RA agreement with

Section 9, "Term of the Agreement," may be modified by the use of Form FmHA 444–27A

A. RA payments will not be made directly

basis if necessary when the owner submits a

prorata basis for eligible tenants occupying

occupancy requirements of paragraph VI B 2

(3) Third two digits—Indicate the number of modifications plus 1. (RA agreement with two modifications on September 30, 1984, will be designated "03.")

c. The Finance Office will assign RA agreement number when RA is obligated on Form FmHA 1944–55. The Finance Office will also track RA agreements by number and notify the District Office on Form FmHA 1951–53, "Multiple Family Housing Transaction Record."

VI Terms of the Rental Assistance Agreement

A. *Effective Date.* Each "Rental Assistance Agreement" will be effective the first day of the month in which it is executed. If assistance is granted to a project under an appeal according to paragraph XVI of this Exhibit, the effective date will be retroactive to the first day of the month in which the assistance was denied, provided the borrower agrees to make any appropriate refunds to tenants who would have been entitled to RA during the retroactive period.

B. Term.

1. *Twenty (20) Year Agreement.* Twenty (20 year agreements when authorized are restricted to new projects or modifications of existing twenty (20) year agreements. The agreement shall be effective for twenty (20) years from the effective date of the agreement. This agreement may be modified or terminated in accordance with the terms of the RA agreement. The agreement will expire when the funds obligated for the RA units described in Section 1 of the agreement are fully disbursed. This can be any time before or after the end of the 20-year term. Upon expiration of the agreement, a replacement agreement may be executed. If a replacement agreement is considered, it will be for a five (5) year period.

2. *Five (5) Year Agreement.* Five (5) year agreements may be used for operational projects, or for new projects when twenty (20) year units are not available. The agreement shall be effective for five (5) years from the effective date of the agreement. This five (5) year agreement may be modified or terminated in accordance with the terms of the RA agreement. The agreement will expire when the funds obligated for the RA units described in section 1 of the agreement are fully disbursed. This can be any time before or after the end of the five (5) year period.

3. *Modification of Agreements.* RA agreements may be modified:

a. To add or subtract RA units assigned to the project through obligation or through transfer from another rental assistance agreement;

b. To reinstate a suspended RA agreement to a new borrower in the same project after a voluntary conveyance or a foreclosure and a credit sale within the Multi-Family Housing program; or

c. To transfer a suspended RA agreement to a new borrower and a different project after liquidation of the project assets or after the loan is paid in full.

4. *Amendment of Agreement.*

a. Any existing RA agreement executed prior to February 15, 1983, which will have a remaining obligation balance at the end of the 5-year or 20-year expiration date stated in Section 9, "Term of the Agreement," may be modified by the use of Form FmHA 444–27A, "Amendment to Rental Assistance Agreement." The amended agreement will expire when the obligated funds are fully disbursed.

b. Any existing RA agreement containing an occupancy standard may be amended by mutual consent of the borrower and FmHA when a new occupancy policy for the project is approved according to paragraph VI B 2 of Exhibit B of this Subpart. To amend the agreement:

(1) Delete Section 5 of the original agreement and the borrower's copy and have the deletion dated and initialed by the appropriate FmHA offical and the person(s) authorized to sign for the borrower.

(2) Type the following statement on the reverse of the original agreement and the borrower's copy and have the statement dated initialed by the appropriate FmHA official and the person(s) authorized to sign for the borrower.

"Amended (date) by authority of paragraphs VI B 4 of Exhibit E and VI B 2 a of Exhibit B to Subpart C of part 1930, Chapter XVIII, Title 7, Code of Federal Regulations."

5. *Replacement Agreements.* Replacement RA agreements for either 5-year or 20-year agreements will be for a five (5) year period. All requirements in paragraph VI B 2 and 3 of this Exhibit apply. Expiring RA agreements and replacement RA agreements may run concurrently for one month so any undisbursed obligation balance on the expiring RA agreement can be liquidated.

VII Recordkeeping Responsibilities

A. the State Director will maintain Form FmHA 444–28, "Record of Rental Assistance Agreements." Any changes which are made in the number of rental units assisted will be recorded on Form FmHA 444–28.

B. The Finance Office (FO) will track the use of RA and ensure that RA is not disbursed or credited to a borrower's account in excess of the RA obligation. Quarterly and annually, the FO will provide the District Director with an RA payment and obligation status report for each project. The annual version of this report will be filed in Position 2 or the project case file and maintained indefinitely.

C. The District Director will notify the borrower to apply for replacement RA units when the RA Undisbursed Balance reaches a level sufficient to cover approximately 6 months of RA requests. This figure will be based on the project's average monthly request for RA.

D. Information on FmHA Rental Assistance on Form FmHA 2033–42, "Multi-Family Housing Information Status Tracking and Retrieval System," (MISTR) regarding balance of RA funds must be updated annually at the end of each fiscal year by the District Director and State Director.

VIII Responsibilities of Borrower in Administering the Rental Assistance Program

The borrower and management agent for each project receiving RA should fully understand the responsibilities and requirements of carrying out the program. The following guidelines will be followed:

A. RA payments will not be made directly to eligible tenants receiving RA except as specified in paragraph IX A. The borrower will maintain an accurate accounting of each tenant's utility allowance and payments made to tenants. All other RA payments will be recorded as a credit to the tenant's monthly rental payment.

B. The borrower must submit Form FmHA 1944–8 "Tenant Certification," for each tenant as required in paragraph VII F of Exhibit B to this Subpart (Management Handbook)

C. The incomes reported by the tenants must be verified by the borrower in accordance with paragraph VII of Exhibit B to this Subpart (Management Handbook).

D. Borrowers utilizing RA must comply with § 1930.124 of this Subpart. RA will not be approved for a project until the operating budget has been approved by the FmHA State Office or the District Director. District Directors, with assistance from the State Office, must closely supervise and assist borrowers in complying with all accounting and management requirements.

E. A borrower participating in the RA program must have an FmHA approved lease with the assisted household. All leases must comply with the provisions of paragraph VIII of Exhibit B to this Subpart (Management Handbook).

F. The borrower will be responsible to FmHA for any errors made in the administration of the RA program which are made by the borrower or the borrower's authorized management agent. Errors in computation or other unauthorized use of RA will require, at a minimum, the repayment of any incorrectly advanced RA funds. If the error or unauthorized use of RA appears to be deliberate or intentional, the State Director will refer the case to the Office of Inspector General according to Subpart B of Part 2012 (available in any FmHA Office).

IX Handling Utility allowonces

A. *Payment of Utilities.*

1. When the tenant is billed directly for utilities, rent paid by the tenant receiving RA will be the difference between the established utility allowance and the portion of income cited in paragraph II A 2 (a) or (b) or (c) of this exhibit.

2. When utilities are paid by the household receiving RA and the portion of income cited in paragraph II A 2 or (b) or (c) of this exhibit is less than the allowance for utilities, the borrower will pay the household the difference between the utility allowance and one of those limits of the household's adjusted monthly income.

3. In a project where the owner pays all utilities, the tenant rent will be the portion of income cited in Paragraph II A 2 (a) or (b) or (c) of this exhibit up to the approved rent for the rental unit being occupied.

B. *Determining the Allowance.* The utility allowance will be determined and recorded by the use of Exhibit A–5 to Subpart E of Part 1944 of this chapter.

C. *Changes in Allowances.* The utility allowance should be reviewed annually and adjusted if there are substantial changes in utility and public service rates. Normally, allowances will be adjusted on an annual basis if necessary when the owner submits a new budget for approval. Changes in utility allowance which will result in changed rent paid by tenants will be processed according to Exhibit C to this Subpart.

X Method of Payment of Rental Assistance to Borrower

A. Regular monthly rental assistance payments.

1. *Borrower Responsibilities.*

a. Any RA due the borrower will be deducted from the balance of scheduled loan payments, any delinquent payments, and other charges due on Form FmHA 1944–29, "Project Worksheet for Interest Credit and Rental Assistance," and the remaining balance must be submitted to the District Office. If the RA due the borrower exceeds the balance of scheduled loan payments, delinquent payments and other charges, an RA check for the excess will be issued by the Finance Office.

b. Each month the borrower must forward to the District Director a separate Form FmHA 1944–29 and any new Form FmHA 1944–8, for each project according to the instruction attached to the form.

2. *District Director Responsibilities.*

a. When a Form FmHA 1944–29 and new Form FmHA 1944–8 are received, the District Director will:

(1) Review Form FmHA 1944–8 and verify that the information contained on the form is complete and correctly computed based on information contained in the form.

(2) Review Form FmHA 1944–29 and ensure that entries are supported by the current Form FmHA 1944–8.

(3) Submit the borrower's payment and payment data to the Finance Office using Form FmHA 1944–9, "Multiple Family Housing Certification and Payment Transmittal."

b. The District Director should verify the accuracy of the borrower's servicing address shown on the Finance Office record. When the address shown is incorrect, Form FmHA 1944–50, "Multiple Family Housing Borrower/Project Characteristics" will be prepared and the Finance Office record corrected via a field computer terminal. File Form FmHA 1944–50 in the borrower casefile.

B. When a project loan account is delinquent, the District Director should counsel with the borrower and develop a servicing plan in accordance with § 1965.85(b) of Subpart B of Part 1965 of this chapter. This plan should incorporate detailed provisions for continuing operation of the project and paying the account current.

1. As part of the servicing plan, the District Director may agree to releasing a portion of the monthly RA for project operation. This amount will be shown in the "Amount of Rental Assistance Check" block on Form FmHA 1944–9. The check will be delivered to the District Director.

2. The RA Check may be released to the borrower according to the servicing plan.

C. An RA payment request must be based on actual occupancy as of the first day of the month, except for the initial month of rent-up in a new project. During the initial month of participation by a new project in the RA program, the borrower must collect RA on a prorata basis for eligible tenants occupying the project. This initial RA request may be submitted with the borrower's first payment and subtracted from the payment due.

XI Assigning Rental Assistance to Tenants

A. *New Project.* Applications for occupancy should be accepted during the construction phase of the project and placed on a waiting list. During initial rent-up period the following priorities will apply:

1. Until all the RA units have been assigned, a number of apartment units in the project equal to the number of RA units will be initially reserved for applicant households who qualify for RA as defined in paragraph II A of this Exhibit. Applicants qualifying for RA will be considered according to the priority established by paragraph XI B, by-passing those applicants on the waiting list whose income is above the low-income limits for the area. The balance of the apartment units will be rented simultaneously to other applicants on a first come, first served basis.

2. If a substantial number of apartment units reserved to be used with RA units remain vacant after initial rent-up and the borrower could rent those units to applicants not eligible for RA, the borrower may consider requesting a transfer of unused RA units in accordance with Paragraph XV B 5 of this chapter. Applicants not eligible for RA cannot be selected to occupy units initially reserved to be used with RA until unused RA units are transferred.

3. If there are still vacant units, those applicants by-passed because they did not qualify for RA will be considered for occupancy on a first-come first-served basis.

B. *Operational Project.* To determine priority for assigning an available RA unit in an operational project, the latest Form FmHA 1944–29 must be updated as of the date the unit is available, assuring that columns 3 through 9 are current and accurate.

1. First priority for assigning RA must always be given to eligible very low-income households in the following order:

a. *Eligible very low-income tenants* paying the highest percentage of adjusted annual income for approved shelter costs.

b. *Eligible very low-income applicants from waiting list.* Very low-income applicants will be selected from the waiting list on a first come, first served basis as provided in paragraph VI E of Exhibit B to this Subpart. No eligible tenant household in the project may be required to move from the project to allow an applicant on the waiting list who is eligible for RA, to move in.

2. Second priority for assigning RA will be given to eligible households with *low-income* in the following order.

a. *Eligible low-income tenants* paying the highest percentage of adjusted annual income for approved shelter cost.

b. *Eligible low-income applicants from waiting list.* Low-income applicants will be selected on a first come, first served basis according to paragraph VI E of Exhibit B of this Subpart, provided the borrower has satisfied the requirements of paragraph XI C of this Exhibit.

3. Third priority for RA will be given, with State Director approval, to occupancy ineligible tenants living in the project. The occupancy requirements of paragraph VI B 2 of Exhibit B of this subpart must be met.

4. When the project has vacancies and RA is not available, an applicant who is eligible for RA may elect to accept occupancy without the benefit of RA. After occupancy, the household will be considered for RA according to paragraph XI B of this Exhibit. If the applicant elects not to accept occupancy because RA is not available, their application will retain its priority date on the waiting list if the rental agent determines that a hardship to the applicant will exist according to paragraph VI E 2 of Exhibit B to this Subpart.

5. Eligible tenants receiving the benefits of RA may continue receiving such benefits as long as they remain eligible for rental assistance and there is a RA agreement in effect.

C. *Limits on Low-Income Applicants Which May Receive Occupancy and RA.*

1. When no more very low-income applicants are on the waiting list *and RA is available,* eligible low-income applicants may obtain occupancy and receive RA, provided that:

a. For projects available for initial occupancy prior to November 30, 1983, no more than 25 percent of the vacant units receiving RA may become occupied by low-income tenants other than very low-income tenants.

b. For projects available for initial occupancy on or after November 30, 1983, no more than 5 percent of the vacant units receiving RA may become occupied by low-income tenants other than very low-income tenants.

2. The borrower may rent units and provide RA to other than very low income applicants/tenants in excess of the percentages in XI C 1 a and b above, respectively, when no more very low-income applicants/tenants are in the market area. The borrower must have in its file and available to FmHA or its representative documentation that shows the efforts made, and the facts used to determine that there are no more very low-income applicants in the market area.

D. *Assigning Rental Assistance Other Than The First of The Month:*

1. When a tenant receiving RA vacates before the end of the month, the RA unit should be immediately reassigned to another tenant or an applicant using the priorities given in paragraph XI B of this exhibit.

2. When RA is assigned to an applicant and the applicant initially enters the project on a day other than the first of the month, the applicant's tenant contribution for housing costs will be prorated for the remaining portion of the month the same as if the tenant was receiving RA. [Example: Basic rent of $200 and the tenants monthly contribution with RA would be $120, the pro rata amount for ½ month would be $60.]

3. When RA is assigned to a tenant other than the first of the month, no adjustment to their tenant contribution on Form FmHA 1944–29 for that month will be made. The tenant will begin to receive the benefits of RA as of the first day of the next month.

4. No adjustment will be made on Form FmHA 1944–29 to request additional RA

payment or to refund any excess RA payment or overage when RA is reassigned other than the first of the month.

XII Terminating Existing Rental Assistance Agreements Obligated in Prior and/or Current Fiscal Years

1965 of this chapter and the account is accelerated, the RA will be suspended and

provided under the conditions of § 1944.235(b) of this chapter. However, if this

Subpart E—Rural Rental Housing Loan

VOL 50 ISS 136 JL 16 1985 UMI

payment or to refund any excess RA payment or overage when RA is reassigned other than the first of the month.

XII Rental Assistance Assigned to Wrong Household

When the tenant has correctly reported income and household size, but RA was assigned to a household in error, that tenant's RA benefit should be cancelled and reassigned. Incidents involving incorrect reporting are addressed in paragraph IX C of Exhibit B to this subpart (Management Handbook).

A. Before the borrower notifies the tenant, the borrower or management agent shall review the case with the District Director. If the District Director verifies that an error has been made based on information available at the time the unit was assigned, the tenant will be given 30 days written notice that the unit was assigned in error and that the RA benefit will be cancelled effective on the next monthly rental payment due date after the end of the 30 day notice period. The tenant will also be notified in writing that:

1. The tenant has the right to cancel the lease based on the error made by the borrower and the loss of benefit to the tenant.

2. The RA granted in error will not be recaptured.

3. The tenant may meet with management to discuss the cancellation and the facts on which the decision was based. If the facts are accurate and the tenant cannot produce further evidence proving eligibility for RA, there will be no appeal from the decision. If the tenant feels there is justification for further review the borrower must give the tenant appeal rights under Subpart L of Part 1944 of this chapter.

B. Reassigning rental assistance:

1. The RA unit will be reassigned to the household which was erroneously denied the RA unit. The assignment will be based on the Form FmHA 1944–29 from which the original priority was established, when the unit was erroneously assigned. The RA will not be retroactive unless the reassignment was based on an appeal by the tenant. Retroactive RA may not exceed the project's remaining RA obligation balance.

2. If the originally denied household now has RA, or is no longer a resident, the RA will be assigned based on a current Form FmHA 1944–29 and the priorities in paragraph XI of this Exhibit.

XIII Rental Assistance Payment Cancellation

When a RA check must be cancelled, the following procedure will be followed:

A. *Return of the original rental assistance Treasury Check:* The District Office will prepare Form FmHA 1944–53, as specified in the FMI and mail it to the MFH Unit in the Finance Office.

B. *Return of all or a portion of the monthly rental assistance payment or refund of rental assistance previously advanced:* A check from the borrower made payable to Farmers Home Administration (FmHA) will be submitted to the MFH Unit in the Finance Office on Form FmHA Form 1944–53, completed according to the FMI.

XIV Terminating Existing Rental Assistance Agreements Obligated in Prior and/or Current Fiscal Years

A. When a project's obligated funds are fully disbursed under any given RA agreement number, RA will be automatically terminated by the Finance Office. The Finance Office will notify the District Office on Form FmHA 1951–51, "Multiple Family Housing Transaction Record." The District Office will notate Form FmHA 1944–27 according to the FMI to indicate that a termination has occurred. The District Director will notify the borrower in writing that the obligation under the RA agreement number has expired and the RA agreement number must be stricken from the agreement.

1. *For all RA obligations before FY 1985.* RA is considered fully disbursed by the Finance Office when all RA funds obligated before FY 1985 are disbursed.

2. *For all RA obligations after FY 1984.* RA is considered fully disbursed by the Finance Office when all RA funds obligated in a particular FY are disbursed. This includes RA transferred from a different MFH project.

3. When an RA agreement (Form FmHA 1944–27) consists of several different obligations (Form FmHA 1944–51, Part III, or Form FmHA 1944–55) identified by different RA agreement numbers, and the obligations will not be fully disbursed at the same time, only those RA agreement numbers with fully disbursed obligations will be terminated.

B. Prior to Full Disbursement of Obligated Funds:

1. *Prior Fiscal Year Obligations.* Prior fiscal year (FY) obligations *will not* be terminated. They will be suspended by the State Director using procedures in paragraph XV of this exhibit.

2. *Current Fiscal Year Obligations.* The State Director is authorized to terminate RA agreements prior to the disbursement of obligated funds if the funds were obligated during the current FY. The undisbursed funds for the RA obligation will be returned to the current FY obligation authority.

XV Suspending or Transferring Existing Rental Assistance Agreements

A. RA may be suspended or transferred according to the requirements for each situation described in Paragraph XV B and the following:

1. *Suspension.*

a. The State Director may approve a suspension of a project's RA agreement and obligation as a result of the servicing actions described in Paragraph XV B 2, 3, and 4 of this exhibit. The State Director will maintain records and control of this suspended RA.

b. The District Director will notify the borrower in writing and the Finance Office by memorandum.

c. After notification, the Finance Office will suspend all RA payments to the affected project.

d. The State Director may reinstate the RA to the same borrower in the same project, by memorandum to this Finance Office.

2. *Transfer.*

a. Only the State Director may approve a RA transfer.

b. RA may be transferred to any borrower with an RA eligible project according to the priorities established by this Exhibit or the National Office.

c. The amount of RA which may be transferred must be:

(1) A specific unit and dollar amount. The dollar value of each RA unit to be transferred will be determined by dividing the transferring project's total remaining RA obligation(s) balance in the transferring RA agreement by the total number of obligated RA units in the RA agreement.

(2) A unit and dollar value equal to or less than those shown on the current RA agreement for the transferring project. For example, a portion of an RA agreement unit and remaining obligation dollar value may be transferred.

d. RA units identified by different RA agreement numbers must be transferred with separate RA agreement numbers on Form FmHA 1944–55.

e. When the State Director approves an RA transfer, Form FmHA 1944–55 completed according to the FMI, will be used to notify the Finance Office except as noted in Paragraph XV B 1 below.

f. Form FmHA 1044–27, with Form FmHA 1944–55, attached will be completed according to the FMI for each transferee. The transferors' RA agreement will be modified by attaching a copy of Form FmHA 1944–55 according to the FMI to indicate that a portion of the agreement has been transferred. When all the RA units on a RA agreement have been transferred, the transferor's present agreement will be so documented.

B. RA may be suspended and/or transferred in the following situations according to the following directions:

1. *RA transfer accompanying a loan transfer.* When a loan is transferred to an eligible borrower, the transferee may assume the transferor's RA agreement. The RA will be transferred using Form FmHA 1944–55 which will be forwarded to the Finance Office with Form FmHA 1965–9, "Multiple Family Housing Assumption Agreement" as required in § 1965.65(c)(11) of Subpart B of Part 1965 of this chapter.

2. *Suspension and transfer after a voluntary conveyance.* When a project with RA is voluntarily conveyed to the Government, the RA will be suspended rather than cancelled. When Form FmHA 1965–19, "Multiple Family Housing Advice of Mortgage Real Estate Acquired" is sent to the Finance Office, Form FmHA 1944–55 must be attached indicating the Code 4 status of the suspended RA units according to the FMI. If the project is sold through a credit sale within the program, the suspended RA may be transferred to the project's new borrower, or a different project if it is not needed.

3. *Suspension and transfer after a liquidation.* When a project with RA is liquidated through sale outside of the program or the loan is paid in full, the RA will be suspended and, subsequently, transferred to a different FmHA financed project.

4. *Suspension and transfer or reinstatement due to a servicing action.*

a. When servicing a project's account according to § 1965.85 of Subpart B of Part 1965 of this chapter and the account is accelerated, the RA will be suspended and either:

(1) Transferred with the project to a new borrower when all appeals and redemption periods of the defaulting borrower have expired and a credit sale is to be completed, or

(2) Transferred to a different project if the defaulting project is subsequently sold outside the program, or

(3) Reinstated to the same project when the defaults are corrected and the State Director reinstates the borrower's account.

b. The borrower will be apprised of the appeal rights available under subpart B of Part 1900 of this chapter upon notification of the pending suspension. The suspension will not be effective until these appeal rights have been exhausted.

5. *Transfer of unused RA.* When RA is unused after initial rent-up and not needed because of a lack of eligible potential tenants in the area, all or a portion of it may be transferred when the State Director determines that the following conditions have been met:

a. The borrower demonstrates that:

(1) The original market survey completed according to Exhibit A–6, Subpart E of Part 1944 of this chapter clearly indicates no significant need for rental housing by households in the market area that would require RA for occupancy, and that there are no eligible tenants in the project not receiving RA or there are no eligible applicants on the waiting list who could use RA when obtaining occupancy. The State Director may require a new market survey for the project to make this determination if the original market survey does not adequately address potential very low-income tenants in the area, or does not reflect current market conditions.

(2) When the market survey indicates that there is a significant need for rental housing by households in the market area that would have required RA for occupancy but all or a substantial portion of the RA units available remain unused after a two year period since initial availability, the borrower must demonstrate that:

(i) A good faith effort was made to market the project to RA eligible applicants;

(ii) The waiting list does not contain RA eligible applicants and the project is not occupied by RA eligible tenants who do not receive RA; and

(iii) Project management has not used a policy of discouraging RA eligible households from applying for or obtaining tenancy in the project.

(3) Rent increases anticipated for the following two years will not prompt a request for RA according to the provision of Exhibit C of this subpart.

b. The District Director recommends the RA transfer after reviewing documentation submitted by the borrower and finding that the applicable conditions of Paragraph XV B 5 of this exhibit have been met.

b. *Transfer due to an uncloseable loan.* When RA will be unused because the loan to which it was obligated will not be closed, or the RA agreement is not signed, the RA obligation may be transferred except as provided under the conditions of § 1944.235(b) of this chapter. However, if this situation occurs during the same FY of obligation, the obligation should be cancelled and reobligated immediately using current authorities. Obligations from prior fiscal year must be cancelled and will be lost *unless* the conditions of § 1944.235(b) of Subpart E of Part 1944 of this chapter exist.

XVI. Rights for Appeal if Rental Assistance is not Granted or is Cancelled by Farmers Home Administration

A. Borrowers who have requested RA in writing and are denied such assistance (whether in whole or in part) by Farmers Home Administration, or when RA is cancelled, will be notified in writing of the specific reasons why they have been denied RA as specified in subpart B or Part 1900 of this chapter.

B. If at any time a borrower or a household is granted RA under an appeal, the borrower or household will receive the next available RA unit.

C. Borrower denial of RA to tenants will be handled according to Subpart L of Part 1944 of this chapter.

XVII. Forms and Exhibits

Exhibit A–5 to Supbart E of Part 1944 of this chapter and Form FmHA 1944–7 are to be used in determining the amount of rental assistance to be provided.

37. In addition to the amendments set forth above, 7 CFR Part 1930 is amended by removing the words "45 days" and inserting the words "60 days" in the following places:

(a) Section 1930.124 (b) introductory text;

(b) Exhibit A–1, paragraph IV B 1 c; item 5. of the Evaluation Checklist for Audit Reports, and item 3. of the Example Audit Review Letter;

(c) Exhibit B–7, wherever it appears under the column entitled "Due dates."

PART 1944—HOUSING

38. The authority citation for Part 1944 is revised to read as follows:

Authority: 42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70.

Subpart D—Farm Labor Housing Loan and Grant Policies, Procedures and Authorizations

§ 1944.182 [Amended]

39. Section 1944.182 is amended in the fifth sentence by changing "Form FmHA 444–8" to "Form FmHA 1944–8."

§ 1944.200 [Amended]

40. Section 1944.200 is amended in the first sentences of paragraphs (a)(1) and (a)(2) by adding the words "very low-," before the words "low- and moderate-income . . ."

41. Exhibit A is amended in the first sentence of the second paragraph by adding the words "very low- and" before "low-income farmworkers."

Subpart E—Rural Rental Housing Loan Policies, Procedures, and Authorizations

42. Section 1944.205 is amended by revising paragraphs (b), (c), the title of paragraph (d), the introductory paragraph of paragraph (f), paragraphs (f)(2), (f)(3), (f)(4), (f)(5), (i) and (j), and by adding paragraph (cc) to read as follows:

§ 1944.205 Definitions.

* * * * *

(b) *Elderly (Senior Citizen).* A person who is 62 years of age or older. The term elderly, or senior citizen, also means persons with the following handicap or disabilities, regardless of age:

(1) *Handicapped.*

(i) Inability to engage in any substantially gainful activity by reason of any medically determinable physical or mental impairment which;

(A) can be expected to result in death, or which has lasted or can be expected to last for a continuous period of not less than 12 months, and

(B) substantially impedes his or her ability to live independently, and

(C) is of such a nature that such ability could be impaired by more suitable housing conditions.

(ii) In the case of an individual who has attained the age of 55 and is blind (within the meaning of "blindness" as determined in Section 223 of the Social Secuity Act), inability by reason of such blindness to engage in substantially gainful activity requiring skills or abilities comparable to those of any gainful activity in which he/she has previously engaged with some regularity and over a substantial period of time.

(2) *Disabled.* In the case of developmental disability, a person with a severe, chronic disability which:

(i) is attributable to a mental or physical impairment or combination of mental or physical impairment;

(ii) is manifested before the person attains age 22;

(iii) is likely to continue indefinitely;

(iv) results in substantial functional limitations in three (3) or more of the following areas of major life activity:

(A) self-care,

(B) receptive and expressive language,

(C) learning,

(D) mobility,

(E) self-direction,

(F) capacity for individual living,

(G) economic self-sufficiency, and

(v) reflects the person's need for a continuation and sequence of special, interdisciplinary or generic care or treatment, or for other services which are of lifelong or extended duration and

are individually planned and coordinated.

(c) *Resident assistant.* A person(s) congregate housing project or a project housing handicapped tenants, space may be provided for cafeteria, dining must be granted by the respective loan approval official. The District Director

Exhibit B, paragraphs II B, VI D, VII A, and VII C.

DEPARTMENT OF TRANSPORTATION

the proposed rule. The proposals contained in this notice may be changed

are individually planned and coordinated.

(c) *Resident assistant.* A person(s) residing in a housing unit who is essential to the well-being and care of the elderly, disabled or handicapped person(s) residing in the unit and who is not related by blood, marriage, or operation of the law to these tenants. The resident assistant is not considered to be part of the household and is not subject to the eligibility requirements of a tenant. The resident assistant receives compensation from sources other than FmHA.

(d) *Very low, low or moderate income household.* * * *

* * * * *

(f) *Eligible occupants.* Eligible occupants in a project may be either the elderly, disabled, handicapped, or very low-, low- and moderate-income households, or any combination thereof, as planned for the project and shown on the applicant's loan resolution or loan agreement, and who comply with the occupancy policy of the borrower as governed by the provisions of paragraph VI B 2 of Exhibit B to Subpart C of Part 1930.

* * * * *

(2) For a direct loan or a loan developed under Plan I, be:

(i) an elderly, handicapped or disabled person with a very low-, low- or moderate-income, or

(ii) Any household with a very low- or low-income.

(3) for loans developed under Plan II, be persons with a very low-, low- or moderate-income.

(4) For all other loans be persons with a very low-, low- or moderate-income or elderly, handicapped or disabled without regard to income.

(5) In the case of cooperative housing projects all members (tenants) must be very low-, low- or moderate-income; however, any tenant who is admitted as an eligible tenant of the cooperative may not subsequently be deprived of her/his membership or tenancy by reason of no longer meeting the income eligibility requirements as outlined in Exhibit C of Subpart A of Part 1944 of this chapter.

* * * * *

(i) *Related facilities.* Related facilities may consist of community rooms or buildings, site manager's apartment unit, cafeterias, dining halls, appropriate recreation facilities, and other essential service facilities such as central heat and cooling, sewerage, light systems, ranges and refrigerators, clothes washing machines and clothes dryers, and a safe domestic water supply. Under special conditions, such as a congregate housing project or a project housing handicapped tenants, space may be provided for cafeterias, dining areas, an infirmary, therapy room, special bathing room, and other special areas needed by the elderly and the handicapped tenants when determined to be economically feasible. The cost of kitchen equipment such as stoves, ovens, steam tables and other such items may be included in the loan. However, the cost of specialized equipment such as that used for training and therapy will not be included in the RRH loan to equip these facilities. When ranges, refrigerators, dish washing machines, dish dryers and other kitchen equipment are included, they will be attached to the real estate in a manner to prevent easy removal.

(j) *Project.* A project is the total number of rental housing units in one community such as a densely settled area, town or village, operated under one management plan with one loan agreement or resolution.

* * * * *

(cc) *Elderly family.* A household where the tenant or co-tenant is 62 years of age or older, handicapped or disabled as defined in § 1944.205(b). An elderly family may include a person(s) younger than 62 years of age who is essential to the elderly handicapped or disabled person's care and well-being. (To be eligible to receive an elderly family deduction the elderly, handicapped or disabled person must be the tenant or co-tenant.)

43. Section 1944.211 is amended by adding paragraph (c) to read as follows:

§ 1944.211 Eligibility requirements.

* * * * *

(c) *Eligibility of tenants.* Eligibility requirements for tenants are specified in Exhibit B to Subpart C of Part 1930 of this chapter.

§ 1944.215 [Amended]

44. Section 1944.215(i)(4) is amended by inserting "very low-" between the words "eligible" and "low- and moderate-income."

45. Section 1944.235 is amended by revising paragraph (i)(1) to read as follows:

§ 1944.235 Actions subsequent to loan approval.

* * * * *

(i) * * *

(1) The District Director will review the applicant's marketing plan to determine that it is complete with all supplemental information provided. If it is determined that the plan should be modified before marketing activity begins, approval of the modification must be granted by the respective loan approval official. The District Director will review the approved project operating budget to determine if it is still adequate for the initial operating period. If it is not adequate, a rent change will be made according to paragraph VI C of Exhibit C of Subpart C of Part 1930 of this chapter.

* * * * *

46. Exhibit B is amended by revising paragraphs IV A 1, IV B 1, IV F and VIII to read as follows:

Exhibit B—Interest Credits on Insured RRH and RCH Loans

* * * * *

IV. * * *

A. * * *

1. Borrowers operating under this plan must agree to limit occupancy of the housing to very low- or low-income nonelderly and very low-, low- and moderate-income elderly, disabled or handicapped persons.

* * * * *

B. * * *

1. Borrowers operating under this plan must agree to limit occupancy of the housing to households, persons, and elderly, disabled and handicapped persons of very low-, low- and moderate-incomes. Under Plan II, interest credits are based on the cost of operating the project and the size and income of the household.

* * * * *

VI. * * *

F. *Understanding Eligibility.* The borrower should understand the eligibility requirements for occupancy of the housing. Instructions for tenant's eligibility may be found in paragraph VI B of Exhibit B to Subpart C to Part 1930 of this chapter (Multiple Housing Management Handbook).

* * * * *

VIII. *TENANT CERTIFICATION*

Tenant certification and recertification for interest credit borrowers will be performed according to paragraph VII of Exhibit B to Subpart C to Part 1930 of this chapter.

* * * * *

47. In addition to the amendments set forth above, 7 CFR Part 1944, Subpart E is amended by changing the references from "Form FmHA 444–8" to "Form FmHA 1944–8" in the following places:

(a) Exhibit B, paragraph IV B 2 c;

(b) Exhibit H, paragraph VII.

48. In addition to the amendments set forth above, 7 CFR Part 1944, Subpart E is amended by changing the references from "Form FmHA 444–29" to "Form FmHA 1944–29" in the following places:

Exhibit B, paragraphs IV B 2 d, the introductory paragraph of paragraph IX and paragraph IX A 2.

49. In addition to the amendments set forth above, 7 CFR Part 1944, Subpart E is amended by changing the references from "Form FmHA 444–7" to "Form FmHA 1944–7" in the following places:

Exhibit B, paragraphs II B, VI D, VII A, and VII C.

50. In addition to the amendments set forth above, 7 CFR Part 1944, Subpart E is amended by changing the references from "Form FmHA 444–9" to "Form FmHA 1944–9" in the following places:

Exhibit B, the introductory paragraph of paragraph IX and paragraph IX A 2.

PART 1965—REAL PROPERTY

51. The authority citation for Part 1965 continues to read as follows:

Authority: 42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70.

Subpart B—Security Servicing for Multiple Housing Loans

52. Section 1965.85(c)(6) is amended by changing the reference from "Form FmHA 444–8" to "Form FmHA 1944–8."

Dated: April 30, 1985.

F.W. Naylor, Jr.,

Under Secretary for Small Community and Rural Development.

14 CFR Part 39

[Docket No. 85–NM–66–AD]

Airworthiness Directives; Boeing Model 747 Airplanes.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to amend an existing airworthiness directive (AD) that requires inspection of trailing edge flap tracks for corrosion and cracking on certain Boeing Model 747 airplanes. This amendment would incorporate increased inspection intervals on the condition the maximum operational flap setting is reduced to 25 degrees. Investigations have shown that this may be accomplished without adversely impacting safety.

DATES: Comments must be received on or before September 9, 1985.

ADDRESS: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 85–NM–66–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. The applicable service information may be obtained upon request from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124–2207. This information may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Owen E. Schrader, Airframe Branch, ANM–120S; telephone (206) 431–2923. Mailing Address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 85–NM–66–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

Amendment 39–4745 (48 FR 48220; October 18, 1983), AD 83–21–02, requires repetitive inspection of trailing edge flap tracks for corrosion and cracking. The corrosion is caused by the accumulation of water in the aft end of the flap track cavity. Extensive cracking that originates from the corrosion could result in separation of the flap under some conditions, and the resultant trajectory of the flap could cause it to damage the horizontal stabilizer, jeopardizing continued safe flight.

The manufacturer has since conducted tests and analyses and has determined that operation of airplanes with flaps not exceeding 25 degrees reduces the loads on the flap tracks and reduces crack growth rate. Boeing issued a revision to the service bulletin that describes an alternate operating procedure and corresponding inspection programs.

This proposed amendment would incorporate the manufacturer's alternative increased external visual inspection intervals on the condition that the maximum operational flap setting is reduced to 25 degrees. These inspection intervals could be further increased if a magnetic particle or penetrant inspection method is used in conjunction with the maximum flap setting of 25 degrees. Also, the X-ray inspection interval may be increased by accomplishing additional visual inspections and/or by determining if corrosion progression has been arrested.

These new inspection intervals and procedures are defined in Boeing Service Bulletin 747–57A2225, Revision 2, dated April 12, 1985. The existing inspection intervals specified in Amendment 39–4745 (48 FR 48220; October 18, 1983), AD 83–21–02, remain

in effect until this proposed amendment becomes a Final Rule.

The Proposed Amendment

Accordingly, pursuant to the authority

On page 27534 in the second column, under "Anchorage International Airport,

DATE: Comments must be received by August 15, 1985.

Also, as ground system saturation nears, the agency sponsoring a new GOES DCS

allocation of frequency resources for a limited period and to ensure against

in effect until this proposed amendment becomes a Final Rule.

Inasmuch as this Amendment would merely offer alternative inspection intervals and inspection techniques, it will not impose any additional regulatory or economic burden on any person.

For the reasons discussed above, the FAA has determined that this document: (1) Involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because few, if any, Model 747 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.85; and 49 CFR 1.47.

2. By amending AD 83-21-02, Amendment 39-4745 (48 FR 48220; October 18, 1983) by revising paragraphs E. and F. to read as follows:

E. Concurrent with the modification of paragraph D., above, perform an internal borescope inspection of the flaptrack in accordance with procedures defined in Boeing Alert Service Bulletin 747-57A225, Revision 1, or later FAA approved revision, to determine if corrosion exists. If corrosion or pitting is found, determine its extent by accomplishing the track web X-ray inspection specified in the service bulletin.

1. Perform repeat external inspections for cracks or corrosion penetration through track webs at the intervals shown in the following Table II:

TABLE II

Maximum flap setting used for landings	Internal corrosion classification	Maximum external inspection intervals (landings)	
		Visual inspection	Magnetic particle or penetrant inspection
25° (a)	Heavy	200	250
	Moderate	400	450
	Light	800	850
30°	Heavy	50	65
	Moderate	100	115
	Light	250	265

(a) Quadrant and alternate extension system must be modified to block off selection of flaps 30°.

F. Repeat the X-ray inspection specified in paragraph E. in accordance with Boeing Alert Service Bulletin 747-57A2225, Revision 1, or later FAA approved revision, on tracks indicating medium or light internal web corrosion at intervals not exceeding one year or until heavy web corrosion is indicated, whichever occurs first. This twelve month inspection interval may be extended to fifteen months, provided a monthly repeat visual inspection is initiated at the twelfth month and continued until the X-ray inspection is accomplished. When the classification of the internal corrosion changes then the inspection interval changes as indicated in paragraph E(1), above. If the previous two X-ray inspections show that corrosion progression has been arrested, the X-ray reinspection internal may be increased from 12 to 24 months until subsequent X-ray inspections indicate noticeable corrosion progression. At that time, the interval for X-ray inspection shall revert to 12 months.

All persons affected by this proposal who have not already received these documents from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124-2207. These documents also may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 9010 East Marginal Way South, Seattle, Washington.

Issued in Seattle, Washington, on July 9, 1985.

Thomas J. Howard,

Acting Director, Northwest Mountain Region.

National Oceanic and Atmospheric Administration

15 CFR Part 911

[Docket No. 50584-5084]

United States Geostationary Operational Evironmental Statellites (GOES) Data Collection System (DCS)

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Geostationary Operational Environmental Satellites (GOES) Data Collection System (DCS) has extra capacity which has been made available to non-NOAA users for the collection from remote locations of environmental data provided that NOAA, another Federal agency, or a state or local government has an interest in or requirement for obtaining these data and that no adequate alternative commercial service exists. This revision of NOAA's regulations for utilizing this excess capacity of the GOES DCS is necessary because the GOES DCS ground system is approaching saturation and more careful use must be made of it. Also, the revision clarifies that use of the GOES DCS may be allowed when an alterantive commercial service exists but involves significant additional cost to the government. Finally, the revision updates organizational references.

DATE: Comments must be received by August 15, 1985.

ADDRESS: Written comments should be sent to Douglas MacCallum, Chief, Data Collection and Direct Broadcast Branch (E/SP21), National Environmental Satellite, Data and Information Services, National Oceanic and Atmospheric Administration, Room 806, World Weather Building, Washington, D.C. 20233. Telephone Number (301) 763-8325.

FOR FURTHER INFORMATION CONTACT: Douglas MacCallum (301)-763-8325 at address given above.

SUPPLEMENTARY INFORMATION: The GOES DCS is a communications system for collecting and transmitting data from remote data collection platforms (DCP's) via a government-owned geostationary statellite, the primary purpose of which is the collection of environmental data, in particular meteorological, hydrological, and oceanic data.

I. Use of Channel Resources

NOAA has published regulations on the administration and operation of the GOES DCS at 15 CFR Part 911. These regulations establish the NOAA policy that the GOES DCS will be made available to non-NOAA users who own or operate DCP's for the collection of environmental data useful to federal agencies or state or local governments. All users have to agree to permit NOAA and other federal agencies free and open use of data collected except under certain specified conditions where private users can agree with NOAA to have data treated in a proprietary manner.

The NOAA GOES DCS ground system (but not the space system) is nearing saturation and no expansion of the ground system is planned for several years. Of the eighty available channels, 73 are in active use and 4 others already have been allocated. In order for NOAA to properly monitor the GOES DCS to ensure system integrity, all data relayed through the system must be received by the NOAA GOES DCS ground system. Once ground system saturation is reached, users wanting to enlarge their DCP networks will have to delay this enlargement until the NOAA ground system is expanded.

In order to more fairly distribute the impact of ground system saturation on the user community, federal agencies or a state or local government sponsoring new private GOES DCS users must share their existing channel resources with the new user they are sponsoring. Also, as ground system saturation nears, the agency sponsoring a new GOES DCS user must realize that channel resources not previously assigned may be allocated to that user and thus not be available for their future use.

II. Use of Alternative Private Carriers

Section 911.2(a) which precludes the use of the GOES DCS when "adequate" private common carrier communications exist, does not discuss cost as a factor. Of course the use of a commercial system will involve some cost to the user, but may also involve additional cost to a federal agency which needs the data, i.e. to tap into the common carrier. Where a federal agency has an urgent need for certain data, it seems inappropriate to preclude the collector from using the government system. The Government built and paid for the DCS and should not have to pay more for data the system is built to collect. NOAA never intended to preclude users under these conditions and this interpretation is clarified in this amendment. It allows use of the DCS unless a carrier arranges to make relevant data available to NOAA at no additional cost, e.g. by relaying these data.

III. Organizational References

The National Environmental Satellite, Data, and Information Service now is the NOAA element responsible for its environmental satellites and for the GOES DCS. The present revision reflects this change, particularly in new § 911.1(b)(3) which also explicitly authorizes redelegation of some functions.

IV. Other Actions Associated with the Rulemaking

(A) Classification Under Executive Order 12291

NOAA has concluded that these regulations are not major because they will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, state or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign based enterprises in domestic or export markets.

The proposed regulations revise existing regulations to ensure fair allocation of frequency resources for a limited period and to ensure against subsidization of private industry at taxpayer expense. The regulations will not result in any direct economic or environmental effect nor will they lead to any major indirect economic or environmental impacts.

(B) Administrative Procedure Act and Regulatory Flexibility Act Analysis (5 U.S.C. 553 and 601 et seq.)

This proposed rule is a matter relating to contracts because it determines who may enter into agreements with Federal agencies for use of channel resources in the GCOS DCS. Thus, it is not subject to the notice and comment requirements of the Administrative Procedure Act, 5 U.S.C. 553(a)(2). Therefore, the Regulatory Flexibility Act does not apply since the rule is not required to be published as a proposed rule. An initial Regulatory Flexibility Analysis was not prepared.

(C) Paper Work Reduction Act of 1980 (Pub. L. 96-511)

The existing regulations at 15 CFR Part 911 contain certain information requirements which have not been reviewed by the Office of Management and Budget. These information requirements are being reviewed at this time and comments on them should be directed to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for the Department of Commerce, The National Oceanic and Atmospheric Administration. The amendments do not impose any additional information requirements and do not require any increase in reporting on the part of any affected party.

(D) National Environmental Policy Act

Publication of the proposed regulations does not constitute a major federal action significantly affecting the quality of the human environment. Therefore, an environmental impact statement is not required.

V. Final Rules

NOAA will issue final rules after the comments received in response to the Notice have been evaluated.

PART 911—[AMENDED]

1. The authority cite for Part 911 continues to read as follows:

Authority: 15 U.S.C. 313; 49 U.S.C. 1463; 15 U.S.C. 1525; 7 U.S.C. 450b; 5 U.S.C. 552.

§ 911.1 [Amended]

2. Adding a new § 911.1(b)(3) to read:

* * * * *

(b) * * *

(3) For purposes of this part, "Assistant Administrator" means the Assistant Administrator for Environmental Satellite, Data, and Information Services or his/her designee.

§ 911.2 [Amended]

3. Revising §§ 911.2 (b) and (c) to read:

* * * * *

(b)(1) Except as provided in paragraph (b)(2) of this section, the GOES DCS is not to be used for data collection where adequate private common carrier communications exist to provide the service. (Adequate is defined in terms of capacity, speed and reliability with respect to the particular use envisioned.) A user must document, with a request for use of the GOES DCS, why private common carrier communications are not adequate.

(2) NOAA may authorize the use of the GOES DCS for environmental data collection critical to a federal program where adequate common carrier communications exist when use of the common carrier would substantially increase the cost to the federal program of collecting these data.

(c) A user must identify the Federal agency or State or local government which will benefit from the proposed collection of data. NOAA will confirm with the identifed sponsor that these data are required by it and that the sponsor is willing to share with the user any frequency channel resource allocated to it.

* * * * *

§ 911.3 [Amended]

4. Deleting the words "for Satellites" wherever they follow "Assistant Administrator" in §§ 911.3 (c)(1), (d)(1), (e)(g)(2) and 911.5(c).

§ 911.5 [Amended]

5. Substituting "Director, Office of Satellite Data Processing and Distribution" for "Director of Data Services for the National Earth Satellite Service" in § 911.5(c).

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL-2864-9]

Federal Assistance Limitations and Construction Moratorium; Wisconsin

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Notice of withdrawal of proposed rulemaking.

SUMMARY: USEPA is withdrawing a notice of proposed rulemaking that was published in the August 3, 1983, Federal Register (48 FR 35327), and that proposed sanctions for nonimplementation of Inspection and Maintenance (I/M) in southeastern Wisconsin. USEPA proposed to impose Federal funding and construction restrictions, as authorized by sections 176(b) and 173(4) of the Clean Air Act, because Wisconsin had failed to implement an I/M program by the required date of January 1, 1983. However, on April 2, 1984, the Wisconsin I/M program became fully operational in southeastern Wisconsin. USEPA published a notice of final rulemaking approving the program on February 25, 1985 (50 FR 7593). Therefore, USEPA's August 3, 1983 (48 FR 35327), finding of nonimplementation is no longer valid, and USEPA is withdrawing its proposal to impose sanctions.

DATE: This action will be effective on August 15, 1985.

FOR FURTHER INFORMATION CONTACT: Colleen W. Comerford, Regulatory Analysis Section, Air and Radiation Branch (5AR-26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 886-6034.

SUPPLEMENTARY INFORMATION: The Wisconsin SIP contains a commitment, and the legal authority, to implement a contractor-operated, centralized motor vehicle inspection and maintenance (I/M) program in the Milwaukee extension area by January 1, 1983 (May 6, 1981; 46 FR 25297-25298). Because the State failed to implement an I/M program by that date, USEPA published a Federal Register notice on August 3, 1983 (48 FR 35327), proposing to find that Wisconsin was no longer implementing the Ozone/Carbon Monoxide (CO) SIP for this area. USEPA also stated in that notice that, if the Agency took final action confirming this finding, then funding limitations and a construction moratorium would apply. These restrictions are authorized by sections 176(b) and 173(4) of the Clean Air Act, and are imposed when a State fails to carry out an approved SIP.

However, USEPA also noted in the August 3, 1983 (48 FR 35327), notice that Wisconsin had made progress toward implementation of an I/M program. On December 10, 1982, the Wisconsin Department of Transportation (WDOT) signed a contract with Hamilton Test Systems for the operation of a centralized I/M program in southeastern Wisconsin. The contract called for an April 2, 1984, program start-up date.

Wisconsin's I/M program did, in fact, begin operation on April 2, 1984. On June 11, 1984, the Wisconsin Department of Natural Resources (WDNR) requested that USEPA finally approve the I/M element of the 1982 Ozone/CO SIP revision. On February 25, 1985 (50 FR 7593), USEPA published a notice of final rulemaking approving Wisconsin's I/M program. USEPA has determined that the program meets all Federal I/M program requirements. In addition, since Wisconsin's I/M program is now fully operational, USEPA's proposed finding of nonimplementation (August 3, 1983; 48 FR 35327) is no longer valid. Therefore, USEPA withdraws the August 3, 1983, notice of proposed rulemaking.

Dated: June 11, 1985.

Valdas V. Adamkus,

Regional Administrator.

BILLING CODE 6560-50-M

40 CFR Part 86

[AMS-FRL-2864-7]

Public Workshop on Test Procedures for Trap-Based Particulate Standards and the Use of Fuel Additives for Particulate Trap Regeneration Systems

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Public workshop.

SUMMARY: This notice announces a public workshop on: (1) The need for modifications to the current test procedures for light- and heavy-duty diesels resulting from the promulgation of trap-based particulate standards and (2) the use of diesel fuel additives as a means of particulate control. In particular, the workshop will examine the treatment of emissions during trap regeneration and the measurement of particulate at low emission levels. In addition to these test procedure related issues, the workshop will also examine the types of fuel additive projected to be used and EPA's policy towards their use. Information is solicited from those parties possessing technical information or data on the topics identified in this notice. Comments on other subjects related to potential test procedure modifications associated with the trap-based standards are also requested.

DATE: The Workshop will be held on July 29, 1985, at 10:00 a.m. at the U.S. Environmental Protection Agency in Ann Arbor.

ADDRESS: The Workshop will be held in the conference room of the Motor Vehicle Emission Laboratory, 2565 Plymouth Road, Ann Arbor, Michigan.

FOR FURTHER INFORMATION CONTACT: Rebecca Kanner (SDSB-12), U.S. Environmental Protection Agency, Emission Control Technology Division, Ann Arbor, Michigan, 48105, (313) 668-4361.

SUPPLEMENTARY INFORMATION: Federal standards for particulate emissions from light-duty diesel vehicles decrease to 0.20 g/mi for 1987 and later model year passenger cars and to 0.26 g/mi for 1987 and later year light-duty trucks; heavy-duty diesel engine particulate standards decrease to 0.10 g/BHP-hr for urban buses and 0.25 g/BHP-hr for all other heavy-duty diesel engines in 1991. In order to meet these standards diesel manufacturers have indicated that they will use particulate traps in their control strategies. Some manufacturers have also expressed their intent to use fuel additives, typically organometallic compounds, in conjunction with the traps.

The impending trap-based standards have raised concerns that revisions to the present test procedure may be required. One concern is the treatment of exhaust emissions during trap regeneration; this is not specifically addressed in the existing test procedures. In addition, the low emission levels required to meet the particulate standards have raised concerns on the part of diesel manufacturers that the present test procedures may not be sufficiently accurate for measuring particulate at these levels. Concern has been expressed regarding what fuel additive compounds may be approved or prohibited by EPA and what other restrictions EPA may place on their use. The purpose of the workshop on this issue is to allow EPA to develop its overall policy towards fuel additive use, following manufacturer input at the workshop.

Because the existing regulations do not specifically address these issues, EPA had decided to hold a workshop to gather information and discuss these issues with interested parties prior to implementing any changes. Because certification testing for some 1987 models will begin this fall, resolution of these issues is necessary soon. EPA believes that this can be best accomplished if all parties are involved early in the process and have an opportunity to informally comment on all potential solutions. Following is a further identification of the issues.

Trap Regeneration

Particulate traps are basically filters which remove the particulate, which is primarily carbon, from the diesel exhaust. Eventually the trapped particulate will clog the filter and restrict exhaust flow. Therefore the particulate must be burned to clean or regenerate the trap. The combustion of the particulate results in some exhaust emissions.

In some trap systems the regeneration process occurs continuously or nearly continuously. Other systems may regenerate in periodic fashion, often by injecting excess fuel in the engine or exhaust to provide sufficient thermal energy to initiate the regeneration. Some systems require the injection of fuel additives to promote regeneration.

EPA is concerned that the present test procedure may not be adequate for trap-equipped vehicles or engines since it does not specifically consider the vehicle emissions during trap regeneration. Particularly for a periodically regenerating trap, the trap may or may not regenerate during the emissions test cycle. If the trap does not regenerate then a vehicle might be certified which, under some conditions, may have very high emissions. If the trap does regenerate during the emission test, then a vehicle might not be certified even though the vehicle might, on the average, comply with the emission standards. High emissions during infrequent trap regenerations may be an even greater problem for durability test vehicles because a single test point could have a major effect on the deterioration factor and the projected emissions at high mileage.

In preparing for the workshop, EPA requests that participants consider the following options for addressing emissions during regeneration:

(1) Require that the vehicle/engine meet the standards both under regeneration and non-regeneration conditions.

(2) Consider regeneration emissions and require that a weighted average of regeneration and non-regeneration emissions meet the standards. Within this option EPA could take two possible approaches:

(a) A detailed plan would be spelled out by EPA, specifying how the testing is to be done and the averaging administered.

(b) The manufacturer would develop the specific test procedures for its system that would comply with a general framework developed by EPA.

(3) Ignore regeneration emissions based upon the presumption that they are too infrequent or insignificant to be a problem.

In addition to comments on the above options, EPA also requests information from manufacturers on the following aspects of their trap programs:

- Trap types, including trapping system, regeneration mechanism, fuel additives.
- How regeneration is initiated.
- How often regeneration occurs.
- Regeneration emission levels.
- Non-regeneration emission levels.
- Regeneration emissions as a function of mileage.

Particulate Emissions Measurement

Other test procedure modifications may also be required as a result of the trap-based particulate standards. At low particulate emission levels, particulate measurement as presently specified may not be sufficiently accurate or precise. The reduced emission levels mean that the test-to-test variability will become a greater percentage of the measured emission values. This may make repeatable measurement of particulate emissions more difficult. Several manufacturers have stated that an improvement to measurement precision is a condition to meeting these reduced particulate emission levels.

In particular, manufacturers have expressed concern that the recommended minimum loading of the sample filters specified in the present test procedures may not be achieved with the lower particulate emission levels. This has led to further concern regarding the measuring error as a result of the required balance accuracy and the reduced filter loading. Another area of concern is the impact of sulfate-absorbed water on the measurement of particulate emissions. As the particulate standard becomes more stringent, the sulfate with its water comprises a larger percentage of the allowable emissions. EPA requests additional information from the manufacturing industry on these subjects.

Fuel Additives

The use of fuel additives to promote trap regeneration raises the question of the possible hazardous nature of these compounds or their combustion

products. Under section 202(a)(4) of the Clean Air Act, the use of an emission control system that will cause or

The issues described in this notice are those planned to be discussed at the

Dockets Branch is located in Room 8428,

purpose of this rulemaking action is to propose these necessary amendments to

Administrative Notices

words "carry-on baggage" and paragraph (a)(2) would be revised to

VOL 50 ISS 136 JL 16 1985 UMI

products. Under section 202(a)(4) of the Clean Air Act, the use of an emission control system that will cause or contribute to an unreasonable risk is prohibited. The Clean Air Act also specifies (section 206(a)(3)) that it is the manufacturers' responsibility to ascertain that no such unreasonable risk is associated with the use of a fuel additive.

In addition to commenting on the general criteria that EPA should use to evaluate applications for the use of additives, EPA requests that workshop participants who are developing fuel additive trap regeneration systems submit information related to their current plans in this area. Confidential submissions will be accepted from manufacturers who believe their work in these areas should be proprietary. The following areas of additive use should be covered.

- The type of additive and its specific chemical form.
- The amount of additive used.
- The total amount of additive stored in the vehicle.
- How the additive is stored and added to the fuel or exhaust.
- The chemical characterization of the additive in the exhaust.
- The tailpipe emissions of the additive during regeneration and otherwise.
- Available health effects data on the additive.

Participation

The workshop is open to all interested parties. EPA requests that all persons planning to attend contact Ms. Rebecca Kanner, the Agency contact, at the above address. Those persons desiring to make specific presentations are requested to so advise the Agency contact, identifying the topics to be covered, the appropriate amount of time needed, and any audio visual equipment needed. The workshop will be informal and no official transcript shall be made of the proceedings.

The format of the workshop will be structured by the three identified issues: (1) The measurement of emissions during trap regeneration, (2) particulate emissions measurement at the trap-based standards, and (3) fuel additives. For each issue, EPA will present its current analysis, followed by any presentations from other participants and then the floor will be opened for discussion on that particular issue. In order to facilitate the procedure, EPA requests that parties making a presentation on more than one of the identified issues be prepared to discuss each issue separately.

The issues described in this notice are those planned to be discussed at the workshop; however, participants are not restricted to these issues. Time will be provided for presentations and discussions by any participant on additional procedural or measurement issues associated with the use of trap-oxidizers.

Dated: July 8, 1985.

Charles L. Elkins,

Acting Assistant Administrator for Air and Radiation.

Research and Special Programs Administration

49 CFR Parts 171 and 175

[Docket No. HM-184C; Notice No. 85-3]

Implementation of the ICAO Technical Instructions

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the Hazardous Materials Regulations (HMR) in order to permit the offering, acceptance and transportation by aircraft, and by motor vehicle incident to transportation by aircraft, of hazardous materials shipments conforming to the most recent edition of the International Civil Aviation Organization's (ICAO) Technical Instructions for the Safe Transport of Dangerous Goods by Air (ICAO Technical Instructions). These amendments are necessary to facilitate the continued transport of hazardous materials in international commerce by aircraft when the 1986 edition of the ICAO Technical Instructions becomes effective on January 1, 1986, pursuant to decisions taken by the ICAO Council regarding implementation of Annex 18 to the Convention on International Civil Aviation.

DATE: Comments must be received by October 4, 1985.

ADDRESS: Address comments to Dockets Branch, Materials Transportation Bureau, U.S. Department of Transportation, Washington, D.C. 20590. Comments should identify the docket and be submitted, if possible, in five copies. Persons wishing to receive confirmation of receipt of their comments should include a self-addressed stamped postcard. The Dockets Branch is located in Room 8426, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590. Public dockets may be reviewed between the hours of 8:30 a.m. and 5:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Edward A. Altemos, International Standards Coordinator, Materials Transportation Bureau, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590, (202) 426-0656.

SUPPLEMENTARY INFORMATION: On November 20, 1984, the Materials Transportation Bureau (MTB) published amendments to the Hazardous Materials Regulations (49 FR 45750) which authorize under certain conditions, and with certain limitations, hazardous materials packaged, marked, labeled, classified and described and certified on shipping papers as provided in the 1985 edition of the ICAO Technical Instructions to be offered, accepted and transported by aircraft within the United States and aboard aircraft of United States registry anywhere in air commerce. In addition, amendments were published to Part 175 of the HMR to align the requirements for the loading and handling of hazardous materials aboard aircraft with those in the 1985 edition of the ICAO Technical Instructions. It was necessary that these amendments be published in order to provide consistency between the Hazardous Materials Regulations and the ICAO Technical Instructions because the ICAO Technical Instructions have become the basic standard applied to the transport of hazardous materials by aircraft worldwide. A more detailed explanation of the reasons for this action was provided in the Notice of Proposed Rulemaking published under Docket No. HM-184 on August 2, 1982 [47 FR 33295].

Since publication of the final rule under Docket No. HM-184B, ICAO has developed a number of amendments to the Technical Instructions. These amendments have been incorporated in the 1986 edition of the ICAO Technical Instructions which will become effective on January 1, 1986. In order to continue to fulfill the intent of the amendments published under Docket Nos. HM-184, HM-184A and HM-184B (i.e., to facilitate the international transportation of hazardous materials by aircraft by insuring a basic consistency between the HMR and the ICAO Technical Instructions), the MTB believes it necessary to amend certain provisions of the HMR to reflect changes introduced in the 1986 edition of the ICAO Technical Instructions. The purpose of this rulemaking action is to propose these necessary amendments to the HMR.

The following is an analysis of this proposal, by section, which provides the background behind the proposed changes:

Section 171.7. The reference to the 1985 edition of the ICAO Technical Instructions in the matter incorporated by reference would be updated to refer to the 1986 edition. A copy of the Report of the Ninth Meeting of the ICAO Dangerous Goods Panel, indicating all changes introduced into the 1986 edition of the Technical Instructions, is on file in the public dockets.

Section 175.10. The exception for aircraft parts and supplies in subparagraph (a)(2), which is currently aligned with the corresponding text of the 1984 edition of the Technical Instructions, would be amended to reflect the wording introduced in the 1986 edition of the Technical Instructions. ICAO changed the exceptions for aircraft parts and supplies in the Technical Instructions in order to achieve consistency with paragraph 2.4.2 of Annex 18 of the Convention. An amendment was proposed to this paragraph under Docket No. HM-184B, but on the basis of several comments and because it was anticipated that ICAO would introduce further changes to the corresponding provisions upon publication of the 1986 edition, the amendment was withdrawn. The text now proposed provides that replacements for aircraft parts and supplies that would be classed as hazardous materials must be transported in accordance with the HMR except that aircraft batteries would not be subject to a gross weight limitation and, in place of the packaging normally required, containers specially designed for the transport of aircraft spares and supplies may be used. In addition, subparagraph (a)(17) would be amended to provide that packagings containing dry ice used to pack perishables in carry-on baggage be designed to permit the release of carbon dioxide gas in order to eliminate the risk of unacceptable pressure increase in the packagings.

Section 175.33. Paragraph (a)(6) of this section would be revised to provide that when radioactive materials are transported in freight containers or overpacks, the information required to be supplied to the pilot-in-command may be provided for an overpack or freight container rather than for the individual packages contained within the overpack or freight container.

Administrative Notices

A. Executive Order 12291

The MTB has determined that the effect of this regulatory proposal would not meet the criteria specified in section 1(b) of Executive Order 12291 and is, therefore, not a major rule. This is not a significant rule under DOT regulatory procedures (44 FR 11034) and requires neither a Regulatory Impact Analysis, nor an environmental impact statement under the National Environmental Policy Act (49 U.S.C. et seq.). A regulatory evaluation is available for review in the Docket.

B. Impact on Small Entities

Based on limited information concerning the size and nature of entities likely affected, I certify that this notice will not, as promulgated, have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects

49 CFR Part 171

Hazardous materials transportation, Incorporated by reference.

49 CFR Part 175

Hazardous materials transportation, Air carriers.

In consideration of the foregoing, 49 CFR Parts 171 and 175 would be amended as follows:

PART 171—GENERAL INFORMATION, REGULATIONS AND DEFINITIONS

1. The authority citation for part 171 would continue to read as follows:

Authority: 49 U.S.C. 1803, 1804, 1805, 1808, 49 CFR 1.53(e).

2. In § 171.7, paragraph (d)(27) would be revised to read as follows:

§ 171.7 Matter incorporated by reference.

* * * * *

(d) * * *

(27) International Civil Aviation Organization Technical Instructions for the Safe Transport of Dangerous Goods by Air, DOC 9284-AN/905 (ICAO Technical Instructions), 1986 edition.

* * * * *

PART 175—CARRIAGE BY AIRCRAFT

3. The authority citation for Part 175 would be revised to read as follows:

Authority: 49 U.S.C. 1803, 1804, 1805, 1808, 49 CFR 1.53(e).

4. In § 175.10, paragraph (a)(19) would be amended by inserting the words "provided the package permits the release of carbon dioxide gas." after the words "carry-on baggage" and paragraph (a)(2) would be revised to read as follows:

§ 175.10 Exceptions.

(a) * * *

(2) Hazardous materials required aboard an aircraft in accordance with the applicable airworthiness requirements and operating regulations. Unless otherwise approved by the Associate Director for HMR, items of replacement for such hazardous materials must be transported in accordance with this subchapter except that—

(i) In place of the required packagings, packagings specially designed for the transport of aircraft spares and supplies may be used, provided such packagings afford equivalent safety to those that would be required by this subchapter; and,

(ii) Aircraft batteries are not subject to a gross weight quantity limitation.

* * * * *

§ 175.33 [Amended]

5. In § 175.33(a)(6), the words "overpacks or freight containers," would be added preceding the words "their category."

Issued in Washington, D.C. on July 10, 1985.

Alan I. Roberts,

Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Threatened Status for the Dismal Swamp Southeastern Shrew

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine threatened status for the Dismal Swamp southeastern shrew, a small mammal restricted primarily to the Dismal Swamp of southeastern Virginia and adjacent North Carolina. This swamp has undergone extensive environmental changes in the recent past, as a result of human activities. In addition to causing direct adverse effects on the shrew, these habitat changes apparently are also enabling a neighboring upland subspecies of

southeastern shrew to invade the swamp. The Dismal Swamp southeastern shrew may be vulnerable

B. *Overutilization for commercial, recreational, scientific, or educational*

allowed the coyote to invade its range. The latter species then began to

species, or (ii) Such designation of critical habitat would not be beneficial

southeastern shrew to invade the swamp. The Dismal Swamp southeastern shrew may be vulnerable to genetic extinction through continued interbreeding with the more widespread upland subspecies. This proposal, if made final, would implement protection provided by the Endangered Species Act of 1973, as amended, for the Dismal Swamp southeastern shrew. The Service seeks relevant data and comments from the public.

DATES: Comments from all interested parties must be received by September 16, 1985. Public hearing requests must be received by August 30, 1985.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Annapolis Field Office, U.S. Fish and Wildlife Service, 1825 Virignia Street, Annapolis, Maryland 21401. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Judy Jacobs or Mr. G. Andrew Moser at the above address (301/269–6324 or FTS 922–4197).

SUPPLEMENTARY INFORMATION:

Background

The Dismal Swamp southeastern shrew (*Sorex longirostris fisheri)* is a small, long-tailed shrew with a brown back, slightly paler underparts, buffy feet, and a relatively short, broad nose (Handley 1980). It was first described as a species, *Sorex fisheri*, by C.H. Merriam in 1895, based on four specimens trapped that same year in the Dismal Swamp by A.K. Fisher. Jackson (1928) reduced *S. fisheri* to a subspecies of the species *Sorex longirostris*, which is found over much of the southeastern United States, and now the former is usually referred to as *Sorex longirostris fisheri*. There is, however, still some question as to whether *fisheri* is a full species, because originally there was not evidence of intergradation between *fisheri* and *longirostris* (Judge and Hoffman 1981). A lack of intergradation in physical characters is generally considered an indication that two wild populations represent species, rather than subspecies. *Fisheri* is 15 to 25 percent larger than its upland relative *S. l. longirostris* and is generally duller in color. Most *S. l. fisheri* measure 95–100 millimeters in greatest length, while most *S. l. longirostris* measure 75–80 millimeters (Rose 1983).

The Dismal Swamp southeastern shrew is essentially restricted to the Great Dismal Swamp National Wildlife Refuge in southeastern Virginia (cities of Suffolk and Chesapeake, formerly Nansemond and Norfolk counties) and adjacent portions of the swamp in North Carolina (Camden, Gates, Pasquotank, and Perquimans counties) (Handley 1980, Hall 1981, Rose 1983). Prior to 1980, the subspecies was known from only 19 specimens collected within the Dismal Swamp (Handley 1979). Since 1980, at least 39 additional specimens have been collected in and adjacent to the Dismal Swamp, which can be identified as *Sorex longirostris fisheri* on the basis of body length (Rose 1983). The subspecies is found in a variety of habitats from lowland old fields to mature pine and deciduous forest areas, but is most abundant in mesic successional habitats such as cane stands, regenerating clearcuts, and 10- to 15-year-old forested plots (Rose 1983).

The Dismal Swamp southeastern shrew is considered threatened due to its very limited distribution and to recent human-induced habitat changes in the swamp. In addition to affecting this lowland shrew directly, these changes may be allowing its restricted habitat to be overrun by the more plentiful upland subspecies, *Sorex longirostris longirostris* (Handley 1980, Rose 1983).

In order to understand this situation more clearly, it is necessary to consider the dynamics of the evolutionary process within the swamp. The Dismal Swamp has apparently acted like an island for several subspecies of small mammals, including *Sorex longirostris*. These subspecies show a feature typical of small mammals on islands, that is, individuals are larger than those from the nearby "mainland," in this case, members of upland subspecies. In the process of subspeciation, individuals in the swamp must have been at a competitive disadvantage when living outside the swamp, and the upland race must have been equally handicapped in the swamp. It follows that any action which detracts from the distinctive nature of the Swamp (e.g., draining) will favor the upland race, in this case *S. l. longirostris*, over the swamp subspecies, *S. l. fisheri*.

In its Review of Vertebrate Wildlife in the **Federal Register** of December 30, 1982 (48 FR 58454–58460), the U.S. Fish and Wildlife Service placed *S. l. fisheri* in category 2, meaning that a proposal to list as endangered or threatened was possibly appropriate, but that substantial data were not then available to biologically support such a proposal. Subsequently, the Service received a report from Dr. Robert K. Rose (1983), who had been contracted to investigate the status of the shrew. The data in Dr. Rose's report, along with other new information assembled by the Service, show that a proposal to list the shrew as threatened is now warranted.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisons of the Act (50 CFR Part 424) set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the Dismal Swamp southeastern shrew, *Sorex longirostris fisheri*, are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Handley (1980) noted that the Dismal Swamp southeastern shrew is essentially confined to the Dismal Swamp. Around the turn of the century, this swamp was estimated to have occupied some 2,000 to 2,200 square miles (Oakes and Whitehead 1979). Even at that time, its size had been reduced by clearing and draining for agriculture. Today, approximately 328 square miles of the original swamp remain intact (U.S. Fish and Wildlife Service 1982), there having been a reduction of roughly 85 percent. According to Rose (1983), ditching has lowered the water table within the remaining swamp. Other human activities such as burning, grazing, and logging, which once maintained portions of the swamp in various stages of succession, were curtailed or eliminated with the establishment of the Great Dismal Swamp National Wildlife Refuge in 1973. As a consequence, the former Dismal Swamp, a heterogeneous mosaic of large tracts of bald cypress, Atlantic white cedar, and cane, has been replaced by a more homogeneous, mesic swamp dominated by a rapidly maturing red maple and black gum forest. This progression toward homogeneous mature forest is likely detrimental to the Dismal Swamp southeastern shrew. Rose's trapping data revealed that, of all habitats evaluated in the swamp, densities of *Sorex* were lowest in mature forests. Rose found the shrew to be abundant in cane stands and regenerating clearcuts, with the highest densities (=healthier populations) in 10- to 15-year-old, mid-successional forested areas with grassy or shrubby understories. These habitats are now rare within the Dismal Swamp, and will essentially disappear if present trends continue.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Not known to be a problem.

C. *Disease or predation.* Not known to be a problem.

D. *The inadequacy of existing regulatory mechanisms.* As a faunal component of the Great Dismal Swamp National Wildlife Refuge, the subspecies is protected within refuge boundaries from direct disturbance violations (to kill, possess, disturb, injure, damage, etc., without special permit) by 50 CFR 27.51. The main problem of the shrew, however, is not direct disturbance or taking, but alteration of habitat (see "A"), and consequent vulnerability to genetic swamping (see "E").

E. *Other natural or manmade factors affecting its continued existence.* The Dismal Swamp southeastern shrew probably developed its large size and coloration while geographically or ecologically isolated from its smaller upland relative, *Sorex longirostris longirostris*, during the late Pleistocene (Handley 1980, Rose 1983). Changes in the Dismal Swamp (as described in "A" above) may have converted the swamp environment into habitat more suitable for the latter subspecies, causing an ingress of the latter into the swamp (Handley 1980, Rose 1983). The Dismal Swamp southeastern shrew is threatened primarily through contact and interbreeding with this smaller upland subspecies (Handley 1980, Rose 1983). Rose (1983) found evidence of interbreeding between the two subspecies along the east and west periphery of the swamp. Evidence of contact and interbreeding is further reinforced by Rose's observation of a clear trend in size, from large to small shrews, as one moves peripherally from the Dismal Swamp. Because of the restricted distribution of the larger Dismal Swamp shrew, it is probable that the continued interbreeding of the two subspecies will eventually result in an infusion of genes of *Sorex longirostris longirostris* into the entire Dismal Swamp shrew population. This would constitute extinction from the Dismal Swamp southeastern shrew.

The hybridization process now jeopardizing the Dismal Swamp southeastern shrew is comparable to that which has nearly destroyed another mammal, the red wolf *(Canis rufus)*, which is federally classified as endangered. According to Nowak (1979), the red wolf originally occupied a range and habitat in the forested southeastern United States, largely separate from that occupied by its smaller relative, the coyote *(Canis latrans)* of the western prairies. Human activities reduced red wolf numbers, disrupted its habitat, and allowed the coyote to invade its range. The latter species then began to interbreed with surviving red wolf populations. As a result, by the early 20th century zones of hybridization were evident in central Texas and the Ozark region. At that time there was a clear progression in size, ranging from the small coyote in the north and west, through intermediate-sized *Canis* in central Texas and the Ozarks, to the large red wolf in eastern Texas, Louisiana, and some adjacent areas. This situation was much the same as we see today in the *Sorex* of the Dismal Swamp region. No conservation measures were initiated for the red wolf until the 1960's, and by then the hybridization process had engulfed almost all of the range of the species. The red wolf, in the pure form, has now nearly or entirely disappeared from the wild. By catching the same process at an earlier stage, however, it may now be possible to save the Dismal Swamp southeastern shrew.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list the Dismal Swamp southeastern shrew as threatened. The Act defines a threatened species as one which "is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range." This status seems most appropriate for *Sorex longirostris fisheri* at this time. As stated above, the subspecies is currently protected from taking or injury and is jeopardized primarily by its limited distribution and the possibility of genetic swamping if present trends continue. These trends have not yet progressed so far that extinction appears imminent, and may yet be reversed by proper conservation measures. For the reasons given below, no critical habitat is being designated.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species which is considered to be critical habitat at the time the species is determined to be endangered or threathened. Implementing regulations at 50 CFR 424.12(a)(1) state: "A designation of critical habitat is not prudent when one or both of the following situations exist: (i) The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of such threat to the species, or (ii) Such designation of critical habitat would not be beneficial to the species." In the case of the Dismal Swamp southeastern shrew, the Service finds that a determination of critical habitat is not prudent. Such a determination would result in no known benefit to the species. Nearly all of the known habitat of this species lies within the Great Dismal Swamp National Wildlife Refuge, which is managed by the Service. The refuge managers and all other involved parties are already aware of the occupied range of this species. The species is not migratory and continuously occupies its known range. Moreover, a final determination of threatened status would be followed by continued development of Refuge management strategies designed to benefit the Dismal Swamp southeastern shrew. Thus, no benefits would accrue from designation of critical habitat.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiate by the Service following listing. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species. If a species is listed subsequently, section 7(a)(2) requires agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species. If a Federal action may affect a listed species, the responsible Federal agency must enter into formal consultaion with the Service.

An overall management plan is currently being developed for the Great Dismal Swamp National Wildlife

(1) Biological, commercial trade, or other relevant data concerning any

the American long-tailed shrews. North American Fauna, no. 51. 238 pp.
Junge, J.A., and R.S. Hoffmann. 1981. An

Species		Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Common name	Scientific name	Historic range				

An overall management plan is currently being developed for the Great Dismal Swamp National Wildlife Refuge. This plan will be designed, in part, to consider the needs of *Sorex longirostris fisheri*. Land use practices likely to benefit this shrew would include: (a) Selective burning and other logging practices that maintain a mosaic of forested plots of differing ages, and (b) increasing the height of the water table (Rose 1983).

The Act and implementing regulations found at 50 CFR 17.21 and 17.31 set forth a series of general prohibitions and exceptions that apply to all threatened wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take, import or export, ship in interstate commerce in the course of commercial activity,or sell or offer for sale in interstate or foreign commerce any listed species. It is also illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that was illegally taken. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving threatened wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22, 17.23, and 17.32. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. For threatened species, there are also permits for zoological exhibition, educational purposes, or special purposes consistent with the purposes of the Act. In some instances, permits may be issued during a specified period of time to relieve undue economic hardship that would be suffered if such relief were not available.

Public Comments Solicited

The Service intends that any final rule adopted will be accurate and as effective as possible in the conservation of endangered or threatened species. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to the Dismal Swamp southeastern shrew;

(2) The locations of any additional populations of the Dismal Swamp southeastern shrew and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range or distribution of this species; and

(4) Current or planned activities in the subject area and their possible impacts on the Dismal Swamp southeastern shrew.

Final promulgation of the regulation on the Dismal Swamp southeastern shrew will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Annapolis Field Office as shown in the above ADDRESSES section.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined by the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Mt. Graham Astrophysical Area; Intent To Prepare an Environmental Impact Statement

The Department of Agriculture, Forest Service, will prepare an environmental impact statement for a proposed astrophysical area on the Safford Ranger District, Coronado National Forest, Graham County, Arizona.

A range of alternatives for this site will be considered. One of these will be non-development of the site. Other alternatives will consider different levels of observatory development and location of support facilities.

Federal, State and local agencies, Indian Tribes, individuals and organizations who may be interested in or affected by the decision will be invited to participate in the scoping process. This process will include identification of those issues to be addressed and analyzed in depth and elimination of insignificant issues or those which have been covered by a previous environmental document.

The Forest Supervisor will hold public meetings at the following locations in Southeast Arizona.

Location, Date, and Time

Old Armory, Safford, AZ, August 1, 1985, 5:00–9:00 PM
Sierra Vista Ranger District Office, Sierra Vista, AZ, July 22 and 25, 1985, 5:00–9:00 PM
Elks Lodge, Willcox, AZ, August 7, 1985, 6:30–9:00 PM
Wilmont Branch Library, Tucson, AZ, August 15, 1985, 5:00–9:00 PM

James C. Overbay, Acting Regional Forester of the Southwest Region in Albuquerque, New Mexico is the responsible official.

A draft environmental impact statement should be available for public review by October, 1985. The final environmental impact statement should be available by Janaury, 1986.

Written comments and suggestions concerning the analysis should be sent to Robert Tippeconnic, Forest Supervisor, Coronado National Forest, Tucson, Arizona 85701 by August 15, 1985.

Date: July 8, 1985.

James C. Overbay
Acting Regional Forester.

International Trade Administration

[A–791–502]

Low-Fuming Brazing Copper Rod and Wire From South Africa; Postponement of Preliminary Antidumping Determination

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: The preliminary antidumping determination involving low-fuming brazing copper rod and wire from South Africa is being postponed until not later than September 17, 1985.

EFFECTIVE DATE: July 16, 1985.

FOR FURTHER INFORMATION CONTACT: Michael Ready, Office of Investigations, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–2613.

SUPPLEMENTARY INFORMATION: On March 11, 1985, we announced the initiation of an antidumping investigation to determine whether low-fuming brazing copper rod and wire from South Africa is being, or is likely to be, sold in the United States at less than fair value (50 FR 10524). The notice stated that we would issue preliminary determination by July 29, 1985.

As detailed in that notice, the petition alleged that imports from South Africa of low-fuming brazing copper rod and wire are being, or are likely to be, sold in the United States at less than fair value.

On July 3, 1985, counsel for petitioners, American Brass, Century Brass, and Cerro Metal Products, requested that the Department extend the period for the preliminary determination until 210 days after the date of receipt of the petition in accordance with section 733(c)(1(A) of the Tariff Act of 1930, as amended (the Act). Accordingly, the period for determination in the case is hereby extended. We intend to issue a preliminary determination not later than September 17, 1985.

This notice is published pursuant to section 733(c)(2) of the Act.

Gilbert B Kaplan,
Acting Deputy Assistant Secretary for Import Administration.

July 9, 1985.

Photo Albums and Filler Pages From Korea; Preliminary Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We have preliminarily determined that photo albums and filler pages from Korea are being, or are likely to be, sold in the United States at less than fair value, and have notified the U.S. International Trade Commission (ITC) of our determination. We have also directed the U.S. Customs Service to suspend the liquidation of all entries of photo albums and filler pages from Korea that are entered, or withdrawn from warehouse, for consumption, on or after the date ninety days before the date of publication of this notice, and to require a cash deposit or bond for each entry in any amount equal to the estimated dumping margin as described in the "Suspension of Liquidation" section of this notice.

If this investigation proceeds normally, we will make a final determination by September 23, 1985.

EFFECTIVE DATE: July 16, 1985.

FOR FURTHER INFORMATION CONTACT: Steven Lim or Ken Stanhagen, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone: (202) 377–1777.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We have preliminarily determined that photo albums and filler pages from Korea are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the Act). The weighted-average margins are listed in the "Suspension of Liquidation" section of this notice.

Case History

On January 30, 1985, we received a petition filed in proper form from Esselte Pandaflex, Inc., the Holson Company, Klee-Vu Plastics Corporation, and SPM Manufacturing Corporation, on behalf of the U.S. industry producing photo albums and filler pages. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from Korea are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act (19 U.S.C. 1673), and that these imports are materially injuring, or threatening material injury to, a U.S. industry.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping investigation. We initiated the investigation on February 19, 1985 (50 FR 7625), and notified the ITC of our action.

On March 16, 1985, the ITC found that there is a reasonable indication that imports of photo albums and filler pages from Korea are materially injuring, or threatening material injury to, a U.S. industry (U.S.I.T.C. Pub. No. 1660, March 1985).

We investigated six Korean producers, Dong In Industrial Co. Ltd. (Dong In), Dong Won Industrial Co. (Dong Won), Donam Industrial Co., Ltd. (Donam), Chinsung Industry Co., Ltd. (Chinsung), Keywon, Inc. (Keywon), and Eunjin Industrial Co., Ltd. (Eunjin). These companies account for 64 percent of all exports of photo albums and filler pages from Korea to the United States.

Scope of Investigation

The merchandise under investigation is photo albums and photo album filler pages. Photo albums are currently provided for in item 256.60 of the Tariff Schedules of the United States (TSUS). Photo album filler pages are currently provided for in items 256.87, 256.90 and 774.55 of the TSUS.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As provided in section 772 of the Act, we used the purchase price of the subject merchandise to represent the United States price for sales by Dong Won, Dong In, Donam, Chinsung, and Keywon and for certain sales for Eunjin because the merchandise was sold to unrelated purchasers prior to its importation into the United States. We used the exporter's sales price for other sales by Eunjin to represent the United States Price because the merchandise was sold to unrelated purchasers after importation into the United States.

We calculated the purchase price based on the FOB or CIF packed price to unrelated customers in the United States. We made deductions, where appropriate, the foreign inland freight, brokerage, drayage, loading, inspection charges, wharfarge, banking charges, export recommendation fees, ocean freight, and marine insurance. We calculated exporter's sales price by making additional deductions for U.S. brokerage, U.S. inland freight, and U.S. duty and other selling expenses incurred in the United States. We increased the United States price by the amount of import duties imposed by Korea which have been rebated by reason of the exportation of the merchandise, pursuant to section 772(d)(1)(B) of the Act (19 U.S.C. 1677a(b)(1)(B)).

Foreign Market Value

In accordance with section 773(a) of the Act, we have preliminarily determined that none of the producers being investigated had sales of photo albums and filler pages in Korea during the period of investigation. The petitioners alleged that sales to third countries were at prices below the cost of producing the merchandise. We examined production costs which included all appropriate costs for materials, fabrication and general expenses. We found sufficient sales in some third countries above the cost of production to allow us to use third country prices in accordance with section 773(a)(1)(B) of the Act to determine foreign market value. We used constructed value as our basis of comparison where there were insufficient sales of such or similar merchandise in third country markets, or where there were insufficient sales above the cost of production. In selecting third countries for comparison purposes, we used sales to the United Kingdom, the Federal Republic of Germany, and Australia, since merchandise sold to these countries were most similar to that sold in the United States or because quantities sold to these countries were most comparable to quantities sold in the United States.

We calculated the third country prices for each product on the basis of FOB or CIF prices to unrelated purchasers. From these prices, we deducted, where appropriate, foreign inland freight, ocean freight, marine insurance, foreign brokerage, loading, wharfage, banking charges, export recommendation fees and drayage. We made adjustments, where appropriate, for differences in the physical characteristics of the merchandise, pursuant to § 353.16 of our regulations, and for differences in circumstances of sale related to commissions and credit expenses pursuant to § 353.15 of our regulations. We also adjusted for differences in packing costs. We also made additions, where appropriate, for import duties which were rebated by reason of the exportation of the merchandise. Where we used exporter's sales price for sales by Eunjin, we deducted third country indirect selling expenses to offset U.S. selling expenses. We used third country prices for all sales by Dong In and some sales by Keywon, Dong Won, Donam and Eunjin. We used constructed value for other sales by Keywon, Dong Won, Donam and Eunjin and for all sales by Chinsung.

We calculated the cost of production for third country sales by totaling the costs of materials, fabrication, general expenses, and packing. We calculated constructed value by totaling the costs of materials, fabrication used in producing such or similar merchandise, general expenses, profit, and the cost of the packing on the U.S. shipments. Where the amount for general expenses was less than ten percent of the cost of materials and fabrication, we used the statutory minimum of ten percent. The amount added for profit in all instances was the statutory minimum of eight percent of the sum of materials, fabrication costs, and general expenses because the companies had no home market sales of merchandise of the same class or kind and we are unable to determine how much of the company's overall profit was related to sales to countries other than the U.S.

The investigation of whether sales were made at prices below the cost of production was initiated on May 30, 1985. Thus, additional information from

respondents and comments by petitioners regarding cost of production and constructed value information were

find that imports of photo albums and filler pages form Korea during the period

dumping margin as described in the "Suspension of Liquidation" section of

Scope of Investigation

Kingdom, the Republic of South Africa, France, and Australia since

VOL 50 ISS 136 JL 16 1985 UMI

respondents and comments by petitioners regarding cost of production and constructed value information were received too late for consideration in this preliminary determination. These submissions will be considered in our final determination.

Critical Circumstances

The petitioners alleged that imports of photo albums and filler pages from Korea present "critical circumstances." Under section 733(e)(1) of the Act, critical circumstances exist if we determine (1) there is a history of dumping in the United States or elsewhere of the class of kind or the merchandise which is the subject of the investigation or the person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and (2) there have been massive imports of the class or kind of merchandise that is the subject of the investigation over a relatively short period.

In determining whether there is a history of dumping of photo albums and filler pages from Korea in the United States or elsewhere, we reviewed past antidumping findings of the Department of the Treasury as well as past Department of Commerce antidumping orders. We also reviewed the antidumping actions of other countries. On March 26, 1985, in the finding of the Antidumping Tribunal in Review No. R-3-84, Canada imposed antidumping duties on photo albums and filler pages from Korea. Thus, we preliminarily find a history of dumping for this merchandise.

Since there is a history of dumping in the United States or elsewhere, we do not need to consider whether there is reason to believe or suspect that importers of this product knew or should have known that it was being sold at less than fair value.

We generally consider the following concerning massive imports: (1) Recent trends in import penetration levels; (2) whether imports have surged recently; (3) whether recent imports are significantly above the average calculated over the last three years; and (4) whether the pattern of imports over that three year period may be explained by seasonal swings.

In considering this question, we analyzed recent trade statistics on import levels, import penetration ratios for photo albums and filler pages from Korea for equal periods immediately preceding and following the filing of the petition, and seasonal factors. Based on our analysis of recent trade data, we find that imports of photo albums and filler pages form Korea during the period subsequent to receipt of the petition have been massive when compared to recent import levels and import penetration ratios. Therefore, we determine that critical circumstances exist with respect to imports of photo albums and filler pages from Korea.

Verification

As provided in section 776(a) of the Act, we will verify all information used in reaching our final determination.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of photo albums and filler pages from Korea that are entered, or withdrawn from warehouse, for consumption, on or after the date ninety days before the date of publication of this notice in the **Federal Register**. The United States Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted average amounts by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below. This suspension of liquidation will remain in effect until further notice.

Manufacturer/producer/exporter	Weighted-average margin (Percentage)
Dong In	3.13
Dong Won	13.71
Doriam	3.20
Chinsung	3.11
Keywon	0.99
Eunjin	10.71
All others	4.04

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry before the later of 120 days after we make our preliminary affirmative determination or 45 days after we make our final affirmative determination.

Public Comment

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on August 8, 1985, at the United States Department of Commerce, Room B-841, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B-099, at the above address within 10 days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed.

In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by August 1, 1985. Oral presentations will be limited to issues raised in the briefs.

All written views should be filed in accordance with 19 CFR 353.46, within 30 days of this notice's publication, at the above address and in at least 10 copies.

Gilbert B. Kaplan,

Acting Deputy Assistant Secretary for Import Administration.

Photo Albums and Filler Pages From Hong Kong; Preliminary Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Department of Commerce.

ACTION: Notice.

SUMMARY: We have preliminarily determined that photo albums and filler pages from Hong Kong are being, or are likely to be, sold in the United States at less than fair value, and have notified the U.S. International Trade Commission (ITC) of our determination. We have also directed the U.S. Customs Service to suspend the liquidation of all entries of photo albums and filler pages from Hong Kong that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice, and to require a cash deposit or bond for each entry in an amount equal to the estimated dumping margin as described in the "Suspension of Liquidation" section of this notice.

If this investigation proceeds normally, we will make a final determination by September 23, 1985.

EFFECTIVE DATE: July 16, 1985.

FOR FURTHER INFORMATION CONTACT: Steven Lim or Ken Stanhagen, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230; telephone: (202) 377-1777.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

We have preliminarily determined that photo albums and filler pages from Hong Kong are being, or are like to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (19 U.S.C. 1673b) (the Act). The weighted-average margin is listed in the "Suspension of Liquidation" section of this notice.

Case History

On January 30, 1985, we received a petition filed in proper form from Esselte Pendaflex, Inc., the Holson Company, Kleer-Vu Plastics Corporation, and SPM Manufacturing Corporation, on behalf of the U.S. industry producing photo albums and filler pages. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petition alleges that imports of the subject merchandise from Hong Kong are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act (19 U.S.C. 1673), and that these imports are materially injuring, or are threatening material injury to, a U.S. industry.

After reviewing the petition, we determined that it contained sufficient grounds upon which to initiate an antidumping investigation. We initiated the investigation on February 19, 1985 (50 FR 7624), and notified the ITC of our action.

On March 18, 1985, the ITC found that there is a reasonable indication that imports of photo albums and filler pages from Hong Kong are materially injuring, or threatening material injury to, a U.S. industry (U.S.I.T.C. Pub. No. 1660, March 1985).

We investigated one producer, Climax Paper Converters, Ltd. This company accounts for approximately 85 percent of all exports of photo albums and filler pages from Hong Kong to the United States.

Scope of Investigation

The merchandise under investigation is photo albums and photo album filler pages. Photo albums are currently provided for in item 256.60 of the Tariff Schedules of the United States (TSUS). Photo album filler pages are currently provided for in items 256.87, 256.90 and 774.55 of the TSUS.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price with the foreign market value.

United States Price

As provided in section 772 of the Act, we used the purchase price of the subject merchandise to represent the United States price for some sales by Climax because the merchandise was sold to unrelated purchasers prior to its importation into the United States. We used the exporter's sales price for other sales by Climax to represent the United States price because the merchandise was sold to unrelated purchasers after importation into the United States.

We calculated the purchase price based on the FOB or CIF packed price to unrelated customers in the United States. We made deductions, where appropriate, for foreign inland freight, loading, ocean freight, marine insurance, U.S. brokerage and U.S. inland freight. We calculated exporter's sales price by making additional deductions for U.S. brokerage, U.S. inland freight, U.S. duty and other selling expenses incurred in the United States.

Foreign Market Value

In accordance with section 773(a) of the Act, we have preliminary determined that Climax had no sales of photo albums and filler pages in Hong Kong during the period of investigation. The petitioners alleged that sales to third countries were at prices below the cost of producing the merchandise. We examined production costs which included all appropriate costs for materials, fabrication and general expenses. We found sufficient sales in some third countries above the cost of production to allow us to use third country prices in accordance with section 773(a)(1)(B) of the Act to determine foreign market value. We used constructed value as our basis of comparison where there were insufficient sales of such or similar merchandise in third country markets, or where there were insufficient sales above the cost of production. In selecting third countries for comparison purposes, we used sales to the United Kingdom, the Republic of South Africa, France, and Australia since merchandise sold to these countries were most similar to that sold in the United States or because quantities sold to these countries were most comparable to quantities sold in the United States.

We calculated the third country prices for each product on the basis of FOB or CIF prices to unrelated purchasers. From these prices, we deducted, where appropriate, foreign inland freight, foreign handling, ocean freight, and marine insurance. We made adjustments, where appropriate, for differences in the physical characteristics of the merchandise, pursuant to § 353.16 of our regulations, and for differences in circumstances of sale related to commissions and credit expenses pursuant to § 353.15 of our regulations. We also adjusted for differences in packing costs.

We calculated the cost of production for third country sales by totaling the costs of materials, fabrication, general expenses, and packing. We calculated constructed value by totaling the cost of materials, fabrication used in producing such or similar merchandise, general expenses, profit, and the cost of the packing on the U.S. shipments. Because the amount for general expenses was less than ten percent of the cost of materials and fabrication, we used the statutory minimum of ten percent. The amount added for profit was the statutory minimum of 8 percent of the sum of materials, fabrication costs, and general expenses because the company had no home market sales of merchandise of the same class or kind and we are unable to determine how much of the company's overall profit was related to sales to countries other than the U.S. We expect to receive additional information from respondent regarding the caculation of fabrication costs for use in the final determination. Comments were received from petitioners too late for consideration in the preliminary determination. These comments will be considered in our final determination.

Preliminary Negative Determination of Critical Circumstances

The petitioners alleged that imports of photo albums and filler pages from Hong Kong present "critical circumstances." Under section 733(e)(1) of the Act, critical circumstances exist if we determine (1) there is a history of dumping in the United States or elsewhere of the class or kind of the merchandise which is the subject of the investigation or the person by whom, or

for whose account, the merchandise was imported knew or should have known that the exporter was selling the

the Act, we are directing the United States Customs Service to suspend liquidation of all entries of photo albums

to account for swing/shift applied to the other Categories.

Adjusting the Import Limit for Certain Man-Made Fiber Textile Products

Department of the Treasury, Washington, D.C. 20229

for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and (2) there have been massive imports of the class or kind of merchandise that is the subject of the investigation over a relatively short period.

In determining whether there is a history of dumping of photo albums and filler pages from Hong Kong in the United States or elsewhere, we reviewed past antidumping findings of the Department of the Treasury as well as past Department of Commerce antidumping orders. We also reviewed the antidumping actions of other countries. On March 26, 1985, in the finding of the Antidumping Tribunal in Review No. R-3-84, Canada imposed antidumping duties on photo albums and filler pages from Hong Kong. This constitutes a history of dumping for this product. Since there is a history of dumping in the United States or elsewhere, we do not need to consider whether there is reason to believe or suspect that importers of this product knew or should have known that this product was being sold at less than fair value.

We generally consider the following concerning massive imports: (1) recent trends in import penetration levels; (2) whether imports have surged recently; (3) whether recent imports are significantly above the average calculated over the last three years; and (4) whether the pattern of imports over that three year period may be explained by seasonal swings.

In considering this quesion, we analyzed recent trade statistics on import levels, import penetration ratios for photo albums and filler pages from Hong Kong for equal periods immediately preceding and following the filing of the petition, and seasonal factors. Based on our analysis of recent trade data, we find that imports of photo albums and filler pages from Hong Kong during the period subsequent to receipt of the petition have not been massive when compared to recent import levels and import penetration ratios. Therefore, we determine that critical circumstances do not exist with respect to imports of photo albums and filler pages from Hong Kong.

Verification

As provided in section 776(a) of the Act, we will verify all information used in reaching our final determination.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the United States Customs Service to suspend liquidation of all entries of photo albums and filler pages from Hong Kong that are entered, or withdrawn from warehouse, for consumption, on or after the date of publication of this notice in the **Federal Register**. The United States Customs Service shall require a cash deposit or the posting of a bond equal to the estimated weighted-average amounts by which the foreign market value of the merchandise subject to this investigation exceeds the United States price as shown in the table below. This suspension of liquidation will remain in effect until further notice.

Manufacturing/producer/exporter	Weighted-average margin (percentage)
Climax	6.12
All others	6.12

ITC Notification

In accordance with section 733(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration. The ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry before the later of 120 days after we make our preliminary affirmative determination or 45 days after we make our final affirmative determination.

Public Comment

In accordance with § 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 2:00 p.m. on August 8, 1985, at the United States Department of Commerce, Room B-841, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B-099, at the above address within 10 days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed.

In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by August 1, 1985. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within 30 days of this notice's publicaton, at the above address and in at least 10 copies.

BILLING CODE 3510-DS-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting Import Restraint Limits for Certain Cotton and Man-Made Fiber Textile Products From Taiwan

July 11, 1985.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on July 17, 1985. For further information contact Eve Anderson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

The bilateral agreement of November 18, 1982, as amended, concerning cotton, wool and man-made fiber textile products from Taiwan provides, among other things, for percentage increases in certain categories during an agreement year for swing and shift, provided corresponding reductions in equivalent square yards are made on other specific limits or sublimits during the same year. Pursuant to terms of the agreement, as amended, the import restraint limits established for Categories 338/339, 340, 631pt. (work gloves), 638 and 670pt. (luggage), exported during the twelve-month period which began on January 1, 1985 are being increased. The limits for Categories 353/354/653/654, 639, 640 and 670pt (handbags) are being reduced to account for swing/shift applied to the other Categories.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

July 11, 1985.

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: On December 21, 1984, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry for consumption, or withdrawal from warehouse for consumption, of goods exported during the twelve-month period beginning on January 1, 1985 and extending through December 31, 1985 of cotton, wool and man-made fiber textile products in certain specified categories, produced or manufactured in Taiwan, in excess of designated restraint limits. The Chairman further advised you that the restraint limits are subject to adjustment.[1]

Effective on July 17, 1985, the directive of December 21, 1984 is hereby futher amended to include adjusted restraint limits for the following categories:

Category	Adjusted 12-mo restraint limit [2]
338/339	633,951 dozen.
340	716,110 dozen.
353/354/653/654	224,821 dozen.
631 pt [3]	219,350 dozen pairs.
638	2,119,848 dozen.
639	4,305,790 dozen.
640	3,221,809 dozen.
670 pt.[4]	70,950,000 pounds.
670 pt.[4]	31,550,000 pounds.

[1] The limits have not been adjusted to account for any imports exported after December 31, 1984.
[2] In Category 631, only T.S.U.S.A. numbers 704.3215, 704.8525 and 704.9000.
[3] In Category 670, only T.S.U.S.A. numbers 706.4144 and 706.4152.
[4] In Category 670, only T.S.U.S.A. number 706.4140.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

[1] The agreement of November 18, 1982, as amended, concerning cotton, wool, and man-made fiber textile products from Taiwan provides that (1) specific limits or sublimits may be exceeded by certain designated percentages, provided a corresponding reduction in equivalent square yards is made in one or more specific limits or sublimits during the same agreement year; (2) certain specific limits or sublimits may be increased for carryforward; (3) special shift may be applied to certain categories, provided an equal amount in square yards equivalent is deducted from designated categories; and (4) administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement.

Adjusting the Import Limit for Certain Man-Made Fiber Textile Products Produced or Manufactured in the Republic of Korea

July 11, 1985.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on July 17, 1985. For further information contact Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement, effected by exchange of notes dated December 1, 1982, as amended, between the Governments of the United States and the Republic of Korea established, among other things, a specific limit of 1,407,963 dozen for man-made fiber textile products in Category 633/634/635, produced or manufactured in Korea and exported during the twelve-month period which began on January 1, 1985 and extends through December 31, 1985. The agreement provides, among other things, for the borrowing of yardage from the succeeding year's limit (carryforward) with the amount used to be deducted from the category limit in the succeeding year. The letter to the Commissioner of Customs which follows this notice amends the directive of December 21, 1984 to reduce the limit for Category 633/634/635 by 13,996 dozen to account for carryforward used during the agreement period which began on January 1, 1984. The adjusted level will be 1,393,967 dozen.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1985).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

July 11, 1985.

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: On December 21, 1984, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry of certain cotton, wool and man-made textile products exported during the twelve-month period beginning on January 1, 1985 and extending through December 31, 1985, produced or manufactured in Korea, in excess of designated restraint limits. The Chairman further advised you that the restraint limits are subject to adjustment.[1]

Effective on July 17, 1985, paragraph 1 of the directive of December 21, 1984 is hereby amended to include an adjusted restraint limit of 1,393,967 dozen[2] for Category 633/634/635.

The Committee for the Implementation of Textile Agreements has determined that this actions falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

Background

China and exported during the twelve-month period which began on April 23, 1985 and

notes dated December 7 and December 28, 1977, as amended, between the Governments of the United States and the Arab Republic of Egypt established, among other things, a specific limit 8,500,000 pounds for cotton textile products in Category 300/301 produced or manufactured in Egypt and exported during the period which began on January 1, 1985 and extends through December 31, 1985 (49 FR 50235). The agreement provides for the borrowing of yardage from the succeeding year's level (carryforward) with the amount used to be deducted from the category level in the succeeding year. The letter to the Commissioner of Customs which follows this notice amends the directive of December 21, 1984 to reduce the limit for Category 300/301 to 8,030,352 pounds to account for carryforward used during the agreement period which began on January 1, 1984.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1985).

Walter C. Lenahan,

Chairman, Committee for the Implementotion of Textile Agreements.

Committee for the Implementation of Textile Agreements

July 11, 1985.

Commissioner of Customs,
Department of the Treosury, Woshington, D.C. 20229

Dear Mr. Commissioner: On December 21, 1984 the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry of certain cotton textile products exported during the twelve month period beginning on January 1, 1985 and extending through December 31, 1985, produced or manufactured in the Arab Republic of Egypt in excess of designated restraint limits. The Chairman further advised you that the limits are subject to adjustment. [1]

Effective on July 17, 1985, paragraph 1 of the directive of December 21, 1984 is hereby amended to include the following adjusted restraint limits:

Category	Adjusted 12-mo limit
300/301	8,030,352 pounds of which not more than 6,974,752 pounds shall be in Category 300 and not more than 1,122,900 pounds shall be in Category 301.

[1] The limits have not been adjusted to reflect any imported exported after December 31, 1984

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemakinng provisions of U.S.C. 553.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 85-16874 Filed 7-15-85; 8:45 am]

BILLING CODE 3510-DR-M

Establishing an Import Limit for Certain Cotton Textile Products Produced or Manufactered in Portugal

July 11, 1985.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive below to the Commission of Customs to be effective July 17, 1985. For further information contact Ann Fields, International Trade Specialist Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On April 11, 1985, a notice was published in the **Federal Register** (50 FR 14277) which announced that, on March 29, 1985 the Government of the United States had requested the Government of Portugal to enter into consultations concerning exports to the United States of cotton pillowcases in category 360 and cotton sheets in Category 361, produced or manufactured in Portugal and exported during the twelve-month period which began on March 29, 1985 and extends through March 28, 1986. Inasmuch as no solution has been reached in consultations on mutally satisfactory limits for these categories, the United States Government has decided to control imports of cotton pillowcases in Category 360, and cotton sheets in Category 361, exported during the twelve-month period which began on March 29, 1985 at levels of 1,626,083 numbers and 2,980,444 numbers, respectively.

The United States remains committed to finding a solution concerning these categories. Should such a solution be reached in consultations with the Government of Portugal, further notice will be published in the **Federal Register**.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1985).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

July 11, 1985.

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on July 17, 1985, entry for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 360 and 361, produced or manufactured in Portugal and exported during the twelve-month period beginning on March 29 1985 and extending through March 28, 1986, in excess of the following levels:

Category	12-mo restraint level [1]
360	1,626,083 numbers.
361	2,980,444 numbers.

[1] The level has not been adjusted to reflect any imports exported after March 28, 1985.

Textile products in Categories 360 and 361 which have been exported to the United States prior to March 29, 1985 shall not be subject to this directive.

Textile products in Categories 360 and 361 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1985).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementotion of Textile Agreements.

[FR Doc. 85-16875 Filed 7-15-85; 8:45 am]

BILLING CODE 3510-DR-M

Import Restraint Limit on Man-Made Fiber Textile Products Produced or Manufactured in the People's Republic of China

July 11, 1985.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on July 17, 1985. For further information contact Diana Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On May 8, 1984, a notice was published in the **Federal Register** (49 FR 19570) establishing a twelve-month limit of 435,649 dozen for knit shirts of man-made fibers in Category 638, among other categories, produced or manufactured in China and exported during the twelve-month period, which began on April 23, 1984, pending agreement on a mutually satisfactory solution concerning this category between the Governments of the United States and the People's Republic of China. To avoid the continued risk of market disruption, the Government of the United States has decided, in the absence of agreement on this category, pursuant to section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854) and the Bilateral Cotton, Wool and Man-made Fiber Textile Agreement, effected by exchange of notes dated August 19, 1983, as amended, to continue the import restraint limit for an additional twelve-month period beginning on April 23, 1985 and extending through April 22, 1986 at a level of 461,788 dozen. This level reflects a six percent increase over the previous level.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1985).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

Committee For the Implementation of Textile Agreements

July 11, 1985.

Commissioner of Customs,
Department of the Treasury, Woshington, D.C. 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement, effected by exchange of notes dated August 19, 1983, as amended, between the Governments of the United States and the People's Republic of China, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed, effective on July 17, 1985, to permit entry into the United States for consumption of man-made fiber textile products in Category 638, produced or manufactured in the People's Republic of China and exported during the twelve-month period which began on April 23, 1984 and extends through April 22, 1986 in excess of 461,788 dozen.[1]

In carrying out this directive, entries of man-made fiber textile products in Category 638, produced or manufactured in China, which have been exported to the United States on and after April 23, 1984 and extending through April 22, 1985, shall, to the extent of any unfilled balance, be charged against the level established for such goods during that twelve-month period. In the event the level established for that period has been exhausted by previous entries, such goods shall be subject to the level set forth in this letter.

Textile products in Category 638 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1985).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Requesting Public Comment on Bilateral Textile Consultations With the Government of Turkey on Category 339; Women's, Girls' and Infants' Cotton Knit Shirts)

July 11, 1985.

On June 27, 1985, the United States Government, under Article 3 of the Arrangement Act of 1956 (7 U.S.C. 1854), requested the Government of Turkey to enter into consultations concerning exports to the United States of women's, girls' and infants' cotton knit shirts in Category 339, produced or manufactured in Turkey.

[1] The level has not been adjusted to reflect any imports exported after April 22, 1985.

[1] The term "adjustment refers to those provisions of the Bilateral Cotton Terxtile Agreement, effected by exchange of notes dated December 7 and 28, 1977, as amended and extended, between the Governments of the United States and the Arab Republic of Egypt, which provide, in part, that: (1) The specific limit for Categorias 300, 301, and 300/301 may be adjusted for carryover and carryforward; and (2) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

The purpose of this notice is to advise that, if no solution is agreed upon in consultations between the two

above address or by phone at (202) 254-6314.

The purpose of this notice is to advise that, if no solution is agreed upon in consultations between the two governments within sixty days of the date of delivery of the aforementioned note, entry and withdrawal from warehouse for consumption of cotton textile products in Category 339, produced or manufactured in Turkey and exported to the United States during the twelve-month period which began on June 27, 1985 and extends through June 26, 1986 may be restrained at 320,972 dozen.

A summary market statement follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Category 339 is invited to submit such comments or information in ten copies to Mr. Walter C. Lenahan, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textile and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C., and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public with the Committee for the Implementation of Textile Agreements consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553 (a)(1) relating to matters which constitute "an affairs function of the United States."

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

Turkey—Market Statement

Category 338—Women's, Girls' and Infants' Cotton Knit Blouses

June 1985.

Summary and Conclusions

U.S. imports of Category 339 from Turkey were 376,365 dozens during the year ending April 1985, nearly three times the imports of 126,705 dozens a year earlier. Imports for the first four months of 1985 were 230,150 dozens, an annual rate of 690,450 dozens. Turkey is the largest uncontrolled supplier of these garments and was the fourth largest supplier during the first four months of 1985.

These imports from Turkey are entering a market already disrupted by imports. The rapid growth and substantial volume of imports from Turkey are disrupting the market and continuation of the growth would further disrupt the market.

U.S. Production

Production of Category 339 in 1983 was 8.1 million dozens, down 3.5 percent from the 8.4 million in 1982. Production in 1984 is estimated to have been between 8.0 million and 8.4 million dozens. Cuttings of women's knit blouses during the first quarter declined by 29.1 percent from the first quarter of 1984.

U.S. Imports

Imports of Category 339 from all sources increased from 7.4 million dozens in 1983 to 10.0 million in 1984. Imports during the first four months of 1985 were at an annual rate of 12.8 million dozens.

Import Penetration

The ratio of imports to production in 1984 was at a record level with imports at 10.0 million dozens exceeding production which is estimated to have been between 8.0 and 8.2 million dozen. The ratio for a number of years has been around 100 percent.

Duty-Paid Values and U.S. Producer Prices

Most of the imports of Category 339 from Turkey are entered under TSUSA Numbers 383.2706—women's tank tops; 383.2724—women's girls' and infants' T-shirts; and 383.2730—women's, other shirts. These garments are being imported at duty-paid values below the U.S. producer prices for comparable garments.

BILLING CODE 3510-DR-M

Request for Public Comment on Bilateral Textile Consultation With the Government of Japan To Review Trade in Category 350 (Cotton Dressing Gowns)

July 11, 1985.

On June 27, 1985, the Government of the United States requested consultations with the Government of Japan with respect to Category 350. This request was made on the basis of the Agreement effected by exchange of notes dated August 17, 1979, as amended and extended, between the Governments of the United States and Japan relating to trade in cotton, wool and man-made fiber textiles and textile products and on the basis of section 204 of the Agricultural Act 1956 (7 U.S.C. 1854).

The purpose of this notice is to advise the public that, if no solution is agreed upon in consultations between the two governments, the Committee for the Implementation of Textile Agreements may request the Government of Japan to limit exports in Category 350, produced or manufactured in Japan and exported to the United States during the twelve-month period which began on January 1, 1985 and extends through December 31, 1985 at a level of 16,919 dozen.

Anyone wishing to comment or provide data or information regarding the treatment of this category under the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement with the Government of Japan, or on any other aspect thereof, or to comment on domestic production or availability of textile products included in the category, is invited to submit such comments or information in ten copies to Mr. Walter C. Lenahan, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230. Because the exact timing of the consultation is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textile and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC, and may be obtained upon request.

Further comments may be invited regarding particular comments of information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

Walter C. Lenahan

July 1985.

Summary and Conclusions

U.S. imports of Category 350 from Japan were 14,677 dozens during the year ending April 1985. This was 35 percent above the level imported a year earlier. Japan was the ninth largest supplier and accounted for 2.7 percent of the total imports.

The market for Category 350 has been disrupted by imports and imports from Japan are contributing to the disruption. A continuation of the growth creates a real risk of more intensive disruption.

U.S. Production and Market Share

U.S. production of Category 350 followed a downward trend from 1979 through 1982. It partially recovered in 1983 and 1984 but remained below the levels maintained during 1979–1981.

The domestic producers share of the market for domestically produced and imported Category 350 declined from 80 percent in 1979 to 55 percent in 1983. It is estimated that the share ranged from 51 to 54 percent in 1984.

U.S. Imports and Import Penetration

U.S. imports of Category 350 increased sharply from 173,000 dozens in 1979 to 531,000 dozens in 1984. Based on the first four months of 1985 data, imports are estimated to reach 656,000 dozen in 1985.

The ratio of imports to domestic production more than tripled from 25.4 percent in 1979 to 80.7 percent in 1983. The ratio is estimated to have ranged between 85.0 and 92.3 percent in 1984.

Duty-Paid Values and U.S. Producer Prices

About 70 percent of the Category 350 imports entered under TSUSA No. 383.3770—women's, girls' and infants' woven robes. These imports are valued well below the U.S. producer prices for comparable robes.

BILLING CODE 3510-DR-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Mercantile Exchange Standard and Poor's Over-the-Counter Industrial Stock Price Index

AGENCY: Commodity Futures Trading Commission.

ACTION: Request for public comment on amended terms and conditions of proposed commodity futures contract.

SUMMARY: On March 19, 1985 the Commodity Futures Trading Commission ("Commission"), in accordance with sections 2(a)(1)(B)(iii) and 2(a)(B)(iv)(II) of the Commodity Exchange Act ("Act"), 7 U.S.C. 2a(iii), 2a(iv)(II)(1983), published in the Federal Register a notice of availability of the contract terms and conditions contained in an application by the Chicago Mercantile Exchange ("CME") for designation as a contract market in an over-the-counter stock index (50 FR 11007). The notice provided for a sixty-day comment period which ended on May 20, 1985. Subsequently, the CME notified the Commission that it intended to propose a change to the terms of the contract. The CME requested that the Commission give notice of, and seek public comment on, this change. In light of this request, the Commission has concluded that, in this instance, an additional period for public comment is warranted.

DATE: Comments must be received on or before July 31, 1985.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Reference should be made to the CME—Standards and Poor's Over-the-Counter Industrial Stock Price Index futures contract.

FOR FURTHER INFORMATION CONTACT: Naomi Jaffe, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, (202) 254–6990.

SUPPLEMENTARY INFORMATION: By letter dated July 3, 1985, the CME notified the Commission that it wished to amend the terms of the CME's proposed futures contract in the Standard and Poor's Over-the-Counter Industrial Stock Price Index. This modification would clarify the standards to be employed by Standard and Poor's in its selection of stocks included in the index. The Commission previously published in the Federal Register a notice of availability of the contract terms and conditions of the proposed contract and provided a sixty-day comment period which ended on May 20, 1985 (50 FR 11007, March 19, 1985).

The CME requested by letter dated July 5, 1985, that the Commission "publish . . . notification in the Federal Register of the selection standard that we submitted to you on July 3, 1985. We intend to afford commentators an additional opportunity to comment on our contract in light of this submission." The Commission agrees that an additional comment period to enable the public to consider the intended modification and to express their views on it is in the public interest and is consistent with the objectives of the Commodity Exchange Act.

The contemplated change to the terms of the proposed Standard and Poor's Over-the-Counter Stock Price Index futures contract modifies the description of the Index. This amendment provides that "the index is a price weighted index of 250 larger, actively traded domestic NASDAQ National Market System industrial stocks." The Commission is requesting comment on the potential effects of this change to the design of the contract. The Commission would appreciate commentors' addressing, in particular, the possible effects of restricting the index of stocks to those which are National Market System industrial stocks.

Copies of the CME's letters of July 5, 1985, and July 3, 1985, which contain the amendment to the terms and conditions of its proposed over-the-counter stock index contract, together with the other terms and conditions of that contract, are available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581. Copies of these documents can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254–6314.

Any person interested in submitting written data, views or arguments on the above identified issues should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581 by the specified date.

Issued in Washington, D.C. on July 11, 1985.

Jean A. Webb,

Secretary of the Commission.

BILLING CODE 6351-01-M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Request for Approval of Survey of Persons Reporting Childhood Ingestion of Prescription Medicines to Poison Control Centers

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. 3601 *et seq.*) the Consumer Product Safety Commission has submited to the Office of Managment and Budget a request for approval of a survey of persons reporting ingestions of prescription medicines by children to poison control centers. Such persons will be asked for information about the person whose medicine was ingested and about the circumstances of the ingestion.

From this information, the Commission will be able to develop effective poison prevention programs and target them at the populations whose medicines pose the greatest risk to children.

Additional Details About the Requested Approval for Collection of Information

Agency Address: Consumer Product Safety Commission, 1111 18th street, Washington, D.C. 20207.

Title of Informotion Collection: American Association of Poison Control Centers Prescription Drug Ingestion Survey.

Type of Request: Approval of new plan.

Frequency of Collection: One time.

General Description of Respondents: Persons reporting childhood ingestions of prescription drugs to selected poison control centers.

Estimated Number of Respondents: 200.

Estimoted Number of Hours for All Respondents: 240.

Comments: Comments on this request

eliminate the use of chlorination facilities at the existing sewage treatment plant in the Town of

BILLING CODE 6355-01-M

DELAWARE RIVER BASIN COMMISSION

Commission Meeting and Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Wednesday, July 24, 1985, beginning at 1:30 p.m. in the Goddard Conference Room of the Commission's offices at 25 State Police Drive, West Trenton, New Jersey. The hearing will be a part of the Commission's regular business meeting which is open to the public.

An informal pre-meeting conference among the Commissioners and staff will be open for public observation at about 11:30 a.m. at the same location.

Applications for Approval of the Following Projects Under Article 10.3, Article 11 and/or Section 3.8 of the Compact:

1. *Holdover Project—County of Montgomery D–85–22 CP.* A sewage treatment project to serve the new Montgomery County Prison in Lower Providence Township, Montgomery County, Pennsylvania. The new treatment facility will be designed to provide tertiary treatment to an average waste flow of 0.053 million gallons per day (mgd). Treated effluent will discharge to an unnamed tributary of Skippack Creek in Lower Providence Township. This hearing continues that of June 27, 1985.

2. *Holdover Project—Town of Rockland—Livingston Manor Sewer District D–85–28 CP.* An application to eliminate the use of chlorination facilities at the existing sewage treatment plant in the Town of Rockland, Sullivan County, New York. The applicant has requested a waiver of the current DRBC disinfection requirement. The Livingston Manor wastewater discharge was approved with a design capacity of 1,050,000 gallons per day (gpd) to be discharged to Willowemoc Creek as described in Docket D–67–29 CP on April 26, 1967. The receiving waters are classified hy the New York Department of Environmental Conservation as C(T) trout waters and as such do not require any disinfection. The New York State Health Department has stated that there is no demonstrated need for disinfection at this facility. This hearing continues that of May 29, 1985.

3. *Borough of Doylestown D–79–18 CP (Renewal).* Renewal of an approved ground water withdrawal from Well No. 13 which supplies water to the applicant's distribution system in Doylestown Borough, Bucks County, Pennsylvania. The original 1980 Commission approval was limited to five years and will expire unless renewed. The proposed 30-day limit remains at 8.7 million gallons (mg) from Well No. 13 and 50 mg from all wells. The project is located in the Southeastern Pennsylvania Ground Water Protected Area.

4. *Borough of Quakertown D–82–4 CP (Revised).* A revised application to increase total ground water withdrawals from the applicant's five existing wells (Nos. 11, 12, 13, 14, and 15) in the Beaver Run Watershed from an average of 0.94 mgd to an average of 1.06 mgd. The wells are located in or near the Borough of Quakertown, Bucks County, and are in the Southeastern Pennsylvania Ground Water Protected Area.

5. *City of Newark D–83–35 CP.* A proposed new interconnection between the City of Newark and the Artesian Water Company water supply systems in New Castle County, Delaware. The interconnection will be located at the intersection of Kirkwood Highway and Polly Drummond Road, approximately two miles northeast of the City of Newark, and will provide for transfer of water of up to 300 gallons per minute (gpm) to Artesian or up to 600 gpm to Newark during emergency conditions. The City of Newark obtains its water supply from 10 wells and two interconnections with the Wilmington Suburban Water Company. Artesian Water Company obtains its water supplies from 41 wells and four interconnections with the City of Wilmington and one interconnection with Wilmington Suburban Water Company.

6. *Citizens Utilities Water Company of Pennsylvania D–84–60 CP.* A ground water withdrawal project to supply approximately 0.25 mgd of water from the applicant's Well No. 23 serving the south side of Gring's Hill. The total withdrawal from all wells in the applicant's distribution system will be 4.24 mgd. The project is located in Spring Township, Berks County, Pennsylvania.

7. *Whitehall Township Authority D–85–37 CP.* A ground water withdrawal project to supply approximately 0.433 mgd of water from the applicant's Mickley Gardens Well No. 2. The total withdrawal from all wells in the applicant's distribution system will be 0.72 mgd. The project is located in Whitehall Township, Lehigh County, Pennsylvania.

8. *Monsanto Polymer Products Company D–85–45.* A project to initiate remedial action towards the removal of PCBs and benzyl compounds from ground water in an isolated area of the existing Monsanto Polymer Products Facility near Bridgeport in Logan Township, Gloucester County, New Jersey. Approximately 50,000 gpd will be withdrawn from 33 wells special 50 feet apart, pretreated in proposed facilities and then processed in the existing wastewater treatment plant prior to discharge into the Delaware River. Clean Water will be reinjected in 33 new injection wells to help flush out the contamination.

9. *Exeter Township, Berks County, Authority D–85–46 CP.* An application for rerating of the Exeter Township, Berks County, Authority sewage treatment plant which serves Exeter Township, St. Lawrence Borough, and a portion of Lower Alsace Township in Berks County, Pennsylvania. The applicant requests that the allowable average waste flow through the existing plant be increased from 2.4 mgd to 3.6 mgd. The existing flow limit of 2.4 mgd has been exceeded because of excessive infiltration and inflow to the collection system. The rerating will allow the plant to accept the seasonal high flows, without permit violation, while the infiltration and inflow problem is being corrected. The plant is designed for secondary treatment at the higher flow rate, and treated effluent will continue to discharge to the Schuylkill River at River Mile 92.47–65.2.

10. *City of Bridgeton D–85–47 CP.* A ground water withdrawal project to replace water from Well No. 4 which collapsed and has been sealed. A proposed withdrawal from new Well No. 16 will be limited to 0.58 mgd. The proposed withdrawal in the applicant's system will be limited to 8.5 mgd. The project is located in the City of Bridgeton, Cumberland County, New Jersey.

Documents relating to these items may be examined at the Commission's offices. Preliminary dockets are available in single copies upon request. Please contact David B. Everett. Persons wishing to testify at this hearing are requested to register with the Secretary prior to the hearing.

Susan M. Weisman,

Secretary.

July 9, 1985.

Public Information Notice

Water Quality Program

The Commission is preparing its water quality program for the fiscal year, ending September 30, 1986. Notice of this action is given in accordance with the requirements of the Federal Clean Water Act, as amended. The proposed program will involve a variety of activities in the areas of planning, surveillance, compliance monitoring, regional coordination, use attainability assessment, wasteload allocations and public participation. While the proposed program is not subject to public hearing by the Commission, it may be examined by interested individuals at the Commission's offices upon request. The public review and comment period will begin July 15, 1985 and extend for 30 days. Contact Seymour P. Gross at the Commission.

BILLING CODE 6360-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP85-169-000]

Consolidated Gas Transmission Corp.; Proposed Changes in Rates and Charges

July 5, 1985.

Take notice that on July 1, 1985, Consolidated Gas Transmission Corporation (Consolidated), pursuant to section 4 of the Natural Gas Act and § 154.63 of the Commission's regulations, tendered for filing proposed changes to its FERC Gas Tariff, Original Volume No. 1 to become effective on August 1, 1985. Consolidated requests that the rates become effective, after five-month suspension, on January 1, 1986, in accordance with a rate moratorium agreed to in a rate settlement agreement in Docket No. RP82–115.

The proposed rate changes would increase Consolidated's revenues from jurisdictional sales and services by $82.9 million based on the twelve months ended March 31, 1985, adjusted for known and measurable changes through December 31, 1985.

Consolidated states that increased rates are necessary to reflect decreased sales and other billing determinants and to recover increased operation and maintenance expenses, increased taxes, and the increased cost of money. The rate of return is based on the capital structure agreed to for filing purposes in Docket No. RP82–115 with an equity return of 17%.

Consolidated states that the cost of gas, including pipeline production, was computed using the base costs of gas per unit of sales reflected on Consolidated's Substitute Second Revised Sheet No. 31.

Consolidated represents that Statement P will be filed within fifteen days of ts filing. It states that it served copies of its filing upon its jurisdictional customers as well as interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before July 12, 1985. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until July 3, 1985.

The substitute sheets are being filed to effectuate the PGA rates approved in Docket Nos. TA85-3-59-000, TA85-3-59-001, TA85-2-59-000 and TA85-2-59-001 pursuant to Northern's Flexible Pricing—Larage Volume Contract Service Rate Schedule.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the Commission's Rule of Practice (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before July 17, 1985. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA85-5-37-000, 001]

Northwest Pipeline Corp.; Change in Rates Pursuant to Purchased Gas Cost Adjustment

July 10, 1985.

Take notice that on July 3, 1985 Northwest Pipeline Corporation ("Northwest") submitted for filing, to be a part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheets:

Twentieth Revised Sheet No. 10
Second Amended Substitute Nineteenth Revised Sheet No. 10

The tendered tariff sheets reflect a reduction of $56,915,093 in Northwest's projected cost of purchased gas resulting from substantial decreases in the cost of Canadian supplies as well as a decline in the price being paid under Northwest's "Market-Out" provisions of its domestic contracts.

Northwest has requested an effective date of July 1, 1985 for the above-referenced tariff sheets.

A copy of this filing has been mailed to all parties of record in Docket No. TA85-3-37-000 and on all jurisdictional customers and affected state agencies.

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 or 214 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before July 17, 1985. Protests will be considered by the Commission in determining the appropriate action, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

FR Doc. 85-16819 Filed 7-15-85; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA85-2-8-002]

South Georgia Natural Gas Co.; Compliance Filing

July 10, 1985

Take notice that on July 2, 1985, South Georgia Natural Gas Company (South Georgia) tendered for filing the following revised tariff sheets to its FPC Gas Tariff, First Revised Volume No. 1:

Substitute Thirty-First Revised Sheet No. 4
Substitute Thirty-Second Revised Sheet No. 4
Thirty-Third Revised Sheet No. 4

South Georgia states that these sheets are filed in accordance with Ordering Paragraph (C) of the Commission's June 21, 1985 order issued in Docket No. TA85-2-8-000. South Georgia requests that the proposed tariff sheets be accepted effective, May 1, 1985, June 1, 1985 and July 1, 1985, respectively. If approved as requests, these three tariff sheets will effect a 21.44¢ per Mcf reduction in South Georgia's Current Adjustment effective May 1, 1985, an additional 7.10¢ per Mcf reduction in South Georgia's Current Adjustment effective June 1; 1985, and a 2.53¢ reduction in South Georgia's Surcharge Adjustment effective July 1, 1985.

Copies of the filing were served on all purchasers, state commissions and interested parties shown on the list attached to the filing.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before July 17, 1985. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-2865-3]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solication and the expected impact, and where appropriate includes the actual data collection instrument. For the ICR listed below OMB has waived the public comment period and given approval (OMB #2070-0074; expires 7/31/88). This ICR is available for review.

FOR FURTHER INFORMATION CONTACT: Nanette Liepman (PM-223); Office of Standards and Regulations; Regulation and Information Management Division; U.S. Environmental Protection Agency; 401 M Street, SW.; Washington, DC 20460; telephone (202) 382-2742) or FTS 382-2742.

SUPPLEMENTARY INFORMATION:

Office of Pesticides and Toxic Substances

- *Title:* Recordkeeping Requirements for Certified Applicators Using 1080 Collars for Livestock Protection (EPA #1249). (This is a new collection.)

Abstract: Sodium Monofluoroacetate (1080), a previously banned pesticide, has been re-approved for use in a new delivery mechanism, the toxic collar. This recordkeeping requirements will monitor the use effectiveness, and any hazards resulting from the use of the toxic collars. Records will be kept by users of the collars.

Respondents: Certified Pesticide Applicators using 1080 toxic collars for livestock protection.

unreasonable or must initiate appropriate action to reduce or control the risk.

5. P85-547: 2-Propenoic acid, 3,3,5-trimethylcyclohexylester.

BILLING CODE 6560-50-M

[OPTS-40010; FRL 2604-2]

Designation of Certain Chemicals for Priority Attention; Notice of Availability of Guidelines

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is making a working document available to the public on section 4(f) of the Toxic Substances Control Act (TSCA). This document contains guidelines on how EPA interprets the requirements of this section.

ADDRESS: Communications to the Agency about his notice should be sent to: TSCA Public Information Office (TS-793), Office of Toxic Substances, Environmental Protection Agency, Room E-108, 401 M Street, SW., Washington, D.C. 20460.

Communications should include the document control number OPTS-40010. Communications received on this notice will be available for review and copying from 8 a.m. to 4 p.m., Monday through Friday, excluding holidays, in Room. E-107 at the address given above.

FOR FURTHER INFORMATION CONTACT: Edwrd A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Room E-543, 401 M Street SW., Washington, D.C. 20460. Toll-free: (800-424-9065). In Washington, D.C.: (554-1404). Outside the USA: (Operator 202-554-1404).

SUPPLEMENTARY INFORMATION: The document being made available today contains EPA's working interpretation of the requirements of section 4(f) of TSCA. This section requires that EPA designate certain chemicals for priority attention. Under section 4(f), when information indicates that there may be a reasonable basis to conclude that a chemical presents or will present a significant risk of serious or widespread harm to humans from cancer, birth defects, or gene nutations, the chemical must be reviewed on a priority basis. EPA must decide within 180 days of receipt of the information which indicates a section 4(f) priority either that the risk identified is not unreasonable or must initiate appropriate action to reduce or control the risk.

EPA's working interpretation of the section, and criteria for applying it, are contained in the document now available. Persons wishing to have copies of the document should call or write their requests to the telephone number or address listed above, under "FOR FURTHER INFORMATION CONTACT." Persons wishing to comment on the document should send their comments to the address given above. The comments will be considered along with public comments received in response to particular section 4(f) designations in the future. Future revisions to the guidance document will reflect both EPA's experience in applying section 4(f) and its considerations of comments received.

Dated: July 2, 1985.

A. James Barnes,

Acting Administrator.

BILLING CODE 6560-50-M

[OPTS-51560A/51562B; FRL-2864-8]

Premanufacture Notices; Extension of Review Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is extending the review period for an additional 90 days for premanufacture notices (PMNs) P85-543, P85-544, P85-545, P85-546, and P85-547 under the authority of section 5(c) of the Toxic Substances Control Act (TSCA). The review period will now expire on October 2, 1985.

FOR FURTHER INFORMATION CONTACT: Robert Jones, Chemical Control Division (TS-794), Environmental Protection Agency, Room E-611, 401 M Street SW., Washington, D.C. 20460 (202-382-3395).

SUPPLEMENTARY INFORMATION: On February 20, 1985, EPA received PMNs P85-543, P85-544, P85-545, P85-546, and P85-547 for the following new chemical substances:

1. P85-543: 2-Butenedioic acid (z)-, mono[2-[(1-oxo-2-propenyl)-oxy]ethyl]ester.

2. P85-544: 2-Propenoic acid, 2-methyl-, 7,7,9-trimethyl-4, 13-dioxo-3, 14-dioxa-5 12-diazo hexandecane-1, 16-diylester.

3. P85-545: 2-Propenoic acid-3-(dimenthylamino)-2,2-dimethyl-propylester.

4. P85-546: 2-Propenoic acid, 2-methyl-, 3,3,5-trimethylcyclohexylester.

5. P85-547: 2-Propenoic acid, 3,3,5-trimethylcyclohexylester.

The submitter claimed the production volume to be confidential business information. Notice of receipt for P85-543, P85-546 and P85-547, was published in the **Federal Register** of March 1, 1985 (50 FR 8390). Notice of receipt for P85-544 and P85-545 was published in the **Federal Register** of March 15, 1985 (50 FR 10536). The original 90-day review period was sheduled to expire on July 4, 1985.

Based on its analysis, EPA finds that there is a possibility that the substances submitted for reveiw in these PMNs may be regulated under TSCA. The Agency requires an extension of the review period, as authorized by section 5(c) of TSCA, to investigate further potential risk, to examine its regulatory options, and to prepare the necessary documents, should regulatory action be required. Therefore, EPA has determined that good cause exists to extend the review period for an additional 90 days, to October 2, 1985.

PMNs are available for public inspection in Rm. E-107, at the EPA headquarters, address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

Dated: July 3, 1985.

Edwin F. Tinsworth,

Acting Director, Office of Toxic Substances.

BILLING CODE 6560-50-M

[A-4-FRL-2864-6]

Standards of Performance for New Stationary Sources; National Emission Standards for Hazardous Air Pollutants Delegation of Additional Standards to Kentucky

AGENCY: Environmental Protection Agency.

ACTION: Informational notice.

SUMMARY: On January 23, 1985, the Kentucky Natural Resources and Environmental Protection Cabinet requested that EPA delegate to the State the authority to implement and enforce EPA's new source performance standards (NSPS) and national emission standards for hazardous air pollutants (NESHAP) for additional categories of air pollution sources (listed below under "Supplementary Information"). Since EPA's review of pertinent Kentucky laws, rules, and regulations showed them to be adequate to implement and enforce these Federal standards, the Agency has delegated authority for them to Kentucky. Affected sources are now under the jurisdiction of the State rather than EPA.

EFFECTIVE DATE: April 17, 1985.

ADDRESSES: Copies of the State's request and EPA's letter of delegation are available for public inspection at EPA's Region IV office, 345 Courtland Street, NE., Atlanta, Georgia 30365. All reports required pursuant to the newly delegated standards (listed below) should be submitted to the Kentucky Division of Air Pollution Control, Ft. Boone Plaza, 18 Reilly Road, Frankfort, Kentucky 40601, rather than to EPA Region IV.

FOR FURTHER INFORMATION CONTACT: Melvin Russell of the EPA Region IV Air Management Branch at the above address, telephone 404/881-2864 (FTS 257-2864).

SUPPLEMENTARY INFORMATION: Section 301, in conjunction with sections 101, 110, 111, and 112 of the Clean Air Act, authorizes EPA to delegate authority to implement and enforce the Standards of Performance for New Stationary Sources (NSPS)—Section 111, and National Emission Standards for Hazardous Air Pollutants (NESHAP)—section 112, to any state which had adequate implementation and enforcement procedures.

On April 12, 1977, EPA delegated to Kentucky authority to implement and enforce NSPS and NESHAP in existence at that time. As additional categories have been promulgated, the State has requested authority for them; EPA has responded by making supplemental delegations of authority for NSPS on December 5, 1980, March 26, 1981, January 1, 1982 and July 6, 1982; and for NESHAP on December 5, 1980. On January 23, 1985, the Kentucky Natural Resources and Environmental Protection Cabinet requested a delegation of authority for the following recently promulgated NSPS contained in 40 CFR Part 60, and NESHAP contained in 40 CFR Part 61.

NSPS

Subpart—Source Category

H (Revised)—Sulfuric Acid Manufacturing Plants
T (Revised)—Phosphate Fertilizer Industry: Wet Process Phosphoric Acid Plants
U (Revised)—Phosphate Fertilizer Industry: Superphosphoric Acid Plants
V (Revised)—Phosphate Fertilizer Industry: Diammonium Phosphate Plants
W (Revised)—Phosphate Fertilizer Industry: Triple Superphosphate Plants
EE—Surface Coating of Metal Furniture
HH—Lime Manufacturing Plants
QQ—Graphic Art Industry: Publication Rotogravure Printing
RR—Pressure Sensitive Tape & Label Surface Coating Operations
SS—Industrial Surface Coating: Large Appliances
TT—Metal Coil Surface Coating
VV—Equipment Leaks of VOC in the Synthetic Organic Chemicals Manufacturing Industry
WW—Beverage Can Surface Coating Industry
XX—Bulk Gasoline Terminals
GGG—Petroleum Refinery Equipment
HHH—Synthetic Fiber Production Facilities

NESHAP

Subpart—Source Category

J—Equipment Leaks of Benzene
M (Revised)—Asbestos Standard
V—Equipment Leaks

Note.—The word "*revised*" following the subpart indicates the standard was previously delegated to the State, and this delegation action is in recognition of the State's adoption of EPA's revision to the standard.

After a thorough review of the request, the Regional Administrator determined that such delegation was appropriate with the conditions set forth in the original delegation letter of April 12, 1977, and granted the State's request in a letter dated April 17, 1985. Kentucky sources subject to the NSPS listed above are not under the jurisdiction of the State of Kentucky.

(Secs. 101, 110, 111, and 301 of the Clean Air Act (42 U.S.C. 7401, 7410, 7411, and 7601))

Dated: July 5, 1985.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[Docket No. FEMA-REP-7-MO-1]

The Missouri Emergency Management Plan Site-Specific for the Callaway Nuclear Power Plant; Certification of FEMA Findings and Determinations.

In accordance with the Federal Emergency Management Agency (FEMA) rule 44 CFR Part 350, the State of Missouri submitted its plans relating to the Callaway Nuclear Power Plant to the Director of FEMA Region VII on May 21, 1984, for FEMA review and approval. On August 31, 1984, the Regional Director forwarded his evaluation to the Associate Director for State and Local Programs and Support in accordance with § 350.11 of the FEMA rule. Included in this evaluation is a review of the State and local plans around the Callaway Nuclear Power Plant, an evaluation of the joint exercise conducted on March 21, 1984, and the April 19, 1984, remedial exercise, in accordance with § 350.9 of the FEMA rule, and a public meeting held on July 25, 1984 to discuss the site-specific aspects of the State and local plans around the Callaway Nuclear Power Plant in accordance with § 350.10 of the FEMA rule.

Based on the evaluation by the Regional Director and the review by the FEMA Headquarters staff, I find and determine that, subject to the condition stated below, the State and local plans and preparedness for the Callaway Nuclear Power Plant are adequate in that they provide reasonable assurance that appropriate protective actions can be taken offsite in the event of a radiological emergency and are capable of being implemented. The condition for the above approval is that the adequacy of the public alert and notification system already installed and operational must be verified as meeting the standards set forth in Appendix 3 of the Nuclear Regulatory Commission (NRC)/FEMA criteria of NUREG-0654/FEMA REP-1, Rev. 1, and the Standard Guide for the Evaluation of Alert and Notification Systems for Nuclear Power Plants (FEMA-43).

FEMA will continue to review the status of offsite plans and preparedness associated with the Callaway Nuclear Power Plant in accordance with section 350.13 of the FEMA rule.

For further details with respect to this action, refer to Docket File FEMA-REP-7-MO-1 maintained by the Regional Director, FEMA Region VII, 911 Walnut Street, Room 300, Kansas City, MO 64106.

Dated: July 10, 1985.

For the Federal Emergency Management Agency.

Samuel W. Speck,

Associate Director, State and Local Programs and Support.

Public Health Service

Saint Elizabeths Hospital and District of Columbia Mental Health Services Act; Delegation of Authority

Notice is hereby given that in furtherance of the delegation by the Secretary of Health and Human Services on May 13, 1985, to the Assistant Secretary for Health, the Acting Assistant Secretary for Health has delegated to the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, with authority to redelegate, the authorities delegated to the Assistant Secretary for Health, under Pub. L. 98-621, 98 Stat. 3369, as amended, insofar as those authorities pertain to the functions assigned to the Alcohol, Drug Abuse, and Mental Health Administration. The following authorities were excluded from this delegation:

Section 4(f)(2)(A)—authority to initiate and complete certain repairs and renovations to the physical plant and facility support systems of the Saint Elizabeths Hospital.

Section 8(a)(1)—except as provided in section 8(a)(2), authority to transfer to the District, without compensation, certain real property at the Saint Elizabeths Hospital, together with buildings, improvements, and personal property, as identified pursuant to section 4(c)(7).

Section 8(c)—authority to transfer to the District, without compensation, the J.B. Johnson buildings and grounds.

Section 9(d)—subject to section 4(f)(2), authority for capital improvements to facilities at the Saint Elizabeths Hospital authorized during the service coordination period in accordance with Pub. L. 83-472.

The delegation to the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, became effective on July 1, 1985.

Dated: July 1, 1985.

BILLING CODE 4160-20-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary of Housing—Federal Housing Commissioner

[Docket No. N-85-1543]

Mortgage and Loan Insurance Programs under the National Housing Act—Debenture Interest Rates

AGENCY: Office of the Assistance Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of change in debenture interest rates.

SUMMARY: This notice announces changes in the interest rates to be paid on debentures issued with respect to a loan or mortgage insured by the Federal Housing Commissioner under the provisions of the National Housing Act (the "Act"). The interest rate for debentures issued under section 221(g)(4) of the Act during the six-month period beginning July 1, 1985, is 10-1/8 percent. The interest rate for debentures issued under any other provision of the Act is the rate in effect on the date that the commitment to insure the loan or mortgage was issued, or the date that the loan or mortgage was endorsed (or initially endorsed if there are two or more endorsements) for insurance, whichever rate is higher. The interest rate for debentures issued under these other provisions with respect to a loan or mortgage committed or endorsed during the six-month period beginning July 1, 1985, is 11-1/8 percent.

FOR FURTHER INFORMATION CONTACT: James B. Mitchell, Financial Policy Division, Room 9132, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410. Telephone (202) 426-4325 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Section 224 of the National Housing Act (24 U.S.C. 1715o) provides that debentures issued under the Act with respect to an insured loan or mortgage (except for debentures issued pursuant to section 221(g)(4) of the Act) will bear interest at the rate in effect on the date the commitment to insure the loan or mortgage was issued, or the date the loan or mortgage was endorsed (or initially endorsed if there are two or more endorsements) for insurance, whichever rate is higher. This provision is implemented in HUD's regulations at 24 CFR 203.405, 203.479, 207.259(e)(6) and 220.830. Each of these regulatory provisions states that the applicable rates of interest will be published twice each year as a notice in the Federal Register.

Section 224 further provides that the interest rate on these debentures will be set from time to time by the Secretary of HUD, with the approval of the Secretary of the Treasury, in an amount not in excess of the interest rate determined by the Secretary of the Treasury pursuant to a formula set out in the statute.

The Secretary of the Treasury: (1) Has determined, in accordance with the provisions of section 224, that the statutory maximum interest rate for the period beginning July 1, 1985, is 11-1/8 percent and (2) has approved the establishment of the debenture interest rate by the Secretary of HUD at 11-1/8 percent of the six-month period beginning July 1, 1985. This interest rate will be the rate borne by debentures issued with respect to any insured loan or mortgage (except for debentures issued pursuant to section 221(g)(4)) with an insurance commitment or endorsement date (as applicable) within the last six months of 1985.

For convenience of reference, HUD is publishing the following chart of debenture interest rates applicable to mortgages committed or endorsed since July 1, 1976:

	On or after	Prior to
Effective rate (percent):		
7	July 1, 1976	Jan. 1, 1977.
6¾	Jan. 1, 1977	July 1, 1977.
7¼	July 1, 1977	Jan. 1, 1978.
7½	Jan. 1, 1978	July 1, 1978.
7¾	July 1, 1978	Jan. 1, 1979.
8	Jan. 1, 1979	July 1, 1979.
8¼	July 1, 1979	Jan. 1, 1980.
9½	Jan. 1, 1980	July 1, 1980.
9¼	July 1, 1980	Jan. 1, 1981.
11¾	Jan. 1, 1981	July 1, 1981.
12⅝	July 1, 1981	Jan. 1, 1982.
12¾	Jan. 1, 1982	Jan. 1, 1983.
10¼	Jan. 1, 1983	July 1, 1983.
10⅜	July 1, 1983	Jan. 1, 1984.
11½	Jan. 1, 1984	July 1, 1984.
13⅜	July 1, 1984	Jan. 1, 1985.
11⅝	Jan. 1, 1985	July 1, 1985.
11½	July 1, 1985	

Section 221(g)(4) of the Act provides that debentures issued pursuant to that paragraph (with respect to the assignment of an insured mortgage to the Secretary) will bear interest at the "going Federal rate" in effect at the time the debentures are issued. The term "going Federal rate", as used in that paragraph, is defined to mean the interest rate that the Secretary of the Treasury determines, pursuant to a formula set out in the statute, for the six-month periods of January through June and July through December of each year. Section 221(g)(4) is implemented in the HUD regulations at 24 CFR 221.790.

The Secretary of the Treasury has determined that the interest rate to be borne by debentures issued pursuant to section 221(g)(4) during the six-month period beginning July 1, 1985, is 10-1/8 percent.

HUD expects to publish its next notice of change in debenture interest rates in January 1986.

The subject matter of this notice falls within the categorical exclusion from HUD's evnironmental clearance procedures set forth in 24 CFR 50.21(a)(15). For that reason, no environmental finding has been prepared for this notice.

(Secs. 211, 221, 224, National Housing Act, 12 U.S.C. 1715b, 17151, 1715o; sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d))

Dated: July 3, 1985.

Janet Hale,

Acting General Deputy Assistant Secretary for Housing-Deputy Federal Housing Commissioner.

BILLING CODE 4210-27-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA-6680-A2]

Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14 of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1613, will be issued to Paug-Vik Incorporated, Limited for approximately 3,657 acres. The lands involved are in the vicinity of Naknek.

Seward Meridian, Alaska

T. 17 S., R. 44 W. (Surveyed)
T. 14 S., R. 45 W. (Unsurveyed)
T. 17 S., R. 45 W. (Partially Surveyed)

A notice of the decision will be published once a week for four (4) consecutive weeks, in the Anchorage Daily News. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271-5960).

Any party claiming a property interest which is adversely affected by the decision shall have until August 15, 1985, to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Barbara A. Lange,

Section Chief, Branch of ANCSA Adjudication.

required to render a minimum deposit of

Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Principal Meridian Montana

T. 8 N., R. 7 E.,
Sec. 20, W½NW¼NW¼;
Sec. 28, W½SW¼, and SE¼SW¼.
T. 8 N., R. 7 E.,
Sec. 20, E½NW¼NW¼, and NE¼SE¼.
T. 10 N., R. 11 E.,
Sec. 21, Lots 2, 4, 5, 9, 10, and 11;
Sec. 27, Lot 6;
Sec. 28, Lot 4.
T. 9 N., R. 9 E.,
Sec. 14, SW¼NE¼.
T. 9 N., R. 10 E.,
Sec. 17, NW¼SE¼.
Aggregating 321.49 acres.

In exchange for these lands, the United States Government will acquire the surface estate in the following described land:

Principal Meridian Montana

T. 24 N., R. 8 W.,
Sec. 6, Lots 6, and 7, NW¼NE¼NE¼SW¼, and W½NE¼SW¼.
Aggregating 96.98 acres.

DATES: For a period of 45 days from the date of this notice, interested parties may submit comments to the Bureau of Land Management, at the address below. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of Interior.

FOR FURTHER INFORMATION CONTACT: Information related to this exchange, including the environmental assessment and land report is available for review at the Lewistown District Office, Airport Road, Lewistown, Montana 59457.

SUPPLEMENTARY INFORMATION: The publication of this notice segregates public lands described above from settlement, sale, location and entry under the public land laws, including the mining laws but not from exchange pursuant to section 206 of the Federal Land Policy and Management Act of 1976.

The exchange will be subject to:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States in accordance with 43 U.S.C. 945.

2. The reservation to the United States of all minerals in the lands being transferred out of Federal ownership. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove the minerals. A more detailed description of this reservation, which will be incorporated in the patent document is available for review at this BLM Office.

3. All valid existing rights (e.g. rights-of-way, easements, and leases of record).

4. A $690.00 value equalization by cash payment will be paid by the United States of America to The Nature Conservancy.

5 The exchange must meet the requirements of 43 CFR 4110.4–2(b).

This exchange is consistent with Bureau of Land Management policies and planning and has been discussed with local officials. The public interest will be served by completion of this exchange as we are acquiring key grizzly bear habitat, essential gray wolf habitat, and wintering areas for deer and bighorn sheep.

Dated: July 9, 1985.
David E. Little,
Acting District Manager.

FOR FURTHER INFORMATION CONTACT: Information related to this exchange, including the environmental assessment and land report is available for review at the Lewistown District Office, Airport Road, Lewistown, Montana 59457.

SUPPLEMENTARY INFORMATION: The publication of this notice segregates public lands described above from settlement, sale, location and entry under the public land laws, including the mining laws but not from exchange pursuant to section 206 of the Federal Land Policy and Management Act of 1976.

The exchange will be subject to:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States in accordance with 43 U.S.C. 945.

2. A reservation to the United States of all minerals in the lands being transferred out of Federal ownership. All minerals shall be reserved to the United States together with the right to prospect for, mine and remove the minerals. A more detailed description of this reservation, which will be incorporated in the patent document, is available for review at this BLM office.

3. All valid existing rights (e.g. rights-or-way, easements, and leases of record).

4. There will be a $700 value equalization by cash payment from Larry Matthews to the United States of America.

5. The exchange must meet the requirements of 43 CFR 4110.4–2(b).

6. The following right-of-way will be reserved to the United States of America—M–58703, Western Area Power Administration.

7. The exchange of these lands will be subject to all valid existing rights and reservations of record including the following rights-of-way: Public roads to Phillips County; Triangle Telephone M–2864, M–42511, M–39347; Big Flat Electric M–57527, M–1614.

This exchange is consistent with Bureau of Land Management policies and planning and has been discussed with local officials. The public interest will be served by completion of this exchange as we are acquiring wildlife values associated with riparian habitat and sagebrush and recreational uses of the land.

BILLING CODE 4310–DN–M

[OR 38477]

Realty Action; Direct Sale of Public Land in Crook County, OR

The following lands are suitable for sale under section 203 and 209 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1713 and 1719, at no less than the appraised fair market value.

Legal description	Acreage
T. 16 S., R. 16 E., Willamette Meridian:	
Sec. 13: Tract 37	.37
Sec. 24: Tract 38	15.52
Sec. 25: Tract 39	4.64
T. 16 S., R. 17 E., Willamette Meridian:	
Sec. 19: Tract 37	0.86
Total	21.39

The above described lands are hereby segregated from appropriation under the public land laws, including the mining laws, but not from sale under the above cited statute.

These (isolated) parcels are difficult and uneconomic to manage as part of the public lands and are not suitable for management by another Federal agency. No significant resource values will be affected by this disposal. The sale is consistent with BLM's planning for the land involved and the public interest will be served by offering this land for sale.

The tracts were established as a result of a dependent resurvey conducted by BLM Prineville District Office. The survey revealed discrepancies between section corners used in surveying the Prineville Lake Acres Unit I subdivision, and the original established corners.

By selling the four tracts directly to the developer, Central Oregon Sun Country, Inc., the property would automatically be incorporated into each of the affected individual lots.

Direct sale procedures are being used since a competitive sale is not appropriate. The public interest would best be served by direct sale because the four tracts are included within lots which have been sold by the developer.

The parcel identified by Serial No. OR 38477 is being offered to Central Oregon Sun Country, Inc., using direct sale procedures authorized under 43 CFR 2711.3–3. The land will be sold at fair market value to Central Oregon Sun Country, Inc., without competitive bidding. The prospective purchaser is required to render a minimum deposit of 20% of the purchase price by October 1, 1985, and the balance within 180 days of the sale date.

Terms and Conditions of the Sale

The terms, conditions, and reservations applicable to the sale are as follows:

(1) All minerals in the lands will be reserved to the United States in accordance with section 209 of the Federal Land Policy and Management Act of 1976.

(2) Rights-of-way for ditches and canals will be reserved to the United States under 43 U.S.C. 945.

(3) The patent will be issued subject to all valid existing rights and reservations of record.

(4) The sale parcels will be subject to:

(a) The rights of prior permittees or lessees to use so much of the surface of said land as is required for oil and gas operations, without compensation to the patentee for damages resulting from proper oil and gas operations for the duration of oil and gas lease OR–22582, OR–024157, OR–36405 and any authorized extension of that lease. Section 29 of the Act of February 25, 1920, 41 Stat. 449, 30 U.S.C. 186 and the Act of March 4, 1933, 47 Stat. 1570, 30 U.S.C. 124.

Further information concerning the sale including the environmental analysis and land report, is available for review at the Prineville District Office.

For a period of 45 days after the date of issuance of this notice, the public and interested parties may submit comments to the Prineville District Manager, at the above address. Any adverse comments received as a result of the Notice of Realty Action or notification to the Congressional delegation will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. (In the absence of adverse comments this realty action will become a final determination of the Department of the Interior.)

Dated: July 3, 1985.

The above described lands are hereby segregated from appropriation under the public land laws, but not from sale under the above cited statute.

The sale will be held on September 18, 1985, at the Bureau of Land Management, Prineville District Office, 185 East 4th Street, Prineville, Oregon. These isolated parcels are difficult and uneconomic to manage as part of the public lands and are not suitable for management by another Federal agency. No significant resource values will be affected by this disposal. The sale is consistent with the BLM's planning for the land involved and the public interest will be served by offering this land for sale.

Sale brochures containing pertinent data on the land offered for sale are available upon request from the District Manager at the above address.

Bidder Qualifications

Bidders must be U.S. Citizens, 18 years of age or more; a state or state instrumentality authorized to hold property; or a corporation authorized to own real estate in the state in which the land is located.

Modified Bidding Procedures

Modified bidding procedures are being used to recognize the needs and historical use of the adjoining landowners. Preference to meet the high selling bid is authorized under 43 CFR 2711.3–2.

Each parcel is being offered for sale through modified competitive bidding and the following adjoining landowners have a preference right to meet the high bid:

No.	Serial No.	Parcel
Don Johnson, OR. 38277	1	
Don Johnson, OR. 38796	2	
Don Johnson, OR. 38797	3	
Fran Cherry, OR. 38798	4	
Cole Bros., Inc., OR. 38799	5	
Cole Bros., Inc., OR. 38800	6	
Brooks Resources Corp., OR. 38800	6	
Mr. R. L. Harrison, OR. 38801	7	
Mr. Peter O. Campbell, OR. 38801	7	
Campbell Livestock Co., OR. 38801	7	
J.S. Boyer Estate, OR. 38801	7	
Mr. Dobert Edwards, OR. 38802	8	
Ms. Nancy L. Hardie, et. al., OR. 38803	9	
Mr. Earl E. Hardie, OR. 38803	9	

Sale bidding will be limited to sealed bids and must be for at least the appraised fair market value. Sealed written bids, mailed or delivered, must be received by the Bureau of Land Management, at the aforementioned address prior to 10:00 a.m., Wednesday, September 18, 1985.

A separate written bid must be submitted for each parcel. Each written sealed bid must be accompanied by a certified check, postal money order, bank draft or cashier's check made payable to Department of the Interior—BLM, for not less than 30 percent of the amount of the bid. The sealed envelope must be marked in the lower left hand corner "Bid for Public Land Sale," Sale Parcel Number——, September 18, 1985.

Bids will be opened and publicly declared at the sale. If two or more envelopes containing valid high bids of the same amount are received, the tied high bidders will be notified through certified mail to submit supplemental sealed bids within 20 days.

The designated bidders will be notified through certified mail that they have 20 days to meet the high bid. Failure to meet the high bid within the 20 days following the sale shall constitute a waiver of their preference rights. The balance of the purchase price will be due within 180 days of the sale date. Failure to pay the balance will result in forfeiture of the bid deposit and the parcel will be offered to the second highest designated bidder. If there is no other designated bidder, the parcel will be reoffered.

If the designated bidders fail to submit a bid, the sale parcel will be awarded to the party submitting the high bid.

Terms and Conditions of the Sale

1. The mineral interests being offered for conveyance have no known mineral value. A bid will also constitute an application for conveyance of the mineral estate, (with the exception of the oil, gas and coal resources which will be reserved to the United States) in accordance with Section 209 of the Federal Land Policy and Management Act 43 U.S.C. 1719. All qualified bidders must include with their bid deposit a non-refundable $50.00 filing fee for the conveyance of the mineral estate. This filing fee will be reimbursed to unsuccessful bidders.

2. Rights-of-way for ditches and canals will be reserved to the United States under 43 U.S.C. 945.

3. Patents will be issued subject to all valid existing rights and reservations of record.

4. The BLM may accept or reject any and all offers, or withdraw any land or interest in land from sale, if in the opinion of the authorized officer, consummation of the sale would not be fully consistent with the Federal Land Policy and Management Act or other applicable laws.

5. The Sale parcels will be subject to the rights of prior permittees or lessees to use so much of the surface of said land as is required for oil and gas operations, without compensation to the patentee for damages resulting from proper oil and gas operations for the duration of oil and gas leases OR.26540, 37625, 25006 and 25010 on tracts No. 3, 5, 8 and 9 respectively and any authorized extension of that lease, Section 29 of the Act of February 25, 1920, 41 Stat. 449, 30 U.S.C. 186 and the Act of March 4, 1933, 47 Stat. 1750, 30 U.S.C. 124.

Unsold Parcels

If any of the parcels identified in the notice are not sold on September 18, 1985, the parcels will be offered to the public, using competitive sale procedures 43 CFR 2711.3–1, until sold or withdrawn from the market. Sealed bids will be solicited at the BLM, Prineville District Office, during regular business hours. All bids received will be opened

the first Wednesday of each month, beginning on October 2nd, 1985. To be considered, bids must be received by 10:00 a.m. on the day of the bid opening.

Comments

For a period of 45 days after the date of issuance of this notice, the public and interested parties may submit comments to the Prineville District Manager, at the above address. Any adverse comments received as a result of the Notice of Realty Action or notification to the Congressional delegation will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. (In the absence of adverse comments this realty action will become a final determination of the Department of the Interior.) Interested parties should continue to check with the District Office to keep themselves advised of changes.

Dated: July 8, 1985.

Gerald E. Magnuson,

District Manager.

BILLING CODE 4310–33–M

Intent To Prepare a Supplement to the Draft Western Oregon Program-Management of Competing Vegetation Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare a Supplement to a Draft Environmental Impact Statement.

SUMMARY: Notice is hereby given that the Bureau of Land Mangagement (BLM) in coordination with the U.S. Forest Service, Pacific Northwest Region, will prepare a Supplement to the BLM Draft Western Oregon Program Management of Competing Vegetation Environmental Impact Statement (EIS). The purpose of this supplement is to provide the decisionmaker with more refined information on the possible effects of managing competing vegetation, particularly herbcide use, on human health. The public is invited to submit comments on the scope of the study, including suggestions as to what factors ought to be considered in the supplement.

DATE: Comments should be submitted by August 16, 1985.

ADDRESS: Comments should be sent to: State Director (935) Bureau of Land Mangagement, 825 N.E. Multnomah St. (Box 2965), Portland, Oregon 97208. Comments from the public are available for inspection at the above address during regular business hours (Monday-Friday 7:30 a.m.–4:15 p.m.).

FOR FURTHER INFORMATION CONTACT: Gregg Simmons, (503) 231–6272.

SUPPLEMENTARY INFORMATION: Several U.S. District Court judges have ruled that, in their opinion, enough scientific uncertainity about herbicides and human health exists to require a worst-case analysis (40 CFR 1502.22) be prepared. An injunction halting application of herbicides has been ordered by the Court until preparation and public review of a worst-case analysis as required by the National Environmental Policy Act Implementing Regulations.

There will be no formal public scoping meetings conducted. The Environmental Protection Agency is invited to participate in the analysis.

The worst-case analysis, as part of the programmatic Environmental Impact Statement, will be used for ascertaining risks to human health from methods of managing competing vegetation.

Dated: July 10, 1985.

Paul M. Veletrick,

Acting Oregon State Director.

BILLING CODE 4310–33–M

[U–52893]

Realty Action; Sale of Public Lands in Iron County, Utah

AGENCY: Bureau of Land Management, Interior.

ACTION: Under section 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1713) public land described as NW¼NE¼NE¼SE¼, N½NW¼NE¼SE¼,SW¼NW¼NE¼SE¼, N½NW¼SE¼,N½SW¼NW¼SE¼, SW¼SW¼NW¼SE¼, and the NW¼SE¼NW¼SE¼ of Sec. 23, T. 33 S., R. 16 W., SLB&M., Utah containing 40 acres, is proposed for direct sale to Lehi Wood at the appraised fair market value of $3,200.00. It is further proposed that public land described as the NE¼NE¼NE¼SE¼, S½NE¼NE¼SE¼, SE¼NW¼SE¼, S½NE¼SE¼, SE¼SW¼NW¼SE¼, NE¼SE¼NW¼SE¼, NE¼SE¼NW¼SE¼, S½SE¼NW¼SE¼, and the S½SE¼ of sec. 23, T. 33 S., 16W., SLB&M, Utah, containing 120 acres, be sold by competitive bidding at not less than the appraised fair market value of $9,600.00. The lands described are hereby segregated from all forms of appropriation under the public land laws, including the mining laws, pending disposition of this action.

SUMMARY: The purpose of the sale is to dispose of public land that is difficult and uneconomical to manage by a government agency.

DATES: Comments should be submitted to the address listed below by September 9, 1985. The sale will be held on September 24, 1985 at 10: a.m.

ADDRESS: Detailed information concerning the sale, including bidding procedures, is available at the Beaver River Resource Area Office, 444 South Main, Cedar City, Utah 84720 (801) 586–2458. The sale will be held at the same address.

SUPPLEMENTARY INFORMATION: The terms and conditions applicable to the sale are:

1. The sale will be for the surface estate only. Minerals will remain with the United States Government.

2. There is reserved to the United States, a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.

3. Title transfer will be subject to valid existing rights including Oil and Gas Lease U–32832 and Railroad Right-of-Way Number SL–016921.

4. If the tracts of public land are not sold pursuant to this notice, they will remain available for sale without preference on a continuing basis until sold until withdrawn from the market.

Any comments or objection received during the comment period will be evaluated and the District Manager may vacate or modify this realty action. In the absence of any objections, this realty action notice will be the final determination of the Department of the Interior.

Dated: July 5, 1985.

Morgan S. Jensen,

District Manager.

offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Venice, Louisiana.

DATE: The subject DOCD was deemed submitted on July 8, 1985.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Ms. Angie D. Gobert; Minerals Management Service; Gulf of Mexico OCS Region; Rules and Production; Plans, Platform and Pipeline Section; Exploration/Development Plans Unit; Phone (504) 838-0876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to Sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is availabe for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected states, executive of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: July 9, 1985.

John L. Rankin,

Regional Director, Gulf of Mexico OCS Region.

National Park Service

Initation of National Historic Landmark Theme Studies—Science and Constitution History

AGENCY: National Park Service; Washington Office, Interior.

ACTION: Notice of National Historic Landmark Theme Studies—Sceince and Constitutional History.

SUMMARY: This notice announces the initiation of National Historic Landmark theme studies of the history of American science and constitutional history and solicits comments on them. The purpose of the studies is to identify nationally significant properites that illustrate and commemorate these subjects. Notice of the studies is required by the National Historic Landmarks Program regulations. The History Division of the National Park Service will conduct the studies.

DATE: To be fully considered, comments should be received by the History Division on or before December 1, 1985.

ADDRESS: Written comments should be addressed to the Chief Historian, History Division, National Park Service, P.O. Box 37127, Department of the Interior, Washington, DC 20013-7127.

FOR FURTHER INFORMATION CONTACT: Mr. Ben Levy, Senior Historian, History Division, National Park Service, United States Department of the Interior, Washington, DC 20013-7127 (202-343-8164).

SUPPLEMENTARY INFORMATION: The science and invention theme study will survey a wide range of historic properties incuding public and private structures that have had a major impact on American science and invention. Examples of the types of historic resources to be examined include research facilities, laboratories, observatories, and other sites and buildings associated with this theme. Subjects to be studied may include, but are not limited to, astronomy, physics, chemistry, mathematics, geology, paleontology, and biology.

The constitutional history theme study will include a similarly wide range of historic properties, such as court buildings where significant cases were decided and the homes of jurists and litigants whose activities have been crucial in the evolution of the Constitution. The study will also consider sites that commemorate the ratification of the Constitution and the adoption of its Amendments.

The History Division welcomes comments concerning the theme studies and suggestions of properties to be included.

Dated: June 28, 1985.

Bennie C. Keel,

Acting Associate Director, Cultural Resources.

BILLING CODE 4310-70-M

Upper Delaware National Scenic and Recreational River; Meeting

AGENCY: National Park Service; Upper Delaware Citizens Advisory Council.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the date of the forthcoming meeting of the Upper Delaware Citizens Advisory Council. Notice of this meeting is required under the Federal Advisory Committee Act.

DATE: July 26, 1985, 7:00 p.m.

ADDRESS: Town of Tusten, Narrowsburg, New York.

FOR FURTHER INFORMATION CONTACT: John T. Hutzky, Superintendent, Upper Delaware National Scenic and Recreational River, Drawer C, Narrowsburg, N.Y. 12764-0159, (717) 729-7135.

SUPPLEMENTARY INFORMATION: The Advisory Council was established under section 704(f) of the National Parks and Recreation Act of 1978, Pub. L. 95-625, 16 U.S.C. 1274 note, to encourage maximum public involvement in the development and implementation of the plans and programs authorized by the Act. The Council is to meet and report to the Delaware River Basin Commission, the Secretary of the Interior, and the Governors of New York and Pennsylvania in the preparation of a management plan and on programs which relate to land and water use in the Upper Delaware region. The agenda for the meeting will include items regarding continuance of discussion of requirements for a river management plan. The meeting will be open to the public. Any member of the public may file with the Council a written statement concerning agenda items. The statement should be addressed to the Council c/o Upper Delaware National Scenic and Recreational River, Drawer C. Narrowsburg, N.Y. 12764-0159. Minutes of meeting will be available for inspection four weeks after the meeting at the permanent headquarters of the Upper Delaware National and Recreational River, River Road, 1¾ miles north of Narrowsburg, N.Y., Damascus Township, Pennsylvania.

Dated: July 8, 1985.

James W. Coleman, Jr.,

Regional Director, Mid-Atlantic Region.

BILLING CODE 4310-70-M

Upper Delaware National Scenic and Recreational River; Preparation of a River Management Plan and Draft Environmental Impact Statement

AGENCY: National Park Service, Interior.

ACTION: Notice of intent to perpare an environmental impact statement for a proposed river management plan which has been prepared by the Conference of Upper Delaware Townships, in cooperation with the States of New York and Pennsylvania, the Delaware River Basin Commission, county governments and the National Park Service; and to request public comments.

SUMMARY: An environmental impact statement (EIS) is to be prepared for a proposed River Management Plan for the Upper Delaware National Scenic and Recreational River (UPDE), Mid-Atlantic Region, National Park Service. The proposed RMP/draft EIS will be released for a 90-day public comment period with two public hearings in each affected state.

FOR FURTHER INFORMATION CONTACT: Joseph DiBello, Project Leader, or J. Glenn Eugster, Chief, Division of Park and Resource Planning, Mid-Atlantic Regional Office, National Park Service, 600 Arch Street, Room 9428, Philadephia, PA 19106, (215) 597-7386.

SUPPLEMENTARY INFORMATION: The RMP/EIS will be prepared pursuant to the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500 et al.); the Wild and Scenic Rivers Act (Pub. L. 90-542 as amended), and the Upper Delaware Special Provisions of the Wild and Scenic Rivers Act, section 704(b); the Final Revised Guidelines for Eligibility, Classification and Management of River Areas (Federal Register Vol. 47, No. 173/Tuesday, September 7, 1982/Notices); and Department of the Interior and National Park Service guidelines.

The Upper Delaware River was one of twenty-seven rivers designated for study under the Wild and Scenic Rivers Act and included in the National Wild and Scenic Rivers System by the National Parks and Recreation Act of 1978 (Pub. L. 95-625). Special provisions specify that the RMP include (a) a map showing detailed final landward boundaries and upper and lower termini; (b) a program for management of existing and future land and water use including the application of available management techniques; (c) an analysis of the economic and environmental costs and benefits of implementing the RMP; (d) a program providing for coordinated implementation and administration of the plan; and (e) other such recommendations or provisions as appropriate.

A previous Draft EIS/RMP was completed in October 1982 (DES 82-64)

1985
UMI

A previous Draft EIS/RMP was completed in October 1982 (DES 82–64) and a Revised Draft River Management Plan was issued in October 1983. Considerable controversy upon release of the documents led to a decision by the National Park Service that a new RMP was needed for this project, to be prepared by the Conference of Upper Delaware Townships in cooperation with the riparian landowners, the State of New York, the Commonwealth of Pennsylvania, the Delaware River Basin Commission, county governments, NPS, and citizen's groups. Because of this, the 1983 RMP and the Draft EIS (DES 82–64) of October 1982 will be superceded by this planning effort.

A new draft EIS will be prepared by NPS. The draft EIS will address the proposed RMP as well as other reasonable alternatives developed through the scoping process described below. Alternatives in the draft EIS are likely to deal with river corridor resources, recreational use, public recreation facility development, and the overall management responsibilities for the river corridor.

This notice is intended to inform the public of the planning effort, and to solicit participation and input on the scope of issues and alternatives to be covered in the EIS. NPS invites participation and consultation by federal and state agencies, local governments, riparian landowners, individuals and private groups that have special expertise, legal jurisdiction, or interest in the preparation of the EIS. Meetings will be scheduled with the Council of Upper Delaware Townships, the Citizen Advisory Council, and others to discuss the scope of the issues and alternatives to be addressed in the draft EIS. The times and locations of these meetings will be announced in area newspapers. Notice will also be mailed to any person requesting to be placed on a mailing list currently being prepared (contact Joseph DiBello, (215) 597–7386). All members of the Conference of Upper Delaware Townships, Citizens Advisory Council, the Plan Oversight Committee and the Land and Water Use Guidelines Committees will automatically be placed on the mailing list.

Don H. Castleberry,

Acting Regional Director, Mid-Atlantic Region.

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–125 (Sub-7X)]

Rail Carriers; Carolina and Northwestern Railway Co.—Abandonment Exemption at Belhaven, NC

AGENCY: Interstate Commerce Commission.

ACTION: Notice of exemption.

SUMMARY: The Interstate Commerce Commission exempt from the requirements of 49 U.S.C. 10903, *et seq.*, the abandonment by Carolina and Northwestern Railway Company of approximately 0.03 miles of railroad at Belhaven, NC, subject to employee protective conditions.

DATES: This exemption will be effective on August 15, 1985. Petitions to stay must be filed by July 26, 1985, and petitions for reconsideration must be filed by August 5, 1985.

ADDRESSES: Send pleadings referring to Docket No. AB–125 (Sub-No. 7X) to:

(1) Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423

(2) Petitioner's representative: Nancy S. Fleischman, Norfolk Southern Corporation, 1050 Connecticut Avenue, NW, Suite 740, Washington, DC 20036

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289–4357 (DC Metropolitan area) or toll free (800) 424–5403.

Decided: July 8, 1985.

By the Commission, Chairman Taylor, Vice Chairman Gradison, Commissioners Sterrett, Andre, Simmons, Lamboley, and Strenio.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 30692]

Rail Carriers; Grand Trunk Western Railroad Co.; Trackage Rights; Consolidated Rail Corp.

Consolidated Rail Corporation has agreed to grant and to renew its prior grant of bridge ("overhead") trackage rights to Grand Trunk Western Railroad Company between Detroit and Ecorse, Michigan, on the one hand, and on the other, a point on the International Boundary line between the United States and Canada, at or near the middle of the Detroit River. The trackage rights became effective April 29, 1985.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction.

Dated: July 9, 1985.

By the Commission, Heber P. Hardy, Director Office of Proceedings.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decrees Pursuant to Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that three proposed consent decrees with Conoco, Inc., Vista Chemical Company and Vista Polymers, Inc., were lodged in the respective United States District Courts. A proposed consent decree in *United States* v. *Conoco, Inc.*, Civil Action No. 83–1918 was lodged on July 9, 1985, with the United States District Court for the Western District of Oklahoma; a proposed Consent Decree in *United States* v. *Conoco, Inc.*, Civil Action No. 83–2518 was lodged on July 3, 1985, with the United States District Court for the Western District of Louisiana; and a third consent decree in *United States* v. *Conoco, Inc.*, Civil Action No. EC–37–LS–P was lodged on July 3, 1985, with the United States District Court for the Northern District of Mississippi. The three complaints filed by the United States alleged that Conoco, Inc., violated the National Emission Standard ("NESHAP") for Vinyl Chloride at its polyvinyl chloride plants in Aberdeen, Mississippi, and Oklahoma City, Oklahoma and its ethylene dichloride/vinyl chloride plant in Westlake, Louisiana. The complaints against the Louisiana and Mississippi facilities sought injunctive relief requiring Conoco, Vista Chemical Company and Vista Polymers, Inc., to comply with the NESHAP for Vinyl Chloride and to implement a program to prevent discharges of vinyl chloride to the atmosphere. All three of the complaints sought civil penalties against Conoco, Inc. for past violations. The proposed Consent Decrees require compliance with the NESHAP for Vinyl Chloride, Submission of a compliance plan, stipulated penalties, and civil penalties for past violations.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Conoco, Inc.*, with the applicable D.J. Reference No. 90–5–2–1–309 (N.D. Miss.); 90–5–2–1–622 (W.D. La.); and 90–5–2–1–614 (W.D. Okla.).

The proposed Consent Decree in *United States* v. *Conoco*, (W.D. Okla.) may be examined at the Office of United States Attorney, Room 4434, U.S. Courthouse and Federal Office Building, Oklahoma City, Oklahoma 73102. The proposed Consent Decree in *United States* v. *Conoco*, (W.D. La.) may be examined at the Office of the United States Attorney, Room 3B12, Federal Building, 500 Fannin Street, Shreveport, Louisiana 71101. Both of these proposed Consent Decrees may also be examined at the Region VI Office of the Environmental Protection Agency, Office of Regional Counsel, interfirst Two Building, 1201 Elm Street, Dallas, Texas 75270. The proposed consent decree in *United States* v. *Conoco*, (N.D. Miss.) may be examined at the Office of United States Attorney, Room 255, Federal Building, 911 West Jackson Avenue, Oxford, Mississippi 38655, and at the Region IV Office of the Environmental Protection Agency, Office of Regional Counsel, 345 Courtland Street, NE., Atlanta, Georgia 30365. Copies of the three Consent Decrees may be examined at the Department of Justice, Land and Natural Resources Division, Environmental Enforcement Section, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of each proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.30 for the Western District of Oklahoma Decree; $1.60 for the Western District of Louisisna; and $1.80 for the Northern District of Mississippi Decree (ten cents per page reproduction costs) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

FR Doc. 85–16856 Filed 7–15–85; 8:45 am]

BILLING CODE 4410-01-M

Drug Enforcement Administration

Controlled Substances; Proposed Revised 1985 Aggregate Production Quota for Phencyclidine

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of a proposed revised 1985 aggregate production quota for phencyclidine.

SUMMARY: This notice proposes a revision in the aggregate production quota for phencyclidine, a Schedule II controlled substance, which will be used to produce a diagnostic product for drug screening.

DATE: Comments or objections should be received on or before August 15, 1985.

ADDRESS: Send comments or objections in quintuplicate to the Acting Administrator, Drug Enforcement Administration, 1405 I Street, NW., Washington, D.C. 20537, Attn: DEA Federal Register Representative.

FOR FURTHER INFORMATION CONTACT: Howard McClain Jr., Chief, Drug Control Section, Drug Enforcement Administration, Washington, D.C. 20537, Telephone: (202) 633–1366.

SUPPLEMENTARY INFORMATION: Section 306 of the Controlled Substances Act (21 U.S.C. 826) requires that the Attorney General establish aggregate production quotas for all controlled substances listed in Schedules I and II. This responsibility has been delegated to the Acting Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations.

Recently, an application for a manufacturing quota for phencyclidine was received by the Drug Enforcement Administration. The amount of substance requested is to be used to produce a diagnostic product for use in drug screening.

The Acting Administrator of the Drug Enforcement Administration, under the authority vested in the Attorney General by section 306 of the Controlled Substances Act of 1970 (21 U.S.C. 826) and delegated to the Acting Administrator by § 0.100 of Title 28 of the Code of Federal Regulations, hereby proposes the following change in the aggregate production quota for phencyclidine, expressed in grams of anhydrous base:

Basic class	Previously established 1985 aggregate production quota	Proposed revised 1985 aggregate production quota
Phencyclidine	100	120

All interested persons are invited to submit their comments and objections in writing regarding this proposal. Comments and objections should be submitted in quintuplicate to the Acting Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative, and must be received by August 15, 1985. If a person believes that one or more issues raised by him warrant a hearing, he should so state and summarize the reasons for his belief.

In the event that comments or objections to this proposal raise one or more issues which the Acting Administrator finds warrant a hearing, the Acting Administrator shall order a public hearing by a notice in the **Federal Register**, summarizing the issues to be heard and setting the time for the hearing.

Pursuant to sections (3)(c)(3) and 3(e)(2)(B) of Executive Order 12291, the Director of the Office of Management and Budget has been consulted with respect to these proceedings.

The Acting Administrator hereby certifies that this matter will have no significant impact upon small entities within the meaning and intent of the Regulatory Flexibility Act, 5 U.S.C. 601, et seq. The establishment of annual aggregate production quotas for Schedules I and II controlled substances is mandated by law and by international commitments of the United States. Such quotas impact predominantly upon major manfuacturers of the affected controlled substances.

Dated: June 17, 1985.

John C. Lawn,

Acting Administrator, Drug Enforcement Administration.

[FR Doc. 85–16838 Filed 7–15–85; 8:45 am]

BILLING CODE 4410-09-M

Controlled Substances; Proposed 1985 Aggregate Production Quota for 1-Piperidinocyclohexanecarbonitrile

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of a proposed 1985 aggregate production quota.

Representative, and must be received by August 15, 1985. If a person believes that any particular revision they are interested in.

Signed at Washington, D.C., this 11th day of July 1985.

the Assistant Secretary for Veterans' Employment and Training

Special Solicitation for Grant

ACTION: Notice of a proposed 1985 aggregate production quota.

SUMMARY: This notice proposes a 1985 aggregate production quota for 1-piperidinocyclohexanecarbonitrile, a Schedule II controlled substance and an immediate precursor to phencyclidine.

DATE: Comments or objections should be received on or before August 15, 1985.

ADDRESS: Send comments or objections in quintuplicate to the Acting Administrator, Drug Enforcement Administration, 1405 I Street, NW., Washington, D.C. 20537, Attn: DEA Federal Register Representative.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, Washington, DC 20537, Telephone: (202) 633–1366.

SUPPLEMENTARY INFORMATION: Section 306 of the Controlled Substances Act (21 U.S.C. 826) requires that the Attorney General establish aggregate production quotas for all controlled substances listed in Schedules I and II. This responsibility has been delegated to the Acting Administrator of the Drug Enforcement Administration by § 0.100 of Title 28 of the Code of Federal Regulations.

Recently, application has been made for a manufacturing quota for 1-piperidinocyclohexanecarbonitrile, a Schedule II substance. This substance is to be manufactured for use as a precursor in the synthesis of phencyclidine.

The Acting Administrator of the Drug Enforcement Administration, under the authority vested in the Attorney General by section 306 of the Controlled Substances Act of 1970 (21 U.S.C. 826) and delegated to the Acting Administrator by § 0.100 of Title 28 of the Code of Federal Regulations, hereby proposes the 1985 aggregate production quota for 1-piperidinocyclohexanecarbonitrile, expressed in grams of anhydrous base.

Basic class	Proposed 1985 aggregate production quota (grams)
1-piperidinocyclohexanecarbonitrile	32

All interested persons are invited to submit their comments and objections in writing regarding this proposal. Comments and objections should be submitted in quintuplicate to the Acting Admininstrator, Drug Enforcement Administration, United States Department of Justice, Washington, DC 20537, Attention: DEA Federal Register Representative, and must be received by August 15, 1985. If a person believes that one or more issues raised by him warrant a hearing, he should so state and summarize the reasons for his belief.

In the event that comments or objections to this proposal raise one or more issues which the Acting Administrator finds warrant a hearing, the Acting Administrator shall order a public hearing by a notice in the **Federal Register**, summarizing the issues to be heard and setting the time for the hearing.

Pursuant to sections (3)(c)(3) and 3(e)(2)(B) of Executive Order 12291, the Director of the Ofice of Management and Budget has been consulted with respect to these proceedings.

The Acting Administrator hereby certifies that this matter will have no significant impact upon small entities within the meaning and intent of the Regultory Flexibility Act, 5 U.S.C. 601, et seq. The establishment of annual aggregate production quotas for Schedules I and II controlled substances is mandated by law and by international commitments of the United States. Such quotas impact predominantly upon major manufacturers of the affected controlled substances.

Dated: June 17, 1985.

John C. Lawn,

Acting Administrator, Drug Enforcement Administration.

BILLING CODE 4410–09–M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in.

Each entry will contain the following information:

The Agency of the Department issuing this form.

The title of the form.

The OMB and Agency form numbers, if applicable.

How often the form must be filled out.

Who will be required to or asked to report.

Whether small businesses or organizations are affected.

An estimate of the number of responses.

An estimate of the total number of hours needed to fill out the form.

The number of forms in the request for approval.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202–523–6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, N.W., Room S–5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Nancy Wentzler, Telephone 202–395–6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

REVISION

Bureau of Labor Statistics

Employee Benefits Survey

1220–0064; BLS 3111

Annually

Businesses or other for-profit; Non-profit institutions

1,500 responses; 2,250 hours; 1 form

The Employee Benefits Survey is the only statistically valid source of information on detailed provisions of employee benefits. It is used to determine policy affecting benefits of all workers; also by private sector in benefits administration, union negotiations, and research.

Signed at Washington, D.C., this 11th day of July 1985.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODE 4510–24–M

[Secretary of Labor's Order 2–85]

Delegation of Authority and Assignment of Responsibility to the Assistant Secretary for Employment and Training for the Job Training Partnership Act

June 18, 1985.

1. Purpose

This Order amplifies the delegation of authority vested in the Secretary of Labor to the Assistant Secretary for Employment and Training for organizing and conducting programs under the Job Training Partnership Act (Pub. L. 97–300) and assigns commensurate responsibilities to other officials in the Department.

2. Directives Affected

Section 4a. of Secretary's Order (S.O.) 4–75, which remains in effect and is amplified and supplemented by this Order, is the general delegation and assignment of responsibility to the Assistant Secretary for Employment and Training for carrying out the employment and training policies, programs, and activities of the Secretary of Labor. S.O. 4–75 will be updated to reflect the provisions of this Order.

3. Background

This Order consolidates into one Order authority and responsibilities under the Job Training Partnership Act. Except as provided herein, general authority and responsibilities for programs under the Job Training Partnership Act are delegated and assigned to the Assistant Secretary for Employment and Training.

4. Delegation of Authority and Assignment of Responsibilities

a. *The Assistant Secretary for Employment and Training* is hereby delegated authority and assigned responsibility, vested in the Secretary of Labor, for carrying out the policies, programs, and activities under the Job Training Partnership Act, except:

(1) Section 436(b) (29 U.S.C. 1706(b)), relating to claims for damages to persons resulting from the operation of the Job Corps, which is the responsibility of the Solicitor of Labor.

(2) Part C of Title IV (29 U.S.C. 1721 et seq.), relating to veterans' employment programs, which is the responsibility of the Assistant Secretary for Veterans' Employment and Training.

(3) Sections 461 and 462 (20 U.S.C. 1751 and 1752), relating to the comprehensive system of labor market information and the cooperative labor market information program, respectively, to the extent that those duties are delegated to the Commissioner of Labor Statistics.

(4) Sections 463 and 464 (U.S.C. 1753 and 1754), relating to special Federal responsibilities and to duties of the National Occupational Information Coordinating Committee, respectively, (however the Assistant Secretary for Employment and Training retains authority as a member of the National Occupational Information Coordinating Committee, pursuant to the Vocational Education Act of 1963 (20 U.S.C. 2391), as amended by the Carl D. Perkins Vocational Education Act of 1984.

(5) Part F of Title IV (29 U.S.C. 1771 et seq.), relating to the National Commission for Employment Policy.

(8) Part G of Title IV (29 U.S.C. 1781), relating to training programs to assist Federal contractors in meeting affirmative action obligations, which is the responsibility of the Deputy Under Secretary for Employment Standards.

(7) Section 167 (29 U.S.C. 1577), relating to enforcement of equal opportunity and nondiscrimination requirements in programs and activities undertaken pursuant to the Job Training Partnership Act, which is the responsibility of the Assistant Secretary for Administration and Management working through the Director, Office of Civil Rights, as delegated in Secretary's Order 2–81 and provided for at 20 CFR (626.2).

(8) The adjudicatory authority contained in section 166 (29 U.S.C. 1576) is reserved to the Secretary.

b. *The Solicitor of Labor,* in addition to 4a.(1) above, shall have responsibility for providing legal advice and assistance to all officers of the Department relating to the delegation of authority and assignment of responsibilities referenced, and applicable laws, Executive orders, and regulations pertaining thereto.

5. Redelegation of Authority

The authority delegated and responsibilities herein assigned may be further redelegated and reassigned.

6. Effective Date

This Order is effective immediately.

William E. Block,

Secretary of Labor.

BILLING CODE 4510–23–M

Special Solicitation for Grant Application; Job Training Partnership Act, Title IV, Part C, Program Year 1985

AGENCY: Office of the Assistant Secretary for Veterans' Employment and Training, Labor.

ACTION: Notice.

SUMMARY: This notice sets forth the procedures and schedule for the special Solicitation for Grant Application (SGA) for the operation of veterans' employment and training programs in the State of Alaska in accordance with Title IV, Part C of the Job Training Partnership Act (JTPA). The regulations at 20 CFR Part 635 provide guidance for the development and administration of programs authorized under this part.

DATE: The SGA is available for issuance as of the date of this notice.

The closing date for receipt of grant applications in response to the SGA is August 16, 1985.

ADDRESS: A copy of the SGA may be obtained by written request only, including two self-addressed mail labels, to the following address: U.S. Department of Labor, Office of Procurement Service, Frances Perkins Building, Room S–5526, 200 Constitution Avenue NW., Washington, D.C. 20210, RE. SGA-VI-C.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph Juarez, Office of the Assistant Secretary for Veterans' Employment and Training, 200 Constitution Avenue NW., Room S1316, Washington, D.C. 20210, Telephone (202) 523–9110, or the State Director for Veterans' Employment and Training Service.

SUPPLEMENTARY INFORMATION: On March 1, 1985, the Office of the Assistant Secretary for Veterans' Employment and Training, U.S. Department of Labor, issued SGA #4 for the Job Training Partnership Act Title IV, Part C, Program Year 1985. This part provides for programs to meet the employment and training needs of service-connected disabled veterans, veterans of the Vietnam era, and veterans who are recently separated from military service. Notice of the issuance was published in the **Federal Register** on March 12, 1985.

The March 1, 1985 SGA limited eligible applicants to (1) State Governors utilizing the JTPA administrative entity in each State and (2) service delivery area administrative entities as described in section 101 and 103 of JTPA including single statewide service delivery areas. The SGA also stated that if in any State no eligible

applicant applied for funds, the

Dated: July 9, 1985.

Program: This meeting will review

16. Date: August 15, 1985.

VOL 50 ISS 136 JL 16 1985 UMI

applicant applied for funds, the difinition of eligible applicant would be broadened in those states and a special solicitation would be issued to provide service to targeted veterans in those states.

On May 10, 1985, a notice was published in the **Federal Register** soliciting applications in five states in which no eligible applicant applied for funds. A June 21, 1985 due date for applications was established. In response to that notice, applications were received from of the five States. No application was received from the state of Alaska.

Accordingly, the Assistant Secretary for Veterans' Employment and Training announces the availability of funds to implement programs as follows:

State	Amount available
Alaska	$55,000

Applications for funds based on the SGA will be accepted from public agencies; community-based organizations; units of local and State government; Indian tribes, bands, or groups on Federal or State reservations; Alaskan Native entities; educational institutions; and private for profit and nonprofit organizations. Each applicant, as of the date of this notice and at the time of application, must be geographically located in the State of Alaska. Further, each applicant must demonstrate that it possesses the requisite understanding and capabilities to conduct an effective program for targeted veterans.

Applications for funds must be received by the State Director for Veterans' Employment and Training Service (SDVETS) not later than 4:30 p.m., at the SDVETS' address cited below on August 16, 1985: SDVETS Burton Finley, Veterans' Employment and Training Service, U.S. Department of Labor, P.O. Box 3–7000, Juneau, Alaska 99802, (907) 465–2723.

It is anticipated that grant awards will be made by November 30, 1985.

Consultation and technical assistance relative to the development of an application under the SGA is available upon request from the State Director for Veterans' Employment and Training.

Signed at Washington, D.C., this 10th day of July 1985.

Donald E. Shasteen,

Assistant Secretary for Veterans' Employment and Training.

BILLING CODE 4510-79-M

Employment and Training Administration

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period July 1, 1985–July 5, 1985.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W–15,924; Tennford Weaving Co., Wartburg, TN

TA–W–15,880; Avondale Mills, Lafayette, AL

TA–W–15,870; Thomaston Mills, Griffin Div., Griffin, GA

TA–W–15,871; Thomaston Mills, Thomaston, GA

TA–W–15,874; Century Brass Products, Inc., Waterbury, CT

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA–W–15,798; Hoffmann-LaRoche, Inc., Nutley, NJ

Aggregate U.S. imports of pharmaceuticals and vitamins are negligible.

TA–W–15,799; Hoffmann-La Roche, Inc., Belvedere, NJ

Aggregate U.S. imports of pharmaceuticals and vitamins are negligible.

Affirmative Determinations

TA–W–15,930; Arno Moccasin, Lewiston, ME

A certification was issued covering all workers of the firm separated on or after May 1, 1984 and before April 15, 1985.

TA–W–15,923; Stride Rite, Presque Isle, ME

A certification was issued covering all workers of the firm separated on or after April 5, 1984 and before September 1, 1984.

TA–W–15,894; General Electric, Cathode Roy Tube, Syracuse, NY

A certification was issued covering all workers of the firm separated on or after March 25, 1984.

TA–W–15,888; Snappy Garment, East Newark, NJ

A certification was issued covering all workers of the firm separated on or after March 6, 1984 and before December 19, 1984.

TA–W–15,873; Albion Cooperative, Albion, NY

A certification was issued covering all workers of the firm separated on or after August 15, 1984 and before February 24, 1985.

TA–W–15,875; Cotter Corporation, Uranium Mill, Canon City, CO

A certification was issued covering all workers of the firm separated on or after February 21, 1984.

TA–W–15,879; Cotter Corporation Schwartz Walder Mine, Golden, CO

A certification was issued covering all workers of the firm separated on or after February 21, 1984.

TA–W–15,805; SKF Industries, Inc., Altoona, PA

A certification was issued covering all workers of the firm separated on or after January 1, 1985.

TA–W–15,802; Jumping-Jacks Shoes, Inc., Monett #2, Monett, MO

A certification was issued covering all workers of the firm separated on or after June 15, 1984 and before June 19, 1985.

TA–W–15,817; Margaret Fashions, Act II Div. of Jonathan Logan, Inc., Panama City, FL

A certification was issued covering all workers of the firm separated on or after January 1, 1985 and before April 30, 1985.

I hereby certify that the aforementioned determinations were issued during the period July 1, 1985–July 5, 1985. Copies these determinations are available for inspection in Room 6434, U.S. Department of Labor, 601 D Streets, NW., Washington, D.C. during normal business hours or will be mailed to persons who write to the above address.

Dated: July 9, 1985.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Humanities Panel Meetings

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, as amended) of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, DC 20506:

1. Date: August 1, 1985.
Time: 9:00 a.m. to 5:00 p.m.
Room: 315.
Program: This meeting will review applications submitted for the "Constitutional Fellowship (Independent Study & Research)" program, for projects beginning after January 1, 1986.

2. Date: August 2, 1985.
Time: 9:00 a.m. to 5:00 p.m.
Room: 316–2.
Program: This meeting will review applications submitted for the "Constitutional Fellowship (College Teachers)" program, for projects beginning after January 1, 1986.

3. Date: August 1–2, 1985.
Time: 8:30 a.m. to 5:00 p.m.
Room: M–14.
Program: This meeting will review applications submitted for the "Humanities Instruction in Elementary and Secondary Schools" programs, for projects beginning after January 1, 1986.

4. Date: August 5–6, 1985.
Time: 8:30 a.m. to 5:00 p.m.
Room: M–14
Program: This meeting will review applications submitted for the "Humanities Instruction in Elementary and Secondary Schools" programs, for projects beginning after January 1, 1986.

5. Date: August 2, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in European History, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

6. Date: August 4, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 316–2.
Program: This meeting will review Fellowships for College Teachers applications in Religious Studies, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

7. Date: August 5, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 316–2.
Program: This meeting will review Fellowships for College Teachers applications in Art and Music, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

8. Date: August 5, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in Music, Dance, and Theatre, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

9. Date: August 6, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in American Literature and American studies, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

10. Date: August 7, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in Philosophy, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

11. Date: August 11, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 316–2.
Program: This meeting will review Fellowships for College Teachers applications in Foreign Languages and Literature, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

12. Date: August 12, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in American History I and History of Education, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

13. Date: August 13, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 316–2.
Program: This meeting will review Fellowships for College Teachers applications in American History, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

14. Date: August 13, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in American History II and Film History, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

15. Date: August 14, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in Art History, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

16. Date: August 15, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 316–2.
Program: This meeting will review Fellowships for College Teachers applications in Political Science, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

17. Date: August 15, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in Social Sciences, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

18. Date: August 16, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in Romance and Classical Languages and Literature, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

19. Date: August 18, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 316–2.
Program: This meeting will review Fellowships for College Teachers applications in World History, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

20. Date: August 19, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in Latin American and Non-Western History, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

21. Date: August 20, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 316–2.
Program: This meeting will review Fellowships for College Teachers applications in Philosophy, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

22. Date: August 20, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in Religious Studies, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

23. Date: August 21, 1985.
Time: 8:30 a.m. to 5:30 p.m.
Room: 315.
Program: This meeting will review Fellowships for Independent Study and Research applications in Germanic, Oriental, and Slavic Languages and Literature, submitted to the Division of Fellowships and Seminars, for projects beginning after January 1, 1986.

24. Date: August 22, 1985.

Room: 430.

Program: This meeting will review Challenge Grants applications from MA/PhD. Universities, for projects beginning after December 1, 1985.
36. Date: August 15–16, 1985.
Time: 9:00 a.m. to 5:00 p.m.
Room: 430.

Program: This meeting will review Challenge Grants applications from Large Museums, for projects beginning December 1, 1985.

The proposed meetings are for the purpose of Panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, D.C. 20506, or call (202) 786–0322.

Stephen J. McCleary,
Advisory Committee Management Officer.

BILLING CODE 7536-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Subcommittee on Emergency Core Cooling Systems; Meeting

The ACRS Subcommittee on Emergency Core Cooling Systems will hold a meeting on July 31, 1985, Room 1046, at 1717 H Street, NW., Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, July 31, 1985—8:30 a.m. until the conclusion of business

The Subcommittee will: continue the review of the proposed revision to Appendix K of 10 CFR 50.46; discuss implementation of the GE Appendix K analysis effort; discuss RCP trip issue resolution; and discuss NRR's ECCS-related issues of ongoing concern.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Paul Boehnert (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: July 10, 1985.
Morton W. Libarkin,
Assistant Executive Director for Project Review.

[FR Doc. 85–16887 Filed 7–15–85; 8:45 am]
BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards Subcommittee on Class 9 Accidents; Meeting

The ACRS Subcommittee on Class 9 Accidents will hold a meeting on August 1, 1985, Room 1046, 1717 H Street, NW., Washington, DC.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Thursday, August 1, 1985—8:30 a.m. until the conclusion of business

The Subcommittee will continue its discussion of the draft NUREG–0956, "Source Term Reassessment" with the NRC Staff.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Dr. Richard Savio (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: July 10, 1985.
Morton W. Libarkin,
Assistant Executive Director for Project Review.

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards Subcommittee on Class 9 Accidents; Meeting

The ACRS Subcommittee on Class 9 Accidents will hold a meeting on August 2, 1985, Room 1046, 1717 H Street, NW, Washington, DC.

The entire meeting will be open to the public attendance.

The agenda for the subject meeting shall be as follows:

Friday, August 2, 1985—8:30 a.m. until the conclusion of business

The Subcommittee will discuss with the NRC and IDCOR the status of programs related to extending the results of the reference plants and how this relates to the ACRS recommended search for outliers program.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Dr. Richard Savio (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Dated: July 10, 1985.
Morton W. Libarkin,
Assistant Executive Director for Project Review.

[FR Doc. 85–16889 Filed 7–15–85; 8:45 am]
BILLING CODE 7590-01-M

[Docket No. 50–261]

Carolina Power and Light Co., (H. B. Robinson Steam Electric Plant Unit No. 2); Order Modifying License Confirming Additional Licensee Commitments on Emergency Response Capability

I

Carolina Power and Light Company (CP&L), (the licensee) is the holder of Facility Operating License No. DPR–23 which authorizes the operation of the H. B. Robinson Steam Electric Plant Unit No. 2 (the facility) at steady-state power levels not in excess of 2300 megawatts thermal. The facility is a pressurized water reactor (PWR) located in Darlington County, South Carolina.

II

Following the accident at Three Mile Island Unit No. 2 (TMI–2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities and significant upgrading of emergency response capability based on the experience from the accident at TMI–2 and the official studies and investigations of the accident. The requirements are set forth in NUREG–0737, "Clarification of TMI Action Plan Requirements," and in Supplement 1 to NUREG–0737, "Requirements for Emergency Response Capability." Among these requirements are a number of items consisting of emergency response facility operability, emergency procedure implementation, addition of instrumentation, possible control room design modification, and specific information to be submitted.

On December 17, 1982, a letter (Generic Letter 82–33) was sent to all licensees of operating reactors, applicants for operating licenses, and holders of construction permits enclosing Supplement 1 to NUREG–0737. In this letter operating reactor licensees

and holders of construction permits were requested to furnish the following

The attached Table summarizing CP&L's schedular commitments for the

submittals noted in section IV herein no later than the dates in the Attachment.

of 10 CFR Part 50, Appendix R, Section III.G, fire protection of the equipment

defined in 10 CFR Part 20. It does not affect nonradiological plant effluents

II

and holders of construction permits were requested to furnish the following information, pursuant to 10 CFR 50.54(f), no later than April 15, 1983:

(1) A proposed schedule for completing each of the basic requirements for the items identified in Supplement 1 to NUREG–0737, and

(2) A description of plans for phase implemenatation and integration of emergency response activities including training.

III

CP&L responded to Generic Letter 82–33 by letter dated April 15, 1983. By letter dated August 24, 1983, CP&L modified several dates as a result of negotiations with the NRC staff. CP&L made commitments to supply schedules and plans (items (1) and (2) of Section II above) by December 1984. On February 21, 1984, the NRC issued "Order Confirming Licensee's Commitments on Emergency Response Capability" which confirmed CP&L's Commitments. By letter dated December 31, 1984, CP&L made commitments to complete the basic requirements. CP&L commitments include (1) dates for providing required submittals to the NRC, (2) dates for implementing certain requirements, and (3) a schedule for providing implementation dates for other requirements.

IV

The February 21, 1984, Order stated that for those requirements for which CP&L committed to a schedule for providing implementation dates, those dates would be reviewed, negotiated and confirmed by a subsequent order. In conformance with the milestones in the February 21, 1984 Order, as implemented by CP&L letter dated December 31, 1984, CP&L provided completion schedules for the following requirements:

1. Safety Parameter Display System (SPDS).

1b. SPDS fully operational and operators trained.

2. Detailed Control Room Design Review (DCRDR).

2b. Submit a summary report to the NRC including a proposed schedule for implementation.

3. Regulatory Guide 1.97 Application to Emergency Response Facility.

3b. Implement (installation or upgrade) requirements.

5. Emergency Response Facilities.

5a. Technical Support Center fully functional.

5b. Operational Support Center fully functional.

5c. Emergency Operations Facility fully functional.

The attached Table summarizing CP&L's schedular commitments for the above items was developed by the NRC staff from the information provided by CP&L. The staff reviewed CP&L's August 24, 1984 and December 31, 1984 letters and discussed the dates with the licensee.

The NRC staff finds that these dates are reasonable and achievable dates for meeting the Commission requirements. the NRC staff concludes that the schedule proposed by the licensee will provide timely upgrading of the licensee's emergency response capability.

In view of the foregoing, I have determined that the implementation of CP&L's commitments are required in the interest of the public health and safety and should, therefore, be confirmed by an immediately effective Order.

V

Accordingly, pursuant to sections 103, 161i, 161p and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.204 and 10 CFR Part 50, it is hereby ordered, effectively immediately, that license DPR–20 is modified to provide that the licensee shall:

Implement the specific items described in the Attachment to this order in the manner described in CP&L's submittals noted in section IV herein no later than the dates in the Attachment.

Extension of time for completing these items may be granted by the Director, Division of Licensing, for good cause shown.

The licensee or any other person with an adversely affected interest may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. Any request for a hearing should be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy should be sent to the Executive Legal Director at the same address. A request for hearing shall not stay the immediate effectiveness of this order.

If a hearing is to be held, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in Section V of this Order.

This Order is effective upon issuance.

For the Nuclear Regulatory Commission.

Dated in Bethesda, Maryland, this 9th day of July, 1985.

Hugh L. Thompson, Jr.,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

LICENSEE'S ADDITIONAL COMMENTS ON SUPPLEMENT 1 TO NUREG–0737

LICENSEE'S ADDITIONAL COMMITMENTS ON SUPPLEMENT 1 TO NUREG–0737

Title	Requirements	Licensee's completion schedule (or status)
1. Safety Parameter Display System (SPDS).	1b. SPDS fully operational and operators trained.	Scheduled to be fully operational 12 months after RO #10.
2. Detailed Control Room Design Review (DCRDR).	2b. Submit a summary report to the NRC including a proposed schedule for implementation.	Summary report and proposed implementation schedule—scheduled for 6 months after RO #10.
3. Regulatory Guide 1.97—Application to Emergency Response Facilities.	3b. Implement (installation or upgrade) requirements.	Full compliance to RG 1.97 scheduled from 3 months after RO #11.
4. Upgrade Emergency Operating Procedures (EOPs).	4a. Submit a Procedures Generation Package to the NRC.	Complete.
	4b. Implement the upgraded EOPs	Complete.
5. Emergency Response Facilities	5a. Technical Support Center fully functional.	Fully functional scheduled for 12 months after RO #10.
	5b. Operational Support Center fully functional.	Complete.
	5c. Emergency Operations Facility fully functional.	Fully functional schedule for 12 months after RO #10.

BILLING CODE 7590–01–M

[Docket No. 50–302]

Florida Power Corp., et al.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR 50.48(c) to the Florida Power Corporation (the licensee) for the Crystal River Unit No. 3 Nuclear Generating Plant (CR–3) located in Citrus County, Florida.

Environmental Assessment

Identification of Proposed Action: The exemption would grant the licensee a schedular deferment from the provisions of 10 CFR Part 50, Appendix R, Section III.G, fire protection of the equipment used for safe shutdown capability, from the end of Refuel V (July 1985) to the first quarter of 1986 (March 31, 1986) for CR–3. The exemption is responsive to the licensee's application for exemption dated October 5, 1984, as superseded March 1, 1985..

The Need for the Proposed Action: 10 CFR Part 50, Appendix R, Section III, identifies specific fire protection required to be provided by a licensee authorized to operate a nuclear power reactor. 10 CFR 50.48(c) identifies the schedules for the completion of fire protection modifications for which a plant shutdown is required. The deadline for those modifications at CR–3 requiring plant shutdown was startup following the refueling outage scheduled to commence in the Spring of 1985.

In a submittal dated October 5, 1984, as superseded March 1, 1985, the licensee requested that the implementation schedules for the proposed fire protection modification in certain areas at CR–3 requiring plant shutdown for installation, be extended to the first quarter of 1986 (March 31, 1986).

The magnitude of the program associated with the fire protection modifications and with an equipment qualification program and other improvement programs with which the fire protection work must interface does not allow the present schedule requirements to be met. As an alternative to implementation of the required modifications before startup following the refueling outage discussed above, the licensee has proposed interim compensatory fire protection measures to be instituted until the modifications have been completed. These measures are being evaluated by the Commission's staff.

Environmental Impacts of the Proposed Action: By using reasonable interim compensatory measures, the proposed exemption will provide a degree of fire protection such that there is no significant increase in the risk of fire at this facility. Consequently, the probability of fires has not been increased and the post-fire radiological releases will not be greater than previously determined nor does the proposed exemption otherwise affect radiological plant effluents. Therefore, the Commission concludes that there are no significant radiological environmental impacts associated with this proposed exemption.

With regard to potential nonradiological impacts, the proposed exemption involves features located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed exemption.

Alternative Use of Resources: This action does not involve the use of resources not considered previously in connection with the Final Environmental Statement (construction and operating license) for the Crystal River Unit No 3. Nuclear Generating Plant.

Agencies and Persons Consulted: The Commission's staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of no Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the foregoing environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the application for exemption dated October 5, 1984, as superseded March 1, 1985, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida.

Dated at Bethesda, Maryland, this 3rd day of July 1985.

For the Nuclear Regulatory Commission.

Gus C. Lainas,

Assistant Director for Operating Reactors, Division of Licensing.

[FR Doc. 85–16886 Filed 7–15–85; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–29]

Yankee Atomic Electric Co., (Yankee Nuclear Power Station); Order Modifying License Confirming Additional Licensee Commitments on Emergency Response Capability

I

Yankee Atomic Electric Company (YAEC) (the licensee) is the holder of Facility Operating License No. DPR–3 which authorizes the operation of the Yankee Nuclear Power Station (the facility) at steady-state power levels not in excess of 600 megawatts thermal. The facility is a pressurized water reactor (PWR) located in Franklin County, Massachusetts.

II

Following the accident at Three Mile Island Unit No. 2 (TMI–2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities and significant upgrading of emergency response capability based on the experience from the accident at TMI–2 and the official studies and investigations of the accident. The requirements are set forth in NUREG–0737, "Clarification of TMI Action Plan Requirements," and in Supplement 1 to NUREG–0737, "Requirements for Emergency Response Capability." Among these requirements are a number of items consisting of emergency response facility operability, emergency procedure implementation, addition of instrumentation, possible control room design modification, and specific information to be submitted.

On December 17, 1982, a letter (Generic Letter 82–33) was sent to all licensees of operating reactors, applicants for operating licenses, and holders of construction permits enclosing Supplement 1 to NUREG–0737. In this letter operating reactor licensees and holders of construction permits were requested to furnish the following information, pursuant to 10 CFR 50.54(f), no later than April 15, 1983:

(1) A proposed schedule for completing each of the basic requirements for the items identified in Supplement 1 to NUREG–0737, and

(2) A description of plans for phased implementation and integration of emergency response activities including training.

III

YAEC responded to Generic Letter 82–33 by letter dated April 19, 1983. By letters dated August 1, September 1, October 21, December 16, 1983, March 28 and April 3, 1984, YAEC modified some of the dates as a result of schedular changes. In these submittals, YAEC made commitments to complete the basic requirements. YAEC commitments included (1) dates for providing required submittals to the NRC, (2) dates for implementing certain requirements, and (3) a schedule for providing implementation dates for other requirements. The staff found that these dates were reasonable and

achievable dates for meeting the Commission requirements and

noted in section IV herein no later than the date in the Attachment.

Hearing Shall not stay the Immediate Effectiveness of this Order.

Commission's Public Document Room, 1717 H Street, NW., Washington, DC

U.S. Office of Personnel Management.
Loretta Cornelius

(202) 254–8326. This notice is issued in Washington, DC on July 10, 1985.

achievable dates for meeting the Commission requirements and concluded that the schedule proposed by the licensee would provide timely upgrading of the licensee's emergency response capability. On June 12, 1984, the NRC issued "Order Confirming Licensee Commitments on Emergency Response Capability" which confirmed YAEC's Commitments. By letter dated January 7, 1985, YAEC requested that the completion date for submission of the Detailed Control Room Design Review Summary Report (Item 2b. of the table attached to the June 12, 1984, Order) be extended. By letter dated January 11, 1985, the NRC granted this extension.

IV

The June 12, 1984, Order stated that for those requirements for which YAEC committed to a schedule for providing implementation dates, those dates woud be reviewed, negotiated and confirmed by a subsequent order. In conformance with the milestones in the June 12, 1984 Order, as modified by NRC letter dated August 23, 1984, YAEC's letters dated July 27, 1984 provided a completion schedule for the following requirement:

4. Upgrade Emergency Operating Procedurs (EOPs) 4b. Implement the upgraded EOPs.

The attached Table summarizing YAEC's schedular commitment for the above item was developed by the NRC staff from the information provided by YAEC. The staff reviewed YAEC's July 27, 1984 letter and discussed the date with the licensee.

The NRC staff finds that this date is a reasonable and achievable date for meeting the Commission requirement. The NRC staff concludes that the schedule proposed by the licensee will provide timely upgrading of the licensee's emergency response capability.

In view of the foregoing, I have determined that the implementation of YAEC commitment is required in the interest of the public health and safety and should, therefore, be confirmed by an immediately effective Order.

V

Accordingly, pursuant to sections 103, 161i, 161o, and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.204 and 10 CFR Part 50, it is hereby ordered, effective immediately, That license DPR–3 is modified to provide that the licensee shall:

Implement the specific item described in the Attachment to this order in the manner described in YAEC's submittals noted in section IV herein no later than the date in the Attachment.

Extension of time from completing this item may be granted by the Director, Division of Licensing, for good cause shown.

The licensee or any other person with an adversely affected interest may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. Any request for a hearing should be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy should be sent to the Executive Legal Director at the same address. A Request for Hearing Shall not stay the Immediate Effectiveness of this Order.

If a hearing is to be held, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in Section V of this Order.

This Order is effective upon issuance.

Dated in Bethesda, Maryland this, 5th day of July 1985.

For the Nuclear Regulatory Commission.

Hugh L. Thompson, Jr.,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

YANKEE NUCLEAR POWER STATION LICENSEE'S ADDITIONAL COMMITMENT ON SUPPLEMENT 1 TO NUREG-0737

Title	Requirements	Licensee's completion schedule (or status)
4. Upgrade Emergency Operating Procedures (EOPs).	4b. Implement the upgraded EPOs.....	Prior to startup for Cycle 19 operation.

[FR Doc. 85–16884 Filed 7–15–85; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–285]

Omaha Public Power District; Granting of Exemption From Appendix R to 10 CFR Part 50; Fire Protection Program

The U.S. Nuclear Regulatory Commission (the Commission) has granted an Exemption from certain requirements of Appendix R to 10 CFR Part 50 to Omaha Public Power Company (the licensee). The Exemption relates to the fire protection program for the Fort Calhoun Station, Unit No. 1 (the facility) located in Washington County, Nebraska. The Exemption is effective as of July 3, 1985.

The Exemption waives certain requirements of Subsection III.G of Appendix R to 10 CFR Part 50 as follows: Certain cables in containment beneath the pressurizer need not have 20-foot separation and other cables in containment having at least 20-foot separation may have some intervening combustibles between them. An area-wide automatic fire suppression system will not be required for the intake structure and fire detectors around the pull boxes near the intake structures will not be required. Regarding the air compressor room, cables and components of redundant shutdown divisions need not be separated by a continuous 1-hour fire-rated barrier. A complete fixed fire suppression system will not be required in the electrical penetration room. In regard to the switchgear room, redundant shutdown divisions need not be separated by a complete 3-hour fire-rated barrier.

Lastly, an area-wide fixed fire suppression system will not be required for the control room. The Exemption is granted mainly on the basis that the existing fire protection, coupled with proposed modifications at Fort Calhoun, is the most practical method for meeting the intent of Appendix R and literal compliance would not significantly enhance the fire protection capability. Details are provided in the Exemption.

The requests for the Exemption comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations which are set forth in the Exemption.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of the Exemption will have no significant impact on the environment (50 FR 20156).

For further details with respect to this action, see (1) the applications for exemptions dated August 30, 1983, December 3, 1984, and January 9 and March 8, 1985, (2) the Commission's letter dated and (3) the Exemption dated July 3, 1985. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this July 3, 1985.

For the Nuclear Regulatory Commission.

Edward J. Butcher,

Acting Chief, Operating Reactors Branch No. 3, Division of Licensing.

OFFICE OF PERSONNEL MANAGEMENT

Proposed Information Collection for OMB Review

AGENCY: Office of Personnel Management.

ACTION: Notice of proposed information collection, SF 2809, "Health Benefits Registration Form."

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (Title 44, U.S.C., Chapter 35), this notice announces a proposed form that collects information from the public. SF 2809, "Health Benefits Registration Form," will be used by former spouses of employees who elect to enroll in the Federal Employees Health Benefits (FEHB) Program, under the authority of the Spouse Equity Act of 1984 (Pub. L. 98–615). This form will be used by former spouses that are eligible for the FEHB Program so they can enroll or change enrollment. For copies of this proposal call John P. Weld, Agency Clearance Officer, on (202) 632–7720.

ADDRESSES: Send or deliver comments within 10 working days from the date of publication to:

John P. Weld, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street, NW, Room 6410, Washington, D.C. 20415

and

Katie Lewin, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, New Executive Office Building, NW., Washington, D.C. 20503

FOR FURTHER INFORMATION CONTACT: James L. Bryson, (202) 632–5472).

U.S. Office of Personnel Management.

Loretta Cornelius

Acting Director.

PEACE CORPS

Agency Information Collection Activities Under OMB Revew; Submission of Public Use Form

AGENCY: Peace Corps.

ACTION: Notice of Submission of public use form review request to the Office of Management and Budget.

SUMMARY: Pursuant to the Paperwork Reduction Act of 1981 (44 U.S.C. Chapter 35), the Peace Corps has submitted to the Office of Management and Budget a request to approve an extension to use the HOTLINE Employer Follow-up Questionnaire through September 30, 1988. This form is completed voluntarily by employers who have placed announcements in the HOTLINE job bulletin and provides information on number of returned Peace Corps Volunteers who applied, were interviewed and/or were hired. The information is necessary for Peace Corps to determine the effectiveness of HOTLINE. No revisions have been made to the questionnaire.

Information About the Questionnaire

Agency Address: Peace Corps, 806 Connecticut Avenue, NW., Washington, DC 20526.
Title and Agency Number: HOTLINE Employer Follow-up Questionnaire, Form Number PC–1510.
Type of request: Form extension approval.
Frequency of collection: On occasion.
General description of respondents: Employers who have placed announcements in HOTLINE.
Estimated number of respondents: 1,080 annually.
Estimated hours for respondents to furnish information: 0.20 hours each.
Respondents obligation to reply: Voluntary.
Comments: Comments on this form should be directed to Francine Picoult, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20523.

Comments should be received on or before August 15, 1985. A copy of the form may be obtained from Leslie Wexler, Office of Special Services, Peace Corps, 806 Connecticut Avenue, NW., Washington, DC 20526; telephone (202) 254–8328. This notice is issued in Washington, DC on July 10, 1985.

Linda Rae Gregory,

Associate Director for Management.

BILLING CODE 6051–01–M

POSTAL RATE COMMISSION

[Order No. 616; Docket No. A85–20]

Little Norway, California 95721 (Mr. and Mrs. Dingwell, petitioners); Order Accepting Appeal and Establishing Procedural Schedule

Issued: July 9, 1985.

Before Commissioners: Janet D. Steiger, Chairman; Henry R. Folsom, Vice-Chairman; John W. Crutcher; James H. Duffy; Bonnie Guiton.

Docket No.: A85–20.

Name of affected Post Office: Little Norway, California 95721.

Name(s) of petitioner(s): Mr. and Mrs. Dingwell.

Type of determination: Consolidation.

Date of filing of appeal papers: July 3, 1985.[1]

Categories of issues apparently raised:

1. Effect on postal services [39 U.S.C. 404(b)(2)(C)].

2. Economic savings [39 U.S.C. 404(b)(2)(D)].

Other legal issues may be disclosed by the record when it is filed; or conversely, the determination made by the Postal Service may be found to dispose of one or more of these issues.

In the interest of expedition within the 120-day decision schedule (39 U.S.C. 404(b)(5)) the Commission reserves the right to request of the Postal Service memoranda of law on any appropriate issue. If requested, such memoranda will be due 20 days from the issuance of the request; a copy shall be served on the Petitioners. In a brief or motion to dismiss or affirm, the Postal Service may incorporate by reference any such memorandum previously filed.

The Commission orders:

(a) The record in this appeal shall be filed on or before July 18, 1985.

(b) The Secretary shall publish this Notice and Order and Procedural Schedule in the **Federal Register.**

[1] Petitioners request an extension of time to permit other patrons to express their views regarding the Postal Service's Determination. No extension of time is necessary because patrons have until July 29, 1985 to intervene in this case. The procedural schedule provides ample time for interested persons to present their views for the Commission's consideration.

VOL 50 ISS 136 JL 16 1985 UMI

By the Commission.

Charles L. Clapp,

Secretary.

BILLING CODE 7715-01-M

POSTAL SERVICE

Privacy Act of 1974; Systems of Records

AGENCY: Postal Service.

ACTION: Advance and final notices of records systems changes.

SUMMARY: The purpose of this document is to publish final notice of a previously published proposed routine use and the deletion of a routine use to one system of records, and also to publish advance notice of several systems of records descriptions changes.

DATE: Part 1 is effective July 16, 1985. Comments on the proposed routine uses in Part 2 and the modifications to several systems in Part 3 must be received on or before August 15, 1985.

ADDRESS: Comments may be mailed to the Records Officer, U.S Postal Service, 475 L'Enfant Plaza, SW, Washington, DC 20260-5010 or delivered to room 8121 at the above address between 8:15 a.m. and 4:45 p.m. Comments received may also be inspected during the above hours in room 1821.

FOR FURTHER INFORMATION CONTACT: Martha J. Smith, Records Office (202) 245-5568.

SUPPLEMENTARY INFORMATION: In accordance with provisions of the Privacy Act Implementation Guidelines issued by the Office of Management and Budget (40 FR 28961), the Postal Service has determined it necessary to: (1) Publish final notice of a proposed routine use and the deletion of a routine use; (2) provide advance notice of two proposed routine uses; and (3) make modifications to several systems of records descriptions in order that they more accurately reflect the way in which the systems operate. Postal Service regulations concerning the privacy of information appear in 39 CFR Part 266. The Postal Service systems of records which are exempt from certain provisions of the Privacy Act are listed in 39 CFR 266.9(b).

Part 1—Final Notice—Routine Uses

a. On May 1, 1985, the Postal Service published for comment in the **Federal Register** (50 FR 18589) advance notice of its intention, in connection with the direction set by the President's Council on Integrity and Efficiency (PCIE) Long Range Computer Matching Group, to disclose certain Postal Service employee information in connection with computer matching operations conducted either by the Postal Service or by requesting Federal agencies or non-Federal entities, through written agreements. No comments were received regarding this proposal. Accordingly, this constitutes the final notice of routine use No. 28 to system USPS 050.020, Finance Records—Payroll System, as follows:

USPS 050.020

SYSTEM NAME:

Finance Records—Payroll System.

ROUTINE USES OF RECORDS MAINTAINED IN THIS SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

28. Disclosure of information about particular current or former postal employees may be made to requesting Federal agencies or non-Federal entities under approved computer matching efforts, limited to only those data elements considered relevant to making a determination of eligibility under particular benefit programs administered by those agencies or entities or by the Postal Service; to improve program integrity; and to collect debts and overpayments owed under those program.

* * * * *

b. In accordance with the above mentioned final notice regarding routine use No. 28 to system USPS 050.020, two computer matching programs were announced on May 1, 1985 in 50 FR 18591, between the Postal Service and the U.S. Department of Agriculture, and the State of Indiana Employment Security Division. These matching program notices called for comments by May 31, 1985. No comments were received and this constitutes final notice of these computer matching programs.

c. Temporary routine use number 29 to system 050.020 was published in 49 FR 24835, June 15, 1984, to be in effect for a period of one year from date of publication. While in effect, this routine use allowed for the disclosure to the City of New Orleans, Louisiana, of information about particular postal employees for comparison with the New Orleans' Department of City Civil Service time/attendance payment files. The effective period of one year elapsed June 15, 1985, and the routine use is being deleted.

Part 2—Proposed Modifications to Routine Uses to Two Systems of Records

(a) The Postal Service proposes to modify routine use No. 1 to system USPS 010.010, Collection and Delivery Records—Address Change and Mail Forwarding Records, and routine use No. 4 to system USPS 010.020, Collection and Delivery Records—Boxholder Records, for the following reasons:

The Postal Service recently revised Form 3575, Change of Address Order, allowing for the entry of family member names on the form. However, public requests for permanent change of address information are received and processed on a specific individual basis only. Therefore, in order that only information that is relevant to a request is released, copies of permanent change of address orders (Forms 3575) will no longer be disclosed to the public; rather, address information will be extracted from them. Furthermore, it has been the longstanding practice of the Postal Service not to disclose to the public temporary change of address orders (Forms 3575) since such orders are filed for brief periods of time such as when an individual or family is vacationing, and disclosure of the temporary order would not fully meet the purpose for which change of address records are maintained, and conceivably could be construed as being an invasion of the filer's privacy. System 010.010 was last published at 48 FR 10963, March 15, 1983. Accordingly, it is proposed that routine use No. 1 to system 010.010 be changed to read as follows:

USPS 010.010

SYSTEM NAME:

Collection and Delivery Records—Address Change and Mail Forwarding Records, 010.010.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

* * * * *

1. Disclosure of the address of any named individual may be made from a permanent address change record to the public, upon request. Note: Temporary changes of address will not be furnished except by the postmaster upon a showing of a compelling emergency situation, or to a Federal, State, or local government agency showing proper identification and providing proper certification that the information is required in the course of a criminal investigation.

* * * * *

(b) In regard to the disclosure of Form 1093, Application for Post Office Box or Caller Number, it has been the longstanding practice and the intent of Postal Service regulations to disclose to the public, upon request, the name, address, and telephone number from Form 1093 in cases where the box is used for the purpose of doing or soliciting business with the public. The intent of this regulation never has been that copies of the form itself would be disclosed since other information of a more personal nature is collected on the form for use in verification of the applicant's identity. System 010.020 was last published at 48 FR 31128; July 6, 1983. Accordingly, it is proposed that routine use No. 4 to system 010.020 be modified to clarify its original intent, as follows:

USPS 010.020

SYSTEM NAME:

Collection and Delivery Records—Boxholder Records, 010.020.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

* * * * *

4. Disclosure of the name, address, and telephone number may be made from the post office box application form, to the public, upon request, when the box is being used for the purpose of doing or soliciting business with the public.

* * * * *

Part 3—Proposed Modifications to Several Systems of Records

The purpose of this document is to modify the descriptions of several systems of records for which fuller descriptive information is needed. For comparison purposes, Systems 050.005 was last published in 47 FR 1199, January 11, 1982; Systems 120.151, 120.152 and 140.020 were last published in 48 FR 10966, March 15, 1983; and System 120.035 was last published in 48 FR 31128, July 6, 1983. A review of the operations of these systems has indicated that the previously published notices of their existence and character do not present an adequate description of their functions. Accordingly, the Postal Service presents in this document proposed revisions to systems 050.005, 120.035, 120.151, 120.152 and 140.020 for the purpose of clarity, as follows:

USPS 050.005

SYSTEM NAME:

Finance Records—Accounts Receivable File Maintenance 050.005.

RETRIEVABILITY:

Change to read: "Records are normally retrieved by social security number. When necessary, they may be retrieved by invoice number or by name of employee, contractor, vendor, or other indebted individuals."

USPS 120.035

SYSTEM NAME:

Personnel Records—Employee Accident Records, 120.035.

CATEGORIES OF RECORDS IN THE SYSTEM:

Change to read: "Occupational accident injury and illness logs, forms, reports, and summaries. Name, address, sex, age, and type of accident."

PURPOSE:

Change to read: "To assist postal managers in meeting the requirement to develop and maintain an effective program of collection, compilation, and analysis of occupational safety and health statistics. To provide for the uniform collection and compilation of occupational safety and health data, for proper evaluation and necessary corrective action."

USPS 120.151

SYSTEM NAME:

Personnel Records—Recruiting, Examining and Appointment Records, 120.151

CATEGORIES OF RECORDS IN THE SYSTEM:

Change to read: "Personal and professional resumes, personal applications, test scores, medical assessment, academic transcripts, letters of recommendation, employment certifications, medical records, and registers of eligibles. Restricted medical records are accumulated and temporarily maintained by personnel offices prior to transmittal to medical facilities."

USPS 120.152

SYSTEM NAME:

Personnel Records—Career Development, Training, and Training Evaluation Records, 120.152

CATEGORIES OF RECORDS IN THE SYSTEM:

Change to read: "Career development records, applications for and record of postal and non-postal training, and records containing student and manager evaluations of training received. Also contains examination and skills bank records, including records of special qualifications, skills or knowledge, career goals, education, and work histories or summaries."

PURPOSE:

Change to read: "To provide managers, supervisors, and training and development professionals with decision-making information for employee career development, training, and assignment."

USPS 140.020

SYSTEM NAME:

Postage—Postage Meter Records, 140.020.

CATEGORIES OF RECORDS IN THE SYSTEM:

Change to read: "Customer name and address, license application, and transaction documents."

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

USPS 050.020

SYSTEM NAME:

Finance Records—Payroll System.

SYSTEM LOCATION:

Payroll system records are located and maintained in all Departments, facilities and certain contractor sites of the Postal Service. However, Postal Data Centers are the main locations for payroll information. Also, certain information from these records may be stored at emergency records centers.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former USPS employees and postmaster relief/replacement employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records contain general payroll information including retirement deduction, family compensations, benefit deductions, accounts receivable, union dues, leave data, tax withholding, allowances, FICA taxes, salary, name, social security number, payments to

VOL

UMI

financial organizations, dates of appointment or status changes, designation codes, position titles, occupation code, addresses, records of attendance, and other relevant payroll information. Also includes automated Form 50 records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

39 U.S.C. 401, 1003.5 U.S.C. 8339.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Purpose—

1. Information within the system is for handling all necessary payroll functions and for use by employee supervisors for the performance of the managerial duties.

2. To provide information to USPS management and executive personnel for use in selection decisions and evaluation of training effectiveness. These records are examined by the Selection Committee and Regional Postmasters General.

3. To compile various lists and mailing list, i.e., Postal Leader, Women's Programs, Newsletter, etc.

4. To support USPS Personnel Programs such as Executive Leadership, Non-Bargaining Positions Evaluations of Probationary Employees, Merit Evaluation, Membership and Identification Listings, Emergency Locator Listings, Mailing Lists, Women's Programs, and to generate retirement eligibility information and analysis of employees in various ranges.

Use—

1. Retirement Deduction—To transmit to the Office of Personnel Management a roster of all USPS employees under Title 5 U.S.C. 8334, along with a check.

2. Tax Information—To disclose to Federal, State and local government agencies having taxing authority, pertinent records, relating to individual employees, including name, home address, social security number, wages and taxes withheld for other jurisdiction.

3. Unemployment Compensation Data—To reply to State Unemployment Offices at the request of separated USPS employees.

4. Employee Address File—For W–2 tax mailings and Postal mailing such as Postal Life, Postal Leaders, etc.

5. Salary payments and allotments to financial organizations—To provide pertinent information to organizations receiving salary payments or allotments as elected by the employee.

6. FICA Deductions—The Social Security Act requires that FICA deductions be made for those employees not eligible to participate in the Civil Service Retirement System (casuals). In addition, the Tax Equity and Fiscal Responsibility Act of 1982 requires that contributions to the Medicare program be deducted from all employees' earnings. (These statutes do not apply to employees in the Trust Territories who are not U.S. citizens.) Accordingly, records of earnings (i.e., W–2 information) must be disclosed to the Social Security Administration in order that it may account for funds received and determine individual's eligibility for benefits. Information disclosed includes name, address, SSN, wages paid subject to withholding, Federal, state, and local income tax withheld, total FICA wages paid and FICA tax withheld, occupational tax, life insurance premium and other information as reported on an individual's W–2 form.

7. Determine eligibility for coverage and payments of benefits under the Civil Service Retirement System, the Federal Employees Group Life Insurance Program and the Federal Employees Health Benefits Program and transfer related records as appropriate.

8. Determine the amount of benefit due under the Civil Service Retirement System, the Federal Employees, Group Life Insurance Program and the Federal Employees Health Benefits program and authorizing payment of that amount and transfer related records as appropriate.

9. Transfer to Office of Workers Compensation Program, Veterans Administration Pension Benefits Program, Social Security Old Ages Survivors and Disability Insurance and Medicare Programs, military retired pay programs, and Federal Civilian employee retirement systems other than the Civil Service Retirement System, when requested by that program or system or by the individual covered by this system for use in determining an individual's claim for benefits under such system.

10. Transfer earnings information under the Civil Service Retirement System to the Internal Revenue Service as requested by the Internal Revenue Code of 1954, as amended.

11. Transfer information necessary to support a claim for life insurance benefits under the Federal Employees' Group Life Insurance, 4 East 24th Street, New York, NY 10010.

12. Transfer information necessary to support a claim for health insurance benefits under the Federal Employees' Health Benefits Program to a health insurance carrier or plan participating in the program.

13. To refer, where there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature to the appropriate agency whether Federal, State, or local charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

14. To request or provide information from or to a Federal, state, or local agency maintaining civil, criminal, or other relevant enforcement or other pertinent information, such as licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract or the issuance of a license, grant, or other benefits.

15. As a data source for management information for production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies, may also be utilized to respond to general requests for statistical information (without personal identification of Individuals) under the Freedom of Information Act or to locate specific individual for personnel research or other personnel management functions.

16. May be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A–19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

17. Certain information pertaining to Postal Supervisors may be transferred to the National Association of Postal Supervisors.

18. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

19. Disclosure may be made from the record of an individual, where pertinent, in any legal proceeding to which the Postal Service is a party before a court or administrative body.

20. Pursuant to the National Labor Relations Act, records from this system may be furnished to a labor organization upon its request when needed by that organization to perform properly its duties as the collective bargaining representative of postal employees in an appropriate bargaining unit.

21. Inactive records may be transferred to a Federal Records Center prior to destruction.

22. To provide to the Office of Personnel Management (OPM) approximately 19 data elements (including SSAN, DOB, service computation date, retirement system, and FEGLI status) for use by OPM's Compensation Group collected are not for the purpose of making determinations about specific individuals but are used only as a means of ensuring the integrity of the active employee/annuitant data systems and for analyzing and statistically projecting Federal retirement and insurance system costs. The same data submission will be used to produce summary statistics for reports of Federal employment.

23. Information contained in this system of records may be disclosed to an authorized investigator appointed by the Equal Employment Opportunity Commission upon his request, when that investigator is properly engaged in the investigation of a formal complaint of discrimination filed against the U.S. Postal Service under 29 CFR 1613, and the contents of the requested record are needed by the investigator in the performance of his duty to investigate a discrimination issue involved in the complaint.

24. Records in this system ae subject to review by an independent certified public accountant during an official audit of Postal Service finances.

25. May be disclosed to a Federal or State agency providing parent locator services or to other authorized persons as defined by Pub. L. 93–647.

26. Disclosure of information about particular postal employees may be made to requesting states in connection with approval computer matching programs, limited to only those data elements considered relevant to making a determination of eligibility under unemployment insurance programs administered by the states (and by those states to local governments); to improve program integrity; and to collect debts and overpayments owed to those governments and their components.

27. To union-sponsored insurance carriers for the purposes of determining eligibility for coverage and payments of benefits under union-sponsored non-Federal insurance plans and transferring related records as appropriate.

28. Disclosure of information about particular current or former postal employees may be made to requesting Federal agencies or non-Federal entities under approved computer matching efforts, limited to only those data elements considered relevant to making a determination of eligibility under particular benefit programs administered by those agencies or entities or by the Postal Service; to improve program integrity; and to collect debts and overpayments owned under those programs.

29. (Temp.) Disclosure of information about particular postal employees who work in the District of Columbia and in the States of Maryland and Virginia may be made to the Government of the District of Columbia, Department of Human Service (DC–DHS) for comparison with the DC–DHS welfare program files.

Note.—This routine use will be in effect for a period of one year ending September 24, 1985.

30. (Temp.) To provide the Department of Housing and Urban Development the names, social security account numbers and home addresses of postal employees for the purpose of notifying those individuals of their indebtedness to the United States under programs administered by the Secretary of Housing and Urban Development and for taking subsequent actions to collect those debts.

Note.—This routine use will be in effect for a period of five years ending September 24, 1989.

31. To provide to the Department of Defense (DOD) upon request, on a semiannual basis, the names, social security account numbers and home addresses of current postal employees for the purposes of identifying those employees who are indebted to the United States under programs administered by the Secretary, DOD, and for taking subsequent actions to collect those debts.

32. To provide to the Department of Defense (DOD), upon request, on an annual basis, the names, social security account numbers, and salaries of current postal employees for the purposes of updating DOD's listings of Ready Reservists and reporting reserve status information to the Postal Service and the Congress.

33. (Temp.) Disclosure of information about postal employees on the employment rolls of the Philadelphia, Pennsylvania School District (PSD) and on the employment rolls of the City of Philadelphia (CP) may be made to the PSD and CP for a one-time comparison with the PSD'S and CP's time/attendance/payment files.

Note.—This routine use will be in effect for a period of one year ending February 13, 1986.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Preprinted forms, magnetic tape, microforms, punched cards, computer reports and card forms.

RETRIEVABILITY:

These records are organized by location, name and social security number.

SAFEGUARDS:

Records are contained in locked filing cabinets; are also protected by computer passwords and tape library physical security.

RETENTION AND DISPOSAL:

See USPS Records Control Schedule.

SYSTEM MANAGER(S) AND ADDRESS:

APMG, Department of the Controller and APMG, Employee Relations Department at Headquarters.

NOTIFICATION PROCEDURE:

Request for information on this system of records should be made to the head of the facility where employed, giving full name and social security number. Headquarters employees should submit requests to the System Manager.

RECORD ACCESS PROCEDURE:

See Notification above.

CONTESTING RECORD PROCEDURES:

See Notification Procedure above.

RECORD SOURCE CATEGORIES:

Information is furnished by employees, supervisors and the Postal Source Data System.

BILLING CODE 6000-60-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket No. 301–48]

Initiation of Investigation Under Section 301; Semiconductor Industry Association

On June 14, 1985 the Semiconductor Industry Association (SIA) filed a petition under section 301 of the Trade Act of 1974, as amended (19 U.S.C. 2411 et seq.) seeking relief from the effects of certain policies and practices of the Government of Japan and its instrumentalities. SIA alleges that through a series of policies which existed until 1974–75 the Government of Japan created a market structure in which the semiconductor industry is dominated by as small number of major semiconductor consuming companies that have strong, interlocking ties with respect to research and development, production and sales, and that this market structure constitutes a major barrier to the sale of foreign semiconductors in Japan. The practices which allegedly created this market structure included: (1) Restrictions on entry into the semiconductor industry by all but large, established electronic producers; (2) concentration of semiconductor subsidies and research and development aid to the largest electronic producers; (3) pressure on semiconductor consumers to "buy Japanese"; and (4) formal restrictions on foreign imports and investment.

SIA maintains that even with the phasing out of the Japanese government's official restrictions, the market barriers have persisted. The U.S. share of the Japanese market has shown virtually no improvements. In 1984, U.S. firms accounted for 11.4 percent of Japanese consumption, virtually the same share which they held in 1973 when the market was formally protected.

SIA claims that Japan's market structure not only causes lost export sales to Japan, resulting in diminished revenues for research and development and capital investment, but also contributes to capacity expansion races—surges of low-priced semiconductor exports from Japan during recessionary periods. Finally, SIA alleges that the import restricting effect of Japan's market structure is in violation of its GATT agreements, inconsistent with the Semiconductor Recommendations and the commitments made when Japan adopted the 1983 Recommendations on High Technology, and an unreasonable burden on U.S. commerce.

On July 11, 1985, the United States Trade Representative decided to initiate an investigation based on the petition filed by SIA in accordance with the provisions of 19 U.S.C. 2412(b).

Interested parties are invited to submit written comments with respect to issues raised in the petition. Such comments should be filed in accordance with the procedures set forth in 15 CFR 2006.8 and should be submitted to the Chairman, Section 301 Committee, Office of the U.S. Trade Representative, Room 223 600 17th Street NW., Washington, D.C. 20506 no later than August 26, 1985. Copies of the Petition are available at the above address.

Jeanne S. Archibald,

Chairman, Section 301 Committee.

UNITED STATES INFORMATION AGENCY

Grants Program for Private Not-for-Profit Organizations; In Support of International Educational and Cultural Activities

The United States Information Agency (USIA) announces a program of selective assistance and limited grant support to non-profit activities of United States institutions and organizations in the Private Sector. The primary purpose of the program is to enhance the achievement of the Agency's international public diplomacy goals and objectives by stimulating and encouraging increased private sector commitment, activity, and resources. The information collection involved in this solicitation is covered by OMB Clearance Number 3116–0175, entitled "A Grants Program for Private Organizations", expiration date January 31, 1987.

Private sector organizations interested in working cooperatively with USIA on the following concept are encouraged to so indicate:

East Asia Security Tour (EAST): An International Affairs Study Program: The United States Information Agency is interested in supporting a two to three week study program which will introduce approximately 10 Asian parliamentarians, scholars and journalists to US military facilities in East Asia and the Pacific. This pilot project will expose younger East Asian leaders to America's defense commitment, regional policies and sensitivities. In addition to installation briefings, participants will receive background presentations by accompanying American scholars and local experts on U.S. policies, bilateral relations, and on each country's military, economic, social and strategic concerns. They will also witness the extent of America's preparedness and defense commitment. For the initial pilot project, Southeast Asian participants will visit U.S. installations in Northeast Asia and the Pacific. A reciprocal follow-on program for Northeast Asian participants visiting Australia and the South Pacific is envisioned. The initial program will begin in the Philippines with subsequent visits to Korea, Japan, Hawaii and possibly the West Coast of the U.S. The final stop will include a two or three day summary seminar/workshop. USIA posts in East Asia will cover intra-regional transportation and per diem costs for Asian participants, and the Office of Private Sector Programs will fund subsequent international travel, per diem and administration costs.

Your submission of a letter indicating interest in the above project concept begins the consultative process. This letter should further explain why your organization has the substantive expertise and logistical capability to successfully design, develop and conduct the above proejct.

Emphasis during the preliminary consultative process will be on identifying organizations whose goals and objectives clearly complement or coincide with those of USIA. Futhermore, USIA is most interested in working with organizations that show promise for innovative and cost effective programming; and with organizations that have potential for obtaining third party private sector funding in addition to USIA support. Organizations must also demonstrate a potential for designing programs which will have a lasting impact on their participants. In your response, you may also wish to include other pertinent background information. To be eligible for consideration, organizations *must* postmark their general letter of interest within 20 days of the date of this notice.

This is not a solicitation for grant proposals. After consultation, selected organizations will be invited to prepare proposals for the financial assistance available.

Office of Private Sector Programs, Bureau of Educational and Cultural Affairs, (ATTN: Initiative Programs), United States Information Agency, 301 4th Street, SW. Washington, DC 20547.

Dated: July 11, 1985.

Albert Ball,

Deputy Director, Office of Private Sector Programs.

BILLING CODE 8230-01-M

VETERANS ADMINISTRATION

Privacy Act of 1974; Proposed Amendment of Systems Notice; Addition of New Routine Use Statements

Notice is hereby given that the Veterans Administration is adding two new routine use statements in the system of records entitled: Veteran, Patient, Employee, and Volunteer Research and Development Project Records—VA (34VA11) as set forth on page 1156 of the **Federal Record** publication, "Privacy Act Issuances, 1982–1983 Compilation, Volume V" and on page 36188 of the **Federal Register** of September 14, 1984. Routine use statements numbered 7 and 8 are being added to provide for the release of information stored in the Research and Development Information System (RDIS) related to research being conducted within the VA Research and Development program. These data are released in response to inquiries from the general public including governmental and non-governmental agencies and commercial organizations.

Interested persons are inivited to submit written comments, suggestions, or objections regarding the proposed system of records to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Ave., NW Washington, D.C. 20420. All relevant meterial received before August 14, 1985 will be considered. All written comments received will be available for public inspection at the above address only between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday (except holidays) until August 28, 1985.

If no public comment is received during the 30-day review period allowed for public comment or unless otherwise published in the **Federal Register** by the Veterans Administration, the proposed routine use statement is effective August 14, 1985.

Approved: July 8, 1985.

By direction of the Administrator.

Everett Aviarez, Jr.,

Deputy Administrator.

Notice of System of Records

The system of records identified as 34VA11, "Veteran, Patient, Employee, and Volunteer Research and Development Project Records—VA", appearing on page 1156 of the **Federal Register** publication "Privacy Act Issuances, 1982–1983 Compilation, Volume V" and 49 FR 36188 is revised as follows:

34VA11

SYSTEM NAME:

Veteran, Patient, Employee, and Volunteer Research and Development Project Records—VA

* * * * * *

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATAGORIES OF USERS AND THE PURPOSES OF SUCH USES:

* * * * * *

7. Upon request for research project data, the following information will be released to the general public including governmental and non-governmental agencies and commercial organizations: Project title and number, name and educational degree of principal investigator, Veterans Administration medical center location, type (initial, progress, or final) and date of last report, name and educational degree of associate investigators and project summary. In addition, upon specific request, keywords and indexing codes will be included for each project.

8. Upon request for information regarding VA employees conducting research, the following information will be released to the general public including governmental and non-governmental agencies and commercial organizations: Name and educational degree of investigator, Veterans Administration title, academic affiliation and title, hospital service, primary and secondary program areas, primary and secondary specialty areas, and subspecialty.

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Cordylanthus Palmatus (Palmate-Bracted Bird's-Beak)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to list a plant, *Cordylanthus palmatus* (palmate-bracted bird's beak), as an endangered species. This action is being taken because population numbers have declined in historic times, and the range of the palmate-bracted bird's beak has been reduced as a result of conversion of land to agricultural use, intensive livestock grazing, urban development, and other land use activities that have altered the natural plant communities that once supported the species. Historically, the species is known from scattered locations in Fresno and Madera Counties in the San Joaquin Valley, north into the Sacramento Valley from San Joaquin to Colusa Counties, and in the Livermore Valley, Alameda County. *Cordylanthus palmatus* presently is known from only three small populations. Habitat modification from urban and agricultural development and ncontrolled off-road vehicle (ORV) use of one area pose the most serious and immediate threats facing the species. Low population numbers may also threaten this annual plant through genetic depletion and reduced reproductive potential. Federal listing would provide the protection of the Endangered Species Act of 1973, as amended, for the three remaining populations of this species. The Service seeks comments and data related to this proposal.

DATES: Comments from all interested parties must be received by September 16, 1985. Public hearing requests must be received by August 30, 1985.

ADDRESS: Comments and material concerning this proposal should be sent to the Regional Director, U.S. Fish and Wildlife Service, Lloyd 500 Building, 500 NE, Multnomah Street, Suite 1692, Portland, Oregon 97232. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne S. White, Chief, Division of Endangered Species, U.S. Fish and Wildlife Service, Lloyd 500 Building, 500 NE, Multnomah Street, Suite 1692, Portland, Oregon 97232 (503/231–6131 or FTS 429–6131).

SUPPLEMENTARY INFORMATION:

Background

Cordylanthus palmatus, an annual herb of the snapdragon family (Scrophulariaceae), was originally collected by Ferris in 1916 and described by her in 1918 under the name *Adenostegia palmata*. Macbride (1919) recognized the species under the genus *Cordylanthus* (a conserved name).

Plants of *C. palmatus* are from 4 to 12 inches tall with several to many ascending-spreading branches from the base of the stem or above. The stems are sparsely to densely hairy with some of the shorter hairs glandular. The leaves and stems are grayish green. The small pale whitish flowers, ½-inch to 1-inch long, are arranged in dense spikes. Each flower is surrounded by a small lobed floral bract.

Little is known of the ecology of *Cordylanthus palmatus* aside from its occurrence in and possible confinement to a particular soil type named saline-alkali (black alkaline) of lowland flats and plains. This habitat was historically rare in much of cis-montane California and is now much reduced in extent. Like other members of the genus and related genera in the family, *C. palmatus* is hemiparasitic on the roots of various seed plants (Chuang and Heckard 1971).

Historically the species was collected from seven scattered locations in Fresno, Madera, San Joaquin, Yolo, and Colusa Counties, California. A recent collection (1982) extended the known range into the Livermore Valley in Alameda County, California. The range of this species coincides with a region of California that has been intensively developed for agriculture, livestock grazing, and urbanization. These activities are the principal factors responsible for the destruction of much of California's pristine valley habitats (Heady 1977), and they undoubtedly contributed to the decline of *Cordylanthus palmatus*. The extirpation of five previously known populations of this plant in Colusa, San Joaquin, Yolo, Madera, and Fresno Counties has been attributed largely to soil reclamation and conversion of lands for agricultural use (Heckard 1977). Prior to destruction of one population, five and one-half air miles east-southeast of Mendota in Fresno County, seed was collected by Dr. L.R. Heckard (University of California, Berkeley). Ten cultivated seedlings from greenhouse stock established from the Mendota site were transplanted to the Mendota State Wildlife Management Area. The new site is less than one mile from the now extirpated donor site. At present, three populations are known, two are on private and city-owned lands near the cities of Livermore, Alameda County, and Woodland, Yolo County; and the third, the transplanted colony, exists within the Mendota State Wildlife Management Area near Mendota, Fresno County.

In the late 1970's and early 1980's searches of likely habitats within the range of the species by local botanists, personnel from the California Department of Fish and Game, and the U.S. Fish and Wildlife Service failed to locate any additional colonies of this species. The rarity of the saline-alkaline soils occupied by this species and the intensive agricultural and urban development within its range make the likelihood of finding additional colonies remote.

The Secretary of the Smithsonian Institution, as directed by section 12 of the Endangered Species Act of 1973, prepared a report on those native U.S. plants considered to be endangered, threatened, or extinct in the United States. This report (House Document No. 94–51), which included the palmate-bracted bird's-beak, was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the Federal Register (40 FR 27823) accepting the report as a petition within the context of section 4(c)(2) of the Act (petition acceptance provisions are now contained in section 4(b)(3)(A)), and giving notice of its intention to review the status of the plant taxa named therein, including the palmate-bracted bird's-beak. As a result of this review, on June 16, 1976, the Service published a proposed rule in the Federal Register (41 FR 24523) to determine approximately 1,700 vascular plant species, including the palmate-bracted bird's-beak, to be endangered species pursuant to Section 4 of the Act. In 1978, amendments to the Endangered Species Act required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to proposals already over 2 years old. On December 10, 1979, the Service published a notice (44 FR 70796) of the withdrawal of that portion of the June 16, 1976, proposal that had not been made final, along with four other proposals that had expired.

The Service published an updated notice of review for plants on December 15, 1980 (45 FR 82480). This notice included *Cordylanthus palmatus* as a candidate plant. On February 15, 1983, the Service published a notice (48 FR 6752) of its prior finding that the listing of this species may be warranted in

accordance with section 4(b)(3)(A) of the Act as amended in 1982. On October 13, 1983, and again on October 12, 1984, further findings were made that the listing of *Cordylanthus palmatus* was warranted, but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act; notification of the 1983 finding was published on January 20, 1984 (49 FR 2485). Such a finding requires the petition to be recycled, pursuant to section 4(b)(3)(C)(i) of the Act. The present proposal constitutes a finding that the listing is warranted. The Service proposes to implement the petitioned action, in accordance with section 4(b)(3)(B)(ii) of the Act.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (codified at 50 CFR Part 424; revised in 49 FR 38900, October 1, 1984) set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Cordylanthus palmatus* (Ferris) Macbride (palmate-bracted bird's-beak) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Specimens of *Cordylanthus palmatus* have been collected from eight sites in six counties in California. Only two of these sites, and one site where a transplanted population is found, presently support the species. Habitat loss resulting from soil reclamation and urban and agricultural developments are responsible for the extirpation of populations at the six sites no longer supporting *Cordylanthus palmatus*. The remaining three populations have declined in the past and face present and potential threats of further habitat loss.

At the transplant site near Mendota, plants are so few in numbers that any disturbance to the habitat could threaten the population with extirpation. Population numbers have fluctuated probably due to the annual nature of the plant and destruction by off-road vehicles (ORV's). Of the ten transplanted specimens, five were destroyed in 1973 by ORV's even though the plants were protected by wire coverings. In 1981 only one plant was observed on the preserve, but in 1982 the population had grown to about 20 to 30 plants (Dr. L.R. Heckard, University of California, Berkeley, telephone comm.). In 1983 between 20 and 30 plants were observed by Peggy Smith, a local botanist (John Stebbins, California State University, Fresno, telephone comm.). The manager of the wildlife area is aware of the population and is attempting to protect the site from encroachment by ORV's (Bob Huddleston, California Department of Fish and Game, telephone and written communication). It is likely that without active protection and management the population will decline and disappear. Active management such as seed dispersal in likely habitats and fencing will be necessary to prevent additional population declines.

The population near Woodland, California, originally occupied about 10 acres, but a large portion (approximately 8 acres) was plowed in 1982 (Rick York, California Native Plant Society, telephone communication) and has been plowed in subsequent years. Plowing eliminated the largest portion of the colony (probably 75 percent or more). The remaining population consists of about 100–200 plants along a nearby drainage ditch and open field. This site is being considered for use as a sewage treatment facility by the City of Woodland.

The Livermore Valley population consists of about 2,000 to 5,000 plants scattered over approximately 180–200 acres within an area zoned for residential and/or agricultural development. Several developments have been proposed for the entire area. In January of 1983 approximately 40 acres of the Livermore site (about 20 percent of the area) was bulldozed and a portion of associated wetlands illegally filled (U.S. Army Corps of Engineers, letter, 1983).

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Not applicable.

C. *Disease or predation.* Historically, cattle grazing affected many of the areas once supporting this species. In some areas the plant species composition was undoubtedly altered significantly by grazing animals. At present, however, grazing does not appear to be a threat in those areas still supporting *Cordylanthus palmatus*.

D. *The inadequacy of existing regulatory mechanisms.* Although the State of California lists the palmate-bracted bird's-beak as endangered, State law does not provide adequate protection for this species in its natural habitat. The law provides that a land owner who has been notified by the State Fish and Game Commission that a State listed plant is growing on his/her property must notify the Department of Fish and Game ". . . at least 10 days in advance of changing the land use to allow salvage of such plant." Although State law also provides for such measures as research and land acquisition, provisions of the Endangered Species Act would offer additional protection for this species and its habitat.

E. *Other natural or manmade factors affecting its continued existence.* Population numbers, especially at the Mendota site, are low for an annual plant. Genetic depletion and reduced reproductive potential may further threaten the palmate-bracted bird's-beak.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Cordylanthus palmatus* as endangered. Endangered status appears most appropriate considering the past and present declines in the species' range and populations, and the current threats faced by the species. Only three populations are known to exist and all three have suffered recent damage. Plants on private and municipally owned lands are imminently threatened by proposed developments. The depauperate transplanted population on the Mendota State Wildlife Area will likely disappear without active management. The designation of critical habitat is discussed in the "Critical Habitat" section.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate any habitat of a species that is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. As discussed under Factor A in the preceding section, *Cordylanthus palmatus* is threatened by taking in the form of destruction due to ORV activity and agricultural conversion. Taking is not regulated by the Act with respect to plants except for a prohibition against removal and reduction to possession of endangered plants on land under Federal jurisdiction. Because of a substantial possibility of vandalism, publication of critical habitat descriptions could make this species more vulnerable.

Melia azedarach. The ground cover is

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service. No Federal activities are known which may affect *Cordylanthus palmatus;* however, the Army Corps of Engineers has permit jurisdiction over some wetlands where the species occurs and developments proposed for these areas may require section 7 consultation to ensure protection for the species and its habitat.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. With respect to *Cordylanthus palmatus* all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, would apply. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. It is anticipated that few trade permits would ever be sought or issued since the species is not common in cultivation or in the wild.

Section 9(a)(2)(B) of the Act, as amended in 1982, prohibits the removal and reduction to possession of endangered plant species from areas under Federal jurisdiction. This prohibition would apply to the palmate-bracted bird's-beak. Permits for exceptions to this prohibition are available through section 10(a) of the Act, until revised regulations are promulgated to incorporate the 1982 Amendments. Proposed regulations implementing this prohibition were published on July 8, 1983 (48 FR 31417), and it is anticipated that these will be made final following public comment. Because this species is not known to occur on Federal land, it is anticipated that few collecting permits for the species will ever be requested. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1903).

Public Comments Solicited

The Service intends that any final rule adopted will be accurate and as effective as possible in the conservation of endangered or threatened species. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of these proposed rules are hereby solicited. Comments particularly are sought concerning the following:

(1) Biological, commercial trade, or other relevant data concerning any threat (or the lack thereof) to *Cordylanthus palmatus;*

(2) The location of any additional populations of *Cordylanthus palmatus;* and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range and distribution of this species;

(4) Current or planned activities in the subject area and their possible impacts on *Cordylanthus palmatus.*

Final promulgation of the regulations on *Cordylanthus palmatus* will take into consideration the comments and any additional information received by the Service, and such communications may lead to final regulations that differ from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Regional Director, U.S. Fish and Wildlife Service, Lloyd 500 Building, 500 NE. Multnomah Street, Suite 1692, Portland, Oregon 97232.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Proposed Regulations Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*).

2. It is proposed to amend § 17.12(h) by adding the following, in alphabetical order under the family Scrophulariaceae, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

BILLING CODE 4310–55–M

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Rule to Determine Endangered Status for Hibiscadelphus Distans (Kauai hau kuahiwi)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine endangered status for *Hibiscadelphus distans* (Kauai hau kuahiwi). Only 10 individuals of this endemic tree remain in the wild, occurring in the State-owned Pu'u Ka Pele Forest Reserve, on the island of Kauai, Hawaii. Imminent threats to this species and its habitat exist from feral goat grazing, fire, competition with exotic species, and human disturbance. Protective measures are needed to ensure the plant's continued existence and to provide for its recovery. Determination of *Hibiscadelphus distans* as endangered would implement the protection provided under the Endangered Species Act of 1973, as amended. The Service seeks relevant data and comments.

DATES: Comments from all interested parties must be received by September 16, 1985. Public hearing requests must be received by August 30, 1985.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Regional Director, U.S. Fish and Wildlife Service, Lloyd 500 Building, Suite 1692, 500 NE. Multnomah Street, Portland, Oregon 97232.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne S. White, Chief, Division of Endangered Species, U.S. Fish and Wildlife Service, Lloyd 500 Building, Suite 1692, 500 NE. Multnomah Street, Portland, Oregon 97232 (503/231–6131 or FTS 429–6131).

SUPPLEMENTARY INFORMATION:

Background

The plant species *Hibiscadelphus distans* was discovered by L. Earl Bishop and Derral Herbst in 1972 and later described by them (Bishop and Herbst, 1973). It likely was at one time more abundant and more widely distributed, but only 10 individuals are presently known to exist. It occurs on State-owned land within the Pu'u Ka Pele Forest Preserve, Koai'e Valley, Waimea Canyon, Island of Kauai, Hawaii.

This species is a small tree, up to 5.45 meters (18 feet) tall, with green heart-shaped leaves and smooth bark. Its flowers are approximately 2.5 centimeters (1 inch) long and are greenish yellow, turning darkish red with age. The plants live within an area of approximately 0.018 hectare (2,000 square feet) on a steep rock bluff at an elevation of about 300 meters (1,000 feet). This area is a remnant of a native, open, dryland forest and receives approximately 150 centimeters (60 inches) of rain annually. The area's yearly mean temperature ranges from 18.5 to 25.7 degrees Centigrade (65 to 78 degrees Fahrenheit). Associated species include *Sapindus oahuensis, Erythrina sandwicensis, Diospyros ferrea,* and *Melia azedarach.* The ground cover is sparse and consists chiefly of exotic grasses and forbs (Herbst, 1978).

Although goats are not known to browse on the present plant population, browsing by an existing large feral goat population was probably responsible for the species' decline and could threaten the continued existence of the remaining plants. Other threats come from fire, competition with exotic species, and human disturbance. A cooperative effort between Federal and State agencies is needed to protect the remaining plants and to provide for the species' recovery.

The Secretary of the Smithsonian Institution, as directed by section 12 of the Endangered Species Act of 1973, prepared a report on those plants considered to be endangered, threatened, or extinct in the United States. This report (House Document No. 94–51) was presented to Congress on January 9, 1975. On July 1, 1975, the Fish and Wildlife Service published a notice in the Federal Register (40 FR 27823) accepting the report as a petition within the context of section 4(c)(2) of the Endangered Species Act (petition acceptance provisions are now contained in section 4(b)(3)(A)), and giving notice of its intention to review the status of the plant taxa named therein, including *Hibiscadelphus distans.* As a result of this review, on June 16, 1976, the Service published a proposed rule in the Federal Register (41 FR 24523) to determine approximately 1,700 vascular plant species, including *Hibiscadelphus distans,* to be endangered pursuant to section 4 of the Act. In 1978, amendments to the Act required that all proposals over 2 years old be withdrawn. A 1-year grace period was given to proposals already over 2 years old. On December 10, 1979, the Service published a notice in the Federal Register (44 FR 70796) of the withdrawal of that portion of the June 16, 1976, proposal that had not been made final, along with four other proposals that had expired. The Service published an updated notice of review for plants on December 15, 1980 (45 FR 82480), including *Hibiscadelphus distans.* On October 13, 1983, a further finding was made that listing of *Hibiscadelphus distans* was warranted, but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act; notification of this finding was published on January 20, 1984 (49 FR 2485). Such a finding requires the petition to be recycled, pursuant to section 4(b)(3)(C)(i) of the Act. This proposed rule constitutes the finding that the petitioned action is warranted and proposes to implement the action in

accordance with section 4(b)(3)(B)(ii) of the Act.

Removal of or damage to any of the few remaining individuals of *Hibiscadelphus*

is not prudent for this species at this time. As discussed under Factor "B" in

Federal agencies to ensure that activities they authorize, fund, or carry

section 10(a) of the Act, until revised regulations are promulgated to

requests must be made in writing to the Service's Regional Director (see

accordance with section 4(b)(3)(B)(ii) of the Act.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (to be codified at 50 CFR Part 424; see 49 FR 38900, October 1, 1984) set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Hibiscadelphus distans* Bishop and Herbst (Kauai hau kuahiwi) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* The habitat of *Hibiscadelphus distans* is subject to disturbance from several sources. Large herds of feral goats graze within the canyon and have destroyed surrounding vegetation. Goats may also dislodge stones from the ledges above the species, potentially damaging the trees and destroying the seedlings (Herbst, 1978). The large goat herds result from specific game management practices aimed at maintaining high goat population levels for hunting.

Human disturbance also presents a serious threat to the species. A hiking trail passes below the ledge where *Hibiscadelphus distans* is found, and activity by hikers straying off this path may impact the species by dislodging stones and increasing erosion of the friable soil. Trees may suffer additional damage by being used as "hand-holds" by hikers scaling the steep embankment.

The habitat disturbances created by people and feral goats have favored the introduction and spread of exotic vegetation. Today, small pockets of native plants can be found, but much of the canyon has been taken over by exotic species. Competition with exotic species and environmental changes brought about by changes in the vegetation have had a serious impact on many of the area's native species of plants and animals.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* The area where *Hibiscadelphus distans* exists is easily accessible to people and has already experienced incidents of unauthorized taking and vandalism. When the Hawaii State Department of Forestry and Game labeled plants along the trail system adjacent to the species' habitat, many of the labeled plants were dug up or damaged by people using the trail. Removal of or damage to any of the few remaining individuals of *Hibiscadelphus distans* could seriously jeopardize the chances of the species' survival.

C. *Disease or Predation.* Browsing by feral goats upon *Hibiscadelphus distans* probably responsible for the species' currently depleted status. Although the remaining plants are apparently free from grazing pressure, the situation is still precarious. Should this grazing pressure increase, through either environmental changes or game management practices, goats may be driven into areas they usually avoid, imperiling the few remaining trees.

D. *The inadequacy of existing regulatory mechanisms. Hibiscadelphus distans* of found in an area within the State-owned Pu'u Ka Pele Forest Reserve. State regulations prohibit the removal, destruction, or damage of plants found on State forest land. However, these regulations are difficult to enforce due to limited personnel. The Endangered Species Act will offer additional protection to this species.

E. *Other natural or manmade factors affecting its continued existence.* The small, extant population (10 individuals) remaining makes *Hibiscadelphus distans* vulnerable to any catastrophe, natural or man-caused, that may impact the area. Reduction of the gene pool and genetic variability, resulting from a small population size, could have detrimental effects on the continued existence of the species. The presence of a trail rest shelter with a small fire pit near this lone population adds a potential threat of destruction by fire during the dry season.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Hibiscadelphus distans* as endangered. Only 10 individuals remain in the wild, and these face threats from feral goats, fire, competition with exotic species, and human disturbance. Given these circumstances, the determination of endangered status seems warranted. See the following "Critical Habitat" section for a discussion of why critical habitat is not being proposed.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species that is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. As discussed under Factor "B" in the "Summary of Factors Affecting the Species," *Hibiscadelphus distans* is subject to taking and vandalism. Plants along a trail near the area where the species occurs have already experienced incidents of unauthorized taking and vandalism. Publication of a critical habitat description in the **Federal Register** would subject those few remaining individuals to an increased risk of taking and vandalism. In addition, since the plant only occurs on State land, and the State of Hawaii is aware of its status, no net benefit would accrue to the species from the designation of critical habitat. Therefore it would not be prudent to designate critical habitat for *Hibiscadelphus distans* at this time.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States, and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. Since *Hibiscadelphus distans* is known only to occur on State land, cooperation between Federal and State agencies is necessary to ensure its continued existence and provide for its recovery. The protection required of Federal agencies and the prohibitions against trade and collecting are discussed, in part, below:

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened, and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed habitat. If a species is listed subsequently, section7 (a)(2) requires

Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. No Federal involvement is known or anticipated to affect *Hibiscadelphus distans* at this time.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63, set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. With respect to *Hibiscadelphus distans*, all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, would apply. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. Due to the numerous threats experienced and its depleted state in the wild, it may be necessary to propagate this species in nurseries. Several specimens are presently found in cultivation and seeds have been sent to Dr. P. Fryxell at Texas A&M University. Requests for trade permits for scientific purposes and enhancing the propagation of the species, allowed under § 17.62, may result if an artificial propagation plan is pursued. Otherwise it is anticipated that few, if any, trade permits would ever be sought or issued, since the species is not common in cultivation or in the wild.

Section 9(a)(2)(B) of the Act, as amended in 1982, prohibits the removal and reduction to possession of endangered plant species from areas under Federal jurisdiction. The new provision would apply to *Hibiscadelphus distans* should it be found on land under Federal jurisdiction. Permits for exceptions to this prohibition are available through section 10(a) of the Act, until revised regulations are promulgated to incorporate the 1982 Amendments. Proposed regulations implementing this new prohibition were published on July 8, 1983 (48 FR 31417) and it is anticipated that these will be made final following public comment. Currently, the species is known only to occur on State land not under Federal jurisdiction. It is anticipated that few, if any, permits for collecting this species will ever be requested. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1903).

Public Comments Solicited

The Service intends that any final rule adopted will be accurate and as effective as possible in the conservation of endangered or threatened species. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry or any other interested party concerning any aspect of these proposed rules are hereby solicited. Comments particulary are sought concerning the following:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to *Hibiscadelphus distans*;

(2) The location of any additional populations of *Hibiscadelphus distans* and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range and distribution of this species; and

(4) Current or planned activities in the subject area and the possible impacts on *Hibiscadelphus distans*.

Final promulgation of the regulation on *Hibiscadelphus distans* will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing to the Service's Regional Director (see ADDRESSES section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined by the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

BILLING CODE 4310-55-M

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Abutilon Menziesii (Ko'oloa 'ula)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to list *Abutilon menziesii* (ko'oloa 'ula) as an endangered species. This plant is known from only three small populations located on the islands of Lanai, Maui, and Oahu, in the State of Hawaii. These populations are vulnerable to any substantial habitat alteration and face the potential threats of fire, flood, overgrazing by feral animals, and predation by the Chinese rose beetle. A determination that *Abutilon menziesii* is an endangered species would implement the protection provided by the Endangered Species Act of 1973, as amended. Comments and related materials on this proposal are solicited.

DATES: Comments from all interested parties must be received by September 6, 1985. Public hearing requests must be received by August 30, 1985.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Regional Director, U.S. Fish and Wildlife Service, Lloyd 500 Building, Suite 1692, 500 NE. Multnomah Street, Portland, Oregon 97232.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne S. White, Chief, Division of Endangered Species, U.S. Fish and Wildlife Service, Lloyd 500 Building, Suite 1692, 500 NE. Multnomah Street, Portland, Oregon 97232 (503/231-6131 or FTS 429-6131).

SUPPLEMENTARY INFORMATION:

Background

Abutilon menziesii was first collected by Dr. Archibald Menzies while in Hawaii with Capt. George Vancouver aboard the "Discovery" in 1790-1794. In 1865, B.C. Seemann found Menzies' collection in the British Museum of Natural History, London. Seemann described the plant and named it for Dr. Menzies. The exact locality of Menzies' collection is unknown. The collection site was listed simply as "The Sandwich Islands." The plant is a shrub, 6-8 feet (2-2.5 m) tall, with coarsely-toothed, silvery, heart-shaped leaves 1-3 inches (2-8 cm) long. The flowers are dark red, about 0.8 inch (2 cm) across. The capsules are hairy, five- to eight-parted, with about three seeds per cell.

The species formerly grew on the islands of Hawaii, Maui, and Lanai; today there are fewer than 25 plants growing naturally in the wild. The principal population is on Lanai. There is a very small remnant population on Maui, and one plant on Oahu is probably an escape from cultivation. The extant populations are threatened by exotic animals (e.g., axis deer, Chinese rose beetle), soil erosion, fire, flood, and commercial development.

Federal actions involving *Abutilon menziesii* began with section 12 of the Endangered Species Act of 1973, which directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report, designated as House Document No. 94-51, was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its to Congress on January 9, 1975. On July 1, 1975, the Service published a notice in the **Federal Register** (40 FR 27823) of its acceptance of the report of the Smithsonian Institution as a petition within the context of section 4(c)(2), now section 4(b)(3)(A) of the Act, and of its intention to review the status of the plant taxa named therein. On June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to determine approximately 1,700 vascular plant taxa to be endangered species pursuant to Section 4 of the Act. This list was assembled on the basis of comments and data received by the Smithsonian Institution and the Service in response to House Document No. 94-51 and the July 1, 1975, **Federal Register** publication. *Abutilon menziesii* was included in the July 1, 1975, notice and the June 16, 1976, proposal. General comments on the 1976 proposal were summarized in an April 26, 1978, Federal Register publication (43 FR 17909).

The Endangered Species Act Amendments of 1978 required that all proposals over 2 years old be withdrawn. A 1-year grace period was allowed for proposals already over 2 years old. In the December 10, 1979, **Federal Register** (44 FR 70796), the Service published a notice of withdrawal of the pending portion of the June 16, 1976, proposal, along with four other proposals that had expired. *Abutilon menziesii* was included as a category 1 species in a revised list of plants under review for threatened or endangered classification published in the December 15, 1980, **Federal Register** (45 FR 82480). Category 1 comprises taxa for which the Service has sufficient biological information on hand to support their being proposed for listing as endangered or threatened species.

The Endangered Species Act Amendments of 1982 required that all petitions pending as of October 13, 1982, be treated as having been newly submitted on that date. Findings were made on October 13, 1983, and again on October 12, 1984, that listing *Abutilon menziesii* was warranted, but precluded by pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act. This proposed rule indicates that the petitioned action is warranted, and constitutes the additional required petition finding in accordance with section 4(b)(3)(B)(ii) of the Act.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (codified at 50 CFR Part 424) set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Abutilon menziesii* Seemann (ko'oloa 'ula) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* *Abutilon menziesii* has been described by collectors from several localities. A recorded population of this species on the island of Hawaii has disappeared completely. The species is now reduced to fewer than 25 individuals on the islands of Lanai, Maui, and Oahu. The Lanai population is now found only at one very small peripheral site, whereas it previously had been recorded from at least six different localities. Only two plants are found on Maui, and the Oahu population consists of a single individual, thought to have escaped from cultivation.

Much of the land where *Abutilon menziesii* had occurred has been cleared for cultivation (pineapple and sugar cane) or pasture, with the land often abandoned in later years. Erosion has been and continues to be a major threat to *Abutilon menziesii*. The Lanai population is in an area that is quite heavily eroded and the Maui population maintains a tenuous existence in a gulch subject to erosion and grazing. All known populations are frequently exposed to severe drought and periodic flooding. Flooding increases the erosion and threatens the existing populations. Also, the drought conditions often lead to wildfires that could destroy any of the existing populations. Overgrazing by axis deer, cattle, and goats also aggravates the erosion problems. Development for housing and commercial use is a continuing threat. The site where the Oahu population grows will almost certainly be developed in the future.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Although *Abutilon menziesii* is not greatly sought after by collectors, the species is occasionally used in ornamental plantings. Since the population has been reduced to fewer than 25 individuals, any collecting for commercial or scientific use would be significant.

C. *Disease or predation.* Browsing by cattle, goats, and axis deer is primarily responsible for decline of *Abutilon menziesii* and may prevent reestablishment of the species. Cattle browsing has been the major problem and is evidently responsible for the disappearance of the plant from the island of Hawaii. Axis deer and feral goats apparently pose the major threat to the plants currently existing on Lanai.

The Chinese rose beetle (*Adoretus sinicus*) has also been documented to defoliate the plants. Since the plants produce new leaves only during a flush growth period in the wet season, such defoliation has a significant negative impact on the survival of the species.

D. *The inadequacy of existing regulatory mechanisms.* There are no State laws or existing regulatory mechanisms at the present time to protect *Abutilon menziesii* or prevent its further decline. Federal listing would automatically invoke listing under State law, which prohibits taking and encourages conservation by the State government.

E. *Other natural or manmade factors affecting its continued existence.* The small number of surviving plants in such small areas makes this species very susceptible to extinction because small fluctuations in any of several environmental factors could have a devastating effect. A single fire or flood on Lanai could wipe out the principal population of *Abutilon menziesii*. Loss of genetic variability is likely in a population of such low numbers. The decline of many native insect pollinators, especially *Nesoprosopis* bees, probably poses an additional threat.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Abutilon menziesii* as endangered. Its decline in numbers to approximately 25 individuals and reduction in range to 3 sites indicate the appropriateness of listing this species as endangered.

It is not prudent to proposed critical habitat because doing so would increase risk for the species, as detailed in the next section.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species that is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. *Abutilon menziesii* has been reduced to three populations and fewer than 25 individuals in a limited geographical range. Any publication of critical habitat descriptions giving the localities of these populations could result in collecting or vandalizing at the sites. All populations are on private land and minimal benefit to the species would result from designating critical habitat.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States, and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. There is no known Federal involvement affecting *Abutilon menziesii*, since all populations occur on private land. Voluntary or mandatory protection of this species and its habitat will require cooperation among private landowners, the State of Hawaii, the County of Maui, and the U.S. Fish and Wildlife Service.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. With respect to *Abutilon menziesii*, all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, would apply. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. It is anticipated that few trade permits involving the species

would ever be sought or issued since the species is not common in cultivation or

addressed to the Regional Director (see **ADDRESSES** section).

Wildlife Service, P.O. Box 50167, Honolulu, Hawaii 96850 (808/546-7530).

The State-owned land is under the jurisdiction of the County of Maui. The

on or before October 13, 1985; this proposed rule constitutes the finding

VOL 50 ISS 136 JL 16 1985 UMI

would ever be sought or issued since the species is not common in cultivation or in the wild.

Section 9(a)(2)(B) of the Act, as amended in 1982, prohibits the removal and reduction to possession of endangered plant species from areas under Federal jurisdiction. The new prohibition will apply in *Abutilon menziesii*. Permits for exceptions to this prohibition are available through section 10(a) of the Act, until revised regulations are promulgated to incorporate the 1982 Amendments. Proposed regulations implementing this new prohibition were published on July 8, 1983 (48 FR 31417), and it is anticipated that these will be made final following public comment. *Abutilon menziesii* occurs solely on private lands, so requests for taking permits are not anticipated. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1903).

Public Comments Solicited

The Service intends that any final rule adopted will be accurate and as effective as possible in the conservation of each endangered or threatened species. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to *Abutilon menziesii*;

(2) The location of any additional populations of *Abutilon menziesii* and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range and distribution of this species; and

(4) Current or planned activities in the areas mentioned and their possible impacts on *Abutilon menziesii*.

Final promulgation of the regulations on *Abutilon menziesii* will take into consideration any comments and any additional information received by the Service, and such communications may lead to adoption of a final rule that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Regional Director (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined by the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Endangered and threatened wildlife, Fish, Marine mammals, Plants (agriculture).

Proposed Regulation Promulgation

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, as set forth below:

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*).

2. It is proposed to amend § 17.12(h) by adding the following, in alphabetical order under the family Malvaceae, to the List of Endangered and Theatened Plants:

§ 17.12 Endangered and threatened plants.

BILLING CODE 4310–55–M

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Rule To Determine Endangered Status for Scaevola Coriacea (Dwarf Naupaka)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine endangered status for *Scaevola coriacea*(dwarf naupaka). Populations, once prevalent throughout the major Hawaiian Islands, are now limited to four small areas of State and privately owned land in Maui County, Hawaii. The only significant population, near Waiehu Point, is threatened by imminent residential development. Approximately two-thirds of the plant's remaining habitat will be impacted by this action. Protective measures for the remaining plants are needed. Determination of *Scaevola coriacea* as endangered would implement the protection provided under the Endangered Species Act of 1973, as amended. The Service seeks relevant data and comments.

DATES: Comments from all interested parties must be received by September 16, 1985. Public hearing requests must be received by August 30, 1985.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Regional Director, U.S. Fish and Wildlife Service, 500 N.E. Multnomah Street, Portland, Oregon 97232. Comments and materials received will be available for public inspection, by appointment, during normal business hours, at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne S. White, Division Chief, Endangered Species, U.S. Fish and Wildlife Service, 500 N.E. Multnomah Street, Portland, Oregon 97232 (503/231–6131 or FTS 429–6131).

SUPPLEMENTARY INFORMATION:

Background

Scaevola coriacea is a sparsely branched, prostrate shrub found in close proximity to the ocean. It was first collected by David Nelson in 1779, and later described by T. Nuttall (1843), based on specimens collected on "Atooi" (Kauai) in 1835. Its leaves are thick and succulent, light green, and about 2.5 centimeters (1 inch) in length. Cream-colored flowers, 1.9 centimeters (0.75 inch) long, may open at any time during the year. The flower is typical of the genus *Scaevola*, with a corolla split down the upper side so that it resembles half of a radially symmetrical flower that has been divided longitudinally. This is sometimes referred to as a "half-flower." The fruit is purplish black and approximately 1.3 centimeters (0.5 inch) in length, and contains 2 seed cells (Carr, 1981). Single plants may cover up to 10 square meters (108 square feet) of surface area.

Sites occupied by *Scaevola coriacea* are mostly on low, consolidated sand dunes near the ocean. The habitat is relatively dry and hot, averaging arounf 79 centimeters (31.5 inches) of precipitation per year (Carr, 1981). The sites receive high insolation and most of the vegetation is at or near ground level. Associated species include *Scaevola taccada* (a common, shrubby member of the same genus), *Bidens mauiensis*, *Nama sandwicensis*, *Boerhavia diffusa*, and *Lipochaeta integrifolia* (Herbst, 1972).

Historically, populations of *Scaevola coriacea* were present on all the major Hawaiian islands, with Maui supporting the most extensive populations. Presently, only four small populations remain in Maui County, Hawaii: At Waiehu Point, West Maui; at Kaupo, East Maui; on the islet of Moke'ehia, off West Maui; and on the islet of Mokuho'oniki, east of Molokai. The islets are part of the Hawaiian State Seabird Sanctuary and are under the jurisdiction of the State Department of Land and Natural Resources. The Waiehu Point population is split between State and private ownership. The State-owned land is under the jurisdiction of the County of Maui. The Kaupo population is entirely on private land. Lose of current and suitable habitat to development represents the major threat to the species. Protection of the remaining habitat from degradation, through a cooperative State, Federal, and County effort, is needed to ensure the species' continued existence.

Section 12 of the Endangered Species Act of 1973 directed the Secretary of the Smithsonian Institution to prepare a report on those plants considered to be endangered, threatened, or extinct. This report (House Document No. 94–51) was presented to Congress on January 9, 1975. On July 1, 1975, the Service published a notice of review in the **Federal Register** (40 FR 27823) accepting this report as a petition within the context of section 4(c)(2) of the Act (petition acceptance is now governed by section 4(b)(3) of the Act, as amended). On June 16, 1976, the Service published a proposed rule in the **Federal Register** (41 FR 24523) to determine approximately 1,700 vascular plant taxa to be endangered species pursuant to section 4 of the Act. *Scaevola coriacea* was included in the Smithsonian report, the notice of review of July 1, 1975, and the proposal of June 16, 1976.

The Endangered Species Act, as amended in 1978, required that all proposals over 2 years old be withdrawn, except that a 1-year grace period was given to proposals already over 2 years old. On December 10, 1979, the Service published a notice of withdrawal of the June 16, 1976, proposal, along with four other proposals that had expired (44 FR 70796). In the **Federal Register** of December 15, 1980 (45 FR 82480), the Service published a revised notice of review. *Scaevola coriacea* was included in this notice as a category–1 species, indicating that existing data warranted proposal to list as endangered or threatened.

The Endangered Species Act Amendments of 1982 required that all petitions pending as of October 13, 1982, be treated as having been newly submitted on that date. *Scaevola coriacea* was subject to this provision, so that a finding was required within one year as to whether its listing was warranted. On October 13, 1983, and again on October 12, 1984, the petition finding was made that listing *Scaevola coriacea* was warranted but precluded by other pending listing actions, in accordance with section 4(b)(3)(B)(iii) of the Act. Such a finding requires a recycling of the petition, pursuant to section 4(b)(3)(C)(i) of the Act. Therefore, a new finding must be made on or before October 13, 1985; this proposed rule constitutes the finding that the petitioned action is warranted and proposes to implement the action in accordance with section 4(b)(3)(B)(ii) of the Act.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*) and regulations promulgated to implement the listing provisions of the Act (codified at 50 CFR Part 424; 49 FR 38900, October 1, 1984) set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to *Scaevola coriacea* (dwarf naupaka) Nutt. are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range.* Historically, *Scaevola coriacea* was present on all the major Hawaiian islands, with Maui supporting the largest populations. Presently, the species only exists in four small areas of Maui County, Hawaii: Waiehu Point, West Maui; Kaupo, East Maui; the islet of Moke'ehia off West Maui; and Mokuho'oniki, east of Molokai. The entire known population consists of approximately 350 individuals, 300 of which are found at Waiehu Point (Carr, 1981).

The Waiehu Point pouplation occurs on four sand dunes, both on State land, as part of Waiehu Golf Course, and on private land, owned by a realty company. The latter is scheduled for development in the near future. Loss of nearly two-thirds of the species' remaining habitat will result from this action. Habitat degradation of the remaining fraction of public land by the activity of golfers off the fairway is a potential, but probably minimal, threat to the plant.

B. *Overutilization for commercial, recreational, scientific, or educational purposes. Scaevola coriacea* is subject to taking and vandalism due to the accessiblity of its habitat and current unprotected status. The flowering plant is attractive and has been noted as being ". . . a worthwhile plant for homes by the beach" (Degener and Greenwell, 1950).

C. *Disease or Predation.* No such threats to *Scaevola coriacea* are known to occur at this time.

D. *The inadequacy of existing regulatory mechanisms.* A special permit is required to land on Mokuho'oniki islet. No additional

VOL 50 ISS 136 JL 16 1985 UMI

protection is now provided to *Scaevola coriacea*.

E. *Other natural or manmade factors affecting its continued existence.* Further reductions of the breeding population may have adverse effects on the reproductive capacity and survival ability of this species (Carr, 1981).

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Scaevola coriacea* as endangered. The low number of individuals in the wild and the imminent loss of two-thirds of its remaining habitat warrant this decision. Critical habitat is not being designated because of the reasons described below.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requries that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species that is considered to be critical habitat at the time the species is determined to be endangered to threatened. The Service finds that designation of critical habitat is not prudent for this species at this time. As discussed under Factor "B" in the "Summary of Factors Affecting the Species," *Scaevola coriacea* is potentially subject to collecting, an activity difficult to control and not regulated by the Endangered Species Act with respect to plants, except for a prohibition against removal and reduction to possession of endangered plants from lands under Federal jurisdiction. The plant currently occurs on State and private land outside Federal jurisdiction. Publication of critical habitat descriptions would make this species more vulnerable to taking and vandalism. In addition, there would be no net benefit to this species from such a designation. Therefore, it is not prudent to designate critical habitat for *Scaevola coriacea* at this time.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. Section 6 of the Endangered Species Act of 1973, as amended, details conditions for cooperative action between the Service and State agencies. Such actions as the establishment of conservation programs, acquisition of land, scientific research, and funding are provided for under section 6(b), management, and 6(c), cooperative agreements. The State of Hawaii has entered into a cooperative agreement with the Service. Since much of the remaining habitat of *Scaevola coriacea* occurs on State land, cooperation among Federal, State, and County officials will be necessary to ensure the continued survival of the species. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below:

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to areas proposed or designated as critical habitat. Regulations implementing this interagency cooperation provisions of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or destroy or adversely modify proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. No Federal activities are known or expected to affect *Scaevola coriacea*.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plant species. With respect to *Scaevola coriacea*, all trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, would apply. These prohibitions, in part, would make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. Cultivated specimens of *Scaevola coriacea* can be found at several sites in Hawaii, including the Maui Zoo and Botanical Garden and the courtyard of the Plant Science Building at the University of Hawaii. However, it is anticipated that few trade permits would ever be sought or issued since the species is not otherwise common in cultivation or in the wild.

Section 9(a)(2)(B) of the Act, as amended in 1982, prohibits the removal and reduction to possession of endangered plant species from areas under Federal jurisdiction. This provision would apply to *Scaevola coriacea* should it be found on Federal land. Permits for exceptions to this prohibition are available through section 10(a) of the Act, until revised regulations are promulgated to incorporate the 1982 Amendments. Proposed regulations implementing this prohibition were published on July 6, 1983 (48 FR 31417), and it is anticipated that these will be made final following public comment. *Scaevola coriacea* is known only to occur on State and privately owned land. It is anticipated that few, if any, collecting permits would ever be requested for the species. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1903).

Public Comments Solicited

The Service intends that any final rule adopted will be accurate and as effective as possible in the conservation of endangered or threatened species. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of these proposed rules are hereby solicited. Comments particularly are sought concerning the following:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to *Scaevola coriacea;*

(2) The location of any additional populations of *Scaevola coriacea* and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range and distribution of this species; and

(4) Current or planned activities in the subject area and their possible impacts on *Scaevola coriacea.*

Final promulgation of the regulation on *Scaevola coriacea* will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if one is requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Regional Director (see **"ADDRESSES"** section, above).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined by the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N-85-1536; FR-2122]

Fund Availability and Solicitation of Proposals for Project Self-Sufficiency

AGENCY: Office of the Secretary, HUD.

ACTION: Notice of fund availability and solicitation of proposals from eligible communities to participate in project self-sufficiency.

SUMMARY: HUD is soliciting proposals from units of general local government including county governments to participate in Project Self-Sufficiency. The Department is interested in encouraging local governments to develop and implement programs to enable unemployed or underemployed very low-income single parents with young children to become economically self-sufficient through the cooperative efforts of the public and private sectors. This demonstration, which involves the resources of several offices within the Department of Housing and Urban Development, will be coordinated by the Office of the Assistant Secretary for Policy Development and Research.

DATES: Application Deadline: Proposals for participation must be received by HUD at the address for application no later than 5:15 p.m. Eastern Daylight Savings Time on August 21, 1985. Letters of Intent will not be accepted. Please refer to § 4.4(b) for the deadline for submission of the section 8 Existing Housing application for this demonstration.

ADDRESS: There is *no application form.* Application is by written proposal only. An original and 5 copies of the proposal should be sent to: Dr. June Q. Koch, Assistant Secretary for Policy Development and Research, Department of Housing and Urban Development, Attention: Project Self-Sufficiency, Room 8128, 451 Seventh Street SW., Washington, D.C. 20410.

The proposal must contain the typed or printed name, mailing address, including zip code and telephone number of the local government's chief exeuctive officer, and the Director of the local Public Housing Agency (PHA), and the person to be contacted locally regarding the contents of the proposal.

FOR FURTHER INFORMATION CONTACT: Regarding Project Self-Sufficiency and proposal matters, contact: Francetta J. White, Telephone: (202) 755-5561. Regarding section 8 Existing Housing Program matters, contact Gwen Carter, Telephone: (202) 755-6887. (These are not toll-free numbers.)

SUPPLEMENTARY INFORMATION:

1. General

"Project Self-Sufficiency" is designed to aid unemployed or underemployed very low-income single parents with young children make the transition from public assistance to productive employment and economic self-sufficiency. Activities to be carried out by local governments selected to participate in this demonstration will include, but are not limited to, housing assistance, child care, adult basic education where necessary, personal and career counseling, transportation, and job training and placement.

Any unit of general local government (e.g. city, county, or town) may apply for Project Self-Sufficiency. Joint applications by units of general local government are permitted.

Project Self-Sufficiency is an effort to encourage communities to develop effective mechanisms for integrating the various support services—both public and private—that exist in the community into a personal development program for single parents to enable them to make the transition from welfare dependency to productive employment. Communities are expected to coordinate and commit the use of all the necessary local public resources, which may include Community Development Block Grant funds (CDBG), to support the components of the self-sufficiency program. In addition, communities are expected to secure commitments from the local private sector to provide additional resources and opportunities for employment for Project Self-Sufficiency participants.

Under Project Self-Sufficiency, communities will be able to use a special allocation of section 8 Existing Housing Certificates to help single parent participants obtain decent, safe, sanitary and affordable housing as a part of a comprehensive and coordinated program. Communities may also encourage single parents to obtain housing in areas close to support services if doing so would facilitate the coordination of the other support services. Decent and affordable housing is a first step in creating the stable environment necessary to allow these single parents to develop their capabilities to become self-sufficient members of the community.

Accordingly, the Department will provide the Public Housing Agency (PHA) administering a section 8 Existing Housing Program in a community selected for participation in this demonstration with a special allocation of section 8 Existing Housing Certificates to be used in conjunction with the local Self-Sufficiency project. Up to 5000 section 8 Certificates will be made available nationwide for this demonstration. Certificates will be awarded according to the criteria set forth in this Notice. The Department reserves the right to reallocate, subject to applicable law, the section 8 allocation to other participating communities if the requirements of sections 4.3 and 5.4 of this Notice are not fulfilled.

For currently approved PS-S demonstration sites, the Department will consider the progress achieved, as described in section 6.9 of this Notice, in implementing Project Self-Sufficiency and the community's capacity to carry out this demonstration. No more than 50 percent of the Section 8 authority to be allocated in this demonstration may be awarded to communities currently participating in Project Self-Sufficiency.

HUD will also provide, to the maximum extent possible, technical assistance by HUD staff or by private consultants to assist participating communities in implementing effective Self-Sufficiency Programs. No separate funds will be provided to local governments for the implementation of Project Self-Sufficiency.

Each participating community will have the flexibility to design a Self-Sufficiency Program to meet its local needs, priorities and government structures within the guidelines established in this Notice.

Communities are invited to apply for participation in this program in accordance with the requirements established in this Notice. The application, in the form of a written proposal, must be signed and submitted by the chief executive officer. The chief executive officer is defined as the chief elected official, or the legally designated official who has the primary responsibility for the conduct of that unit's governmental affairs. Examples of the "chief executive officer" of a unit of local government are: The elected mayor of a municipality; the elected county executive of a county; the chairman of a county commission or board in a county that has no elected county executive; the official designated pursuant to law by the governing body of the unit of general local government; or the chairman, governor, chief, or president (as the case may be) of and Indian tribe or Alaskan native village.

2. Background

In 1982, almost 11 percent of the more than 61 million families in the United States were single parent families, according to data available from the U.S. Census Bureau. These families inlcuded 6.8 million children under the age of twelve or approximately six percent of all children under twelve in the country. More than one-half of those families with at least two children had incomes below the poverty level.

Single parent families with very low incomes face many difficult problems. Many single parents are unemployed or underemployed and lack resources such as adequate child care services, transportation or a stable housing environment necessary to enable them to acquire skills to obtain employment.

The Department of Housing and Urban Development has determined that the widespread and multifaceted problems of very low-income families require that the Department test new and innovative techniques to assist those who live below the poverty level to become parf of the economic mainstream. To further this objective, the Department of Housing and Urban Development has developed a number of demonstrations which are collectively known as the Quality of life Initiatives. These initiatives share the following features:

- They emphasize the coordination of resources already available from Federal, State, and local sources rather than the funding of new programs.
- They stress local autonomy in design and implementation. Broad program objectives must be met but communities tailor individual programs to meet their own unique needs.
- They require the commitment of all major local sectors; private business, local elected officials, the Public Housing Agency, educational, philanthropic and community organizations, and the residents themselves.

Project Self-Sufficiency is a demonstration developed and implemented within these broad guidelines to improve the quality of life of single parent families.

Over the years a variety of local, State and Federal programs, including welfare, housing assistance and job training, have been established to deal wth specific needs of lower-income families. However, these programs are generally administered separately by different agencies at varying levels of government. Additionally, charitable organizations that can and do provide assistance to needy families exist in every community but rarely are these private efforts coordinated with that of the public sector. Thus, even though their clientele may be the same, there is often no effective mechanism established within the community to integrate these services and programs.

On May 21, 1984, the Department published in the **Federal Register** (49 FR 21433) a Notice of Fund Availability to initiate the Project Self-Sufficiency Demonstration.

A comment period was provided. Listed below is a summary of the comments received:

Two comments recommended that organizations other than PHAs administer the Section 8 certificates. This recommendation is contrary to HUD regulations and could not be implemented.

One comment requested increases in rent allowance. Rental assistance limits are reviewed on a regular basis and adjusted in accordance with HUD regulations.

One comment recommended allowing a longer response time. The Department attempted to allow a greater response period; however, budgetary and time restrictions do not allow for a longer response period.

One comment recommended that HUD provide additional funds for staffing and coordination. Project Self-Sufficiency is designed to emphasize the coordination of existing services rather than funding of new programs, to build private-public partnerships and to determine the capability of leveraging private resources with Section 8 assistance. To provide additional funds for administering Project Self-Sufficiency would undermine the purposes of the demonstration.

Two comments dealt with combining all PS-S activities into one facility or building a new facility to house all PS-S activities. There are no restrictions to providing all service activities at one facility provided it can be accomplished within the time frame of the demonstration. Housing may be offered in one facility, but housing choice may not be restricted to that facility.

As a result of the original announcement of Project Self-Sufficiency in 1984, the Department received over 220 proposals from communities. Seventy-eight (78) of these communities were selected for participation. The Demonstration sites have successfully established task forces, developed Action Plans, and leveraged private resources using the Section 8 housing assistance provided by HUD. Single-parent participant selection and job-training programs are underway, and in some cases employment has begun.

In view of these experiences and the continuing interest of local governments in Project Self-Sufficiency as exhibited by inquiries from individuals and communities not participating in the current demonstration, the Department is, with this Notice, reaffirming its continuing commitment to improving the quality of life for single parents by announcing an additional allocation of section 8 Existing Housing authority for Project Self-Sufficiency. The Department has determined that it would be particularly useful in the Demonstration to emphasize assistance to single parents who are motivated but have long-standing problems, such as lack of adequate, basic education, long-term unemployment, and other special problems that severely limit their ability to become self-sufficient. In an effort to better serve the "hard to serve" segment of the very low-income single parent population, the guidelines for communities selected in Fiscal Year 1985 to receive section 8 Authority for the Project Self-Sufficiency Demonstration are being clarified to encourage communities to target the local demonstration to single parents with special long-standing needs. For example, this Notice adds adult basic education to the list of service needs that should be addressed in the mutually agreed upon plan for the delivery of a coordinated program of housing, counseling, child care, transportation, job training and placement assistance to single parent participants.

Other major refinements to the demonstration which are being implemented in this Notice for communities selected in Fiscal Year 1985 to receive section 8 units under Project Self-Sufficiency are:

- The active and continued involvement of the local chief executive officer in the operation of the demonstration is being given added emphasis. Preliminary experience from the current demonstration indicates that the involvement of the CEO throughout the demonstration is a key factor in generating effective public/private partnerships.
- Appointment/confirmation of the task force, as discussed in section 4.3 below, must be completed within 60 days of date of the official announcement of demonstration awards.
- An acceptable Action Plan must be submitted to HUD no later than 60 days following the local approval of the task force.
- The Department reserves the right to reallocate, subject to applicable law, the section 8 allocation to other participating communities if the requirements of sections 4.3 and 5.4 are not fulfilled.

VOL

1985
UMI

• A program completion date for the local demonstration must be specified and must be within 30 months from the date of public announcement of demonstration awards, unless prior approval for a longer period is given by HUD. This change is being made to allow consideration of adult basic education, and training courses that might extend beyond the usual 12 to 18 months; e.g., trades or other non-traditional occupations, and training programs for certain career-ladder positions that require more extensive training. However, all section 8 Certificates must be issued within 12 months of the execution of the ACC.

• If *prior to the issuance* of the section 8 Certificate the single-parent participant fails to actively participate in stated activities in the mutually agreed upon Individual Action Plan, the task force may reconsider his/her candidacy and allocate the Certificate to another candidate, in accordance with requirements discussed in section 4.1 below.

No more than 50 percent of the PS–S Fiscal Year 1985 section 8 authority provided under this Notice will be made available to currently approved Demonstration sites.

3. Goals of the Program

The overall goal of Project Self-Sufficiency is to enable very low-income single parents to become economically self-sufficient. Specific objectives of the program are:

(a) To create an awareness in local communities of the problems faced by single parent, very low-income families and to mobilize community support for an effort to help them become self-sufficient and productive members of the community;

(b) To demonstrate the capacity of local communities to assist very low-income single parents to become self-sufficient by the efficient and innovative use of existing public and private resources;

(c) To develop a range of effective strategies for generating private sector involvement and integrating these private sector resources with public assistance programs; and

(d) To document the experiences of implementation of successful Self-Sufficiency Programs that can be adopted in other communities.

4. Resources to be Committed by HUD and Other Participants

4.1 *HUD.*

4.1 (a). HUD will provide a special allocation of section 8 Existing Housing Certificates for use in communities selected for participation in this demonstration. These Certificates will be provided to the local Public Housing Agency by HUD. The PHA shall be responsible for the administration of the Certificates in the community in accordance with the Annual Contributions Contract (ACC) and with the local Self-Sufficiency Program approved by HUD as incorporated into the Administrative Plan. The Certificates are to be made available to very low-income single parents selected for participation in the community's Self-Sufficiency Program to enable them to locate decent safe and affordable housing of their choice. Use of the Certificates may not be restricted to particular housing units, although as discussed in section 5.7, some communities may find it feasible to encourage single parent participants to obtain housing in a single building or area if doing so would facilitate the coordination of the other support services. Up to 5000 Certificates will be made available for this demonstration. The number of Certificates to be provided by HUD to each PHA in a participating community will be within the limits of overall availability and will be based, among other things, on the PHA's performance in running the section 8 Existing Housing program and its capacity to handle an additional allocation, and the number of Certificates requested in relation to the number of very low income single parent families currently on the section 8 waiting list. The Assistant Secretary for Housing-Federal Housing Commissioner will issue a waiver of 24 CFR 882.207 as necessary to permit implementation of Project Self-Sufficiency. A single parent selected for participation must be on the PHA's section 8 waiting list at the time the Certificate is issued. The Task Force (discussed in 4.3 below) may determine at what stage of the program the section 8 Certificate will be given. The PS–S program shall indicate the general criteria which the Task Force will consider with respect to the timing of the issuance of the section 8 Certificate. These criteria shall be reasonably related to the accomplishment of the goals of the PS–S program and must be incorporated into the PHA's Administrative Plan. The timing of the section 8 assistance for each participant in the program must be reflected in the participant's Individual Action Plan (discussed in 5.6 below) and must be related to the specific needs of the participant. However, all PS–S section 8 Certificates must be issued within 12 months of the date of the execution of the Annual Contributions Contract.

If, *prior to the issuance* of the section 8 Certificate, a single parent selected for Project Self-Sufficiency fails to actively participate in one of the stated activities in the mutually agreed upon Individual Action Plan, the Task Force may reconsider his or her candidacy and terminate the single parent from Project Self-Sufficiency. The Task Force must establish a policy for termination of participants from PS–S. The policy must include reasonable and specific criteria for assessing the progress and participation of participants in PS–S, and must be contained in the community's Action Plan and the Administrative Plan of the PHA.

Upon termination of a participant from Project Self-Sufficiency prior to the issuance of a section 8 Certificate, the Task Force may consider another single parent for Project Self-Sufficiency and section 8 assistance. The termination of a single parent from Project Self-Sufficiency prior to the issuance of the section 8 Certificate, will not affect his or her eligibility for regular section 8 assistance and his or her place on the existing waiting list.

Once a Certificate has been issued to a Project Self-Sufficiency participant it cannot be withdrawn (except as provided in 24 CFR 882.210), and any turnover of the Certificate becomes a part of the PHA's regular section 8 Existing Housing Program.

4.1 (b). To the extent possible, HUD will provide technical assistance to communities selected for participation in the demonstration.

4.2 *Local Governments.*

4.2 (a). The chief executive officer is expected to provide the necessary support of the local government for the Self-Sufficiency Program. In addition, the chief executive officer must commit him or herself to continued involvement in and leadership of Project Self-Sufficiency for the duration of the demonstration as specified in the community's Action Plan.

4.2 (b). Each participating community must commit its local service agencies to provide the necessary resources as may be appropriate for the program. Such resources may include, but are not limited to, local government staff, labor and equipment, and general revenues; block grant funds; transportation; and the use of publicly-owned buildings and property.

4.2 (c). Each participating local government must also commit itself to generating private sector commitments for the program. Evidence of private sector commitments will be the willingness of such businesses and private organizations to provide the local Self-Sufficiency program with such assistance as:

—Volunteers or loaned executives
—Donations of equipment, supplies or space
—Monetary contributions
—Employment skills training
—On-the-job training
—Child care support services
—Counseling—personal and career
—Employment opportunities and placement
—Employment information/referrals

4.3 *The Task Force*

The chief executive officer of the participating community shall appoint a Task Force of representatives from the local public and private sectors to oversee the planning and implementation of the local Self-Sufficiency Program. The chief executive officer is strongly urged to chair the Task Force. Current experience has demonstrated that the sustained involvement of the local chief executive officer is a key factor in generating effective private-public partnerships. Although the Task Force may identify a Project Director or administrator to administer the day-to-day activities of the project, the Task Force shall be the over-seeing body and shall be responsible for pulling together the various public and private resources necessary for program implementation. The Task Force must include representatives from the Public Housing Agency, local public and private agencies that have resources or programs available to assist unemployed single parents, local businesses, private employers, the Private Industry Council (where it exists), educational institutions and the single parent population. Communities are encouraged to involve members of the medical, religious, and financial communities in the Task Force. The final approval of the Task Force by the local legislative body, if required, must be completed within 60 days of the date of the official announcement of the demonstration awards.

4.4 *PHA.*

4.4 (a). The PHA must agree in writing, as part of the proposal submitted by the community, to administer the section 8 Certificates on behalf of the local Self-Sufficiency Program and to serve as a member of the local Task Force.

4.4 (b). The cooperating PHA must submit the necessary section 8 Existing Housing application to the HUD Field Office by August 7, 1985. HUD is required by section 213(a) of the Housing and Community Development Act of 1974 to provide the unit of general local government an opportunity to object to HUD's approval of an application for housing assistance on the grounds that the application is inconsistent with the local Housing Assistance Plan. Accordingly, the Chief Executive Officer is encouraged to submit a section 213 letter with the PHA's Application. To avoid any delay in HUD's approval of the PHA's Application, the section 213 letter must indicate that approval of the Application for the section 8 Existing Housing Program is consistent with the community's Housing Assistance Plan, that the letter can be considered the final comments, and that no additional comments will be submitted by the unit of local government. The section 213 letter must be received by the HUD Field Office no later than August 29, 1985.

4.4 (c). Once communities have been selected for participation in this demonstration, the participating PHAs will be required to submit a revised Administrative Plan and Equal Opportunity Housing Plan to the appropriate HUD Field Office before execution of the Annual Contributions Contract (ACC). The Administrative Plan and the Equal Opportunity Housing Plan must include the following: The participant selection process; the criteria to be used to select participants for the demonstration; the policy on the timing of the issuance of section 8 Certificates; and the policy, including the criteria, for removal of participants from PS–S prior to the issuance of a section 8 Certificate. If the section 8 waiting list is to be opened for Project Self-Sufficiency, the criteria and process to be used in opening the waiting list must be included in the revised Administrative Plan.

5. Local Self-Sufficiency Program Design

Each participating community should design a Self-Sufficiency Program that reflects local needs and priorities, available resources, and the existing local government structure. Activities that are required to be undertaken in all local Self-Sufficiency Programs are described in the following paragraphs:

5.1 *Establishment of a Local Task Force.* Each program should begin with the establishment of a local Task Force as described in section 4.3 above. A strong local Task Force will be the motivating force to help the community plan, develop and implement its Self-Sufficiency Program. The Task Force will be responsible for updating and expanding, if necessary, the Needs Assessment (described below), developing community objectives for the program and an Action Plan to meet those objectives, identifying and securing commitments of local public and private resources, developing the selection process and the criteria to be used to select the single parent participants for the program, and overseeing the administration and final evaluation of the program. The single most important role of the local Task Force must be that of identifying and harnessing overall community resources into commitments for specific program support activities.

5.2 *Generating Private Sector Resources.* The Task Force must identify and recruit an active group of local private businesses, employers, and organizations willing to commit funds, staff, equipment, use of buildings and property, training assistance, housing, employment opportunities, and other services to the program. These may include private:

—Employers;
—Businesses;
—Financial institutions;
—Employee organizations;
—Religious organizations;
—Neighborhood organizations;
—Schools and colleges;
—Medical institutions;
—Cultural and civil organizations;
—Voluntary and non-profit service groups;
—Foundations and corporate philanthropies; and
—Individual givers.

5.3 *Needs Assessment.* The purpose of the local Needs Assessment is to identify the particular problems faced by local single parents and the activities and services needed to remove obstacles to their economic independence. The Need Assessment should identify both specific needs of the single-parent population, and availability of specific resources within the community to meet these needs. It should identify areas of potential employment in the community, including non-traditional occupations and occupations having career ladder potential, and the resources, training and other activities that will be needed to help single parents obtain jobs in these areas. Subjects to be covered in addition to employment opportunities and job training shall include, but need not be limited to, housing, child care, basic education where necessary, personal and career counseling, and transportation.

5.4 *Action Plan.* Each community, through its local Task Force, must develop an Action Plan outlining the program services and activities necessary to meet the needs of program

VOL
50
ISS
136
JL
16
1985
UMI

participants as determined by the Needs Assessment.

The preparation of the local Action Plan should begin with review and updating, as necessary, of the Needs Assessment. Any revisions and updating of the Needs Assessment must be submitted with the Action Plan. An acceptable Action Plan must be completed and received by HUD no later than 60 days following the local approval of the Task Force.

The plan must describe specific steps that will be taken to deliver all program services and activities, including, among other things, job placement, participant follow-up after placement and program evaluation; specify a time schedule for each step; indicate the procedures to be used to assure that public and private resources will be integrated to implement the program, and indicate the organization responsible for each activity and for program service implementation. The Action Plan must specify a program completion date when the entire HUD sponsored self-sufficiency demonstration will be completed, including participant follow-up and local program evaluation. This date may not extend beyond 30 months after the date of official announcement of demonstration award without previous approval by HUD.

Although the Self-Sufficiency Action Plan developed by the Task Force in each community should be tailored to meet program participant needs and to make full use of community resources unique to the community as identified by the Needs Assessment, each Action Plan shall include, at a minimum, the following program services and activities:

—A selection process and selection criteria to be used;
—The policy for timing the issuance of the section 8 Certificates;
—The policy for termination of participants from PS–S including the criteria for assessing the progress and participation of participants.
—Provision of adequate case management including: the development of Personal Needs Assessments and Individual Action Plans for program participants; and monitoring of individual progress so problems can be identified early enough to make adjustments to reduce the potential for drop-outs.
—Housing assistance;
—Child care;
—Personal and career counseling;
—Basic education, where necessary, such as general education (GED) training, literacy training and English as a second language;
—Transportation access;
—Development of job skills including on-the-job training where appropriate;
—Job placement through private sector job commitments;
—Follow up after job placement;
—Program evaluation.

Other suggested, though not required, program elements include:

—Support group discussions;
—Medical care;
—Preventive health care training; and
—Home maintenance training.

5.5 *Selection of Program Participants.* The local Task Force, in consultation with the PHA, local service agencies and others as may be designated by the Task Force, will select program participants who are motivated to become self-sufficient. Those selected for participation must be very low-income single parent families as defined in section 3(b)(2) of the United States Housing Act of 1937, and must be on the section 8 waiting list at the time their Certificates are issued.

5.6 *Personal Needs Assessment and Individual Action Plan.* A Personal Needs Assessment must be prepared for each participant. This assessment should identify the specific needs of the participant and any special problems, including the lack of basic educational skills, that could inhibit the participant from achieving self-sufficiency. A recent GAO evaluation of job training programs confirmed that a significant relationship exists between participant education level completed, employment, and Aid for Families with Dependent Children (AFDC) status. The study indicated that the proportion of participants who obtained and kept jobs which enabled them to provide for their families without AFDC benefits was significantly higher for those having completed 12th grade as compared with those having an 8th grade education. Consequently, the Task Force should consider giving primary consideration to assisting those participants who lack a high school diploma to obtain one or to obtain a general education development (GED) equivalent. An Individual Action Plan, mutually agreed upon by the participant and the Task Force, also must be prepared for each participant. It must be based on the information developed in the Personal Needs Assessment and must identify specific activities and services which will help the program participant to become self-sufficient.

The Personal Needs Assessment and the Individual Action Plan are developed in cooperation with the participant, and should clearly specify the resources to be made available to the participant as well as the responsibilities of the participant.

5.7 *Housing Assistance.* The local Public Housing Agency shall be responsible for issuing section 8 Certificates to single parents selected and actively participating in this program. Housing assistance must be assimilated into the larger purpose of helping to create a stable environment for these single parents to allow them to participate in job training programs without undue concern for the welfare and safety of their families. The issuance of the section 8 Certificate should be coordinated with the provisions of the Individual Action Plan. Within these parameters, and in accordance with the Administrative Plan of the PHA, the Task Force has the authority to determine at what stage of the program the section 8 Certificates will be issued. However, all PS–S section 8 Certificates must be issued within 12 months of the execution of the ACC.

To the extent possible, the PHA should assist program participants in locating suitable housing by providing them with a list of available units that facilitate participation in the Self-Sufficiency Program, such as easy access to public transportation and/or job training sites, or place of employment. The community may find it feasible to encourage program participants to utilize their section 8 Certificates to obtain housing in a particular area if doing so would facilitate the coordination of other support services. However, a community may not mandate that utilization of the Certificates be restricted to any particular building or area. All housing must meet the program requirements for the section 8 Existing House Program (See 24 CFR Part 882). Once a Certificate has been issued to a Project Self-Sufficiency participant, it cannot be withdrawn unless termination is consistent with grounds identified in 24 CFR Part 882. Any turnover of the Certificate becomes a part of the PHA's regular section 8 Existing Housing Program.

5.8 *Child care.* The availability of quality child care services is considered an essential element of a successful Self-Sufficiency Program. Single parents must feel assured that their children are in an adequate child care environment. Lack of quality child care or unreliable child care services can contribute to the failure of participants to take full advantage of the range of support services which have been identified for them and may result in absenteeism rates that preclude satisfactory completion of job training programs. Single parent participants should receive guidance in the selection of appropriate child care services. Communities may wish to consider establishing, with the help of the private sector, a centralized child care facility for the children of Project Self-Sufficiency participants if doing so would facilitate access by participants to other elements of the self-sufficiency program such as evening support group meetings.

5.9 *Basic Education.* Where necessary, as determined by the Personal Needs Assessment and Individual Action Plan, participants who lack a high school diploma should be encouraged to enroll in classes to obtain a high school diploma or a general education development (GED) equivalent. Those participants lacking basic English language skills should be considered for additional assistance such as literacy training and English as a second language course to improve their ability to communicate in the work place and to carry out the responsibilities of their jobs.

5.10 *Transportation.* Attention should be paid to the transportation needs of program participants since experience indicates a high correlation between the availability of transportation and the degree to which program participants avail themselves of the full range of other support services, such as evening education classes and support group meetings.

5.11 *Personal and Career Counseling.* Counseling can be a critical element in the package of services provided under Project Self-Sufficiency, and it is likely that may PS–S participants will need extensive counseling in order to achieve the goal of self-sufficiency. With proper counseling, participants will be encouraged and trained to assume responsibility for their own needs and to learn how to make basic life decisions—a major part of becoming self-sufficient; and to identify career areas and to set short and long term career goals.

5.12 *Job Development and Placement.* It is important to identify potential employers early in the planning process, so that the job training programs can be tailored to the needs of the job providers. The involvement of private sector members of the Task Force is especially critical at this stage or program implementation. A placement officer must be thoroughly familiar with the program participant's skills and personality so that an appropriate match can be made to match individual program participants with employment opportunities. Job placement must be the cornerstone and expected outcome of any training program that is undertaken.

5.13 *Program Requirements.* Communities participating in Project Self-Sufficiency must comply with all applicable section 8 Existing Housing regulations. If funds are used for the local Self-Sufficiency Program from any other source of Federal assistance, the regulations and requirements of those programs also must be followed. Communities participating in Project Self-Sufficiency must comply with all requirements of this Notice.

6. Application Requirements

A proposal submitted must contain the following:

6.1 A narrative on why a Self-Sufficiency Program is needed in the community.

6.2 A Needs Assessment which identifies the particular problems faced by the target population and the program services, employment opportunities, and activities and resources needed to address these problems.

6.3 A statement of the number of section 8 Existing Housing Certificates requested to support the local Self-Sufficiency Program, and a statement of justification for the request which, at a minimum, provides information on the number of single parents with young children currently on the section 8 waiting list relative to the number of Certificates requested and other documentation of need.

6.4 An explanation of how the community will provide for housing, employment training and employment opportunities, transportation, counseling, and child care for the number of participants for which the community is requesting section 8 Certificates.

6.5 A specification of the local public and private resources which would be needed to support the number of participants anticipated; and the amount of resources which will be made available to this demonstration. This section of the proposal will receive particular consideration in the selection process.

6.6 A letter from the chief executive officer specifying his or her involvement and commitment to the local Project Self-Sufficiency Program. This section of the proposal will receive particular consideration in the selection process.

6.7 A description of the local Task Force (if established by the date of proposal submission, include the names, titles, and organizations they represent) and the types of commitments they could contribute to perform the functions outlined in section 5. It is encouraged that letters from Task Force members or prospective members agreeing to serve be submitted with the proposal. Since the Task Force shall be responsible for marshalling resource commitments from local public agencies, private organizations and individuals to support the program, this section of the proposal will also receive particular consideration in the selection process.

6.8 A letter from the Public Housing Agency authorized to administer a section 8 Existing Housing Program in the community agreeing to participate in the demonstration and stating its willingness to administer the Certificates being requested for that community's Self-Sufficiency Program under the conditions set forth in this Notice. The letter should also indicate the PHA's willingness to cooperate as a member of the local Task Force in the overall planning and implementation of the project. PHAs not currently administering a section 8 Existing Housing Program will not be considered.

6.9 In addition to the above, a community currently participating in the PS–S demonstration, must provide an up-to-date status report on the community's progress in implementing the first demonstration including, among other things, the date when the Task Force was established, the Action Plan was submitted, participants were selected; the status of job training or job placement of current participants, and the status of the issuance of section 8 Certificates.

6.10 Please note that the proposal process does not require that the community have a completed Action Plan, described in section 5.4, at the time of the proposal.

7. Selection and Approval Procedures

7.1 Proposals will be reviewed by HUD Headquarters. HUD Field office comments will be solicited concerning the PHA's past performance in administering the section 8 Existing Housing Program, and the capacity of the PHA to absorb this additional section 8 allocation. There is no requirement that a Task Force be selected, and public and private resources be committed to the PS–S program, prior to submission of the PS–S application. However, particular consideration will be given to applications which indicate that a PS–S program is further along in development. In this regard note 6.5 and 6.7 above. Key factors to be taken into consideration in assessing each application will include:

—Extent of the CEO's involvement in and commitment to the local Project Self-Sufficiency Program;

community's capacity to carry out an additional allocation.

information for purposes of program evaluation to HUD or HUD's designee.

Tuesday
July 16, 1985

VOL
50
ISS
136

16
1985
UMI

—Extent of the CEO's involvement in and commitment to the local Project Self-Sufficiency Program;
—Extent to which the composition of the Task Force represents a broad spectrum of the community capable of marshalling the necessary public and private sector resources;
—Extent of local public sector resources committed to the program;
—Extent of local private sector resources committed to the program;
—Extent to which the application reflects an understanding of the Project Self-Sufficiency concept;
—Capacity of the local private employment sector to provide employment opportunities for Project Self-Sufficiency participants; and
—Ability of the applicant to implement the program within the deadlines established in this Notice.
—For currently approved Project Self-Sufficiency demonstration sites, progress achieved in implementing Project Self-Sufficiency and the community's capacity to carry out an additional allocation.

The Department will also seek diversity in its selection of participating communities according to geographical location, population and type of government (city, county, or other locality).

7.2 Preliminary selection of communities will be made by the Assistant Secretary for Policy Development and Research in consultation with the Assistant Secretary for Housing-Federal Housing Commissioner. Final selection will be by the Secretary.

8. Other Matters

8.1 This Notice affects the following Federal program listed in the Catalog of Federal Domestic Assistance at the specified number: Low-Income Housing Assistance Programs, section 8 (14.156);

8.2 Periodically, communities selected for participation in this demonstration will be asked to provide information for purposes of program evaluation to HUD or HUD's designee.

8.3 The information collection requirements contained in this Notice has been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act, and has been assigned OMB control number 2528–0112.

8.4 An environmental finding under the National Environmental Policy Act (42 U.S.C. 4321–4347) is unnecessary since the Certificate Program is part of the section 8 Existing Housing Program, which is categorically excluded under HUD regulations at 24 CFR 50.20(d).

Authority: Section 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d), and Title V, United States Housing Act of 1970 (12 U.S.C. 1701z–1).

Dated: July 5, 1985.

Samuel R. Pierce, Jr.,

Secretary.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 108

[Docket No. 24719; Amdt. No. 108-3]

Aviation Security; Coordination and Training

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: Because of the current level of threat, this emergency regulation requires each certificate holder to whom the airplane operator security rules apply to have employees identified and trained as Security Coordinators for international and domestic flights, in accordance with its approved security program. It also requires certificate holders to provide security training for all crewmembers to the extent necessary to prepare each crewmember to respond adequately to various levels and types of threats. This regulation is needed to respond to recent terrorist attacks against U.S. civil aviation. It is intended to protect U.S. civil aviation against international terrorism.

DATES: Effective date of this amendment is July 11, 1985. Section 108.27 does not become effective until notice of approval of the reporting requirement therein by the Office of Management and Budget is published in the **Federal Register.** Comments must be received on or before August 30, 1985.

ADDRESSES: Send comments on this amendment in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Docket No. 24719, 800 Independence Avenue SW., Washington, D.C. 20591; or deliver comments in duplicate to: Federal Aviation Administration, Rules Docket, Room 916, 800 Independence Avenue SW., Washington, D.C. 20591. Comments may be examined in the Rules Docket on weekdays, except Federal holidays, between 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. Donnie Blazer, Aviation Security Division (ACS-100), Office of Civil Aviation Security, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Telephone: (202) 426-8798.

SUPPLEMENTARY INFORMATION:

Comments Invited

Because of the emergency need for this amendment, it is being adopted without notice and public comment. However, the Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) provide that, to the maximum extent possible, DOT operating administrations should provide notice and an opportunity for the public to comment on such emergency regulations after their issuance. Accordingly, interested persons are invited to comment on this final rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket and be submitted in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket, AGC-204, Docket No. 24719, 800 Independence Ave. SW., Washington, DC 20591. All comments submitted will be available in the Rules Docket for examination by interested persons. This amendment may be changed in light of the comments received.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 24719." The postcard will be date and time stamped and returned to the commenter.

Background

The June 14, 1985, hijacking of Trans World Airlines Flight 847 resulting in the murder, torture, and kidnapping of U.S. citizens is the latest in a continuing series of terrorist attacks against U.S. aviation and U.S. interests, Government officials, and tourists in Europe, the Middle East, and throughout the world during the 1980's. Accordingly, it has become necessary to undertake certain actions to protect U.S. aviation in addition to those already mandated by Part 108 of the Federal Aviation Regulations. To that end, it is necessary that the FAA immediately undertake certain actions to protect U.S. civil aviation and U.S. citizens in high-risk areas and throughout the world.

Security Coordination

One action effected by this amendment is to enhance the coordination and supervision of the security provided for domestic and international flights. In view of the current level of threat, this amendment requires each certificate holder to whom the airplane operator security rules apply to provide a ground and an inflight Security Coordinator for each international and domestic flight, in accordance with its approved security program. This amendment further requires that the pilot in command (PIC) be designated as the inflight Security Coordinator.

The function of the Security Coordinators will be to ensure that all necessary security requirements are met prior to departure and while in flight. The duties of the ground Security Coordinator will be specified in the certificate holder's approved security program and will include monitoring the security requirements in effect for the following: (1) Screening for the flight; (2) access to the airplane; (3) airplane servicing (including fueling and catering); (4) ground support for inflight emergency response; (5) air operations area security; and (6) baggage and cargo acceptance and loading. The duties of the inflight Security Coordinator will also be specified in the security program and will include: (1) Reviewing, with the ground Security Coordinator, pertinent security information for the specific flight; (2) prior to beginning a flight or a series of flights with a particular crew, briefing the crew on the specific manner in which the PIC wants inflight incidents to be managed; (3) prior to each flight segment, briefing the crew on any significant irregularities or occurrences that may affect the security of the flight; and (4) on completion of a flight or series of flights, briefing the certificate holder on any significant incidents or occurrences, in accordance with the procedures established by the certificate holder.

New § 108.23(a) requires that each designated Security Coordinator satisfactorily complete the training as specified in the certificate holder's approved security program, within the preceding 12 calendar months. New § 108.7(b)(7) requires the curriculum for all required security training for ground and inflight Security Coordinators to be specified in the certificate holder's approved security program which is approved by the Principal Security Inspector. Based on the present level of threat, the air carrier's security program will require a maximum of 40 hours of initial training, as well as a minimum of 8 hours of annual recurrent training, for the ground Security Coordinator.

Pilots in command designated as inflight Security Coordinators will receive substantial training on inflight Security Coordinator duties during initial and recurrent training. As with other crewmembers, the pilot in command will be required to receive a minimum of 8 hours of initial training, including training directed at the functions and responsibilities of the inflight Security Coordinator, as well as annual recurrent training.

Crewmember Security Training

The second action considered essential is to provide all crewmembers with expanded security training. In particular, this amendment will result in all air carrier crewmembers having a significantly increased capability of responding to hijack attempts and other criminal acts. To that end, significantly enhanced initial and recurrent training is being required for crewmembers.

New § 108.23(b) prohibits the use by a certificate holder of any person as a crewmember unless, within the preceding 12 calendar months, that person has satisfactorily completed the training as specified in the certificate holder's approved security program. All required security training for crewmembers must be specified in the certificate holder's approved security program and integrated in the certificate holder's approved training program which is approved by the Principal Operations Inspector in coordination with the Principal Security Inspector. For the crew member training provisions of an air carrier security program to be approved by the FAA, the training program must provide 8 hours of initial security training, as well as annual recurrent training. Where the trainee is to act as pilot in command, this training will include significant emphasis on Security Coordinator duties and responsibilities. Each certificate holder is required to submit a separate curriculum for each type of training.

Evidence of Compliance

In order to ensure effective compliance with these amendments and other provisions, new § 108.27 provides that, on request of the Administrator, each certificate holder shall provide evidence of compliance with this part and its approved security program. In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96-511), this new reporting provision will be submitted for approval to the Office of Management and Budget (OMB). New § 108.27 will not become effective until OMB approval has been received and notice of that approval is published in the **Federal Register.** Comments on this provision should be submitted to the Office of Information and Regulatory Affairs (OMB), New Executive Office Building, Room 3001, Washington, D.C. 20503; Attention: FAA Desk Officer (Telephone: 202-395-7313). A copy should be submitted to the FAA Docket.

Need for Immediate Adoption

Because of the need to respond immediately to the heightened threat to civil aviation from terrorist hijackings and sabotage, I find that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this amendment effective in less than 30 days.

Economic Assessment

Because of the emergency need for this regulation, no regulatory evaluation has been prepared. In accordance with section 11(a) of the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), a regulatory evaluation will be prepared and placed in the public docket, unless an exception is granted by the Secretary of Transportation. For this same reason and in accordance with section 8(a)(1) of Executive Order 12291, I find that following the procedures of that Executive Order is impracticable.

Conclusion

In accordance with section 8(a)(1) of Executive Order 12291, because of the emergency need for this regulation, the procedures in that Executive Order have not been followed. In view of the substantial public interest in the matter of aviation security as a result of the current threat situation, this regulation is considered significant under the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the regulatory evaluation to be prepared for this project will be placed in the public docket, unless an exception is granted by the Secretary of Transportation.

Transportation, Air safety, Safety, Aviation safety, Air transportation, Air carriers, Airports, Airplanes, Airlines, Law enforcement officers, Police, Security measures, Training.

The Amendment

PART 108—[AMENDED]

Accordingly, Part 108 of the Federal Aviation Regulations (14 CFR Part 108) is amended as follows, effective July 11, 1985:

1. The authority citation for Part 108 is revised to read as follows:

Authority: 49 U.S.C. 1354, 1356, 1357, 1358, 1421, and 1424; 49 U.S.C. 106(g) (revised, Pub. L. 97-449, January 12, 1983).

2. By amending § 108.7 by adding new paragraphs (b)(6) and (b)(7) to read as follows:

§ 108.7 Security program: Form, content, and availability.

* * * * *

(b) * * *

(6) The procedures used to comply with the applicable requirements of § 108.10.

(7) The curriculum used to accomplish the training required by § 108.23.

* * * * *

3. By adding a new § 108.10 to read as follows:

§ 108.10 Prevention and management of hijackings and sabotage attempts

(a) Each certificate holder shall—

(1) Provide and use a Security Coordinator on the ground and in flight for each international and domestic flight, as required by its approved security program; and

(2) Designate the pilot in command as the inflight Security Coordinator for each flight, as required by its approved security program.

(b) *Ground Security Coordinator.* Each ground Security Coordinator shall carry out the ground Security Coordinator duties specified in the certificate holder's approved security program.

(c) *Inflight Security Coordinator.* The pilot in command of each flight shall carry out the inflight Security Coordinator duties specified in the Certificate holder's approved security program.

4. By revising § 108.23 to read as follows:

§ 108.23 Training.

(a) No certificate holder may use any person as a Security Coordinator unless, within the preceding 12 calendar months, that person has satisfactorily completed the security training as specified in the certificate holder's approved security program

VOL

(b) No certificate holder may use any person as a crewmember on any domestic or international flight unless within the preceding 12 calendar months that person has satisfactorily completed the security training required by § 121.417(b)(3)(v) or § 135.331(b)(3)(v) of this chapter and as specified in the certificate holder's approved security program

4. By adding a new § 108.27 to read as follows:

§ 108.27 Evidence of Compliance.

On request of the Administration, each certificate holder shall provide evidence of compliance with this part and its approved security program.

Issued in Washington, D.C., on July 11, 1985.

Donald D. Engen,

Administrator.

LIST OF PUBLIC LAWS

Last List July 12, 1985

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

H.R. 2800/Pub. L. 99–62
To provide authorization of appropriations for activities under the Land Remote-Sensing Commercialization Act of 1984. (July 11, 1985; 99 Stat. 118) Price $1.00

S. 822/Pub. L. 99–63
To extend the time for conducting the referendum with respect to the national marketing quota for wheat for the marketing year beginning June 1, 1986. (July 11, 1985; 99 Stat. 119) Price: $1.00

S. 883/Pub. Law 99–64
To reauthorize the Export Administration Act of 1979, and for other purposes. (July 12, 1985; 99 Stat. 120) Price: $1.00

S. 1141/Pub. Law 99–65
Relating to certain telephone services for Senators: (July 12, 1985; 99 Stat. 163) Price: $1.00

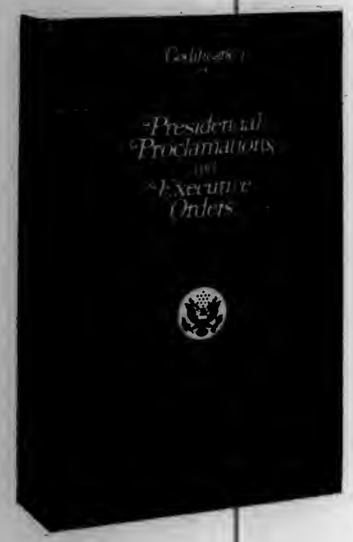
UPDATED EDITION NOW AVAILABLE



For those of you who must keep informed about Presidential proclamations and Executive orders, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period January 20, 1961, through January 20, 1981, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1961–1981 period, along with any amendments, an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Administration

Order from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 50, No. 137
Wednesday, July 17, 1985

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

MERIT SYSTEMS PROTECTION BOARD

5 CFR Part 1201

Practices and Procedures

AGENCY: Merit Systems Protection Board.

ACTION: Final rule.

SUMMARY: On August 10, 1984, (49 FR 32072), the Board published proposed regulations to amplify and clarify the procedures governing the filing of petitions for review of initial decisions issued by presiding officials. The purposes of the proposed revisions were to deal more comprehensively with pleadings related to petitions for review, to change service requirements, and to explain more fully procedures regarding timeliness. Comments on those proposed regulations have now been received and considered and the Board adopts the following as the new § 1201.114 of Title 5, Code of Federal Regulations.

EFFECTIVE DATE: August 1, 1985.

ADDRESS: Send written inquiries to Joseph Ellis, Deputy Clerk of the Board, Merit Systems Protection Board, 1120 Vermont Avenue NW., Washington, D.C. 20419.

FOR FURTHER INFORMATION CONTACT: Joseph Ellis, Deputy Clerk of the Board, Merit Systems Protection Board, (202) 653–7282.

SUPPLEMENTARY INFORMATION: A small number of comments were received on the Board's proposed regulations. Most commenters expressed agreement with the proposal, and particularly with the provision for the filing of cross petitions for review. Most of the comments received addressed the issues of extensions of time and late filed petitions, as well as intervention and service requirements. Analysis of the specific comments received is set forth in the following paragraph by paragraph analysis of comments and changes.

1. Section 1201.114(a) *Who May File.* No comments were received on this paragraph in which changes had been proposed to clarify (1) that the Special Counsel may file a petition for review independently of a party or the Director of OPM, by changing the conjunction "and" to "or", and (2) that pleadings must contain an original signature. No further changes have been made.

2. Section 1201.114(b) *Cross Petitions For Review.* A number of comments were received agreeing with the proposal to specify that challenges to the initial decision must appear in either a timely petition or cross petition for review. No further changes have been made.

3. Section 1201.114(c) *Place for Filing.* The proposed change here made this paragraph compatible with proposed § 1201.114(b) with respect to cross petitions, adding clarifying language concerning related motions and pleadings, and clarified methods of service. No comments were received concerning these proposed changes. The only change made to the proposed regulation has been to reflect the Board reorganization redesignating the Office of Secretary as the Office of the Clerk of the Board.

4. Section 1201.114(d) *Time For Filing.* One commenter advocated that service of the initial decision and all subsequent pleadings and motions should be considered complete on the date of receipt, rather than date of issuance of the initial decision or service completion pursuant to § 1201.114(h). This suggestion was rejected as impractical in view of the difficulty of determining date of receipt in any contested circumstances. The proposal was changed in three respects. The first two changes were to reflect the designation of Clerk of the Board, and to insert "to a" prior to the phrase "cross petition for review", for purposes of clarity. The third change was the substitution of "must" for "may" in two places. This change does not make a petition or response obligatory. Rather, the intent is to clarify that submissions must be timely.

5. Section 1201.114(e) *Extensions of Time to File.* This paragraph sets out the procedure for obtaining an extension of time to file a pleading prior to its due date.

As originally proposed, this paragraph set out examples of types of circumstances that might be deemed to warrant extensions. Those examples have been deleted as unnecessary.

In their place, the following was inserted: "Such affidavit or declaration must make a specific and detailed showing of the circumstances alleged to constitute good cause and must be accompanied by documentation or other evidence to support the matters asserted."

One comment was received suggesting that it not be necessary to accompany the good cause showing with an affidavit. It was suggested instead that a signature should be adequate in light of the Federal False Statements Act. Pursuant to 28 U.S.C. 1746, an unsworn statement signed and dated by its author under penalty of perjury may be substituted for an affidavit. The Board agrees with the commenter that such a statement is sufficient and has amended the regulation accordingly.

6. Section 1201.114(f) *Late Filings.* This paragraph sets out circumstances under which late filings will be accepted. A number of comments were received. One suggestion was that response to the merits of a petition for review should be tolled pending a Board ruling on the request for leave to file late. The Board recognizes that in some cases, the proposed procedure puts an ultimately unnecessary obligation on one of the parties.

The Board's appellate practice is designed around a "one step" appellate consideration, in keeping with the Board's interpretation of its enabling legislation. The most expeditious procedure for the Board, and therefore the parties, is to consider most motions at the same time any merits determination is made. Moreover, at the petition for review level, most arguments are directly related to arguments previously made at the petition for appeal stage. Therefore, the Board believes that the advantages of the suggestion do not outweigh the advantage of the proposal, which remains unchanged.

Another commenter suggested that this paragraph appears internally inconsistent in requiring that late filings "must be accompanied by a motion for waiver and affidavit" but also providing for a Board determination of whether good cause exists in the absence of a motion for waiver and affidavit. No

change has been made in this respect

permissive intervention at the Board

right as OPM to file an intervention after

However, two comments did relate to its

Authority: 5 U.S.C. et seq., unless otherwise

accompanied by an affidavit showing

VOL 50 ISS 137 JL 17 1985 UMI

change has been made in this respect because it is the Board's intention that the required submission "must" be made. However, the provision for Board consideration of a late filed petition in the absence of those submissions simply recognizes the existence of 5 CFR 1201.12, which provides that the Board may in an individual case, waive any of its regulations not required by statute.

A third suggestion on this paragraph was that there is no purpose to requiring a statement of the reasons a timely request for extension was not made. However, as the commenter recognized, such reasons are a factor for consideration in determining whether due diligence was exercised. Therefore, the Board believes that it is appropriate to adopt this requirement as proposed.

A final suggestion with respect to this paragraph was to clarify that the filing of a motion for waiver does not extend the time limit for filing a cross petition for review. This suggestion has been adopted and the change made.

The Board has also made two changes from the version originally proposed. A reference to examples of reasons for late filing set out in paragraph (e) was excluded for the reasons given in the comment to that paragraph. In addition, the eight day period for parties to respond to motions for waiver of late filings is eliminated, and the remaining language changed in order to clarify that the response to the motion for waiver may be included in the response to the late-filing pleading. This is consistent with current Board practice under which there is no separate preliminary determination on timeliness. Instead, the Board will issue only one order on a case, including disposition of the motion for waiver, and, if appropriate, the merits. As noted above, this means that a responding party should address its pleading to all the pending issues of a case because there will be no further opportunity for response.

Finally, the words "to file a cross petition for review or" were added to clarify that a response to the motion for waiver does not act to delay the filing of a cross petition, and the word "subsection" was changed to "paragraph . . . of this section."

7. Section 1201.114(g) *Intervention.* A comment was received which suggested that proposed paragraph (g)(3) will preclude permissive intervention at the petition for appeal level. The commenter argues that allowing permissive intervention at the petition for review level, but not at the petition for appeal level, would produce certain inequities. The comment misconstrues in the intent of the proposal, which was to clarify the Board's intent to have the same rights of permissive intervention at the Board level as at the regional level. The intent was not to limit or expand rights of intervention at the petition for review level. Accordingly, no change has been made to reflect the commenter's specific concerns because this represents only a statement in the regulations directly concerning petitions for review of the board's parallel practice at the petition for appeal stage, and not a change in that practice. The only change made was in the organization of the last sentence of this paragraph, in order to clarify its meaning.

The Director of PPM suggested that his brief on intervention become due 20 days after receipt of the file rather than 20 days after service of the response to the petition or the due date of the response. The Board feels that this is unnecessary for two reasons. First, it is unlikely that the issues raised in the response will be sufficiently different from the petition for review and the initial decision as to warrant further time. Second, the regulation contemplates that the Board may allow additional time for filing a brief, recognizing that there might be unusual circumstances to warrant an extension.

The Director further recommends that the proposal be amended to permit interventions, not only after the petition for review and response, but also after a cross petition or the response to a possible cross petition. The regulations contemplate that a cross petition for review be filed within the same 25-day period as the response to a petition for review. Therefore, the calculations of OPM intervention time with respect to cross petitions for review would normally be subsumed into the requirement that the intervention be made within 20 days of the response. However, because the filing of a response to a petition for review does not have to be done simultaneously with a possible cross petition, the regulation has been amended by insertion of the words "cross petition or" between "date of service of the" and "response to petition".

With respect to extending the time further for responses to cross petitions, the Board is of the view that the issues of a given case should be sufficiently apparent in the numerous pleadings or orders which predate the response to a cross petition, that a further opportunity to intervene would appear to be unnecessary.

The words "cross petition or" have been inserted in paragraph (g)(2) of this section prior to "response to the petition for review", in order to make it plain that the Special Counsel has the same right as OPM to file an intervention after a cross petition for review.

Finally, the word "section" was changed to "paragraph" in (g)(1) and (g)(2).

8. Section 1201.114(h) *Service.* Certain commenters suggested that this paragraph be amended to require service by the Clerk of the Board rather than by the parties, as had previously been the practice with respect to the first filing with the Board, *i.e.*, the petition for review. The Board believes that service by the parties, which is the practice as to responses to the petition for review and any subsequent submissions at the Board level, and throughout the proceedings at the regional office level after the filing of the initial petition for appeal, has proven both practicable and effective in almost all cases. Because initial decisions are issued with a certificate of service attached, the parties are made aware at that time of the names and addresses of the other parties. Should there be a change in the representative of one of the parties, that party would have the obligation of informing the Board and the other parties, as well as of assuring that the new representative acted in a timely manner in prosecuting or responding to the petition for review. This is consistent with present practices since the Board has long held both that an appellant is personally responsible for his/her own case, whether or not he or she is represented, and that an agency's internal delays in assuring that it acts in a timely manner when it changes representatives at the petition for review stage do not constitute good cause for waiving the regulatory time limit. Thus, the Board has made no change in its decision to require service by the parties.

Another suggestion as to this paragraph was to require service to be made by certified mail or personal delivery. When the Board originally adopted its filing requirement for petitions for appeal at 5 CFR 1201.22(c), service was required to be made in that manner. The Board believes that these still constitute the preferred methods of service, but that the parties should, as the more recent version of § 1201.22(c) allows, have the option of completing service by regular mail. Any party attempting to accomplish service in a manner other than through personal delivery or certified mail, of course, retains the burden of assuring and proving that timely service is made.

9. Section 1201.114(i) *Closing the Record.* None of the comments received on this paragraph of the regulations disagreed with its major thrust. However, two comments did relate to its application. First, it was suggested that the Board allow the filing of a reply to the response to the petition for review within 15 days of its service. While this suggestion would comport with the Federal Rules of Appellate Procedure, the Board believes that the benefits to be derived would not compensate for the delays this procedure would engender since, under the Board's rules, a response to a petition for review may properly address only those matters which were already addressed in the petition. If a new issue is to be raised, it would likely be in the context of a cross petition for review. Any such cross petition would, of course, be a proper subject for response pursuant to the new § 1201.114(d); conversely, there would be no need to respond to a matter not properly raised to the Board. Thus, this suggestion has not been incorporated into the regulation.

The final comment received on this paragraph suggests that the Board allow the filing of material to update the petition for review, specifically the citation and discussion of authority issued subsequent to the filing of the petition.

The Board believes that there is no need to modify this paragraph further because as written it provides that where new and material evidence has become available, the record may be reopened for its consideration. If material such as that mentioned by this commenter were shown to be new and material, it would be accepted into the record under the present regulation.

Regulatory Flexibility Act

The Chairman, Merit Systems Protection Board, certifies that the Board is not required to prepare initial or final regulatory analysis of this rule, pursuant to section 603 or 604 of the Regulatory Flexibility Act, because of his determination that this rule would not have a significant economic impact on a substantial number of small entities, including small business, small organizational units and small governmental jurisdictions.

List of Subjects in 5 CFR Part 1201

Government employees; Administrative Practices and Procedures

Accordingly, the Merit Systems Protection Board revises 5 CFR 1201.114 as set forth below:

PART 1201—PRACTICES AND PROCEDURES

1. The authority for Part 1201 continues to read as follows:

Authority: 5 U.S.C. et seq., unless otherwise noted.

Subpart B—Hearing Procedures for Appellate Cases.

2. Section 1201.114 is revised to read as follows:

§ 1201.114 Filing of petition and cross petition for review.

(a) *Who may file.* Any party to the proceeding, the Director of OPM, or the Special Counsel may file a petition for review. The Director of OPM may request review only if he/she is of the opinion that the decision is erroneous and will have a substantial impact on any civil service law, rule, or regulation under the jurisdiction of the Office (5 U.S.C. 7701 (e)(2)). All submissions to the Board must contain an original signature of the appellant or the party's designated representative.

(b) *Cross petition for review.* If a timely petition for review is filed by a party, the Director of OPM or the Special Counsel, a cross petition for review may be filed by any other party, the Director of OPM or the Special Counsel within 25 days of the date of service of the petition for review. Issues not raised in the petition for review will not normally be considered by the Board unless raised in a timely filed cross petition for review.

(c) *Place for filing.* A petition for review, cross petition for review, responses thereto and all motions and pleadings associated therewith shall be filed with the Clerk of the Merit Systems Protection Board, Washington, D.C. 20419, either by personal delivery during normal business hours or by mail addressed to the Clerk of the Board.

(d) *Time for filing.* Any petition for review must be filed within 35 days of issuance of the initial decision. Any response to a petition for review or to a cross petition for review must be filed within 25 days after service of the petition or cross petition. The date of filing shall be determined by the date of mailing indicated by the postmark date. If no postmark date is evident on the mailing, it shall be presumed to have been mailed five days prior to receipt. If the filing is by personal delivery, it shall be considered filed on the date it is received by the Clerk of the Board.

(e) *Extension of time to file.* Motions for extensions of time to file a petition for review, cross petition or response shall be granted only upon a showing of good cause. Such motions must be filed in advance of the date on which the petition or other pleading is due. Motions for extension of time may be granted or denied without providing other parties the opportunity to comment, in the Board's discretion. Motions for extensions shall be accompanied by an affidavit showing good cause for the request, or shall be submitted pursuant to 28 U.S.C. 1746, which requires a signed and dated declaration or statement subscribed as true under penalty of perjury. Such affidavit or declaration must make a specific and detailed showing of the circumstances alleged to constitute good cause and must be accompanied by documentation or other evidence to support the matters asserted.

(f) *Late filings.* Unless an extension of time has been specifically granted by the Board pursuant to paragraph (e) of this section or is pending before the Board, any petition for review, cross petition for review, or response which is filed after time limits must be accompanied by a motion for waiver, and either an affidavit, or signed and dated declaration or statement subscribed as true under penalty of perjury, pursuant to 28 U.S.C. 1746 showing good cause for the untimely filing. Such showing must include:

(1) The reasons for failure to request an extension in advance of the filing date; and

(2) The reasons necessitating the late filing.

Any response filed to the motion for waiver may be included in the response to the petition for review, cross petition for review or response to the cross petition for review. Such response will not extend the period of time required by § 1201.114(d) to file a cross petition for review or to respond to the petition or cross petition. In the absence of a motion for waiver, the Board may, in its discretion, determine on the basis of the existing record whether there was good cause for the untimely filing or provide the proponent of the submission opportunity to show cause why it should not be dismissed or excluded as untimely.

(g) *Intervention.* (1) *By Director of OPM.* Pursuant to 5 U.S.C. 7701(d), the Director of OPM may intervene in a case before the Board under the standards set forth in that section, provided that right is exercised as early in the proceeding as practicable. For purposes of this paragraph, if the Director did not intervene in the case before the regional office, such intervention will be considered timely if it is filed within 20 days of the date of service of the cross petition or response to the petition for review, or if no response is filed, within 20 days of the date on which it is due. The Board may, in its discretion, at the Director's request, allow an additional period for the filing of the brief on intervention. A party may respond to the Director's brief within 15 days of the

VOL 50 ISS 137 JL 17 1985 UMI

date of service. The Director shall serve his notice of intervention and brief on all parties.

(2) *By Special Counsel.* Pursuant to 5 U.S.C. 1206(i), the Special Counsel may intervene as a matter of right. For purposes of this paragraph, if the Special Counsel did not intervene in the case before the regional office, such intervention will be considered timely if it is filed within 20 days of the date of service of the cross petition or response to the petition for review, or if no response is filed, within 20 days of the date on which it is due. The Board may, in its discretion, at the Special Counsel's request, allow an additional period for the filing of the brief on intervention. A party may respond to the Special Counsel's brief within 15 days of the date of service. The Special Counsel shall serve his notice of intervention and brief on all parties.

(3) *Permissive intervenors.* Any person may, by motion, request the Board to grant permission to intervene. The motion shall state in detail the reasons why the person should be permitted to intervene. A motion for permission to intervene will be granted where the requester, including any person alleged to have committed a prohibited personnel practice under 5 U.S.C. 2302(b), will be affected directly by the outcome of the proceeding.

(h) *Service.* Copies of the petition for review, cross petition for review, response, and all other motions and pleadings in connection therewith must be served by the party submitting the pleading upon all parties to the proceeding and their designated representatives. Service may be made by mailing or delivering personally a copy of the submission to each party and representative on the service list for the initial decision. The submission must be accompanied by a certificate specifying how and when such service was made. It is the duty of all parties and representatives to notify the Board and each other in writing of any changes in the names and addresses on the service list.

(i) *Closing the record.* The record shall close upon expiration of the period for filing the response to the petition for review, or to the cross petition for review, or to the brief on intervention, if any, or on such other date as set by the Board. Once the record is closed, no additional evidence or argument shall be considered except upon a showing that new and material evidence has become available which was not available prior to the closing of the record.

Dated: July 12, 1985.

For the Board.

Herbert E. Ellingwood,

Chairman.

[FR Doc. 85-16955 Filed 7-16-85; 8:45 am]

BILLING CODE 7400-01-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 908

[Valencia Orange Reg. 352, Amdt. 1; Valencia Orange Reg. 353]

Valencia Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Amendment 1 of Regulation 352 increases the quantity of fresh California-Arizona Valencia oranges that may be shipped to market during the period July 12–18, 1985. Regulation 353 establishes the quantity of such fruit that may be shipped to market during the period July 19–25, 1985. The amendment and regulation are needed to provide for orderly marketing of fresh Valencia oranges for the periods specified due to the marketing situation confronting the orange industry.

DATE: Regulation 352, Amendment 1 (§ 908.652) is effective for the period July 12–July 18, 1985. Regulation 353 (§ 908.653) is effective for the period July 19–25, 1985.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone: 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* These rules have been reviewed under USDA procedures and Executive Order 12291 and have been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that these actions will not have a significant economic impact on a substantial number of small entities.

The amendment and the regulation are issued under Marketing Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The actions are based upon the recommendation and information submitted by the Valencia Orange Administrative Committee (VOAC) and upon other available information. It is hereby found that these actions will tend to effectuate the declared policy of the act.

The amendment and the regulation are consistent with the marketing policy for 1984–85. The committee met publicly on July 9, 1985, to consider the current and prospective conditions of supply and demand and recommended a quantity of Valencia oranges for the specified weeks. The committee reports the demand for Valencia oranges has improved slightly.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because there is insufficient time between the date when information upon which these regulations are based became available and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the amendment and the regulation at an open meeting. To effectuate the declared policy of the act, it is necessary to make the regulatory provisions effective as specified, and handlers have been notified of the amendment and regulation and their effective dates.

List of Subjects in 7 CFR Part 908

Marketing Agreements and Orders, California, Arizona, Oranges (Valencia).

PART 908—[AMENDED]

1. The authority citation for 7 CFR Part 908 continues to read as follows:

Authority: (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

2. Section 908.652 is added to read as follows:

§ 908.652 Valencia Orange Regulation 352.

The quantities of Valencia oranges grown in California and Arizona which may be handled during the period July 12, 1985, through July 18, 1985, are established as follows:

(a) District 1: 240,000 cartons;

(b) District 2: 360,000 cartons;

(c) District 3: Unlimited cartons.

3. Section 908.653 is added to read as follows:

§ 908.653 Valencia Orange Regulation 353.

The quantities of Valencia oranges grown in California and Arizona which may be handled during the period July 19, 1985, through July 25, 1985, are established as follows:

(a) District 1: 240,000 cartons;

(b) District 2: 360,000 cartons;

(c) District 3: Unlimited cartons.

Dated: July 12, 1985.

Thomas R. Clark,

Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 85-16981 Filed 7-16-85; 8:45 am]

BILLING CODE 3410-02-M

Animal and Plant Health Inspection Service

9 CFR Part 78

[Docket No. 85-066]

Brucellosis in Cattle; State and Area Classifications

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms the interim rule which amended the regulations governing the interstate movement of cattle because of brucellosis by changing the classification of the State of Georgia from Class B to Class A. This rule meets the standards for Class A status. The rule relieves certain restrictions on the interstate movement of cattle from the State of Georgia.

EFFECTIVE DATE: July 17, 1985.

FOR FURTHER INFORMATION CONTACT: Dr. Thomas J. Holt, Cattle Diseases Staff, VS, APHIS, USDA, Room 817, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8711.

SUPPLEMENTARY INFORMATION:

Background

A document published in the **Federal Register** on April 5, 1985 (50 FR 13546–13547), amended the brucellosis regulations in 9 CFR Part 78 by changing the classification of the State of Georgia from Class B to Class A. The amendment, which was made effective April 5, 1985, relieves certain restrictions on the interstate movement of cattle from Georgia.

Comments were solicited for 60 days after publication of the amendment. No comments were received. The factual situation was set forth in the document of April 5, 1985, still provides a basis for the amendment.

Executive Order and Regulatory Flexibility Act

This rule has been reviewed in accordance with Executive Order 12291 and has been determined not to be a major rule. Based on information compiled by the Department, it has been determined that this rule will not have a significant effect on the economy; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not have any significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Cattle moved interstate are moved for slaughter, for use as breeding stock, or for feeding. Changing the status of the State of Georgia reduces certain testing and other requirements on the interstate movement of these cattle. Cattle from Certified Brucellosis-Free Herds moving interstate are not affected by the change in status. It has been determined that the change in brucellosis status made by this rule will not affect marketing patterns and will not have a significant economic impact on those persons affected by this document.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this rule will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 9 CFR Part 78

Animal diseases, Brucellosis, Cattle, Hogs, Quarantine, Transportation.

PART 78— BRUCELLOSIS

Accordingly, the interim rule amending 9 CFR Part 78 which was published at 50 FR 13546–13547 on April 5, 1985, is adopted as a final rule without change.

Authority: 21 U.S.C. 111–113, 114a–1, 115, 120, 121, 125, 134b, 134f; 7 CFR 2.17, 2.51, and 371.2(d).

Done at Washington, D.C., this 11th day of July 1985.

J.K. Atwell,

Deputy Administrator, Veterinary Services.

BILLING CODE 3410-34-M

9 CFR Part 78

[Docket No. 85-067]

Brucellosis in Cattle; State and Area Classifications

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms the interim rule which amended the regulations governing the interstate movement of cattle because of brucellosis by changing the classification of the State of Tennessee from Class B to Class A. This rule is necessary because it has been determined that this State meets the standards for Class A status. The rule relieves certain restrictions on the interstate movement of cattle from the State of Tennessee.

EFFECTIVE DATE: July 17, 1985.

FOR FURTHER INFORMATION CONTACT: Dr. Thomas J. Holt, Cattle Diseases Staff, VS, APHIS, USDA, Room 817, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8711.

SUPPLEMENTARY INFORMATION:

Background

A document published in the **Federal Register** on April 18, 1985 (50 FR 15410–15411), amended the brucellosis regulations in 9 CFR Part 78 by changing the classification of the State of Tennessee from Class B to Class A. The amendment, which was made effective April 18, 1985, relieves certain restrictions on the interstate movement of cattle from Tennessee.

Comments were solicited for 60 days after publication of the amendment. No comments were received. The factual situation which was set forth in the document of April 18, 1985, still provides a basis for the amendment.

Executive Order and Regulatory Flexibility Act

This rule has been reviewed in accordance with Executive Order 12291 and has been determined not to be a major rule. Based on information compiled by the Department, it has been determined that this rule will not have a significant effect on the economy; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not have any significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

For this action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

Cattle moved interstate are moved for slaughter, for use as breeding stock, or

VOL 50 ISS 137 JL 17 1985 UMI

for feeding. Changing the status of the State of Tennessee reduces certain testing and other requirements on the interstate movement of these cattle. Cattle from Certified Brucellosis-Free Herds moving interstate are not affected by the change in status. It has been determined that the change in brucellosis status made by this rule will not affect marketing patterns and will not have significant economic impact on those persons affected by this document.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this rule will not have a significant economic impact on a substantial number of small entities.

BILLING CODE 3410-34-M

9 CFR Part 94

[Docket No. 85–063]

Change in Disease Status of Belgium Because of African Swine Fever

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms the interim rule which amended the regulations concerning the importation into the United States of pork and pork products by adding Belgium to the list of countries where African swine fever (ASF) exists or where there is reason to believe that ASF exists. The effect of the amendment is to add certain restrictions on the importation of pork and pork products from Belgium. This is necessary in order to help prevent the introduction of ASF into the United States.

EFFECTIVE DATE: July 17, 1985.

FOR FURTHER INFORMATION CONTACT: Dr. Mark P. Dulin, Import-Export Animals and Products Staff, VS, APHIS, USDA, Room 843, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, 301–436–8499.

SUPPLEMENTARY INFORMATION:

Background

On March 18, 1985, an interim rule was published in the **Federal Register** (50 FR 10752–10753) which amended the regulations in 9 CFR Part 94 by adding Belgium to the list of countries where ASF exists or where there is reason to believe ASF exists. The interim rule became effective on the date it was signed, March 12, 1985. Comments were solicited for 60 days following publication. No comments were received. The factual situation which was set forth in the interim rule still provides a basis for the amendment.

Executive Order 12291 and Regulatory Flexibility Act

This action has been reviewed in accordance with Executive Order 12291 and has been determined to be not a "major rule." The Department has determined that this rule will not have a significant annual effect on the economy; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will have no significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The amount of swine, pork, or pork products imported into the United States from Belgium prior to the effective date of the interim rule was less than one percent of the amount of these items imported into the United States annually. Further, the importation of any of these items from Belgium was not the primary business activity of any business in the United States.

Under the circumstances explained above, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

For this rulemaking action, the Office of Management and Budget has waived its review process required by Executive Order 12291.

List of Subjects in 9 CFR Part 94

Animal diseases, Imports, Livestock and livestock products, Meat and meat products, Milk, Poultry and poultry products, African Swine Fever, Foot-and-mouth disease, Fowl pest, Garbage, Hog cholera, Rinderpest, Swine Vesicular Disease.

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), NEWCASTLE DISEASE (AVIAN PNEUMOENCEPHALITIS), AFRICAN SWINE FEVER, AND HOG CHOLERA: PROHIBITED AND RESTRICTED IMPORTATIONS

Accordingly, the interim rule amending 9 CFR 94.8 which was published at 50 FR 10752–10753 on March 18, 1985, is adopted as a final rule.

(Authority: 21 U.S.C. 111; 7 CFR 2.17, 2.51, and 371.2(d).

Done at Washington, D.C., on this 11th day of July 1985.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 85–AWP–12]

Alteration of Control Zone and Transition Area; Elko, NV

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule will alter the control zone and 700′ transition area at Elko, Nevada. The additional controlled airspace will accommodate aircraft executing the recently published LDA/DME Runway 23 instrument approach procedure to Elko Municipal-J.C. Harris Field. This action is necessary to ensure segregation of aircraft using approach procedures in instrument weather conditions and other aircraft operating in visual weather conditions.

EFFECTIVE DATE: 0901 G.m.t., November 21, 1985.

FOR FURTHER INFORMATION CONTACT: Curtis Alms, Federal Aviation Administration, Air Traffic Division, Airspace and Procedures Branch, 15000 Aviation Boulevard, Hawthorne, California 90261; telephone number (213) 536–6649.

SUPPLEMENTARY INFORMATION:

History

On May 9, 1985, the Federal Aviation Administration proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the control zone and 700′ transition area at Elko, Nevada. The additional controlled airspace will accommodate aircraft executing the recently published LDA/DME Runway 23 instrument approach procedure to Elko Municipal-J.C. Harris Field. This action is necessary to ensure segregation of aircraft using approach procedures in instrument weather conditions and other aircraft operating in visual weather conditions. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. These amendments are the same as those proposed in the notice. Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were published in Handbook 7400.6A dated January 2, 1985.

The Rule

These amendments to § 71.171 and § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) will provide additional controlled airspace to accommodate aircraft executing the recently published LDA/DME Runway 23 instrument approach procedures to Elko Municipal-J.C. Harris Field.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in CFR Part 71

Control zones, Transition areas, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

(Authority: 49 U.S.C. 1348(a) and 1354(a); 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69

2. Section 71.171 is amended as follows:

Elko, Nevada, Control Zone—[Revised]

Within a 5-mile radius of the Elko Municipal Airport [40°49′20.5″ N./115°47′38.1″ W.); and within 2 miles each side to the 247° bearing from the Elko Airport extending from the 5-mile radius area to 6 miles southwest of the airport; and within 1.5 miles each side of the 075° bearing from the Elko Airport extending from the 5-mile radius area to 9.5 miles northwest of the airport.

3. Section 71.181 is amended as follows:

Elko, Nevada, Transitions Areas—[Revised]

That airspace extending upward from 700 feet above the surface within a 9.5-mile radius of Elko Municipal Airport (lat. 40°49′20.5″ N., long. 115°47′38.1″ W.) and within 4.5 miles east and 9 miles west of the 161° bearing from the Elko Municipal Airport, extending from the 9.5-mile radius area to 25 miles south of Elko Municipal Airport, and within 5 miles each side of the 075° bearing from the Elko Municipal Airport, extending from the 9.5-miles radius to 20.5 miles northeast of the airport; and that airspace extending upward from 1,200 feet above the surface within a 21.5-mile radius of Elko Municipal Airport.

Issued in Los Angeles, California on July 5, 1985.

H.C. McClure,

Director, Western-Pacific Region.

14 CFR Part 71

[Airspace Docket No. 80–ANE–17]

Establishment of Control Zone at Quonset State Airport, North Kingstown, RI; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: This action corrects **Federal Register** Document 85–11648 published on May 15, 1985 (50 FR 20200) that established a new control zone at Quonset State Airport, North Kingstown, Rhode Island. The control zone will provide controlled airspace protection for aircraft operating at the airport. This correction provides that the control zone will be effective during the specific dates and times established in advance by a Notice to Airmen.

EFFECTIVE DATE: 0901 G.m.t., July 17, 1985.

FOR FURTHER INFORMATION CONTACT: Stanley E. Matthews, Manager, Operations, Procedures and Airspace Branch, ANE–530, Federal Aviation Administration, Air Traffic Division, 12 New England Executive Park, Burlington, Massachusetts 01803. Telephone (617) 273–7139.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 85–11458 was published on May 15, 1985 (50 FR 20200) that established a new control zone at Quonset State Airport, North Kingstown, Rhode Island. The control zone will provide controlled airspace protection for aircraft operating at the airport. The correction provides that this control zone will be effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time thereafter will be continuously published in the Airport/Facility Directory.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation Safety, Control zones.

Adoption of the Correction

Accordingly, pursuant to the authority delegated to me, the **Federal Register**, Document 85–11648, as published in the **Federal Register** on May 15, 1985 (50 FR 20200) is corrected as follows:

1. The authority citation for Part 71 continues to read as follows:

(Authority: 49 U.S.C. 1348(a), 1354(a), 1510 Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); [14 CFR 11.69].

2. By amending § 71.171 as follows:

Quonset State Airport, North Kingstown, Rhode Island—[New]

Within a 5 mile radius of the center, Lat. 41°35′45″N., Long. 71°24′35″W., of the Quonset State Airport, North Kingstown, Rhode Island; within 2 miles each side of the Providence, Rhode Island VORTAC 171°T(185°M), extending from the 5 mile radius zone to 15.5 miles south of the VORTAC excluding that airspace within the Providence, Rhode Island Control Zone. This control zone will be effective during the specific dates and times established in advance by a Notice to Airmen. The effective

VOL 50 ISS 137 JL 17 1985 UMI

date and time thereafter will be continuously published in the Airport/Facility Directory.

Issued in Burlington, Massachusetts, on July 8, 1985.

14 CFR Part 71

[Airspace Docket No. 85-ANE-05]

Chester, CT, 700 Foot Transition Area; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: This action corrects Federal Register Document 85-13708 published on June 7, 1985, (50 FR 23941) that amended the description of the Chester, Connecticut 700 Foot Transition Area so as to provide airspace for aircraft executing a new RNAV Standard Instrument Approach Procedure (SIAP) to Runway 17 at the Chester Airport, Chester, Connecticut. The latitude shown in that amended description is incorrect and is being corrected to reflect the correct latitude.

EFFECTIVE DATE: 0901 G.m.t., July 17, 1985.

FOR FURTHER INFORMATION CONTACT: Stanley E. Matthews, Manager, Operations, Procedures and Airspace Branch, ANE-530, Federal Aviation Administration, Air Traffic Division, 12 New England Executive Park, Burlington, Massachusetts 01803. Telephone (617) 273-7139.

SUPPLEMENTARY INFORMATION:

History

Federal Register Document 85-13708 was published on June 7, 1985, (50 FR 23941) that amended the description of the Chester, Connecticut 700 Foot Transition Area so as to provide airspace for aircraft executing a new RNAV Standard Instrument Approach Procedure (SIAP) to Runway 17 at the Chester Airport, Chester, Connecticut. The latitude as shown in the amended description is incorrect. This correction will make the appropriate change in the latitude.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 16 CFR Part 13

Intrastate carriers, Collective ratemaking, Trade practices.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

[Docket No. 9184]

Order Dismissing Complaint

The Commission has considered this matter on complaint counsel's unopposed motion that the complaint be withdrawn.

In this case respondent has argued that its collective ratemaking activities are immunized by the state action doctrine. Complaint counsel now represents that all the elements of a state action defense as articulated by the Supreme Court in *Southern Motor Carriers Rate Conference* v. *United States*, 105 S. Ct. 1721 (1985), are available to the respondent. Accordingly, further prosecution of this matter does not appear to be in the public interest. The complaint is therefore dismissed.

By direction of the Commission.

Issued: July 5, 1985.

Emily H. Rock,

Secretary.

16 CFR Part 13

[Docket No. 9157]

The Echlin Manufacturing Co. et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Dismissal Order.

SUMMARY: The Federal Trade Commission has dismissed its antitrust challenge to the Echlin Mfg. Co.'s acquisition of Borg-Warner Corp.'s automotive-aftermarket operations. The Commission ruled that since there are no barriers to entry into the market for the assembly and sale of carburetor kits, "there can be no anticompetitive effect from the acquisition, and no violation of the antitrust laws."

DATES: Complaint issued July 23, 1981. Final Order issued June 28, 1985.*

FOR FURTHER INFORMATION CONTACT: Ann B. Malester, FTC/L-501, Washington, D.C. 20580. (202) 254-8644.

SUPPLEMENTARY INFORMATION: In the Matter of The Echlin Manufacturing Company, a corporation, and Borg-Warner Corporation, a corporation.

List of Subjects in 16 CFR Part 13

Automotive parts, Corporate acquisitions, Trade practices.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

[Docket No. 9157]

Final Order

This matter has been heard by the Commission upon the appeals of complaint counsel and respondent The Echlin Manufacturing Company from the initial decision and upon briefs and oral argument in support of and in opposition to the appeals. For the reasons stated in the accompanying Opinion, the Commission has determined to affirm the initial decision. Accordingly,

It is Ordered that the complaint is dismissed.

By the Commission, Commissioner Bailey dissenting.

Issued: June 28, 1985.

Emily H. Rock,

Secretary.

Dissenting Opinion of Commissioner Patricia P. Bailey

Echlin Manufacturing Co., Docket No. 9157, June 28, 1985

This is a merger between competing firms with 36% and 10% of a small and declining market so highly concentrated that six firms account for 95% of sales. The Herfindahl-Hirschman index as a result of this acquisition rises by over 750 points to just under 3000. These figures would suggest that this market is susceptible to collusion. There are few sellers in the market for assembly and sale of carburetor kits, and their market shares have remained stable over the past 15 years. There are large numbers of buyers most of which make relatively small purchases, limiting the ability of buyers to disrupt collusion. Because of the similarity of these buyers' businesses in reselling what are fairly standardized, noncustomized products, there are relatively few issues over which sellers need collude. Substitute products (new and rebuilt carburetors) are considerably more expensive, and demand is alleged to be inelastic, since car repairs create necessity. Industry members use price lists, which facilitates price policing, and discounts off these lists are uncommon. There has been relatively little price competition, according to the ALJ, although he found that non-price competition did exist. There is evidence that the largest respondent exercised price leadership. The question of supracompetitive profits is disputed (the ALJ considered the evidence "fragmentary" and the Commission rejects it without discussion), but industry leaders testified that their operations were profitable.

Under the 1984 Justice Department Merger Guidelines—the most recent government pronouncement on merger analysis—a merger that looks like this one is so likely to be anticompetitive and therefore unlawful that only the "extraordinary" case will avoid legal sanction. The Commission has dismissed this case on the sole ground that it finds no barriers to entry into the market, holding that this conclusion renders the otherwise strong structural case for illegality irrelevant.[1]

I have three primary concerns about the Commission's decision and its implications for future FTC merger policy. First, I believe the Commission has embraced a particularly narrow definition of barriers to entry that may be ill-suited to merger analysis, and which is, moreover, a source of much dispute among industrial economists. Second, I disagree with the conclusion drawn by the Commission, that entry into this market is "extraordinarily easy and can be quite rapid." Finally, as matter of legal policy, I am concerned over the Commission's single-minded focus on the hotly disputed barriers to entry issue as dispositive of legal liability in a horizontal merger case where the prima facie case for antitrust concern about collusion is as strong as it is here.

I

Barriers to entry are clearly of increasing importance to antitrust analysis. From a conceptional point of view, this is not hard to understand. Former Director of the FTC's Bureau of Economics, F.M. Scherer, has stated that "significant entry barriers are the *sine qua non* of monopoly and oligopoly, for . . . sellers have little or no enduring power over price when entry barriers are nonexistent."[2] The Commission has recognized the role of barriers as a supplement to consideration of quantitative factors such as market shares and concentration. "The issue of entry barriers is perhaps the most important qualitative factor, for if entry barriers are very low it is unlikely that market power, whether individually or collectively exercised will persist for long."[3] The Department of Justice has gone even further in stating, "If entry into a market is so easy that existing competitors could not succeed in raising price for any significant period of time, the Department is unlikely to challenge mergers in that market."[4] Two recent federal court decisions have hoisted the Justice Department on its own petard by denying government merger challenges on the basis of low barriers to entry.[5]

But to say that barriers to entry are important in antitrust thinking does not lead me to the necessary conclusion that barriers analysis has yet reached the point where it should resolve antitrust disputes as easily as it is being used to do in this and in possible future cases.[6] For one, there is such lack of clear consensus about the nature or effect of barriers to entry[7] that some suggest this issue is elusive, and can confound the resolution of complex antitrust questions.[8] One scholar has observed that barriers to entry is "the single most misunderstood topic in the analysis of competition and monopoly," exceeding

So, barriers to entry stand only as high as time waxes long and rivals grow tall." *Id.* at 1543.

even the issue of market definition in this regard.[9]

yet not attract new entry. The Bain view, while subject to almost thirty

supracompetitive pricing within an industry and yet prevent for a

profitable, but shielded by barriers that deter entry at a significant scale.

assessment standpoint, there are alleged to be four factors that complaint counsel

case, the need to achieve scale economies deters entry.

even the issue of market definition in this regard.[9]

The majority cements its agreement with respondent's definition of entry barriers ("additional long run costs that may be incurred by an entrant relative to the long-run costs faced by incumbent firms"), by a citation to Professor George Stigler, among others. The majority declares this position is "now widely accepted in the legal and economic communities." Stigler's formulation (1968) defines barriers to entry "as a cost of producing (at some or every rate of output) which must be borne by a firm which seeks to enter an industry but is not borne by firms already in the industry." [10] This view, as carried forward in the majority's analysis, is that entry barriers block new competition from the market; access to the market is closed to outsiders on account of the barrier. Examples of such barriers given by the majority are governmental entry restrictions and patents. Other examples might be control of scarce resources, such as essential raw materials, or unique management or labor resources. Conversely, under a "Stiglerian" approach, if some factor simply imposes risks and costs on new entrants resulting in possible delay or deferral of entry, that factor is not really a barrier to entry, because access to the market imposes or has already imposed the same costs or risks on all firms, at one time or another. All firms have equal access to the market, even given the need to undertake certain prescribed steps to accomplish entry.

Perhaps at the other end of the scale from Stigler's view is the "neo-classical" view of Joe S. Bain (1956), which would measure the prospect of entry by the "extent to which, in the long run, established firms can elevate their selling prices above the minimal average costs of production and distribution (those costs associated with operation at optimal scales) without inducing potential entrants to enter the industry." [11] The condition of entry is thus defined "as the 'disadvantage' of potential entrant firms as compared to established firms or conversely, the 'advantage' of established over potential entrant firms." [12] In essence, an entry barrier is whatever allows incumbent firms to charge supra-competitive prices yet not attract new entry. The Bain view, while subject to almost thirty years of criticism by its opponents and revisionism by its friends, remains an alternative approach which provides a different perspective on entry questions.

The Commission distinguishes between "absolute" barriers to entry—which are barriers touched by the Commission's Stiglerian Philosopher's Stone—and mere "impediments" to entry, evidence of which are taken up by the record in this case. (Some of these resemble Bain's barriers to entry sent to the back of the classroom). The Commission finds no absolute barriers to entry in this case at all, but it insists on an extended treatment of the subject, perhaps to accomplish the result of fixing in the caselaw its particular entry barrier definition. As to entry-delaying "impediments," the Commission rules that none of these would permit any exercise of market power by incumbent firms because of the ease with which the impediments could be kicked aside.

The Commission, then, in this opinion embraces the current "Chicago School" economic "State Religion" approach to barriers to entry, a view which simply is *not* generally "accepted [13] in the legal and economic communities." In both communities, though this view has gained some ground recently in a few cases,[14] the battle rages fiercely, and is as empirically unresolved as ever.[15]

II

But is this point important, or do I belabor an all-too technical issue? It seems to me the point is important if barriers to entry, so particularly defined, become the easy way to resolve complex antitrust cases. Section 7 of the Clayton Act makes illegal mergers that have the probability of substantially lessening competition. The statute does not add the word "forever". A merger can lessen competition and therefore violate the statute, in my view, if market conditions, structural features, or behavioral patterns make entry an unattractive investment risk for a significant period of time. If such a situation exists so as to permit supracompetitive pricing within an industry and yet prevent for a substantial period new entry or the expansion of marginal fringe competitors, then it is possible that a barrier to entry exists. The defect in the Stiglerian alternative is that it does not account for the time, scale and cost necessary for a successful entry that is a meaningful threat to incumbent firms.

This situation, as I understand it, is essentially what complaint counsel is arguing. They do not claim that there are any of Stigler's barriers to entry into this market, but rather they assert that entry is unlikely due to the fundamental unattractiveness of the market. New entrants are deterred from making investments in entry because they cannot expect to make acceptable profits. At the very minimum, the argument seems to be, entry would be delayed for a significant period of time during which there would be injury to competition, constituting a violation of section 7.

The majority admits complaint counsel's pragmatic point about conditions that delay or impede entry. The Commission states: "There may be little practical difference between an absolute barrier to entry and conditions of entry that delay the restoration of competitive prices for decades." Delayed entry "for decades" fits an almost-Stiglerian scenario of an industry where potential entrants must await the expiration of patents or overcome similar dramatic entry problems. However, decade-long delays should not be and are not, the only circumstance of concern under the antitrust law.[16] Most temporal measures of new entry speak of difficulty of entry in terms of two to five years.

In the end, the majority concludes that where entry is not blocked (by its analysis), it is easy and can also be rapid—with citation to the entry over the past ten years of about five firms at the fringe of the market. The majority assumes that any of these firms could expand its operations virtually at will.

Complaint counsel buttress their statistical case by descriptions of market conditions that permit the exercise of market power without resulting in the expansion of fringe entrants or the entry of new competitors. They view the market as conducive to collusion and highly

[13] The Commission uses the term "widely accepted." Alas, that may be so, depending however on the circles in which one travels.

[14] Those cases include the Commission's decision in General Foods Corp., 103 FTC 204, 354 n. 54 (1984), where I expressly disassociated myself from the Commission's notational embrace of this Stiglerian view. (103 FTC at 372).

[15] See for example, Demsetz, supra.; Waterson, "On the Definition and Meaning of Barriers to Entry," 26 Antitrust Bulletin 521 (1981), and Wentz, "Mobility Factors in Antitrust Cases: Assessing Market Power in Light of Conditions Affecting Entry and Fringe Expansion," 80 Mich. L. Rev. 1545 (1982).

[16] FTC Merger Statement section III(A)(1) (1982). ("To be sure, merger analysis properly focuses primarily on long-term competitive implications, but short term effects should not be ignored, particularly if they are substantial.")

profitable, but shielded by barriers that deter entry at a significant scale.

The murky issue of profits cannot be finally resolved on this record. While complaint counsel argue that this market enjoys supracompetitive profits and therefore is attractive to entrants, neither the ALJ nor the Commission accepted this analysis.[17] The Commission considers it possible that the industry may be unattractive to entrants because prices are competitive or simply because the market is declining.[18] It is noteworthy that the ALJ, while finding some non-price competition, concluded that "the record as a whole does not reflect vigorous price competition."[19] And, if the declining market simply does not interest outsiders in and of itself, there would seem to be at least modest room for collusion, which this merger might facilitate.

Accepting for the moment that the market is at least somewhat attractive for entry from the initial profitability assessment standpoint, there are alleged to be four factors that complaint counsel say mitigate against entry, but which the Commission rejects even as "impediments."

First, complaint counsel assert there are sunk costs associated with entry that cannot be recovered if a firm decides to exit the market. These sunk costs are not large in terms of dollars, but they are large relative to the expected return in this small ($53 million) and declining market, thereby increasing the risk and decreasing the likelihood of entry given alternative investment opportunities.

Second, complaint counsel contend that entry is deterred by the need to achieve an economy of scale that is quite high. Like the arguments surrounding supracompetitive profits in this record, arguments about economies of scale are a subject of bitter dispute. Complaint counsel's expert witness, using exhibits prepared by respondents, estimated that about 10% of the market represented minimum efficient scale.[20] The ALJ rejected the 10% calculation; he agreed that there were some scale economies in this industry but considered them insignificant. However, if new entrants were faced with economies of scale of 10%, achievement of this reduction of unit costs would give a decided cost advantage to the larger incumbent firms, and saddle entrants with a major competitive burden to attain these same advantages without prospect of doing so simply from capture of any market growth. Incumbent firms capable of output at these scales could also deliberately flood the market to deter entry with lower prices. Because potential entrants perceive this to be the case, the need to achieve scale economies deters entry.

Third and fourth, complaint counsel also argue that the recent record of new entrants is especially poor in this industry, and that the record shows at least one case of targeted market retaliation by the market leader against a new firm.

Areeda and Turner endorse a shorthand test for barriers to entry by assessing the historical record of entry over the past few years in the market.[21] The 1984 DOJ Guidelines propose a two-year period in which to assess new entry in response to a "small but significant non-transitory increase in price" (about 5% lasting one year).[22] The 1982 FTC statement emphasizes the importance of the historical record on entry.[23] So does the body of traditional caselaw. I believe that judging the historical record on entry has always been, and remains today, the simplest and most practical way to deal with most barrier to entry analysis situations.

While these historical tests emphasize the importance of the traditional study of the simple record of entry, they also emphasize the importance of the size and scope of such entry. The 1984 DOJ Guides would take into account the "magnitude" of entry.[24] The 1982 FTC Statement declares: "Evidence of *substantial* expansion by firms already in an industry, especially non-dominant firms, may persuasively indicate that barriers to larger scale are not high. Conversely, evidence of frequent entry by fringe firms on a small scale *without significant expansion*, may also suggest the existence of barriers to larger scale".[25] (Emphasis added).

The record in this case shows that over more than a decade only fringe competitors have entered and only to the extent of a total *combined* market share of about 2%. Moreover, expansion or increased profitability has not occurred over a ten-year period for some of these firms, and three years or more for others. The majority conclusion that expansion is "easy and rapid," is not supported by the historical record.[26]

There are serious questions in my mind that these struggling fringe competitors represent any disciplining threat on the prices of the market

[17] The administrative law judge found that the evidence on profitability was fragmentary and hypothetical, since no actual long run profitability data on carburetor kits was available for individual firms. In addition to testimony by witnesses for four of the leading members of this industry that their companies were profitable, and planning documents of respondent stating its operations are profitable, complaint counsel made use of two *in camera* exhibits prepared by respondents' employees and economic expert. These exhibits are based on data from Echlin's own books and records, originally prepared to establish an economic model of relative costs of production at three different hypothetical levels of output. Complaint counsel, over the vigorous objection of respondents, asserted that this model enabled complaint counsel to establish the profitability of a firm that operated at about 10% of the market, or sales of 1.5 million kits. Comparing these data with 1978–1982 Census Bureau Quarterly Financial Reports (QFR) five-year averages for 1) return on assets for all manufacturing, 2] average return on stockholder's equity, and even 3) return on assets for wholesaling, complaint counsel argues that all of these QFR "benchmarks" are very substantially exceeded by the profit data derived from respondents' economic exhibits. The degree to which these calculated "profits" exceeded the benchmarks (50%) was well above the level agreed by both sides' economic experts to indicate supracompetitive profitability. [Complaint counsel's profit calculations yielded "accounting" rates of return. Such accounting profits are potentially unreliable because they do not take into account certain of a firm's costs; however, complaint counsel explain that in this industry, accounting rates of return closely approximate economic rates of return, considered more reliable evidence of profitability by some economists). In addition, although inferences to be drawn are limited, there is evidence that respondent was able to retaliate against one new market entrant by offering discounts on selected kits ranging from 5–30%. The Commission expressly rules that these sales were not below variable cost. There is the suggestion that respondents' usual prices are normally above a competitive level.

[18] I should note here that the DOJ guides and caselaw do not provide for *per se* legality for mergers in declining industries.

[19] I.D F. 286, p. 81.

[20] To assess the level of scale economies, complaint counsel again relied on CX 563 and 544, an analysis of the market at three hypothetical levels of output, prepared by respondent's employees from respondents' books and records. These *in camera* exhibits explain certain characteristics of three different sized firms—a firm that produces 1.5 million carburetor kits annually, representing just over 10% of the market, a firm producing 300,000 kits annually or about 2% of the market, and a firm with about 4% of the market, or about 100,000 kits. The data showed, according to complaint counsel, substantially different unit costs associated with each size of output. The larger the "firm" the more decided the cost advantage. There is additional evidence that this upper range of output may approximate the optimum in the business expansion plans of another competitor (Holley), allowing it the cost benefits of automated packaging. Respondent is scornful of the economies of scale argument on methodological grounds, on the grounds that the numbers are purely hypothetical, on the fact that only two of the six market incumbents would meet the 10% criteria (although the smaller firms have the existing capability to expand production to 10%, according to complaint counsel's industry expert), and on the fact that the numerous smaller firms appear to be profitable.

which are essentially technical and non-

leaders, and unless they do, their entry is not "significant," quite apart from the question of their size. The ALJ acknowledged only one firm, Sherman, to be a "significant" competitive entry. The record shows that Sherman's 1981 efforts at assembly and sale of a line of 120-kits at low prices continued for two years with little success. Sherman's survival, with about one-third of one percent of the market may be owed mostly to an agreement to supply kits to another firm for resale, after that firm (Carter) gave up on the assembly and sale of kits on its own (for corporate reasons apparently not related to the kit market). Sherman obtained this account in 1983 by underbidding Borg-Warner's carburetor kits subsidiary. About the time that the Carter/Sherman agreement was implemented, respondent targeted Sherman with special and unusal discounts on 19 lines of fast-moving kits. The Commission's observation about the targeted response to Sherman's entry and Sherman's capture of the lifesaving Carter business after two years of struggle, is that "A price war is evidence of competition, not the absence of competition." That is, Sherman's presence tempered the market leader's prices overall. This is simply not consistent with the selectivity of the response, or the fact that two years passed before it even began. A prospective entrant might take the following view: that a recent entrant, Sherman, was targeted for selective price cuts by a leading firm that almost certainly possessed a cost advantage in calculating the degree of its retaliatory discounting (5–30% off list price, according to the record).[28] How might such a prospect affect the next firm's decision to enter the market? To me, this is a relevant question bearing on the likelihood of any further new entry, even at the margin. Of course, it can be said that Borg-Warner's superior efficiency (scale economies) is the risk worth taking in terms of anticipated post-entry return?

The most obvious pool of potential new entrants are the numerous firms that are private label resellers of kits assembled by the few firms that populate the assembly market. Some of these were formerly assemblers, and all prosses some access to distribution systems and the advantage of some name recognition and familiarity with customers. However, the same factors that operate to discourage new entrants, or expansion by fringe entrants, operate to deter resellers, particularly since resellers may be even more knowledgeable and alert than others about the dismal record of entry in this market. Most kit resellers handle small percentages of kit resales, and all but one (Ford) have 3% of such resales or less. Therefore, even firms with established distribution will be forced to capture "changeover" customers if they are to achieve scale economies. But the most significant factor about potential reseller entry is that no reseller has ever successfully entered into kit assembly. The market is clearly unattractive to the new entrants best poised to make the effort, and some factor must account for this fact.

In these circumstances one could predict that further entry is likely to be judged very risky indeed, and given the unlikelihood of any market growth, doomed. With such a poor record on *significant* new entry, the presumption of market power that attends high market shares, high concentration and Herfindahl levels should remain standing, somewhat battered to be sure, but unbowed. If expansion is not occurring, the Commission opines, it simply must be attributable to some factor other than incumbent firm's market power—power normally inferred from the enormous "numbers" in complaint counsel's prima facie case. To suggest that the failure to expand can be based on the invisible evidence of some invisible hand is such a spectral conclusion that it is less credible to me than the anticompetitive inferences to be drawn from the traditional market tests so recently confirmed in the 1982 FTC and 1982 *and* 1984 Justice Department merger frameworks. There are no additional arguments to add to this balance, since there are no credible arguments that this merger enhances efficiency, or that it is likely to promote competition in some other fashion.[29]

In summary, the likelihood of any firm entering this market does not depend simply on the existence or absence of Stigler's entry barriers. The presence of supracompetitive prices may normally be an inducement to entry, but, depending on the record on entry, it may also suggest the historical lesson that entry is risky, and therefore deterred.[30]

A firm's decision to take the investment risk depends on its anticipated post-entry rate of return. Initially, a small market that is stable or declining and promises no new growth for an entrant to capture may not be attractive for entry.[31] It might, however, be the sort of market conducive to collusion. Unrecoverable sunk costs are not lightly to be regarded when the ten-year record of entry shows five firms holding two percent, and two of the three largest firms recently merged into a single firm with almost half the market. The few incumbent firms may have the scale economy advantage of lower unit costs, which may permit selective retaliatory pricing that is not, strictly speaking, predatory, but is, generally speaking, entry deterring. And, if there is excess capacity, as there is alleged to be in the two or three incumbent firms that operate at 5–7% of the market, expansion of product "runs" on individual lines of kits could deter entry by easily increasing supply and flooding the market with cheaper kits.[32] Finally, assessing once again the historical record of entry, the potential entrant/expander may well be aware that it faces no Stiglerian barriers, and no necessarily enormous capital investment costs in getting a toehold in the market, yet it may anticipate a post entry rate of return that does justify the effort, given other investment alternatives.[33]

III

Unlike the majority I regard this as a close case, and, on balance, I come out the other way. The major weaknesses arguing against this outcome are the absence of stronger evidence as to

[28] That fact that the Commission found none of these retaliatory discounts to be predatory suggests that pre-entry price levels were higher than in a competitive environment.

[29] A claim that social costs of a merger would be small is a much weaker defense than a claim, as in an economies defense, that a merger would yield social gains. The social interest in attempting to isolate and immunize the former is plainly less than the social interest in protecting the latter. It may be sensible to absolve the low-loss cases, but whether it is or not depends heavily on the facility with which they can be identified. IV Areeda and Turner, *supra*, ¶917b at 87.

(High profit rates associated with high risks of entry, deter entry, and enable established firms to earn supranormal profits. Records of small firms at the edge of the market an important factor in assessing risk).

[31] DOJ Merger Guides, section 3.3 n. 21 (1984); Webbink, Entry, Price-Cost Margins and Barriers to Entry in 280 4-Digit Industries, 1967–1972, Federal Trade Commission Bureau of Economics Working Paper No. 19, 5, 14 (1979).

[32] Spence, "Entry, Capacity, Investment and Oligopolistic Pricing," 8 Bell J. Econ. 534 (1976); Dixit, "A Model of Duopoly Suggesting a Theory of Entry Barriers," 10 Bell J. Econ. 20, 21 (1979) ("The threat of a large enough post-entry output will make entry seem unprofitable, and then it need never be implemented"); Wenders, "Excess Capacity as a Barrier to Entry," 20 J. of Ind. Econ. 14 (1971).

[33] The entrant should ignore preentry price and profit levels, but attempt to infer the postentry equilibrium price and profit levels. If the entrant's expected profits are negative, he is deterred; the no-entry profits accrue to the already established firm rather than the equally efficient entrant. Even a more efficient entrant may be deterred by an established firm who has sunk sufficient costs to make his own exit uneconomical, and hence, entry mutually destructive. Salop, "Strategic Entry Deterrence," 69 Am. Econ. Rev. 335 (1979).

supracompetitive profits of incumbent firms, and on economies of scale that may operate to create disadvantages. But it is precisely because of the typical—perhaps inherent—difficulty and potential ambiguity of such evidence in merger cases that the history of merger law shows a struggle to find simplifying assumptions that can proxy for economic proof positive. Examples of these assumptions to which I am willing to give credence, based on my reading of the law, the 1982 and 1984 DOJ Guides, and the 1982 FTC Statement on Horizontal Mergers, are that high market shares and Herfindahls indicate the prospect for collusion and that a long record of failed or marginal entry raises an inference of high entry barriers.

The sun has probably set on the rule of presumptive illegality in horizontal merger cases, such as outlined in *U.S. v. Philadelphia National Bank*, 374 U.S. 321, 364–66 (1963).[34] Yet have we not gone all the way in the other direction if we say that the *only* relevant question is whether particularly defined barriers to entry are high or low, irrespective of the traditional indicia of antitrust concerns about enhanced potential for collusion? I seriously question, based on the facts of this case, whether any true advance in our knowledge of how this market really works is promoted by a rigid economic theory of "absolute" barriers to entry, or a notion of "delayed" entry in terms of decades. Certainly such an economic theory is outcome determinative, just as was the old rule of presumptive illegality. The analysis contained in this opinion of the Commission denies us the latitude to consider whether market structure, performance or conduct in a given case leads rational potential entrants to walk away, on the basis of their assessment of risks they face and the sorry record of the firms the Commission here would call "new entrants." One wonders why the FTC and the Department of Justice have spilled so much ink over how to analyze mergers, if it is all as easy as this. The clear implication of the writing and then rewriting of the DOJ Guides was that merger analysis was complicated stuff, and that fair enforcers should take into account relatively sophisticated analysis of all aspects of the market. I suggest that the majority has turned the old section 7 "numbers" game on its head in favor of a "quick look" approach for Stigler's barriers to entry, the new *primus inter pores* of merger law. One result of such an approach would be to sanction any and all mergers in this market, right up to the point where a pure monopoly results. If there are no barriers to entry, after all, what would be wrong with that?[35] The entry barriers "quick look" test leads to a rule of *per se* legality for many mergers.

It is, of course, always possible that the distinguished and expert majority is dead right with their election of the economic theory to drive the result in this case. But my own brief assessment of the literature on this issue shows it long on words and short on empirical findings. There is no surfeit of discussions of the issues, but no agreement on them, either.

What is emerging in Commission merger decisions is by and large the rule that, according to the "new" economic learning, a merger is almost always legal. The Commission has charted a new course away from the great body of the traditional caselaw, and indeed abandoned the assumptions that have attended merger enforcement policy of both old and recent vintage, substituting a well-nigh theological—and surely theoretical—economic *deus ex machina*.

[FR Doc. 85–16899 Filed 7–16–85; 8:45 am]

BILLING CODE 6750–01–M

[34] However, Judge Winter in Waste Management observed that the Supreme Court has never expressly stated that ease of entry is one of the circumstances that fits the Court's approving assessment of market conditions to supplement the statistical market share and concentration data of the prima facie case, such as occurred in U.S. v. General Dynamics Corp., 415 U.S. 486 (1974); 743 F. 2d at 982 (1984).

[35] Or, as the Commission opinion puts it, "In the absence of barriers to entry, incumbent firms cannot exercise market power, regardless of the concentration in the nominal 'market,' and even if that 'market' has been 'monopolized' by a single firm."

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 3

Adoption of Revised Registration Forms

AGENCY: Commodity Futures Trading Commission.

ACTION: Adoption of revised registration forms.

SUMMARY: The Commodity Futures Trading Commission ("Commission") has revised its Form 8–R, the application for registration as an associated person or floor broker and supplement to application on Form 7–R. In connection therewith, the Commission has also made certain revisions to the Form 8–S, special registration for certain associated persons, and the Form 8–T, notice of termination. These revisions, which are essentially technical and non-substantive in nature, have been adopted to assist the National Futures Association ("NFA") in the performance of the registration functions which the Commission has authorized NFA to perform and in the implementation and operation of NFA's program to register and regulate directly the associated persons sponsored by members of NFA.

EFFECTIVE DATE: August 1, 1985.

FOR MORE INFORMATION CONTACT: Robert P. Shiner, Assistant Director, and Linda Kurjan, Special Counsel, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581. Telephone: (202) 254–9703 and (202) 254–8955, respectively.

SUPPLEMENTARY INFORMATION: Section 17 of the Commodity Exchange Act ("Act"), 7 U.S.C. 21 (1982), sets forth the requirements for registration of, and the authority which may be exercised by, a registered futures association. In this connection, section 17(b)(4) of the Act specifically requires the rules of such association to provide that:

> no person shall become a member and no natural person shall become a person associated with a member unless such person is qualified to become a member or a person associated with a member in conformity with specified and appropriate standards with respect to the training, experience and such other qualifications of such person as the association finds necessary or desirable . . .

Elsewhere, section 17(b)(8) of the Act requires that "the rules of the association provide that its members and persons associated with its members shall be appropriately disciplined, by explusion, suspension, fine, censure or being suspended or barred from being associated with all members, or any other fitting penalty, for any violation of its rules" and section 17(p)(3) requires that the association "establish minimum standards governing the sales practices of its members and persons associated therewith for transactions subject to the provisions of the Act."

Thus, section 17 of the Act clearly requires a registered futures association to register and regulate directly individuals associated with a member of the association as well as the member itself. To effect its obligations under the Act with respect to "persons associated with a member," NFA, the only futures association registered by the Commission, has adopted bylaw 301(b), which provides:

> No person may be associated with a Member of NFA unless the person is

registered with NFA as an Associate or is an NFA Member. As used in these bylaws, the

which a significant number of associated person applicants would

immediate registration in the event of a

registered with NFA as an Associate or is an NFA Member. As used in these bylaws, the term "associated with a Member" means any person who is associated with a Member of NFA within the meaning of the term "associated person" as used in Section 4k of the Act and who is required to be registered as such with the Commission. Registration with NFA as an Associate is not registration as an associated person under the Act.

To date, NFA has not implemented this bylaw in order to focus its resources on matters which NFA, with the concurrence of the Commission, has considered more important in its development as a self-regulatory organization. By letter dated July 3, 1985, however, NFA has advised the Commission that, effective August 1, 1985, NFA will implement and enforce bylaw 301(b). Thus, all individuals required to be registered with the Commission as an associated person who are sponsored by a registrant which is a member of NFA will, in turn, be required to be registered with NFA as an Associate.

The Commission has previously authorized NFA to process and, where appropriate, grant applications for registration as an associated person. In order to reduce the burden on NFA members and their associated persons, NFA has requested the Commission to approve certain revisions to the Form 8–R, application for registration as an associated person or floor broker and supplement to application on Form 7–R, which, when adopted, will permit the same form to be used to apply for registration both as an associated person with the Commission and as an Associate with NFA.[1] Conforming amendments to the Form 8–S, special registration for certain associated persons, and the Form 8–T, notice of termination, have also been proposed.

NFA has also advised the Commission that the Chicago Board of Trade, the Chicago Mercantile Exchange, the New York Futures Exchange and the Minneapolis Grain Exchange, the four designated contract markets which have rules requiring any associated person sponsored by a member of such contract market to be registered with that contract market as a registered commodity representative, have agreed to authorize NFA to process the applications for such registration. Thus, the revisions requested by NFA will permit these forms to be used to register with the appropriate contract market as a registered commodity representative as well, and the number of applications which a significant number of associated person applicants would otherwise be required to complete and file will be reduced from six to one.

The Commission has carefully considered the revisions requested by NFA and has concluded that they are essentially technical and non-sustantive in nature and, as such, they will impose no additional burden on Commission registrants. To the contrary, as noted above, adoption of these revisions will relieve such registrants, both associated persons and their sponsors, of a substantial administrative burden by reducing from six to one the potential number of applications an applicant must file. Therefore, the Commission has determined to adopt these revised forms effective August 1, 1985.

The most significant changes in the forms have been made to the Form 8–R. In addition to changes in the instructions to reflect the transfer of registration processing from the Commission to NFA and changes in format, the following three questions have been added to the disciplinary history section of the form, Section G:

Has a bonding or surety company denied, paid out on, or revoked coverage for you?

Do you have any unsatisfied judgments or liens against you?

Were you discharged or permitted to resign from any employment due to a complaint or legal proceeding by a customer, an investigation or any disciplinary action?

Similar questions are presently found in the applications of the Chicago Board of Trade and Chicago Mercantile Exchange for registration as a registered commodity representative and NFA has concluded that the responses to these questions are relevant in determining fitness for registration as an Associate. To the extent those questions are not already set forth in the Form 8–S and the Form 8–T, those forms have been revised accordingly.

The second addition to the Form 8–R is the Applicant Agreement, which follows the applicant's certification of the accuracy of the responses in the application. Pursuant to the Applicant Agreement, the applicant applies for registration as an Associate with NFA and agrees to be bound by all NFA requirements. In addition, if the applicant's sponsor or, in the event the applicant's sponsor is a guaranteed introducing broker under Commission rule 1.10(j), the guarantor of the applicant's sponsor, is a member of a contract market which has rules applicable to associated persons of members, the applicant agrees to abide by those rules as well.

Finally, the Form 8–R has been revised to permit its use to obtain immediate registration in the event of a transfer from one sponsor to another or in the event an associated person of a commodity pool operator or commodity trading advisor wants to become associated concurrently with an introducing broker or a futures commission merchant. Under the Commission's registration rules, an individual who terminates his association with one sponsor may become registered immediately with another sponsor if, within sixty days of the date of such termination, the new sponsor mails to NFA or the Commission, as appropriate, certain required certifications followed within sixty days thereafter by a Form 8–R and the fingerprint card of such person.[2] The Commission's Form 8–S is currently used to make these required certifications. Similarly, the Form 8–S is used when an associated person of a commodity pool operator and commodity trading advisor applies for concurrent registration with an introducing broker or futures commission merchant.

In order to improve the efficiency of registration processing, NFA has requested that the Form 8–R be revised to permit it to be used alone in such circumstances, without requiring the use of the intervening Form 8–S.[3] The necessary revisions include the addition of a section on the first page of the application, wherein the applicant may indicate that he qualifies for special registration, and the addition of the special certifications required under the rules.

The Commission adopted these latter revisions because it believes they have merit beyond simple efficiency. In particular, the Commission notes that by using the Form 8–R only, the new sponsor will have available the answers to each of the disciplinary history questions and will have completed the sponsor's certification at the time the associated person first becomes associated with the sponsor, rather than sixty days thereafter. The Commission understands that many sponsors already require the Form 8–R and the sponsor's certification to be completed as a matter of good business practice, and the Commission believes it should encourage more registrants to adopt this practice. At the same time, however, the Commission must emphasize that sponsors are free to continue to use the Form 8–S procedure if they so choose.

[1] Of course, this same Form 8–R will continue to be used by applicants for registration as a floor broker or as an associated person of a leverage transaction merchant.

[2] See Commission rules 3.12(d), 3.16(d) and 3.18, 17 CFR 3.12(d), 3.16(d) and 3.18(d) (1984).

[3] Commission regulations do not require the use of the Form 8–R, *per se*.

The Commission adopted the Form 8–S procedure essentially to afford a new sponsor sufficient time to verify the past employment and educational history of the associated person without interfering with that person's ability to work. In this connection, NFA has asked the Commission whether, in these circumstances, a new sponsor may certify the past employment and educational history of an associated person by contacting the person's previous sponsoring employer rather than separately confirming the associated person's history. The Commission has never prescribed the manner in which a sponsor must verify an applicant's employment and educational history. Therefore, the Commission does not object if a sponsor wishes to verify these matters through the previous employer. The Commission must emphasize, however, that is the obligation of each sponsor to verify the employment and educational history of its associated persons, and the sponsor cannot avoid this obligation by relying upon the previous sponsor.

Related Matters

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. Chapter 35 (1982), the Commission previously submitted these forms to the Office of Management and Budget. The control number provided for these forms is 3038–0023.

Effective Date

The Form 8–R, Form 8–S and Form 8–T, as revised, shall be effective August 1, 1985. As the Commission has noted the amendments to the forms are predominantly technical and non-substantive in nature. Moreover, these amendments relieve burdens on the affected public by combining and, thus, eliminating repetitive questions. The Commission, therefore, finds that the notice and public comment procedures of 5 U.S.C. 553 are not required.

Issued by the Commission on July 9, 1985, in Washington, D.C.

Jean A. Webb,

Secretary of the Commission.

COMMODITY FUTURES TRADING COMMISSION
NATIONAL FUTURES ASSOCIATION

OMB No. 3038-0023

FORM 8-R

APPLICATION FOR REGISTRATION AS ASSOCIATED PERSON AND NFA ASSOCIATE OR FLOOR BROKER AND BIOGRAPHICAL SUPPLEMENT TO APPLICATION ON CFTC FORM 7-R AND SPECIAL REGISTRATION FOR CERTAIN ASSOCIATED PERSONS

WHO MUST FILE FORM 8-R

(See definitions on page 7 of Form 8-R)

Associated Persons
Generally each time you apply for registration as an associated person ("AP") your sponsor must submit a Form 8-R for you. To be registered, you must be associated with a futures commission merchant ("FCM"), introducing broker ("IB"), commodity trading advisor ("CTA"), commodity pool operator ("CPO") or leverage transaction merchant ("LTM").

Principals
Any **initial Application** for registration as an FCM, IB, CTA, CPO or LTM must be accompanied by a Form 8-R for each principal except for principals who are already individually a registrant or a principal of a registrant. An individual seeking to become a principal of an existing registrant should consult CFTC Rule 3.32 to determine whether the filing of a Form 8-R for such individual is required. (A Branch Manager or Designated Supervisor must be registered as an AP.)

Special Registration (Transfers and Multiple Associations)
If you have either left your prior employment as an AP within the last 60 days or you want to be registered as an AP of an FCM or IB while currently registered as an AP of a CPO or CTA, you are eligible to use the Form 8-R to obtain immediate registration (effective on filing the properly completed Form 8-R.) You may also use Form 8-S to obtain immediate registration in these circumstances. If filing Form 8-S, a Form 8-R must be filed within 60 days of mailing the Form 8-S.

Floor Brokers
If you are applying for registration as a floor broker you must file Form 8-R. If you are applying for renewal of registration as a floor broker you must file Form 8-R but may answer "No Change" to any question which asks for information that has previously been furnished to the Commission on a Form 8-R or supplement thereto if such information remains accurate and unchanged. If the information has not changed but additional information is needed as an update, you may insert the words "Information Since Previous Filing" and then give the new information.

You must have been granted trading privileges by a board of trade which has been designated as a contract market by the Commission in order to be registered as a floor broker or to have your registration as a floor broker renewed.

WHAT TO FILE

Associated Persons
To apply for a temporary license and for registration as an AP your sponsor must file all of the following for you at the same time:
1. The appropriate fee;
2. A Form 8-R completed in accordance with the instructions thereto;
3. Your fingerprints on a fingerprint card provided by NFA, or if you are an AP of an LTM, on a fingerprint card provided by the Commission*, and
4. Satisfactory evidence that you passed the National Commodity Futures Examination ("NCFE" or "Series 3".) (Does not apply to APs of LTMs.)

Applications should be assembled in the order listed above.

Principals
Principals must file all of the following at the same time:
1. A Form 8-R completed in accordance with the instructions thereto;
2. Your fingerprints on a fingerprint card provided by NFA, or if you are a principal of an LTM, on a fingerprint card provided by the Commission*. (You need not file a fingerprint card if you have a current Form 8-R or Form 94 on file or you are exempt under Section 3.32 of the Commission's regulations);
3. Satisfactory evidence of passage of the National Commodity Futures Examination ("NCFE" or "Series 3") if you are acting in the capacity of an associated person, or supervise, or have the authority to supervise (generally includes Chief Executive Officers, Chief Operating Officers, Presidents and General Partners as well as others) a person acting as an associated person.

Applications should be assembled in the order listed above.

Special Registration (Transfers and Multiple Associations)
To obtain immediate registration as an AP your sponsor must file the following for you:
1. The appropriate fee;
2. A Form 8-R completed in accordance with the instructions thereto;

Within 60 days:
3. Your fingerprints on a fingerprint card provided by NFA, or if you are applying for special registration as an AP of an LTM, on a fingerprint card provided by the Commission.

OR

1. A Form 8-S completed in accordance with the instructions thereto;

Within 60 days:
2. The appropriate fee;
3. A Form 8-R completed in accordance with the instructions thereto;
4. Your fingerprints on a fingerprint card provided by NFA, or if you are applying for special registration as an AP of an LTM, on a fingerprint card provided by the Commission.

Floor Brokers
To apply for registration as a floor broker you must file all of the following at the same time:
1. The appropriate fee;
2. A Form 8-R completed in accordance with the instructions thereto;
3. Your fingerprints on a fingerprint card provided by the Commission*. (You need not file a fingerprint card if you have a current Form 8-R or Form 94 on file.)

Applications should be assembled in the order listed above.

WHERE TO FILE

All Applicants
Send all registration applications to National Futures Association, Office of the Secretary, P.O. Box 96383, Chicago, Illinois 60693, except those for APs and principals of LTMs as well as floor broker applications which should be sent with separate remittance to the Commodity Futures Trading Commission, P.O. Box 70685, Chicago, Illinois 60673.

If you must file a Form 8-R, a fingerprint card or other document with both the Commission and NFA, you may submit the original Form 8-R, fingerprint card or other document to either the Commission or NFA and simultaneously submit a legible, accurate and complete photocopy of the Form 8-R, fingerprint card or document with an original signature and date in each place where required on the original form, card or document, to NFA or the Commission. All photocopies should note at the bottom of the copy that "Original was sent to NFA" or "Original was sent to the CFTC" as appropriate.

*Fingerprint Cards — In lieu of a fingerprint card you may submit (1) a legible, accurate and complete photocopy of a fingerprint card which has been submitted to the FBI for processing and identification if such processing was completed satisfactorily by the FBI not more than 90 days prior to the filing with the Commission or NFA of the photocopy (You must include any report, record or notation made available by the FBI with respect to the fingerprint card.) Photocopies must be validated on the reverse side with the signature of an officer, a general partner or the sole proprietor. Floor broker applicants using this alternative must sign for themselves; or (2) a statement that your application for initial registration in any capacity was granted within the preceding 90 days, PROVIDED that you were required to file a fingerprint card in connection with such application for initial registration.

COMMODITY FUTURES TRADING COMMISSION
NATIONAL FUTURES ASSOCIATION

OMB No. 3038-0023

FORM 8-R

REGISTRATION FEES

All fees must be remitted by money order, bank draft or check. Registration fees are nonrefundable.

APs of FCMs, IBs, CTAs and CPOs
Each Form 8-R filed to obtain registration or special registration as an AP of an FCM, IB, CPO or CTA must be accompanied by a fee of $30 payable to National Futures Association.

APs of LTMs
Each Form 8-R filed to obtain registration or special registration as an AP of an LTM must be accompanied by a fee of $35 payable to the Commodity Futures Trading Commission.

Floor Brokers
Each application for registration or for renewal of registration as a floor broker must be accompanied by a fee of $25 payable to the Commodity Futures Trading Commission.

TESTING REQUIREMENTS

(Not applicable to Floor Brokers and APs of LTMs)

All individuals applying for registration as a sole proprietor FCM, IB, CPO, CTA or as an AP of any of the foregoing must provide proof of passage of the National Commodity Futures Examination ("NCFE" or "Series 3".) A copy of the testing application can be found in this booklet.

No exemptions or waivers of the testing requirement will be granted. However, certain individuals may not be required to take the NCFE (Series 3) because they meet conditions established by NFA. These are:

If Applicant is applying as:	Then NCFE not required if:
AP of FCM, CPO or CTA, or sole proprietor FCM, CPO or CTA	Applicant has been continuously registered or pending as an FCM, IB, CPO, CTA or AP or principal of any of the foregoing, since on or before March 1, 1984, without a lapse in registration.
AP of an IB, or sole proprietor IB	Applicant has been continuously registered or pending as an FCM, IB, CPO, CTA, or AP or principal of any of the foregoing, since on or before August 1, 1983, without a lapse in registration.
Any of the above, and is currently registered as a floor broker	Floor Broker registration is current (pending or inactive floor brokers not applicable.)
Any of the above, and is registered with NASD as General Securities Representative and limits futures activities to soliciting or accepting orders for stock index products or supervision of persons whose activities are so limited, and passed the NYFE Registered Commodity Representative (Series 20) exam before December 31, 1984	Applicant continues to limit futures activities to soliciting or accepting orders for stock index products or supervising persons whose activities are so limited.
Any of the above, and is registered with NASD as General Securities Representative and limits futures activities to solicitation of commodity pool participants or supervision of persons whose activities are so limited.	Applicant submits Alternate Testing Certification (Certification available from NFA) and proof of NASD registration.

TEMPORARY LICENSES

If the Form 8-R is being filed in connection with an initial application for registration as an AP, you may receive a temporary license pending completion of your fitness check and prior to being granted registration. If you receive a temporary license, you may act in the capacity of an AP as if such registration had been granted. In that case, you will be subject to all of the obligations and liabilities imposed on a registrant under the Commodity Exchange Act and the rules, regulations and orders thereunder. In particular you will be subject to reparation and arbitration proceedings. A temporary license, however, does not confer any right to registration at a later date.

An applicant will not qualify for a temporary license if he answers "Yes" to any questions in items 14-18 of the Disciplinary History section.

While acting pursuant to a temporary license, an applicant for registration as an AP may not be sponsored by any registrant other than that registrant which filed the sponsor's certification.

If you receive a temporary license, it will terminate immediately: (1) upon notice that you are subject to a statutory disqualification under Section 8a(2) through Section 8a(4) of the Act; (2) upon termination of your association with the sponsoring registrant; or (3) at the end of six months. Unless action is taken to deny your application for registration within six months of the date the license is granted, the license will convert automatically to a registration.

ASSOCIATE MEMBERSHIP IN NFA

If your sponsor is a Member of NFA you will be granted Associate membership in NFA for the duration of the temporary license, and you will become an Associate if and when you are granted registration as an AP.

DURATION OF REGISTRATION AS AN AP

The duration of your registration as an AP will be until (1) you cease association with your sponsor for whatever reason or (2) you or your sponsor's registration lapses or is revoked, suspended, or withdrawn.

TERMINATIONS AND FAILURES TO BECOME ASSOCIATED

An FCM, IB, CPO or CTA must file a properly completed Notice of Termination (Form 8-T) with NFA within twenty days after the occurence of any of the following: (1) the failure of an individual to become associated with the sponsoring registrant after the filing of a Form 8-R on his behalf; or (2) the termination of the association of an individual with the sponsoring registrant; or (3) the termination of the affiliation of a principal with the firm. Form 8-T's for LTM personnel should be filed with the Commission.

Notice of termination as described above may be given on a Uniform Termination Notice for Securities Industry Registration (Form U-5) in lieu of a Form 8-T.

FORM 8-R

GENERAL INSTRUCTIONS FOR PREPARING FORM 8-R

1. All information must be typed or neatly printed in black ink.
2. All required signatures must be original; mechanical reproduction of signatures will not be accepted.
3. All questions on Form 8-R must be answered unless specifically directed otherwise. If you are not required to answer a question, enter "Not Applicable."
4. You must use all space provided on Form 8-R before using a supplemental sheet. Be certain that the name of the applicant, the appropriate signatory and the number corresponding to the number on the Form 8-R appear on every attachment sheet.
5. Each AP, Floor Broker or principal of a registrant must keep accurate and current the information supplied on the Form 8-R or any supplements thereto. A change of any such information must be promptly reported on a Form 3-R. A Form 3-R is provided in this booklet. Tear it out and keep it for future use.
6. If you have an inquiry or question about a pending application and you are filing as an associated person or principal, you should contact the sponsor with which you are going to be affiliated.
7. You should retain a copy of all applications and test results for your files.
8. If an application is incomplete or otherwise improperly submitted its processing will be delayed. If an application is seriously deficient it may be returned. Filing fees are not refundable.
9. Acceptance of any form does not constitute a finding that the information contained therein is accurate, current or complete or that it has otherwise been filed as required.

APPLICATION FOR REGISTRATION AS ASSOCIATED PERSON AND NFA ASSOCIATE OR FLOOR BROKER AND SUPPLEMENT TO APPLICATION ON CFTC FORM 7-R AND SPECIAL REGISTRATION FOR CERTAIN ASSOCIATED PERSONS

BE CERTAIN TO ANSWER ALL QUESTIONS AS DIRECTED

A. REGISTRATION INFORMATION

1 THIS FORM IS BEING FILED TO REGISTER AS THE FOLLOWING (Staple Application Fee to Left Side of This Page)

(FILE WITH NFA)		(FILE WITH CFTC)	
☐ Associated Person of FCM	($30)	☐ Associated Person of LTM	($35)
☐ Associated Person of IB	($30)	☐ Floor Broker	($25)
☐ Associated Person of CTA	($30)		
☐ Associated Person of CPO	($30)		

1A THIS FORM IS BEING FILED AS A BIOGRAPHICAL SUPPLEMENT TO APPLICATION FOR REGISTRATION (No Additional Fee Required.) A principal who is also registering as an AP must check the appropriate boxes
(LTM's File with CFTC. All others file with NFA)

☐ Principal ☐ Branch Office Manager or Designated Supervisor

2 **SPECIAL REGISTRATION.** If you meet the requirements of 2A or B below you are eligible to apply for Special Registration. If you are using this form to apply for special registration do NOT file Form 8-S
NOTE: If the new sponsoring firm is a CTA or CPO and the Applicant continues to be registered as an AP of another CTA or CPO or as an AP of an FCM or IB, the new sponsoring CTA or CPO must file Form 3-R (Part II) instead of this form (Check applicable boxes and complete as indicated.)

The New Sponsoring Firm is:

A An ☐ FCM ☐ IB ☐ CTA ☐ CPO ☐ LTM Applicant's prior AP registration has expired within the preceeding 60 days

Name of Prior Firm

Firm NFA ID No	Firm CFTC ID No	Date AP Terminated

B An ☐ FCM or ☐ IB and the Applicant continues to be registered as an AP of a CTA and/or CPO firm

Name of CTA and/or CPO Firm continuing to Sponsor AP

Firm NFA ID No	Firm CFTC ID No	Check Categories
		☐ CTA ☐ CPO

Effective Date of Special Registration is date this Form 8-R is mailed. Date mailed: _____ Mo/Day/Yr

B. PERSONAL HISTORY

3 NAME (Last, First, Middle, Suffix)¹

PERSONAL ID No (If Assigned)	
4a NFA ID	4b CFTC ID

5 HAVE YOU EVER BEEN KNOWN BY ANY OTHER NAME(S) (Including Maiden Name)?¹
☐ YES If "yes," give name(s) ☐ No

FORM 8-R

G. DISCIPLINARY HISTORY

INSTRUCTIONS: Carefully read the following instructions before you answer items 14 through 21.

A. For each question answered "YES," supply the following information:

1. What the circumstances were, in your own words;
2. Who was involved (e.g. the parties to any proceeding);
3. When the event or conduct requiring a "YES" answer happened;
4. What the final determination was, if any, and the date on which that determination was made.
5. A certified copy of any applicable documents, such as any complaint, plea, order, agreement of settlement, verdict or other findings made, and sanctions or sentences imposed. (Court orders should be certified.) If documents are not attached, an explanation stating why documents are not obtainable must be furnished.

B. With respect to item 14B and item 15, a "YES" answer is required regardless of whether: the record was expunged, set aside or sealed; there was a conditional discharge or post-conviction dismissal; a state certificate or relief from disabilities or similar document was issued which relieves the holder of forfeitures, disabilities or bars that result from a conviction; or a pardon was granted. You must also include information as to the foregoing matters. You may, however, answer "NO" if the case was adjudicated in a juvenile court or under a youth offender law.

Note: If you answer "YES" to more than one question and the details and documents you must supply with respect to each are identical, you need only supply such information once. Be sure, however, to indicate for which questions such information is being supplied. No details or documents need be furnished if the details have been reported in writing to the Commission or NFA on a previous registration application or supplemental statement or if the action was brought by the Commission or NFA or was a reparations proceeding. **You must, however, write the words "previous filing," if applicable, give the name and docket or case number of the action or proceeding next to your "YES" response and indicate the year of the action or proceeding.**

C. You are deemed to control a firm, corporation or other organization if you:

1. Have the right to vote, or are the beneficial owner of, ten percent or more of the voting securities;
2. Are entitled to receive ten percent or more of the net profits;
3. Have contributed ten percent or more of the capital;
4. Are the chief executive officer;
5. Are a director;
6. Are a sole proprietor, if organized as a sole proprietorship; or
7. Are a general partner, if organized as a partnership.

14. Have you or any firm, corporation or other organization which you control or have controlled ever:

A. Been subject to an expulsion, bar, fine or civil monetary penalty, censure, denial (including withdrawal of an application for cause), suspension or revocation of membership or registration, permanent or temporary injunction, cease and desist order, denial of trading privileges or other sanction or disciplinary action through an adverse determination, voluntary settlement or otherwise in an action or proceeding brought by or before:

(i) The Commodity Futures Trading Commission, the Securities and Exchange Commission or the attorney general, securities commissioner or a similar regulatory authority of any state, territory, possession, the District of Columbia or foreign country:
☐ YES ☐ NO

(ii) Any commodity, option or securities exchange, clearing organization, contract market, National Futures Association or other association registered with the Commission under section 17 of the Commodity Exchange Act, or the National Association of Securities Dealers, Inc.; or:
☐ YES ☐ NO

(iii) A professional association in any of the following fields: accounting, banking, commodities, finance, insurance, law, real estate or securities?
☐ YES ☐ NO

B. Been charged with, been convicted or found guilty of, or pleaded guilty or nolo contendere to, any felony in a federal, state or foreign court?
☐ YES ☐ NO

C. Been found by any court or by the Commission or any federal or state agency or other governmental body, or by agreement of settlement to which the Commission or any federal or state agency or other governmental body is a party:

(i) To have violated any provision of the Commodity Exchange Act, the Securities Act of 1933, the Securities Exchange Act of 1934, the Public Utility Holding Company Act of 1935, the Trust Indenture Act of 1939, the Investment Advisers Act of 1940, the Investment Company Act of 1940, the Securities Investor Protection Act of 1970, the Foreign Corrupt Practices Act of 1977, or any similar statute of a state or foreign jurisdiction, or any rule, regulation or order under any such statute, or the rules of the Municipal Securities Rulemaking Board:
☐ YES ☐ NO

(ii) To have violated any statute or any rule, regulation or order thereunder which involves embezzlement, theft, extortion, fraud, fraudulent conversion, misappropriation of funds, securities or property, forgery, counterfeiting, false pretenses, bribery or gambling; or
☐ YES ☐ NO

(iii) To have willfully aided, abetted, counseled, commanded, induced or procured such violation by any other person?
☐ YES ☐ NO

D. Been debarred by any agency of the United States from contracting with the United States?
☐ YES ☐ NO

15. Within the last ten years, have you or any firm, corporation or other organization which you control or have controlled, been convicted or found guilty of, or pleaded guilty or nolo contendere to, a misdemeanor which:

(i) Involves any transaction or advice concerning any contract of sale of a commodity for future delivery or any activity subject to Commission regulation under section 4c (options) or 19 (leverage transactions) of the Commodity Exchange Act or concerning a security;

☐ YES ☐ NO

(ii) Arises out of the conduct of the business of a futures commission merchant, introducing broker, floor broker, commodity trading advisor, commodity pool operator, leverage transaction merchant, associated person of any registrant under the Commodity Exchange Act, securities broker, securities dealer, municipal securities broker, municipal securities dealer, transfer agent, clearing agency, securities information processor, investment adviser, investment company, or an affiliated person or employee of any of the foregoing;

☐ YES ☐ NO

(iii) Involves embezzlement, theft, extortion, fraud, fraudulent conversion, misappropriation of funds, securities or property, forgery, counterfeiting, false pretenses, bribery or gambling; or

☐ YES ☐ NO

(iv) Involves the violation of section 152 (concealment of assets, making of false oaths or claims, or bribery in connection with a bankruptcy), 1341, 1342, or 1343 (mail fraud) or chapter 25 (counterfeiting and forgery), 47 (fraud or false statements in a matter within the jurisdiction of a United States department or agency), 95 (racketeering) or 96 (racketeering activity) of title 18 of the United States Code?

☐ YES ☐ NO

16. Are you or any firm, corporation or other organization which you control or have controlled, a party to any action, or is there any charge pending, or have you been informed of any action or charge, the resolution of which could result in a "YES" answer to any of the above questions (items 14 and 15)?

☐ YES ☐ NO

17 Within the past ten years, has any firm, corporation or other organization which you control or have controlled been adjudicated bankrupt under any bankruptcy code or act, had a trustee appointed pursuant to the Securities Investor Protection Act of 1970 or been in federal or state receivership?

☐ YES ☐ NO

18. Have you ever:

A. Made or caused to be made any statement which was found to be at the time and in light of the circumstances under which it was made, false or misleading with respect to any material fact, or omitted to state any material fact, which was required to be stated:

(i) In any application for registration with, or for membership, associate membership or participation in;

☐ YES ☐ NO

(ii) In any report required to be filed with; or

☐ YES ☐ NO

(iii) In any proceeding before;

any self-regulatory organization described in item 14A(ii) above, the Commission or the Securities and Exchange Commission?

☐ YES ☐ NO

B. Been discharged, or requested or permitted to resign for cause as a result of allegations or charges of embezzlement, theft, fraud, fraudulent conversion, misappropriation of funds, securities or property, or failure to supervise another person in the conduct of such person's activities as a registrant of the Commission, Securities and Exchange Commission, National Futures Association, National Association of Securities Dealers, Inc. or other self-regulatory organization?

☐ YES ☐ NO

19. Has a bonding or surety company ever denied, paid out on, or revoked coverage for you?

☐ YES ☐ NO

20. Do you now have any unsatisfied judgments or liens against you?

☐ YES ☐ NO

21. Were you discharged or permitted to resign from any employment due to a complaint or legal proceeding by a customer, an investigation, or any disciplinary action?

☐ YES ☐ NO

OMB No 3038-0023

FORM 8-R

H. **Applicant's Certification** (The following should be read very carefully and signed by the applicant, registrant, branch office manager or other principals)

I understand that I am subject to the imposition of criminal penalties under section 9(b) of the Commodity Exchange Act and 18 U.S.C. 1001 for any false statements or omissions made in this application. I further certify that I will at all times keep accurate and current the answers to the items required to be updated by filing written notice of changes with National Futures Association, 200 W. Madison Street, Chicago, Illinois 60606, or, in the case of an associated person or principal of a leverage transaction merchant or floor broker, with the Commission's Registration Unit, 233 South Wacker Drive, Suite 4600, Chicago, Illinois 60606.

I certify that my answers and statements in this Form 8-R are true and that in light of the circumstances under which I have given them, my answers and statements in this Form 8-R are not misleading in any material respect. If I am applying for Special Registration, I further certify that my registration as an associated person is not suspended or revoked and if I have answered "Yes" to item 14 or item 18 the sponsor listed in item C-10 has been given a copy of the complaint or notice issued by the CFTC or NFA.

I understand that my address as submitted on Form 8-R may be deemed to be the address for delivery to me of any communications from the Commission and National Futures Association, including any notice of intent to deny, revoke or otherwise affect my registration, any summons, complaint, reparation claim, arbitration claim, order, subpoena, request for information, or any other written communication, unless I specify another address for this purpose. I further understand that I must keep current the address on this Form 8-R

I understand that I am not registered and may not act as an associated person or floor broker until a notice has been issued that registration has been granted unless (1) I am applying for and am eligible to receive Special Registration as an associated person; (2) this Form 8-R has been timely filed as an application for renewal of registration as a floor broker, or (3) a temporary license has been issued.

APPLICANT AGREEMENT. Does not apply to floor brokers and AP's of LTM's. If I am submitting this application to obtain registration as an associated person, I hereby also apply for registration with NFA as an Associate if my sponsor is or becomes a member of NFA and I understand that under NFA Bylaw (301)(f), execution and delivery of this application shall constitute (A) a representation that the information supplied in the application is complete and accurate, and (B) an express agreement by me that, if registered as an Associate, I shall become and remain bound by all NFA requirements as then and thereafter in effect. I also understand that if I am submitting this application in order to obtain registration as an associated person or as a supplement to my application for registration individually in another capacity (other than as a floor broker) that I may be subject to proficiency testing requirements under NFA rules, satisfaction of which is a prerequisite to obtaining a temporary license or such registration. I agree that the decision of NFA as to the results of any examinations that I may be required to pass under such rules will be accepted by me as final.

In consideration of NFA receiving and considering this application (if submitted to obtain registration as an Associate), I also submit to the jurisdiction of any contract market, of which my sponsor or any current or future guarantor (under CFTC Rule 1.10(j)) of my sponsor is or may become a member, which has or may adopt rules which apply to me as an associated person and I further agree to abide by all such rules and to comply with, be subject to, and abide by all requirements, rulings, orders, directives and decisions of and any penalties, prohibitions and limitations imposed by any such contract market.

I hereby authorize NFA and any contract market of which my sponsor or any current or future guarantor (under CFTC Rule 1.10(j)) of my sponsor is or may become a member ("self-regulatory organizations") to conduct investigations to determine my fitness for registration as an Associate and for association with my sponsor as an associated person and I agree to cooperate promptly and fully in such investigation, including submitting such documents and information to any self-regulatory organization which such self-regulatory organization, in its discretion, may require in connection with determining such fitness. I hereby authorize and request any person having such information to furnish it to any self-regulatory organization (or any agent acting on its behalf) upon its request and any person furnishing information to a self-regulatory organization in connection with the investigation authorized hereby, and any self-regulatory organization (or any agent acting in its behalf) hereby is released from any and all liability of whatever nature by reason of furnishing such information to a self-regulatory organization (or its agent) or by reason of conducting such investigation.

SPONSOR'S CERTIFICATION

(To be completed by Sponsor for Associated Person Registration Only)

APPLICANT'S NAME (Last, First, Middle, Suffix)	NFA ID No.	CFTC ID No.

I. VERIFICATION OF EMPLOYMENT AND EDUCATION (Periods of unemployment must be verified)

Sponsor must verify applicant's education and employment history during the preceding five years by contacting the relevant sources. If applicant left a previous employment as an AP within the last 60 days, the sponsor may indicate verification by noting below that it has contacted the applicant's last previous employer. The sponsor remains responsible in all cases for verification of the applicant's employment and education history for the past five years.

J. SPONSOR'S CERTIFICATION STATEMENT

I hereby certify that the information supplied by the applicant in response to questions contained in Form 8-R which relate to the applicant's employment and education history for the past five years has been verified. I certify that this application is accurate and complete to the best of my knowledge, information and belief. I further certify: 1) that the applicant has been hired or is employed by the sponsoring firm; OR 2) it is the intention of the sponsor to hire or otherwise employ the applicant as an associated person within thirty days after receipt of notification that the applicant has received a temporary license or has been so registered (contingent upon the sponsor hiring or otherwise employing the applicant as an associated person within thirty days), and that further, the applicant will not be permitted to act as an associated person until the applicant has received a temporary license or has been registered as such pursuant to this application.

I understand it is the duty and obligation of the firm not to employ a person with a statutory disqualification under section 8a(2) of the Act, to notify the Commission when any person associated with the firm is subject to a statutory disqualification under section 8a(2) of the Act and to supervise the sponsored person named herein, once he or she is employed, with a view toward preventing him or her from committing violations of the Commodity Exchange Act and the rules, regulations, and orders thereunder. I further certify that if the applicant answered "Yes" to item 14 or 16 the firm has received a copy of the complaint or letter issued by the Commission.

I understand that information contained in the Form 8-R has been supplied to this firm for the sole purpose of allowing it to verify the information contained in Form 8-R in connection with the registration of the person named herein as an associated person. I further represent that I have taken, and will take, such measures as are necessary to prevent the unwarranted dissemination of any of the information contained in Form 8-R and the records and documents retained in support of Form 8-R.

WILLFUL FALSIFICATION, MISREPRESENTATION, OR OMISSION OF ANY MATERIAL FACT REQUIRED TO BE STATED ON THIS FORM CONSTITUTES CAUSE FOR DENIAL, SUSPENSION, OR REVOCATION OF REGISTRATION AND PROSECUTION UNDER CRIMINAL STATUTES OF THE INDIVIDUAL AND FIRM MAKING THE ABOVE CERTIFICATION.

NATIONAL FUTURES ASSOCIATION

OMB No. 3038-0023

FORM 8-R

DEFINITIONS

1. **Associated Persons**
This term means any natural person who is associated in any of the following capacities with:

(1) A futures commission merchant or introducing broker as a partner, officer or employee (or any natural person occupying a similar status or performing similar functions), in any capacity which involves: (i) the solicitation or acceptance of customers' or option customers' orders (other than in a clerical capacity) or (ii) the supervision of any person or persons so engaged;

(2) A commodity pool operator as a partner, officer, employee, consultant or agent (or any natural person occupying a similar status or performing similar functions), in any capacity which involves: (i) the solicitation of funds, securities or property for participation in a commodity pool or (ii) the supervision of any person or persons so engaged;

(3) A commodity trading advisor as a partner, officer, employee, consultant or agent (or any natural person occupying a similar status or performing similar functions), in any capacity which involves: (i) the solicitation of a client's or prospective client's discretionary account or (ii) the supervision of any person or persons so engaged; or

(4) A leverage transaction merchant as a partner, officer, employee, consultant or agent (or any natural person occupying a similar status or performing similar functions), in any capacity which involves: (i) the solicitation or acceptance of leverage customers' orders (other than in a clerical capacity) for leverage transactions as defined in Section 31.4(x) of the Commission's regulations or (ii) the supervision of any person or persons so engaged.

2. **Floor Brokers**
This term means any person who, in or surrounding any pit, ring, post or other place provided by a contract market for the meeting of persons similarly engaged, purchases or sells for any person any commodity for future delivery on or subject to the rules of any contract market and includes any person required to register as a floor broker by the Commission's regulations relating to commodity options. An applicant for registration as a floor broker (or for renewal thereof) must have been granted membership or trading privileges by a commodity exchange which has been designated by the Commission as a contract market.
An exchange member who executes only his own trades by being personally present in a pit or place for futures trading is a floor trader, and, as such, is not required to be registered.

3. **Principals**
This term means, with respect to an applicant for registration, a registrant or a person required to be registered under the Commodity Exchange Act or regulations thereunder: (1) any person, including but not limited to, a sole proprietor, general partner, officer, director, branch office manager or designated supervisor, or person occupying a similar status or performing similar functions, having the power, directly or indirectly, through agreement or otherwise, to exercise a controlling influence over the activities of that person which are subject to regulation by the Commission; (2) any holder or beneficial owner of ten percent or more of the outstanding shares of any class of stock; or (3) any person who has contributed ten percent or more of the capital.

Note: Any principal who acts in the capacity of an associated person must be registered as such with the Commission.

4. **National Futures Association Associate**
This term means a person who is associated with a Member of NFA within the meaning of the term "associated person" as used in Section 4k of the Commodity Exchange Act and who is required to be registered as an "associated person" with the Commodity Futures Trading Commission.

NOTICE OF TERMINATION

OMB No 3038-0023

(To be Completed By Futures Commission Merchant, Introducing Broker, Commodity Trading Advisor, Commodity Pool Operator, or Leverage Transaction Merchant For Associated Person, NFA Associate, Branch Officer Manager, Designated Supervisor or Other Principal)

Instructions: A sponsoring registrant must file this Form (or the Form U-5, Uniform Termination Notice for Securities Industry Registration) within twenty days after the occurrence of any of the following: (1) the failure of an individual to become associated with the sponsoring registrant after the filing of a Form 8-R on his behalf; (2) the termination of the association of an individual with the sponsoring registrant; or (3) the termination of the affiliation of a principal with the firm. Send all 8-T's to National Futures Association, Office of the Secretary, P.O. Box 98383, Chicago, Illinois 60693, except those for LTM personnel which should be sent to the Commodity Futures Trading Commission, P.O. Box 70685, Chicago, Illinois 60673.

1. NAME (Last, First, Middle, Suffix) | PERSONAL ID No: 2a. NFA ID | 2b. CFTC ID

3. DATE OF BIRTH (Mo/Day/Yr)* | 4. PLACE OF BIRTH (City & State)* | 5. SOCIAL SECURITY NUMBER*

* Provide responses to questions 3, 4 and 5 on a supplemental sheet if the registrant, branch office manager or principal originally provided such information on a supplemental attachment to Form 8-R. While submission of Social Security Number is voluntary, inclusion assists in proper identification and expedites processing.

6. FIRM NAME | FIRM ID No: 7a. NFA ID | 7b. CFTC ID

INSTRUCTIONS: Answer each question below by placing a check in the appropriate box. Furnish full details on supplemental sheet for boxes marked by a double asterisk (**).

8. DATE TERMINATED / /

8A. Terminated As: ☐ AP ☐ PRINCIPAL ☐ BRANCH MANAGER ☐ NFA ASSOCIATE

9. REASON FOR TERMINATION (Check One): ☐ VOLUNTARY ☐ DECEASED ☐ PERMITTED TO RESIGN** ☐ DISCHARGED** ☐ OTHER** _____

10. While employed by or associated or affiliated with your firm, was the individual the subject of:

(a) Any investigation or proceeding conducted by any governmental agency or self-regulatory body which has jurisdiction over the banking, commodities, insurance, real estate, or securities industry? ☐ YES** ☐ NO

(b) A refusal of registration, censure, suspension, expulsion, fine or any disciplinary action by any governmental agency or self-regulatory body, having jurisdiction over the banking, commodities, insurance, real estate or securities industry? ☐ YES** ☐ NO

(c) Any material complaint or any legal proceeding by a customer or any internal investigation or disciplinary proceeding? ☐ YES** ☐ NO

(d) Any conviction of a felony? ☐ YES** ☐ NO

(e) Any conviction of a misdemeanor involving any transaction subject to regulation under the Commodity Exchange Act or the securities act or arising out of the individual's misconduct as a registrant with the Commission, National Futures Association or National Association of Securities Dealers Inc.? ☐ YES** ☐ NO

(f) A denial or revocation of coverage provided by a bonding or surety company or a payout by a bonding or surety company? ☐ YES** ☐ NO

(g) Any unsatisfied judgments or liens? ☐ YES** ☐ NO

11. Is there any reason to believe that the individual while employed by or associated with your firm, may have violated any provision of any commodities or securities law or regulation or any agreement with or rule of any governmental agency or self-regulatory body or engaged in conduct which may be inconsistent with just and equitable principles of trade under the rules or regulations of any governmental or self-regulatory body? ☐ YES** ☐ NO

SUPPLEMENTAL STATEMENT TO APPLICATION FOR REGISTRATION

INSTRUCTIONS

1. The prompt filing of Part I of this form is required by section 3.31 of the regulations under the Commodity Exchange Act if the information reported in any of the items specified in the Instructions to Form 7-R or Form 8-R, or on any schedule or supplemental statement thereto, is found to be incorrect or incomplete or if changes occur which render that information no longer accurate and current. If you are reporting changes to disciplinary history, be sure to provide certified copies of applicable documents.
2. Whenever there is an addition of a natural person as a principal or branch office manager or designated supervisor in items 9 or 10 of Form 7-R, that person must complete a Form 8-R and a fingerprint card which should be attached to this form unless that individual is exempt from filing under the provisions of section 3.32 of the Commission's regulations. Section 3.32 also should be reviewed carefully to determine whether a new registration is required. In general, a new registration will be required whenever there is a change in the control or the form of organization of the registrant. The FCM, IB, CTA, CPO or LTM should note in Part I, item 4, the reason for not attaching a Form 8-R and fingerprint card for these individuals and, if the individual is a registered associated person, also furnish his or her CFTC or NFA ID number.

INSTRUCTIONS CONTINUED

3. Use Part I of this form to promptly amend an application from the time the application is filed, while the application is pending and after registration has been granted, unless instructed otherwise.
4. Where to file. Send all registration forms to National Futures Association, Office of the Secretary, P.O. Box 98383, Chicago, Illinois 60693, except those for associated persons and principals of leverage transaction merchants as well as floor broker forms, which should be sent with separate remittances to the Commodity Futures Trading Commission, P.O. Box 70685, Chicago, Illinois 60673. If you must file with both the Commission and NFA, you may submit the original to either the Commission or NFA and simultaneously submit a legible, accurate and complete photocopy (with an original signature and date where required) to NFA or the Commission. All photocopies should note at the bottom of the copy that "Original was sent to NFA" or "Original was sent to the CFTC" as appropriate.
5. Report terminations and failures to become associated on Form 8-T, Notice of Termination, or on Form U-5, Uniform Termination Notice for Securities Industry Registration.
6. Use Part II of this form to report the multiple association that occurs if your firm is registered as a CTA and/or CPO and employs any individual who is already registered as an AP of an FCM, IB, CTA, CPO or LTM.

NOTE: Use Form 8-R, fingerprint card and fee for a multiple association that occurs if your firm is registered as an FCM or IB and you are employing an individual who will continue to be registered as an AP of a CTA or CPO. Also use Form 8-R, fingerprint card and fee to add an AP who has recently terminated as an AP of an FCM, IB, CTA, CPO or LTM.

OMB No. 3038-0023

FORM 8-S

INSTRUCTIONS FOR FORM 8-S

WHEN TO USE FORM 8-S: Form 8-S may be used to obtain immediate AP registration as of the date the Form 8-S is mailed when the individual meets either of the criteria in item 6.

Item 6A— Use when the AP leaves the prior firm and goes to the new sponsoring firm within 60 days. The new sponsoring firm may be an FCM, IB, CTA, CPO or LTM; however, an AP or an FCM or IB may not be simultaneously associated with a CTA or CPO which clears or introduces its trades through the FCM or IB.

Item 6B— Use when the AP stays with the prior firm (which is registered as a CTA and/or CPO) and adds a new sponsoring FCM or IB. (See Note below if the new sponsoring firm is a CTA and/or CPO.)

NOTE: Form 3-R, Part II (Reporting by Additional Sponsoring Firm of Multiple Association of APs of CTAs and CPOs) should be used when the AP stays with the prior firm (which is registered as an FCM, IB, CTA, or CPO) and adds a new sponsoring firm which is registered as a CTA or CPO.

WHAT TO FILE: If the AP meets the eligibility requirements specified in Item 6:

(a) The AP and sponsoring firm must complete and sign Form 8-S. The AP is registered as of the date Form 8-S is mailed. See item 9.

(b) Within 60 days, the AP and sponsoring firm then must file a Form 8-R with the Sponsor's Certification, a legible fingerprint card and the registration fee. NOTE: Do not send the registration fee with the Form 8-S.

WHERE TO FILE:

Send all Form 8-S's to National Futures Association, Office of the Secretary, P.O. Box 96383, Chicago, Illinois 60693 except those for LTM personnel which should be sent to the Commodity Futures Trading Commission, P.O. Box 70685, Chicago, Illinois 60673

If you must file with both the Commission and NFA, you may submit the original to either the Commission or NFA and simultaneously submit a legible, accurate and complete photocopy (with an original signature and date where required) to NFA or the Commission. All photocopies should note at the bottom that "Original was sent to NFA" or "Original was sent to the CFTC" as appropriate.

OMB No. 3038-0023

PRIVACY ACT NOTICE

This information in CFTC Forms 8-R, 8-S, 8-T and on the fingerprint card is being collected pursuant to authority granted in sections 4f, 4k, 4n, 8a and 19 of the Commodity Exchange Act [7 U.S.C. 6f, 6k, 6n, 12a and 23].

The information requested in Form 8-R and on the fingerprint card will be used by the Commodity Futures Trading Commission or National Futures Association, as appropriate, as a basis for initiating an inquiry into the individual's fitness to be an associated person or floor broker or to be a principal of a futures commission merchant, introducing broker, commodity trading advisor, commodity pool operator or leverage transaction merchant. The information requested in Form 8-S and portions of the information requested in Form 8-R will be used by the Commission and, in appropriate cases, by National Futures Association, to confirm the registration of certain associated persons. The information requested in Form 8-T will be used by the Commission, and, in appropriate cases, by National Futures Association, to record the registration status of the individual and, in appropriate cases, as a basis for a further inquiry into the individual's fitness to remain in business subject to the Commission's jurisdiction.

With the exception of the social security number, all information in Forms 8-R, 8-S and 8-T must be furnished before the forms will be processed. The furnishing of a social security number, however, assists the Commission and NFA in identifying individuals and therefore expedites the processing of those forms.

Failure by an applicant, registrant or principal to timely file or cause to be filed a properly completed Form 8-R, 8-S, 8-T or a fingerprint card may result in the lapse, denial, suspension, or revocation of registration or other enforcement action by the Commission.

With the exception of the fingerprint card and any supplementary information contained in attachments to Items 6-9 and 14-21 on Form 8-R or in attachments to Item 3 on Form 8-S or Items 3-5 and 9-11 on Form 8-T, these forms are considered by the Commission to be public records and will be available for inspection by any person. Copies will be maintained by National Futures Association, Registration Department, Suite 1400, 200 W. Madison Street, Chicago, IL 60606 (except those for floor brokers and associated persons of leverage transaction merchants, which will be maintained at the Commission's Central Regional Office at Sears Tower, Suite 4600, 233 S. Wacker Drive, Chicago, IL 60606). Further, the Commission or National Futures Association may disclose the fingerprint card and any such supplementary information to third parties pursuant to routine uses which the Commission has published in the Federal Register or as otherwise authorized under the Privacy Act, 5 U.S.C. 552a, and the Commodity Exchange Act. Disclosure of such information may be made by the Commission as follows: (1) in connection with administrative proceedings or matters in litigation; (2) in connection with Commission investigations; (3) where the information is furnished to regulatory, self-regulatory and law enforcement or other governmental agencies to assist them in meeting responsibilities assigned to them by law; (4) where disclosure is required under the Freedom of Information Act [5 U.S.C. 552]; (5) in connection with an employer's hiring or retention of an employee; (6) in connection with the verification of information submitted for sponsorship purposes; (7) in other circumstances in which the withholding of such information appears unwarranted; and (8) in connection with legally required or authorized reports. Disclosure may be made by National Futures Association in accordance with rules approved by the Commission.

If an individual believes that the placing in the Commission's or National Futures Association's public files of any of the information contained in the attachments to Items 6-9 and 14-21 on Form 8-R, Item 3 on Form 8-S, or Items 3-5 and 9-11 on Form 8-T, or on the fingerprint card would constitute an unwarranted invasion of his personal privacy, the individual may petition the Commission, pursuant to 17 CFR 145.9, to treat such information as non-public in response to requests under the Freedom of Information Act.

This notice is provided in accordance with the requirements of the Privacy Act, 5 U.S.C. 552a(e) (3) and summarizes some of an individual's rights under the Privacy Act 5 U.S.C. 552a, and the Freedom of Information Act 5 U.S.C. 552. Individuals desiring further information should consult the Commission's regulations under the Privacy Act, 17 CFR Part 146, and under the Freedom of Information Act, 17 CFR Part 145, and the Commission's annual notice, published in the Federal Register, pursuant to the Privacy Act, of the existence and character of each system of records maintained by the Commission.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 270

[Release No. IC-14625; S7-35-84]

Separate Accounts Funding Flexible Premium Variable Life Insurance Contracts

AGENCY: Securities and Exchange Commission.

ACTION: Adoption of rule amendments.

SUMMARY: The Commission is adopting amendments to two paragraphs of rule 6e–3(T) under the Investment Company Act of 1940. The amendments revise conditions under which insurance company separate accounts are permitted to offer flexible premium variable life insurance contracts ("flexible life") by permitting insurance companies to offer incidental insurance benefits and cover substandard underwriting risks in a manner consonant with the design of flexible life. The Commission is not at this time adopting a permanent rule.

EFFECTIVE DATE: The rule amendments will become effective July 17, 1985.

FOR FURTHER INFORMATION CONTACT: Brian M. Kaplowitz, Special Counsel, (202) 272–2061, or Robert E. Plaze, Attorney, (202) 272–2622, Office of Insurance Products and Legal Compliance, Division of Investment Management, Securities and Exchange Commission, 450 5th Street NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Securities and Exchange Commission ("Commission") today is adopting amendments to rule 6e–3(T) (17 CFR 270.6e–3(T)) under the Investment Company Act of 1940 (15 U.S.C. 80a–1 et seq.) ("Act"). Rule 6e–3(T) provides extensive exemptive relief from various provisions of the Act for insurance company separate accounts offering flexible premium variable life insurance contracts ("flexible life" or "flexible contracts").[1] These amendments are designed to reconcile rule 6e–3(T) with the offering of certain "riders"[2] and the covering of certain risks in connection with flexible contracts. Specifically, the amendments grant additional exemptive relief to permit the deduction from cash values of (1) the cost of incidental insurance benefits ("incidental insurance charges")[3] and (2) charges imposed because the insured does not meet standard underwriting requirements ("substandard risk charges"). In addition, the amendments revise the definition of "payment" for the purpose of measuring compliance with various sales load limitation and refund provisions by including within the term "payment" amounts attributable to incidental insurance and substandard risk charges in flexible contracts in which these amounts are deducted from cash values.

Background and Discussion

On November 14, 1984, the Commission issued a release adopting on a temporary basis rule 6e–3(T) as a comprehensive exemptive rule for separate accounts proposing to offer flexible life. The adopting release also solicited comments on the rule.[4]

The Commission received thirteen letters of comment on rule 6e–3(T).[5] Six of these letters addressed the need to revise the rule in order that incidental insurance and substandard risk charges be treated under the Act's sales load provisions in a manner that would allow the charges for these items to be deducted from cash value.[6] While the Commission is not yet prepared to adopt the rule on a permanent basis, it believes that amendment of rule 6e–3(T) along the aforesaid lines should facilitate the life insurance industry designing flexible contracts which are consistent with the policies of the Act.[7]

A. Paragraph (b)(13)(iii)(E)—Deductions from Cash Value

Paragraph (b)(13)(iii)(E) provides relief from sections 27(c)(2) (15 U.S.C. 80a–27(c)(2)) and 26(a)(2) (15 U.S.C. 80a–26(a)(2)) to permit certain specified fees and charges to be deducted from account assets. However, that paragraph does not provide relief to deduct incidental insurance or substandard risk charges.

Flexible life is designed so that virtually all charges, including incidental insurance and substandard risk charges, may be collected by deductions from a flexible contract's cash value.[8] Moreover, deducting these charges from premium payments prior to allocation of the net premium to the separate account may not be feasible because the insured is not obligated, under flexible life, to make periodic payments.[9] In order to permit a flexible contract containing a rider for incidental benefits or covering substandard risks to operate as designed, the Commission has determined to revise paragraph (b)(13)(iii)(E).

B. Paragraph (c)(7)—Definition of Payment

The term "payment" is defined by paragraph (c)(7) in two ways depending on where it is used in the rule. Generally, "payment" means gross premiums paid. For purposes of calculating sales load and any refund of sales load, however, paragraph (c)(7) defines "payment" as the gross premium paid less certain charges for incidental insurance benefits or substandard risks. This bifurcated approach was intended to assure that the sales load and refund provisions apply only to the amount of sales load charged for the variable benefits.[10]

In this respect, paragraph (c)(7) is identical to paragraph (c)(7) of rule 6e–2, which regulates scheduled premium variable life insurance contracts ("scheduled life" or "scheduled contracts"). Scheduled contracts are characterized generally by the deduction of charges from each premium payment with the net premium then allocated to the separate account. When computing sales load and any required refund, these charges are simply subtracted from the annual scheduled premium payment and the relevant percentage limitations are applied to the remainder. However, in the case of

[1] For a description of flexible life, *see* Investment Company Act Release 13632 (Nov. 23, 1983) (48 FR 54043 (Nov. 30, 1983); 29 SEC Docket 365 (Dec. 6, 1983)) and Investment Company Act Release 14234 (Nov. 14, 1984) (48 FR 47208 (Dec. 3, 1984); 31 SEC Docket 1113 (Nov. 27, 1984)).

[2] "Riders" to insurance contracts are supplements used to modify or add to coverages the contract otherwise provides.

[3] "Incidental Insurance Benefits" are defined in paragraph (c)(2) of Rule 6e–3(T).

[4] Investment Company Act Release 14234 ("Release 14234"). *See supra* note 1. Shortly thereafter the Commission proposed conforming amendments to rule 6e–2 under the Act (17 CFR 270.6e–2), a companion rule to rule 6e–3(T), that grants separate accounts offering scheduled premium variable life insurance contacts exemptive relief from the Act. Investment Company Act Release 14421 (March 15, 1985) (50 FR 11709 (March 25, 1985); 32 SEC Docket 1295 (April 2, 1985)).

[5] The comment letters included two extensive comments, one from an industry trade group, and the other from a law firm on behalf of an insurance company.

[6] One applicant has been granted exemptive relief in order to offer flexible contracts in the manner described above. *See* Investment Company Act Releases 14428 (Mar. 19, 1985) (notice), and 14475 (Apr. 17, 1985) (order). The modifications to rule 6e–3(T) the Commission is today adopting codify this relief insofar as it relates to paragraphs (b)(13)(iii)(E) and (c)(7) of the rule.

[7] This release should be considered the operative interpretive document insofar as it may conflict with the discussion of rule 6e–3(T) in sections II.B.12.c of II.C.7 of Release 14234.

[8] Some charges, such as sales load, certain administrative fees, and premium taxes, may be deducted from payments.

[9] *See* discussion *infra*.

[10] Release 14234 at section II.C.7.

flexible contracts, it is necessary to deduct incidental insurance and substandard risk charges from cash value because the need for charges to support them is constant while the timing and amount of payments are unpredictable.

The lack of relationship between premium payments and deductions of incidental insurance and substandard risk charges precludes application of a bifurcated sales load computation without use of a set of artificial assumptions. According to an industry commentator, there appears to be no practical means to attribute these charges to payments prospectively since it cannot be known in advance how the frequency or amount of payments will relate to these periodic deductions from cash value.

The inclusion of these charges within the definition of "payment" in one sense will result in a greater amount of permissible sales load because the base against which sales load is measured, *i.e.*, "payments" during a contract period, will expand to the extent a portion of a payment is attributable to incidental insurance or substandard risk charges. However, the deduction of incidental insurance and substandard risk charges periodically from cash value, rather than from payments, results in insureds having larger amounts of their premium payments allocated to the separate account and added to their cash values. Larger cash value benefits the insured by reducing the basic insurance charge and giving the insured the opportunity for greater investment return. Based on these considerations, the Commission has determined to amend paragraph (c)(7).

Paragraph (c)(7), as amended, excludes from the definition of "payment" incidental insurance and substandard risk charges only when those charges are deducted from premium payments in the same manner as scheduled contracts subject to rule 6e–2.[11] To the extent those charges are deducted from cash values, however, they are to be included within the definition of "payment."

List of Subjects in 17 CFR Part 270

Investment companies, Reporting and recordkeeping requirements, Securities.

[11] If either of those charges is deducted from premium payments before allocation of the net premium to the separate account, it must be excluded from the definition of "payment" for purposes of measuring sales load and refund rights, *i.e.*, each charge is treated independently.

Text of Amendments to Rule 6e–3(T)

In accordance with the foregoing Title 17, Chapter II of the Code of Federal Regulations is amended as follows:

PART 270—[AMENDED]

1. The authority citation of Part 270 continues to read in part as follows:

Authority: Sections 6(e) and 38(a) of the Investment Company Act of 1940, as amended, 15 U.S.C. 80a–6(e) and 37(a). * * *

2. By revising paragraphs (b)(13)(iii)(E) and (c)(7) of § 270.6e–3(T) to read as follows:

§ 270.6e–3(T) Temporary exemptions for flexible premium variable life insurance separate accounts.

* * * * *

(b) * * *

(13) * * *

(iii) * * *

(E) The deduction of premium taxes imposed by any state or other governmental entity, the cost of insurance, charges assessed for incidental insurance benefits or if the insured does not meet standard underwriting requirements, and, if the separate account is organized as a management investment company, an investment advisory fee;

* * * * *

(c) * * *

(7) "Payment," as used in paragraphs (b)(13)(i), (b)(13)(ii), and (b)(13)(v)(A) of this Rule and in sections 27(a)(2) and 27(h)(2) solely with respect to flexible contracts, means for a contract period the gross premiums paid less any portion of such gross premiums deducted for the item specified in paragraph (c)(4)(viii) and, if deducted prior to the allocation of net premiums to the separate account, for the items specified in paragraphs (c)(4)(vi) and (c)(4)(vii) of this Rule. "Payment," as used in any other section of this Rule, means the gross premiums paid or payable for the flexible contract, *Except*, that "Payment" shall not include any amount deducted by the life insurer to recover excess sales loading previously applied to keep the contract in force pursuant to paragraph (b)(13)(iv)(B)(*2*) of this Rule.

* * * * *

Regulatory Flexibility Act Certification

Pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), the Chairman of the Commission previously certified that rule 6e–3(T) will not have a significant economic impact on a substantial number of small entities. No comments were received on that certification. The amendments do not alter the basis for this determination.

Paperwork Reduction Act

These amendments to rule 6e–3(T) are not subject to the Act because they do not impose an information collection requirement.

Administrative Procedure Act

Because this rulemaking is exemptive in nature, the Commission finds, pursuant to section 553(d)(1) of the Administrative Procedure Act (5 U.S.C. 553(d)(1)), that the 30 day delay in effectiveness is not required, and, accordingly, the rule amendments will become effective immediately upon publication in the **Federal Register**. The Commission has determined, pursuant to section 553(b)(B) of the Administrative Procedure Act (5 U.S.C. 553(b)(B)), that there is no need to republish rule 6e–3(T) to obtain additional comment on its decision to amend this rule since the issues were raised by both Investment Company Act Releases 1362 (Nov. 23, 1983) (48 FR 54043 (Nov. 30, 1983); 29 SEC Docket 365 (Dec. 6, 1983)) and 14234 and in fact were commented upon.

By the Commission.

John Wheeler,

Secretary.

July 10, 1985.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Tylosin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed for Feed Service Co., Inc., providing for the manufacture of 5- and 20-gram-per-pound tylosin premixes used to make complete feeds for swine, beef cattle, and chickens.

EFFECTIVE DATE: July 17, 1985.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Center for Veterinary Medicine (HFV–135), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1414.

SUPPLEMENTARY INFORMATION: Feed Service Co., Inc., 303 Lundin Blvd., P.O. Box 698, Mankato, MN 56001, is the sponsor of a supplement to NADA 111–837 submitted on its behalf by Elanco Products Co. The supplement provides

requesting documents and for processing such requests, and information and identifiable records consistent with the provisions of the Act Foundation, 1724 Massachusetts

for the manufacture of 5- and 20-gram-per-pound tylosin premixes used to make complete feeds for swine, beef cattle, and chickens for use as in 21 CFR 558.625(f)(1)(i) through (vi). The supplement is approved and the regulations are amended to reflect the approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA-305), Food and Drug Administration, RM. 4-62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has detemined under 21 CFR 25.24(d)(1)(i) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 558

Animal drugs; Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 558 is amended as follows:

[Docket No. 76N-0324]

Investigational Device Exemptions; Conforming Amendments

Correction

In FR Doc. 85-15069, beginning on page 25908 in the issue of Monday, June 24, 1985, make the following corrections:

1. On page 25908, third column, seventh line from the bottom of the page, add "of" after "consideration".

2. In § 812.35(b), on page 25910, first column, sixth line, "will-being" should read "well-being".

BILLING CODE 1505-01-M

AFRICAN DEVELOPMENT FOUNDATION

22 CFR Part 1502

Availability of Records

AGENCY: African Development Foundation.

ACTION: Final rule.

SUMMARY: This action establishes the policies and procedures the African Development Foundation is adopting to permit the inspection and copying of documents of the Foundation in accordance with the requirements of the Freedom of Information Act. The regulations include procedures for

requesting documents and for processing such requests, and establishes the fees which shall be charged by the Foundation for costs associated with responding to requests.

EFFECTIVE DATE: August 17, 1985.

FOR FURTHER INFORMATION CONTACT: Paul Magid, General Counsel, Ann Richardson, Director, Administration and Finance, (202) 634-9853.

SUPPLEMENTARY INFORMATION: Proposed rulemaking was published on pages 18678-18680 of the Federal Register of May 2, 1985, and invited comments for 60 days ending July 1, 1985. No comments were received.

Executive Order 12291

The African Development Foundation has determined that this rule is not a major rule for the purpose of E.O. 12291 because it is not likely to result in an annual effect on the economy of $100 million or more.

Paperwork Reduction Act

This rule imposes no obligatory information requirements on the public.

Regulatory Flexibility Act of 1980

The President of the Foundation certifies that this rule will not have a significant impact on a substantial number of small entities.

List of Subjects in 22 CFR Part 1502

Administrative practice and procedures, Freedom of Information, Records.

Accordingly, Part 1502 is added to 22 CFR Chapter XV to read as follows:

PART 1502—AVAILABILITY OF RECORDS

Sec.

1502.1 Introduction.
1502.2 Definitions.
1502.3 Access to Foundation records.
1502.4 Written requests.
1502.5 Records available at the Foundation.
1502.6 Records of other Departments and Agencies.
1502.7 Fees.
1502.8 Exemptions.
1502.9 Processing of requests.
1502.10 Judicial review.

Authority: 5 U.S.C. 552, and 22 U.S.C. 290h-4.

§ 1502.1 Introduction.

(a) It is the policy of the African Development Foundation that information about its operations, procedures, and records be freely available to the public in accordance with the provisions of the Freedom of Information Act.

(b) The Foundation will make the fullest possible disclosure of its information and identifiable records consistent with the provisions of the Act and the regulations in this Part.

(c) The Director of Administration and Finance (A&F) shall be responsible for the Foundation's compliance with the processing requirements of the Freedom of Information Act.

§ 1502.2 Definitions.

As used in this Part, the following words have the meanings set forth below:

(a) "Act" means the act of June 5, 1967, sometimes referred to as the "Freedom of Information Act" or the Public Information Section of the Administrative Procedure Act, as amended, Pub. L. 90-23, 81 Stat. 54, codified at 5 U.S.C. 552.

(b) "Foundation" means the African Development Foundation.

(c) "President" means the President of the Foundation.

(d) "Record(s)" includes all books, papers, or other documentary materials made or received by the Foundation in connection with the transaction of its business which have been preserved or are appropriate for preservation by the Foundation as evidence of its organization, functions, policies, decisions, procedures, operations, or other activities, or because of the informational value of the data contained therein. Library or other material acquired and preserved solely for reference or exhibition purposes, and stocks of publications and other documents provided by the Foundation to the public in the normal course of doing business are not included within the definition of the word "records." The latter will continue to be made available to the public without charge.

§ 1502.3 Access to Foundation records.

Any person desiring to have access to Foundation records may call or apply in person between the hours of 10 a.m. and 4 p.m. on weekdays (holidays excluded) at the Foundation offices at 1724 Massachusetts Avenue, NW., Suite 200, Washington, D.C. 20036. Requests for access should be made to the Director of A&F, at the Foundation offices. If request is made for copies of any record, the Office of A&F will assist the person making such request in seeing that such copies are provided according to the rules in this Part.

§ 1502.4 Written requests.

In order to facilitate the processing of written requests, every petitioner should:

(a) Address his or her request to: Director, Administration and Finance Division, African Development Foundation, 1724 Massachusetts Avenue, NW., Suite 200, Washington, D.C. 20036.

Both the envelope and the request itself should be clearly marked: "Freedom of Information Act Request."

(b) Identify the desired record by name, title, author, a brief description, or number, and date, as applicable. The identification should be specific enough so that a record can be identified and found without unreasonably burdening or disrupting the operations of the Foundation. Blanket requests or requests for "the entire file of" or "all matters relating to" a specified subject will not be accepted. If the Foundation determines that a request does not reasonably describe the records sought, the requestor shall be advised what additional information is needed or informed why the request is insufficient.

(c) Include a check or money order to the order of the "African Development Foundation" covering the appropriate search and copying fees, or a request for determination of the fee and a promise to pay any amount over $3.00 in connection with the FOIA request.

§ 1502.5 Records available at the Foundation.

The Administration and Finance Division will make available for public inspection and copying, to the extent not authorized to be withheld, the following works or classes of information:

(a) A copy of Foundation regulations, including those published in Title 22 of the Code of Federal Regulations or of any other title of the Code.

(b) Statements of policy and interpretations which have been adopted by the Foundation and which are not published in the **Federal Register.**

(c) Administrative staff manuals and instructions to staff that affect a member of the public;

(d) Any indexes providing identifying information regarding any record described in paragraphs (b) and (c) of this section.

(e) Brochures and other printed materials describing the Foundation's activities.

§ 1502.6 Records of other Departments and Agencies.

Requests for records which have been originated by, or are primarily the concerns of, another U.S. Department or Agency will be forwarded to the particular Department or Agency involved, and the petitioner so notified. In response to requests for records or publications published by the Government Printing Office or other

Government printing activity, the Foundation will refer the petitioner to

Foundation, may be exempted from disclosure under 5 U.S.C. 552(b):

(c) *Extension of time.* Where it is reasonably necessary to the proper

Executive Order 12291

Authority: E.O. 11222, 3 CFR 1964-1965 Comp., 5 CFR 735.104.

corporations, associations, partnerships, trusts, sole proprietorships, foundations

Government printing activity, the Foundation will refer the petitioner to the appropriate sales office and refund any fee payments which accompanied the request.

§ 1502.7 Fees.

(a) *When charged.* Fees shall be charged in accordance with the schedules contained in paragraph (b) of this section for services rendered in responding to requests for Foundation records under this sub-part unless the Director of A&F determines that such charges, or a portion thereof, are not in the public interest because furnishing the information primarily benefits the general public. Fees shall also not be charged where they would amount, in the aggregate, for a request or series of related requests, to less than $3. Ordinarily, fees shall not be charged if the records requested are not found, or if located, are withheld as exempt.

(b) *Services charged for and amount charged.* For the services listed below expended in locating or making available records or copies thereof, the following charges shall be assessed:

(1) *Copies.* For copies $.10 per copy of each page.

(2) *Clerical searches.* For each one quarter hour spent by clerical personnel in excess of the first quarter hour in searching for and producing requested records, $2.30.

(3) *Non-routine, non-clerical searches.* Where the task of determining which records fall within a request and collecting them requires the time of professional or managerial personnel, and where the time required is substantial, for each one quarter hour spent in excess of the first quarter hour, $5.40. No charge shall be made for the time spent in resolving legal or policy issues affecting access to records of known contents.

(4) *Other charges.* When a response to a request requires services or materials other than those described in paragraphs (b)(1) through (b)(3) of this section, the direct cost of such services to the Foundation may be charged, providing the requestor has been given an estimate of such cost before it is incurred.

(c) *Revision of Schedule.* The fee schedule will be revised from time to time, without notice, to assure recovery of actual costs of rendering information services to any person. The revised schedule will be available without charge.

§ 1502.8 Exemptions

The following categories are examples of records which, if maintained by the Foundation, may be exempted from disclosure under 5 U.S.C. 552(b):

(a) Records specifically required by Executive Order to be exempt from disclosure in the interest of the national defense or foreign policy which properly classified pursuant to such Executive Order;

(b) Records related solely to the internal personnel rules and practices of the Foundation;

(c) Records specifically exempted from disclosure by statute (other than 5 U.S.C. 552b), providing that such statute (1) requires that the matter be withheld from the public in such a manner as to leave no discretion, or (2) establishes criteria for withholding or refers to particular types of matters to be withheld;

(d) Trade secrets and commercial or financial information obtained from any person which is privileged or confidential;

(e) Interagency or intra-agency memoranda or letters which would not be available by law to a private party in litigation with the Foundation;

(f) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(g) Investigatory files (including security investigation files and files concerning the conduct of employees) compiled for law enforcement purposes, except to the extent available by law to a private party.

The Foundation will not honor requests for exempt records or information.

§ 1502.9 Processing of requests.

(a) *Processing.* A person who has made a written request for records which meets the requirements of § 1502.4 shall be informed by the Director of A&F within ten working days of receipt of the Foundation's decision whether to deny or grant access to the records.

(b) *Denials.* If the Director of A&F, with the concurrence of the General Counsel, denies a request for records, the requestor will be informed of the name and title of the official responsible for the denial, the reasons for it, and the right to appeal the decision to the President of the Foundation within 15 working days of receipt of the denial. The President shall determine any appeal within 20 days of receipt and notify the requestor within the time period of the decision. If the decision is to uphold the denial, the requestor will be informed of the reasons for the decision and of the right to a judicial review of the decision in the federal courts.

(c) *Extension of time.* Where it is reasonably necessary to the proper processing of requests, the time required to respond to an FOIA request or an appeal may be extended for an additional 10 working days upon written notification to the requestor providing the reasons for the extension.

§ 1502.10 Judicial review.

On complaint, the district court of the United States in the district in which the complainant resides, or has his/her principal place of business, or in which the agency records are situated, or in the District of Columbia, has jurisdiction to enjoin the Foundation from withholding Foundation records, and to order the production of any agency records improperly withheld from the complainant (5 U.S.C. 552(a)(4)(B))

Dated: July 8, 1985.

Leonard H. Robinson, Jr.,

President, African Development Foundation.

BILLING CODE 6117-01-M

---

22 CFR Part 1504

Employee Responsibilities and Conduct

AGENCY: African Development Foundation.

ACTION: Final rule.

SUMMARY: This rule is intended to implement and interpret E.O. 1222 (3 CFR 1964–1965 Comp.; 5 CFR 735.104); Title 18, U.S.C. 203, 205, 207, 208, 209; and Title II of the Ethics in Government Act of 1978, as amended (5 U.S.C.). The African Development Foundation finds and determines that publication of these regulations in the Code of Federal Regulations is necessary for the effective discharge of its functions and activities.

EFFECTIVE DATE: August 17, 1985.

FOR FURTHER INFORMATION CONTACT: Paul Magid, General Counsel, (202) 634–9853.

SUPPLEMENTARY INFORMATION: Proposed rulemaking was published on pages 18878–18884 of the Federal Register of May 3, 1985, and invited comments for 60 days ending July 2, 1985. No comments were received.

Regulatory Flexibility Act of 1980

Generally, these regulations do not contain substantive new material. It is, therefore, certified that they will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act.

Executive Order 12291

The African Development Foundation has determined that this rule is not a major rule for purposes of E.O. 12291 because it is not likely to result in an annual effect on the economy of $100 million or more.

Paperwork Reduction Act

This rule imposes no obligatory information requirements on the general public.

Subpart A—General Provisions

§ 1504.101 Purpose.

The maintenance of the highest standards of honesty, integrity, impartiality, and conduct by Government employees and special Government employees is essential to assure the proper performance of the African Development Foundation's business and the maintenance of confidence by citizens in their Government. The avoidance of misconduct and conflicts of interests on the part of employees through informed judgment is indispensable to the maintenance of these standards. To accord with these concepts, this Part sets forth the Foundation's regulations prescribing standards of conduct and responsibilities for its employees, and requires statements reporting employment and financial interests.

§ 1504.102 Definitions.

As used in this Part:

(a) "Foundation" or "Agency" means the African Development Foundation.

(b) "Employee" includes anyone serving in the Foundation as:

(1) A person appointed by the President and confirmed by the Senate to a position in the Foundation;

(2) A person appointed by the Board of Directors;

(3) A person appointed by the President of the Foundation or by his/her designee to a position in the Foundation; or

(4) A special Government employee.

(c) "Regular office or employee" means an employee as defined in paragraph (b) (1), (2), or (3) of this section.

(d) "Special Government employee" means a person who is retained, designated, appointed, or employed to perform temporary duties for the Foundation, with or without compensation, for not to exceed 130 days during any period of 365 consecutive days, either on a full-time or intermittent basis.

(e) "Member of an employee's family" means a spouse, minor child, or other individual related to the employee by blood, marriage or adoption who are resident in the employee's household.

(f) "Counselor" means the Foundation's Counselor on Ethical Conduct and Conflicts of Interest. The Counselor for the Foundation will be the General Counsel of the Foundation. The Director of Administration and Finance will serve as Deputy Counselor.

(g) "Organization" as used herein includes profit and non-profit corporations, associations, partnerships, trusts, sole proprietorships, foundations, and foreign, State and local government units.

(h) "Potential Contractor" means any organization or individual that has submitted a proposal, application, or otherwise indicated in writing its intent to apply for or seek from the Foundation a specific contract or other agreement, including a grant, loan or loan guarantee.

(i) "is associated with" as used in §§ 1504.211 and 1504.212, means:

(1) Is a director of an organization or is a member of a board or committee which exercises a recommending or supervisory function in an organization; or.

(2) Serves as an employee, officer, owner, trustee, partner, consultant, or paid advisor in an organization; or

(3) Owns (or his or her spouse, minor child, or other member of his or her immediate household owns) individually or collectively, 1 percent or more of the voting shares of an organization; or

(4) Owns (or his or her spouse, minor child, or other member of his or her immediate household owns) individually or collectively, either beneficially or as trustee, a direct financial interest in an organization through stock, stock options, bonds, or other securities, or obligations, valued at $50,000 or more; or

(5) As a continuing financial interest in an organization, such as participation in or entitlement under a bona fide pension plan, valued at $5,000 or more, through an arrangement resulting from prior employment or business or professional association.

Subpart B—Standards of Conduct

§ 1504.201 General.

(a) All employees of the Foundation are required to conduct themselves in such a manner as to create and maintain respect for the Foundation and the U.S. Government; to avoid situations which require or appear to require a balancing of private interests or obligations against official duties; to be mindful of the high standards of integrity expected of them in all their activities, both personal and official; and to conform with the applicable statutes, rules, and regulations governing their activities. Particularly, an employee shall avoid any action, whether or not specifically prohibited, which might result in or create the appearance of:

(1) Using public office for private gain;

(2) Giving preferential treatment to any organization or person;

(3) Impeding Government efficiency or economy;

(4) Losing complete independence or impartiality of action;

(5) The provision relating to the habitual use of intoxicants to excess (5

employment. Incompatible activities include but are not limited to:

§ 1504.204 Speeches and participation in conferences.

(1) Has or is seeking to obtain, contractual or other business or

personal living expenses, gifts, entertainment, or other personal

VOL

(4) Losing complete independence or impartiality of action;

(5) Making a Government decision outside official channels;

(6) Affecting adversely the confidence of the public in the integrity of the Government; or

(7) Using Government employment to coerce, or give the appearance of coercing, a person in order to gain financial benefit for him or herself or for another person, particularly one with whom the employee has family, business or financial ties.

(b) An officer or employee of another Federal agency who is assigned or detailed to the Foundation shall adhere to the standards of conduct applicable to employees as set forth in this Part.

§ 1504.202 Statutes, rules, and regulations governing conduct of employees.

(a) The "Code of Ethics of Government Services" set forth by the Legislative Branch in House Concurrent Resolution 175, passed in 1958; the "Standards of Ethical Conduct for Government Officers and Employees" set forth by the President of the United States in Executive Order 11222, dated May 8, 1965, and the regulations issued by the Office of Personnel Management pursuant to this Executive Order (5 CFR Part 735); and other statutes, rules, and regulations governing conduct of employees, including Foundation regulations, shall govern Foundation employees in their service to the Government.

(b) Conflict of interest statutes: The provisions of 18 U.S.C. 203, 205, 207, 208, and 209 prohibiting conflicts of interests between an employee's Government duties and outside activities are summarized in specific sections of this Part.

(c) Miscellaneous statutory provisions: In addition to the various provisions referred to above, Foundation employees must observe the following:

(1) Chapter 11 of Title 18, United States Code, relating to bribery, graft, and conflicts of interests, as appropriate to the employees concerned.

(2) The prohibition against lobbying with appropriated funds (18 U.S.C. 1913).

(3) The prohibition against striking against the Government (5 U.S.C. 7311; 18 U.S.C. 1981).

(4) The prohibitions against: (i) The disclosure of classified information (18 U.S.C. 798; 50 U.S.C. 783); (ii) the disclosure of confidential information (18 U.S.C. 1905); and (iii) the disclosure of privileged information withheld under the exemptions of the Public Information Section of the Administrative Procedure Act (5 U.S.C. 552).

(5) The provision relating to the habitual use of intoxicants to excess (5 U.S.C. 7352).

(6) The prohibition against the misuse of a Government vehicle (31 U.S.C. 638a(c)).

(7) The prohibition against the misuse of the franking privilege (18 U.S.C. 1719).

(8) The prohibition against the use of deceit in an examination or personnel action in connection with Government employment (18 U.S.C. 1917).

(9) The prohibition against fraud or false statements in a Government matter (18 U.S.C. 1001).

(10) The prohibition against mutilating or destroying a public record (18 U.S.C. 2071).

(11) The prohibition against counterfeiting and forging transportation requests (18 U.S.C. 508).

(12) The prohibitions against (i): Embezzlement of Government money or property (18 U.S.C. 464); (ii) failing to account for public money (18 U.S.C. 643); and (iii) embezzlement of the money or property of another person in the possession of an employee by reason of his/her employment (18 U.S.C. 654).

(13) The prohibition against unauthorized use of documents relating to claims from or by the Government (18 U.S.C. 285).

(14) The prohibitions against political activities in Subchapter III of Chapter 73 of Title 5, United States Code, and 18 U.S.C. 602, 603, 607, and 608.

(15) The prohibition against an employee acting as the agent of a foreign principal registered under the Foreign Agents Registration Act (18 U.S.C. 219).

(16) The prohibition against the employment of an individual convicted of a felonious rioting related offense (5 U.S.C. 7313).

(17) The prohibition against a public official's appointing or promoting a relative, or advocating such an appointment or promotion (5 U.S.C. 3110).

(18) The prohibition against self-dealing with a private foundation (26 U.S.C. 4941, 4946). "Self-dealing" is defined at 26 U.S.C. 4941(d) to include certain transactions involving an employee's receipt of pay, a loan, or reimbursement for travel or other expenses, or sale to or purchase of property from a private foundation.

§ 1504.203 Outside employment and other activities.

(a) An employee shall not engage in outside employment or other outside activity not compatible with the full and proper discharge of the duties and responsibilities of Government employment. Incompatible activities include but are not limited to:

(1) Acceptance of a fee, compensation, gift, payment of expense, or any other thing of monetary value in circumstances in which acceptance may result in, or create the appearance of, conflicts of interest; or

(2) Outside employment which tends to impair the employee's mental or physical capacity to perform Government duties and responsibilities in an acceptable manner.

(b) A regular employee shall not receive any salary or anything of monetary value from a private source as compensation for services to the Government (18 U.S.C. 209). This section does not apply to special Government employees. Nor does it prevent a regular officer or employee from: (1) Continuing participation in a bona fide pension plan or other employee welfare or benefit plan maintained by a former employer, or (2) receiving payments or accepting contributions, awards, or other expenses in accordance with Chapter 41 or Title 5, United States Code, relating to employee training.

(c) Employees are encouraged to engage in teaching, lecturing, and writing which is not prohibited by law or regulations. However, an employee shall not, either for or without compensation, engage in teaching, lecturing, or writing (including teaching, lecturing, or writing for the purpose of the special preparation of person or class of persons for an examination of the Office of Personnel Management or The Board of Examiners for the Foreign Service) that depends on information obtained as a result of Government employment, except when the information has been made available to the general public or will be made available on request, or when the Chairman of the Board or the President of the Foundation gives written authorization for use of nonpublic information on the basis that the use is in public interest.

(d) This section does not perclude an employee from:

(1) Participation in the activities of national or State political parties not proscribed by law;

(2) Participation in the affairs of, or acceptance of an award for, a meritorious public contribution or achievement given by a charitable, religious, professional, social, fraternal, nonprofit educational, recreational, public service, or civic organization; or

(3) Outside employment otherwise permitted under these regulations.

§ 1504.204 Speeches and participation in conferences.

(a) *Fees and expenses.* An employee may not accept a fee for his or her own use or benefit for making a speech, delivering a lecture, or participating in a discussion if the subject is the Foundation or Foundation programs or if such services are part of the employee's official Foundation duties. However, the employee may suggest that the amount otherwise payable as a fee or honorarium be contributed to a not-for-profit organization concerned with African development.

(b) When a meeting, discussion, or other gathering to which paragraph (a) of this section refers takes place at a substantial distance from the employee's home, he or she may accept such reimbursement, subject to the approval of the counselor, for the actual cost of transportation and necessary subsistence or expenses, as is compatible with this part and for which no Government payment or reimbursement is made. If an employee receives accommodations, goods, or services in kind from a non-Government source while on official travel, such items will be treated as a donation to the Foundation and an appropriate reduction will be made in per diem or other travel expenses payable.

(c) An employee may accept fees for speeches, etc., dealing with subjects other than Foundation programs when no official funds have been used in connection with his or her appearance and such activities do not interfere with the efficient performance of his or her duties, and for which leave of absence, where necessary, is obtained.

(d) No employee may participate for the Foundation in a conference or speak for the Foundation before audiences when he or she has reason to believe that any racial group has been segregated or excluded from the meeting, from any of the facilities or conferences, or from membership in the organization sponsoring the conference or meeting.

§ 1504.205 Gifts, entertainment, and favors.

(a) An employee shall not receive or solicit, directly or indirectly, for personal benefit or for persons with whom there exist family, business, or financial ties, anything of economic value as a gift, gratuity, loan, entertainment, or favor which might reasonably be interpreted by others as affecting the employee's independence or impartiality, from any person, corporation, or group, if the employee has reason to believe that the entity:

(1) Has or is seeking to obtain, contractual or other business or financial relationships with the Foundation;

(2) Conducts operations or activities which are regulated by the Foundation; or

(3) Has interests which may be substantially affected by the employee's performance or nonperformance of his or her official duty.

(b) Paragraph (a) of this section does not prohibit:

(1) Acceptance of things of economic value arising from obvious family or personal relationships (such as those between the employee and the parents, children, or spouse of the employee) when the circumstances make it clear that it is those relationships rather than the business of the persons concerned which are the motivating factors;

(2) Acceptance of food and refreshments of nominal value on infrequent occasions in the ordinary course of a luncheon or dinner meeting or other meeting or on a project tour where an employee may properly be in attendance;

(3) Acceptance of loans from banks or other financial institutions on customary terms to finance proper and usual activities of employees, such as, home mortgage loans; and

(4) Acceptance of unsolicited advertising or promotional material, such as, pens, pencils, note pads, calendars, and other items of nominal intrinsic value.

(c) An employee shall not solicit a contribution from another employee for a gift to an official superior, or accept a gift from an employee receiving less pay than himself/herself (5 U.S.C. 7351). However, this paragraph does not prohibit a voluntary gift of nominal value or a donation in a nominal amount made on a special occasion, such as marriage, illness, or retirement.

(d) An employee shall not accept a gift, present, decoration, nor any other thing from a foreign government unless authorized by Congress as provided by the Constitution, 5 U.S.C. 7342, and the regulations in Part 3 of Chapter 1 of Title 22 ("Acceptance of Gifts and Decorations from Foreign Governments").

(e) Neither this section nor § 1504.203 precludes an employee from receipt of bona fide reimbursement, unless prohibited by law, for expenses of travel and such other necessary subsistence as is compatible with this Part and for which no Government payment or reimbursement has been made. However, this paragraph does not allow reimbursement, or payment to be made on the employee's behalf, for excessive personal living expenses, gifts, entertainment, or other personal benefits.

§ 1504.206 Financial interests.

(a) Neither a regular nor a special Government employee may participate in a governmental capacity in any matter in which that employee, the employee's spouse, minor child, associate or organization with whom there exists a business relationship, or person or organization with whom there exists negotiation for employment, has a financial interest (18 U.S.C. 208). Such an employee shall not: (1) Have a direct or indirect financial interest that conflicts substantially, or appears to conflict substantially, with his/her Government duties and responsibilities; or (2) directly or indirectly, engage in any financial transaction as a result of, or primarily relying on, information obtained through his/her Government employment.

(b) An employee may be granted exemption from these restrictions provided: (1) The President of the Foundation for staff, or the Chairman of the Board for members of the Board, is first advised of the nature and circumstances of the particular matter, and the employees makes full disclosure of the financial interest, and (2) he/she receives in advance a written determination by the President or Chairman, as appropriate, that the outside financial interest is deemed not substantial enough to have an effect on the integrity of his/her services.

(c) This section does not preclude an employee from having a financial interest or engaging in financial transactions to the same extent as a private citizen not employed by the Government so long as it is not prohibited by law, Executive Order 11222, this section, or these Foundation regulations.

§ 1504.207 Use of Government Property.

An employee shall not directly or indirectly, use, or allow the use of, Government property of any kind, including property leased to the Government, for other than officially approved activities. An employee has a positive duty to protect and conserve Government property, including equipment, supplies, and other property entrusted or issued to him/her.

§ 1504.208 Misuse of information.

(a) For the purpose of furthering a private interest, an employee shall not, except as provided in § 1504.203, directly or indirectly, use, or allow the use of, official information obtained

through or in connection with Government employment which has not been made available to the general public.

(b) This section is not intended to discourage disclosure through proper channels of information which has been or should be made available to the public by law.

§ 1504.209 Indebtedness.

An employee shall pay each just financial obligation in a proper and timely manner, especially one imposed by law, such as, Federal, State, or local taxes. For the purpose of this section, a "just financial obligation" means one acknowledged by the employee, reduced to judgment by a court, or imposed by law, such as Federal, State, or local taxes. "In a proper and timely manner" means in a manner which the Foundation determines does not, under the circumstances, reflect adversely on the Government as the individual's employer. In the event of dispute between an employee and an alleged creditor, this section does not require an agency to determine the validity or amount of the disputed debt.

§ 1504.210 Gambling, betting, and lotteries.

An employee shall not participate, while on Government-owned or leased property or while on duty for the Government, in any gambling activity, including the operation of a gambling device, in conducting a lottery or pool, in a game for money or property, or in selling or purchasing a numbers slip or ticket.

§ 1504.211 Association with potential contractor prior to employment.

(a) No employee, or any person subject to his or her supervision, may participate in the decision to award a contract to any organization with which that employee has been associated in the past 2 years. When an employee becomes aware that such an organization is under consideration for or has applied for a contract with the Foundation, the employee shall notify his or her immediate supervisor in writing. The supervisor shall take whatever steps are necessary to exclude the employee from all aspects of the decision process regarding the contract or agreement.

(b) When an employee becomes aware that an organization with which he or she has been associated in the past 2 years is under consideration for or has applied for a contract with the Foundation, he or she shall refrain from participating in the decision process.

§ 1504.212 Association with Foundation contractor or potential contractor while an employee.

(a) No regular employee may be associated with any Foundation contractor or potential contractor. Any organization that is associated with a regular employee shall be suspended from consideration as a contractor.

(b) No regular or special employee, except in his or her official capacity as a Foundation employee, shall participate in any way on behalf of any organization in the preparation or development of a contract proposal involving the Foundation, or represent any other organization in a matter pending before the Foundation when such participation or representation would result in or create the appearance of the use of public office for private gain. In such cases, if a regular or special employee participates, while an employee of the Foundation, in any aspect of the development of a contract or agreement proposal on behalf of an organization, or represents another organization in a matter pending before the Foundation, that organization shall be suspended from consideration for the contract or other agreement.

(c) No regular or special employee who, prior to his or her employment at the Foundation, participated in the development of a contract or other agreement proposal on behalf of another organization, shall participate in any aspect of the decision process regarding that contract or other agreement, or, if the contract or other agreement is awarded, in any oversight or management capacity in relation to that contract or other agreement. In the event a regular or special employee who participated in the development of the contract or other agreement proposal prior to being employed at the Foundation does participate as a Foundation employee in the decision process for such contract or other agreement, the organization shall be suspended from consideration.

§ 1504.213 Economic and financial activities of employees abroad.

(a) Foundation employees are specifically prohibited from engaging in the activities listed below in any foreign country:

(1) Speculation in currency exchange;

(2) Transactions at exchange rates differing from local legally allowable rates, unless such transactions are duly authorized in advance by the Foundation;

(3) Sales to unauthorized persons, whether at cost or for profit, of currency acquired at preferential rates through diplomatic or other restricted arrangements;

(4) Transactions which entail the use, without official sanction, of the diplomatic pouch;

(5) Transfers of funds on behalf of blocked nationals, or otherwise in violation of U.S. foreign funds and assets control;

(6) Independent and unsanctioned private transactions which involve an employee as an individual in violation of applicable control regulations of foreign governments;

(7) Acting as an intermediary in the transfer of private funds for persons in one country to persons in another country, including the United States; and

(8) Permitting use of his or her official title in any private business transactions or in advertisements for business purposes.

(b) U.S. citizen-Foundation employees on official travel or assignment abroad are prohibited from engaging in the activities listed below:

(1) Transacting or having an interest in any business or engaging for profit in any profession or undertaking or other gainful employment in any country or countries in which he or she is on official travel assignment in his or her own name or through the agency of any other person.

(2) Investing in real estate or mortgages on properties located in his or her country of assignment. (The purchase of a house and land for personal occupancy is not considered a violation of this subparagraph); and

(3) Investing money in bonds, shares, or stocks of commercial concerns headquartered in his or her country of assignment or conducting a substantial portion of business in such country. (Such investments, if made prior to knowledge of assignment or detail to such country or countries, may be retained during such assignment or detail); and

(4) Selling or disposing of personal property, including automobiles, at prices producing profits which result primarily from import privileges derived from his or her official status as an employee for the U.S. Government.

§ 1504.214 Discrimination.

No employee may make inquiry concerning the race, political affiliation, or religious beliefs of any employee or applicant in connection with any personnel action, and may not practice, threaten, or promise any action against or in favor of any employee or applicant for employment because of race, color, religion, sex, age, or national origin, and in the competitive service, on the basis of politics, marital status, or physical handicap.

§ 1504.215 General conduct prejudicial to the Government.

An employee shall not engage in criminal, infamous, dishonest, immoral, or notoriously disgraceful conduct, or other conduct prejudicial to the Government.

Subpart C—Procedures

§ 1504.301 Responsibility of employees.

It is the responsibility of each employee: (a) To become familiar with the full text of applicable statutes, rules, and regulations before engaging in outside employment and financial activity which might involve a conflict of interest, or other activity which might involve a violation of standards of ethical conduct or of statutory or regulatory restrictions; and (b) to secure the advice or approval of his or her supervisor and the Counselor before engaging in the contemplated activity.

§ 1504.302 Sources of information and advice.

General information on statutes, rules, and regulations governing the conduct of employees may be obtained from the General Counsel. Specific information may be obtained from the United States Code, from the Federal Personnel Manual, and from Foundation regulations, all of which are available through the General Counsel. A copy (or a summary) of the Foundation regulations will be furnished to each employee in accordance with Office of Personnel Management Regulations (5 CFR Part 735). Clarification of standards of conduct and related laws, rules, and regulations, and advice on their applicability to individual situations, may be obtained from the General Counsel.

§ 1504.303 Executive personnel financial disclosure.

(a) The following employees of the Foundation shall submit completed Executive Personnel Financial Disclosure Reports (SF278) containing information required in accordance with 5 CFR Part 734, Subpart C:

(1) Within 5 days after transmittal by the President to the Senate of their nomination, each member of the Board of Directors of the Foundation.

(2) Within 30 days, after assuming the position, any newly appointed employee of the Foundation whose position is classified at GS–16 or above of the General Schedule, or whose basic rate of pay (excluding "step" increases) under other pay schedules is equal to or greater than the rate for GS–16 (Step 1).

(3) Within 30 days after designation, the designated Foundation Counselor on Ethical Conduct and Conflicts of Interest.

(b) Employees, who perform the duties of a position or office described in this section in excess of sixty days in any calender year, must submit annual statements as of May 15 of each year containing the information described in 5 CFR Part 734, Subpart C.

(c) Executive Personnel Financial Disclosure-statements filed pursuant to this section shall be made available to the public in accordance with the provisions of 5 CFR Part 734.603.

§ 1504.304 Statements of employment and financial interests.

The following employees of the Foundation shall submit statements of employment and financial interests:

(a) Employees classified at GS–13 or above under section 5332 of Title 5, United States Code, or at a comparable pay level under another authority, including employees promoted into positions whose incumbents were required to file, as well as, new employees hired who are in positions, the basic duties of which, impose upon the incumbent the responsibility for making a Government decision or taking Government action with regards to:

(1) Contracting or procurement;

(2) Administering or monitoring grants or subsidies;

(3) Regulating or auditing private or other non-Federal enterprises; or

(4) Other activities where the decision or action has an economic impact on the interests of any non-Federal enterprise; and

(b) Other employees, including those classified at GS–12 and below whose submission of statements of financial interest has been approved by the Office of Government Ethics, whose duties and responsibilities require them to report employment and financial interests in order to avoid involvement in a possible conflict of interest situation and to carry out the purpose of the law, Executive Order 11222, and the Foundation's regulations.

§ 1504.305 Employees not required to submit statements.

(a) Employees in positions that meet the criteria in paragraph (c) of § 1504.303 may be excluded from the reporting requirement when the President of the Foundation determines that:

(1) The duties of the positions are such that the likelihood of the incumbent's involvement in a conflict of interest situation is remote; or

(2) The duties of the position are at such level of responsibility that the submission of a statement of employment and financial interests is not necessary because of the degree of supervision and review over the incumbent, or the inconsequential effect on the integrity of the Government.

(b) A statement of employment and financial interests is not required by these regulations from members of the Board of Directors and employees of GS–16 and above, who file Financial Disclosure Reports required by § 1504.303.

(c) The President of the Foundation may waive the requirement of this Subpart for the submission of a statement of employment and financial interests in the case of a special Government employee who is not a consultant or an expert when he/she finds that the duties of the position held by the special Government employee are of a nature and at such levels of responsibility that the submission of the statement by the incumbent is not necessary to protect the integrity of the Government. For the purpose of this paragraph, "consultant" and "expert" have the meanings given those terms by Chapter 304 of the Federal Personnel Manual.

§ 1504.306 Employees' complaint filing requirement.

Each employee shall have the opportunity for review of a complaint that his/her position has been improperly included in § 1504.303 as one requiring the submission of a statement of employment and financial interests. Employees are reminded that they may obtain counseling pursuant to § 1504.302 prior to filing a complaint.

§ 1504.307 Time and place of submission.

(a) An employee shall submit his/her statement of employment and financial interests to the Counselor no later than:

(1) Ninety days after the effective date of these regulations, if the person has entered on duty on or before that effective date; or

(2) Five days after entrance on duty, if the employee enters on duty after that effective date.

(b) Only the original of the statement, or supplement thereto, required by this Part shall be submitted. The individual submitting a statement should retain a copy for his or her personal records.

§ 1504.308 Information required, and forms.

(a) *Employees.* The employee's statement of employment and financial interests required by these regulations shall be submitted on the form, "Confidential Statement of Employment and Financial Interests", and shall

VOL 50 ISS 137 JL 17 1985 UMI

contain all the information therein required.

(b) *Interests of employees' relatives.* The interest of a member of an employee's family is considered to be an interest of the employee. The term "member of the employee's family" is defined in § 1504.102(e).

(c) *Information not known by employees.* If any information required to be included on a statement of employment and financial interests or supplementary statement, including holdings placed in trust, is not known to the employee but is known to another person, the employee shall request that other person to submit information in his/her behalf.

(d) *Information not required to be reported.* The regulations in this Part do not require an employee to submit on a statement of employment and financial interests or supplementary statement any information relating to:

(1) The employee's connection with, or interest in, a professional society or a charitable, religious, social, fraternal, recreational, public service, civic, or political organization, or similar organization, not conducted as a business enterprise. For the purpose of this section, educational and other institutions doing research and development or related work involving grants or money from, or contracts with, the Government are deemed "business enterprises" and are required to be included in an employee's statement of employment and financial interests; (2) an indirect interest, such as ownership of shares in a mutual fund, which in turn owns an interest in other organizations, unless such mutual fund is substantially involved in African ventures. Such an "indirect" interest is hereby determined pursuant to 18 U.S.C. 208(b)(2), to be too remote to affect the integrity of employees' services.

§ 1504.309 Supplementary statements.

(a) Employees, other than those occupying positions requiring the filing of Executive Personnel Financial Disclosure statements, who perform the duties of a position or office for a period in excess of sixty days in any calendar year, including special Government employees, must submit annual statements as of June 30 of each year containing the information described in § 1504.308.

(b) Notwithstanding the filing of reports required by this section, each employee shall at all times avoid acquiring a financial interest that could result, or taking an action that would result, in a violation of the conflicts of interest provisions of section 208 of Title 18, United States Code, or these regulations.

§ 1504.310 Review of statements and determinations as to conflicts of interest.

(a) On the basis of the statement of employment and financial interests submitted by each employee, or on the basis of information received from other sources, the Counselor shall determine in the light of the duties which that employee is or will be performing whether any conflicts of interest, real or apparent, are indicated. The Counselor shall make the determination based on the applicable statutes, Executive Order 11222, and the applicable regulations of the Office of Personnel Management and the Foundation.

(b) Where the Counselor's determination in a particular case is that a conflict of interest, real or apparent, is indicated, informal discussions with the employee concerned shall be initiated. The discussions shall have as their objectives:

(1) Providing the individual with a full opportunity to explain the conflict or appearance of conflict; and

(2) Arriving at an agreement (acceptable to the Counselor, the individual, and the individual's immediate superior) whereby the conflict of interest may be removed or avoided.

(c) Where an acceptable agreement cannot be obtained pursuant to paragraph (b) of this section, the Counselor shall present his/her findings and recommendations to the President for decision. The President shall decide what remedy is most appropriate to remove or correct that conflict or apparent conflict. Remedial action under this paragraph may include disciplinary action or any of the actions enumerated in § 1504.310.

(d) Written summaries of all agreements and decisions arrived at pursuant to this section and § 1504.310 shall be placed in the Counselor's files. Copies shall also be made available to the regular or special Government employee concerned.

§ 1504.311 Penalties for violation.

(a) Violations of these regulations subject employees to remedial or disciplinary action by the Foundation which may be in addition to any penalty prescribed by law.

(b) When, after consideration of the explanation of the employee and the findings and recommendations of the Counselor, the President decides that remedial action is required, immediate action to end the conflict or appearance of a conflict of interest, shall be taken. Remedial action may include, but is not limited to:

(1) Changes in assigned duties;

(2) Divestment by the regular or special Government employee of the conflicting interest;

(3) Disciplinary action; or

(4) Disqualification for a particular assignment.

Remedial action, whether disciplinary or otherwise, shall be effected in accordance with any applicable laws, Executive Orders, and regulations.

§ 1504.312 Administrative enforcement proceedings.

In the event that the Foundation receives information that there has been a possible violation involving the Foundation of the restrictions against post employment activities contained in section 207 (a), (b), or (c) of title 18 U.S.C., the President or his designee shall follow the procedures set forth in 5 CFR 737.27 with respect to the initiation and conduct of an administrative disciplinary hearing.

§ 1504.313 Confidentiality of employees' statements.

The Foundation shall hold each statement of employment and financial interests, and each supplementary statement, in confidence. To insure this confidentiality only the Counselor and Deputy Counselor are authorized to review and retain the statements.

The Counselor is responsible for maintaining the statements in confidence and shall not allow access to, or allow information to be disclosed from, a statement except to carry out the purpose of this Part. The Foundation may not disclose information from a statement except as the Office of Personnel Management or the President of the Foundation may determine for good cause shown.

§ 1504.314 Effect of employees' statements on other requirements.

The statements of employment and financial interests and supplementary statements required for employees are in addition to, and not in substitution for, or in derogation of, any similar requirement imposed by law, order, or regulation. The submission of a statement or supplementary statement by an employee does not permit participation in a matter in which such participation is prohibited by law, order, or regulation.

Dated: July 8, 1985.

Leonard H. Robinson, Jr.,

President, African Development Foundation.

BILLING CODE 6117-01-M

POSTAL SERVICE

39 CFR Part 601

Procurement of Property and Services; Amendments to Postal Contracting Manual

AGENCY: Postal Service.

ACTION: Amendments to Postal Contracting Manual.

SUMMARY: The Postal Service announces that it is amending the Postal Contracting Manual to establish a 6 year records retention period for contract case files (excluding those relating to real property), but that unsuccessful offers may be destroyed after final payment of the contract or after 1 year from date of award, whichever is later. Several other minor changes and corrections of errors are also made.

EFFECTIVE DATE: July 10, 1985.

FOR FURTHER INFORMATION CONTACT: Eugene A. Keller, (202) 245-4818.

SUPPLEMENTARY INFORMATION: The Postal Contracting Manual, which is incorporated by reference in the Code of Federal Regulations (see 39 CFR 601.100), has been amended by the issue of PCM Circular 85-2, dated July 10, 1985.

In accordance with 39 CFR 601.105, notice of these changes is hereby published in the **Federal Register** and the text of the changes is filed with Director, Office of the Federal Register. Subscribers to the basic manual will receive these amendments from the Postal Service. (For other availability of the Postal Contracting Manual, see 39 CFR 601.104.)

List of Subjects in 39 CFR Part 601

Government procurement, Postal Service, Incorporation by reference.

PART 601—[AMENDED]

The authority citation for Part 601 continues to read as follows:

Authority: 5 U.S.C. 552(a), 39 U.S.C. 401, 404, 410, 411, 2008, 5001-5605.

Explanation of Changes

1-307, Documentation of Procurement Actions; Maintenance and Disposition of files, is expanded to set forth a 6 year records retention period for contract case files (excluding those relating to real property), except that unsuccessful offers may be destroyed either after final payment under the contract, or after 1 year from date of award of the contract, whichever occurs later.

1-323.2(a), Reporting Noncompetitive Practices, is revised to correct the title of the manager to whom reports are to be sent and to include notification of the Postal Inspection Service.

1-323.2(d) is revised to insert three words omitted by TL35.

1-323.3 is revised to insert a sentence omitted by TL35.

2-403, Recording Bids, is revised to delete the last sentence pertaining to keeping records, because records retention is specifically addressed in 1-307, as explained above.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

BILLING CODE 7710-12-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 147

[OW-7-FRL-2862-1]

Missouri Department of Natural Resources Underground Injection Control Program Approval

AGENCY: Environmental Protection Agency.

ACTION: Approval of State Program.

SUMMARY: The State of Missouri has submitted an application under section 1422 of the Safe Drinking Water Act (SDWA) for the approval of an Underground Injection Control (UIC) program governing Classes I, III, IV and V injection wells. After careful review of the application, the Agency has determined that the State's injection well program for Classes I, III, IV and V injection wells meets the requirements of Section 1422 of the Act. Therefore, this application is approved.

EFFECTIVE DATE: This approval shall be promulgated for purposes of judicial review at 1:00 p.m. eastern time on July 31, 1985, and shall become effective on July 31, 1985.

FOR FURTHER INFORMATION CONTACT: Theodore Fritz, Ground Water Section, U.S. Environmental Protection Agency, Region VII, 726 Minnesota, Kansas City, Kansas 66101, at phone number (913) 236-2815.

SUPPLEMENTAL INFORMATION: Part C of the SDWA provides for a UIC program. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State programs to prevent underground injection which endangers drinking water sources. The Administrator is also to list in the **Federal Register** each State for which, in his judgment, a State UIC program may be necessary. Each State listed shall submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State: (i) Has adopted after reasonable notice and public hearings, a UIC program which meets the requirements of regulations in effect under section 1421 of the SDWA; and (ii) will keep such records and make such reports with respect to its activities under its UIC program as the Administrator may require by regulations. After reasonable opportunity for public comment, the Administrator shall by rule approve, disapprove or approve in part and disapprove in part, the State's UIC program.

The State of Missouri was listed as needing a UIC program on June 19, 1979 (40 FR 35288). The State submitted an application under section 1422 on September 28, 1984, for a UIC program to be administered by the Missouri Department of Natural Resources (MDNR). On November 2, 1984, EPA published notice of receipt of the application, requested public comments, and offered a public hearing on the UIC program submitted by the MDNR (49 FR 44111). A public hearing was held on December 12, 1984, in Kansas City, Missouri.

After careful review of the application, I have determined that the Missouri UIC program submitted by the MDNR to regulate Class I, III, IV and V injection wells on all State lands other than Indian lands meets the requirements established by the Federal regulations pursuant to section 1422 of the SDWA and, hereby, approve it. However, since there are no Class I and IV wells and the State elected to prohibit such injection, Class I and IV injection will be banned. The effect of this approval is to establish this program under the SDWA for non-Indian lands in the State of Missouri. Missouri's program for Class II wells under section 1425 was approved December 2, 1983.

This program replaces the existing EPA-administered program. EPA promulgated the EPA-administered program, published May 11, 1984, (49 FR 20209), in order to comply with the requirement of the SDWA to promulgate a Federally-administered program if a State-administered program cannot be approved within a certain time. Now that EPA has determined that the State-administered program meets all applicable Federal requirements, the Agency is withdrawing the EPA-administered program and establishing the State-administered program as the applicable UIC program in the State, because of the preference in the SDWA

VOL 50 ISS 137 JL 17 1985 UMI

for State administration of UIC programs.

This approval will be codified in 40 CFR Section 147.1301. State statutes and regulations that contain standards, requirements, and procedures applicable to owners or operators are incorporated by reference. These provisions incorporated by reference, as well as all permit conditions or permit denials issued pursuant to such provisions, are enforceable by EPA pursuant to section 1423 of the SDWA.

The terms listed below comprise a complete listing of the thesaurus terms associated with 40 CFR Part 147, which sets forth the requirements for a State requesting the authority to operate its own permit program of which the Underground Injection Control program is a part. These terms may not all apply to this particular notice.

List of Subjects in 40 CFR Part 147

Indian—lands, Reporting and recordkeeping requirements, Intergovernmental relations, Penalties, Confidential business information, Water supply, Incorporation by reference.

OMB Review

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I certify that approval by EPA under section 1422 of the Safe Drinking Water Act of the application by the Missouri Department of Natural Resources will not have a significant economic impact on a substantial number of small entities, since this rule only approves State actions. It imposes no new requirements on small entities.

Dated: July 3, 1985.

A. James Barnes,

Acting Administrator.

As set forth in the preamble, Part 147 of Title 40 of the Code of Federal Regulations is amended as follows:

PART 147—STATE UNDERGROUND INJECTION CONTROL PROGRAMS

Subpart AA—Missouri

1. The authority for Part 147 continues to read as follows:

Authority: Sections 1421 and 1422 Pub. L. 93–523, 88 Stat. 1674 (300 U.S.C. 300h, 300h–1).

2. Section 147.1301 is revised to read as follows:

§ 147.1301 State-administered program—Class I, III, IV, and V wells.

The UIC program for Class I, III, IV, and V wells in the State of Missouri, other than those on Indian lands, is the program administered by the Missouri Department of Natural Resources, approved by EPA pursuant to section 1422 of the SDWA. Notice of this approval was published in the **Federal Register** on November 2, 1984; the effective date of this program is July 31, 1985. This program consists of the following elements, as submitted to EPA in the State's program application.

(a) *Incorporation by reference.* The requirements set forth in the State statutes and regulations cited in this paragraph are hereby incorporated by reference and made a part of the applicable UIC program under the SDWA for the State of Missouri. This incorporation by reference was approved by the Director of the Federal Register effective July 31, 1985.

(1) Revised Statutes of the State of Missouri, Volume 2, sections 204.016, 204.026, 204.051, 204.056 and Volume V, section 577.155 (1978 and Cumm. Supp. 1984);

(2) Missouri Code of State Regulations, title 10, division 20, Chapter 6, sections 20–6.010, 20–6.020, 20–6.070, 20–6.080, 20–6.090, and title 10, division 20, Chapter 7, section 20–7.031 (1977, amended 1984).

(b) *Other laws.* The following statutes and regulations, although not incorporated by reference except for select sections identified in paragraph (a) of this section, are also part of the approved State-administered program.

(1) Revised Statutes of the State of Missouri, chapters 204, 260, 536, 557, 558 and 560; sections 640.130.1 and 1.020 (1978 and Cumm. Supp. 1984);

(2) Rule 52.12 Vernon's Annotated Missouri Rules (1978);

(3) Missouri Code of State Regulations, title 10, division 20, Chapters 1 through 7 (1977, amended 1984).

(c) The Memorandum of Agreement between EPA Region VII and the Missouri Department of Natural Resources, signed by the EPA Regional Administrator on October 10, 1984.

(d) *Statement of Legal Authority.* Opinion No. 123–84, signed by Attorney General of Missouri, September 24, 1984. Amended April 2, 1985.

(e) The Program Description and any other materials submitted as part of the application or as supplements thereto.

[FR Doc. 85–16381 Filed 7–16–85; 8:45 am]

BILLING CODE 6560–50–M

40 CFR Part 147

[OW–9–FRL–2861–9]

Commonwealth of the Northern Mariana Islands Division of Environmental Quality Underground Injection Control Program Approval

AGENCY: Environmental Protection Agency.

ACTION: Approval of State Program.

SUMMARY: The Commonwealth of the Northern Mariana Islands has submitted an application under section 1422 of the Safe Drinking Water Act for the approval of an Underground Injection Control (UIC) program governing Classes I, II, III, IV, and V injection wells. After careful review of the application, the Agency has determined that the Commonwealth's injection well program meets the requirements of the Act and, therefore, approves it.

EFFECTIVE DATE: This approval shall be promulgated for purposes of judicial review at 1:00 p.m. eastern time on July 31, 1985. This approval shall become effective on August 30, 1985.

FOR FURTHER INFORMATION CONTACT: Meiling Odom or Nathan Lau, Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, CA 94105; PH: (415) 974–7766, (FTS) 454–7766.

SUPPLEMENTAL INFORMATION: Part C of the Safe Drinking Water Act (SDWA) provides for an Underground Injection Control (UIC) program. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State programs to prevent underground injection which endangers drinking water sources. The Administrator is also to list in the **Federal Register** each State for which, in his judgment, a State UIC program may be necessary. The definition of State in this case also includes territories such as the Commonwealth of the Northern Mariana Islands. Each State listed shall submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State: (i) Has adopted after reasonable notice and public hearings, a UIC program which meets the requirements of regulations in effect under section 1421 of the SDWA; and (ii) will keep such records and make such reports with respect to its activities under its UIC program as the Administrator may require by regulations. After reasonable opportunity for public comment, the Administrator shall by rule approve, disapprove or approve in part and disapprove in part, the State's UIC program.

The Commonwealth of the Northern Mariana Islands was listed as needing a UIC program on March 19, 1980 (45 FR 17632). The State submitted an application under section 1422 on October 26, 1984, for a UIC program to regulate Class I, II, III, IV, and V injection wells to be administered by the Commonwealth of the Northern Mariana Islands Division of Environmental Quality (CNMIDEQ).

On January 18, 1985, EPA published notice of receipt of the application, requested public comments, and offered a public hearing on the UIC program submitted by the CNMIDEQ. No hearing requests nor comments were received.

After careful review of the application, I have determined that the portion of the Commonwealth of the Northern Mariana Islands program submitted by the CNMIDEQ applicable on all State lands other than Indian lands meets the requirements established by the Federal regulations pursuant to section 1422 of the SDWA and, hereby, approve it. The effect of this approval is to establish this program as the applicable underground injection control program under the SDWA for non-Indian lands in the Commonwealth of the Northern Mariana Islands.

This program replaces the existing EPA-administered program. EPA promulgated an UIC program for the CNMI published May 11, 1984 (49 FR 20220). in order to comply with the requirement of SDWA to promulgate a Federally-administered program if a State-administered program cannot be approved within a certain time. Now that EPA has determined that the State-administered program meets all applicable Federal requirements, the Agency is withdrawing the EPA-administered program and establishing the State-administered program as the applicable UIC program in the State, because of the preference in the SDWA for State administration of UIC programs.

This approval will be codified in 40 CFR 147.2800. State statutes and regulations that contain standards, requirements, and procedures applicable to owners or operators are incorporated by reference. These provisions incorporated by reference, as well as all permit conditions or permit denials issued pursuant to such provisions, are enforceable by EPA pursuant to section 1423 of the SDWA.

The terms listed below comprise a complete listing of the thesaurus terms associated with 40 CFR Part 147, which sets forth the requirements for a State requesting the authority to operate its own permit program of which the Underground Injection Control program is a part. These terms may not all apply to this particular notice.

List of Subjects in 40 CFR Part 147

Indian—lands, Reporting and recordkeeping requirements, Intergovernmental relations, Penalties, Confidential business information, Water supply, Incorporation by reference.

OMB Review

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I certify that approval by EPA under section 1422 of the Safe Drinking Water Act of the application by the Commonwealth of the Northern Mariana Islands Division of Environmental Quality will not have a significant economic impact on a substantial number of small entities, since this rule only approves State actions. It imposes no new requirements on small entities.

Dated: July 3, 1985.

A. James Barnes,

Acting Administrator.

As set forth in the preamble, Part 147 of Title 40 of the Code of Federal Regulations is amended as follows:

PART 147—STATE UNDERGROUND INJECTION CONTROL PROGRAMS

Subpart EEE—Commonwealth of the Northern Mariana Islands

1. The authority for Part 147 continues to read as follows:

Authority: Pub. L. 93–523, 88 Stat. 1674 (300 U.S.C. 300h, 300h–1).

2. Section 147.2800 is added to read as follows:

§ 147.2800 State-administered program—Class I, II, III, IV, and V wells.

The UIC program for Class I, II, III, IV, and V wells in the Commonwealth of the Northern Mariana Islands, other than those on Indian lands, is the program administered by the Commonwealth of the Northern Mariana Islands Division of Environmental Quality approved by EPA pursuant to Section 1422 of the SDWA. Notice of this approval was published in the **Federal Register** on January 18, 1985; the effective date of this program is August 30, 1985. This program consists of the following elements, as submitted to EPA in the State's program application.

(a) *Incorporation by reference.* The requirements set forth in the State statutes and regulations cited in this paragraph are hereby incorporated by reference and made a part of the applicable UIC program under the SDWA for the Commonwealth of the Northern Mariana Islands. This incorporation by reference was approved by the Director of the Federal Register effective July 31, 1985.

(1) CNMI Environmental Protection Act, 2 CMC sections 3101, *et seq.* (1984);

(2) CNMI Coastal Resources Management Act, 2 CMC sections 1501, *et seq.* (1984);

(3) CNMI Drinking Water Regulations, Commonwealth Register, Volume 4, Number 4 (August 15, 1982);

(4) CNMI Underground Injection Control Regulations, Commonwealth Register, Volume 6, Number 5 (May 15, 1984, amended November 15, 1984, January 15, 1985);

(5) CNMI Coastal Resources Management Regulations, Commonwealth Register, Volume 6, Number 12, December 17, 1984.

(b)(1) The Memorandum of Agreement between EPA Region IX and the Commonwealth of the Northern Mariana Islands Division of Environmental Quality, signed by the EPA Regional Administrator on May 3, 1985;

(c) *Statement of Legal Authority.* Statement from Attorney General Commonwealth of the Northern Mariana Islands, "Underground Injection Control Program—Attorney General's Statement," signed on October 10, 1984.

(d) The Program Description and any other materials submitted as part of the original application or as supplements thereto.

submitted by the Interregional Research

requirements to reinstate a requirement for the submission of efficacy data for certain vertebrate control products. At the same time, EPA is revising its conditional registration regulations to rescind an efficacy data waiver that would be inconsistent with the new requirement. This action is required by section 25(a)(2)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended.

FOR FURTHER INFORMATION CONTACT:

By mail: Jean Frane, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 1114, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–0592).

SUPPLEMENTARY INFORMATION: Section 25(a)(2)(B) of FIFRA provides that the Administrator shall provide the Secretary of Agriculture with a copy of any final regulation at least 30 days prior to signing it for publication in the Federal Register. If the Secretary comments in writing regarding the final regulation within 15 days after receiving it, the Administrator shall issue for publication in the Federal Register, with the final regulation, the comments of the Secretary, if requested by the Secretary, and the response of the Administrator concerning the Secretary's comments. If the Secretary does not comment in writing within 15 days after receiving the final regulation, the Administrator may sign the regulation for publication in the Federal Register anytime after the 15-day period.

As required by FIFRA section 25 (a)(3), a copy of this final regulation has been forwarded to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

Authority: 7 U.S.C. 136.

Dated: June 19, 1985.

Steven Schatzow,

Director, Office of Pesticide Programs.

BILLING CODE 6560–50–M

40 CFR Part 180

[OPP–300127A; FRL 2863S]

Linoleic Diethanolamide; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule exempts linoleic diethanolamide from the requirement of a tolerance when used as an inert ingredient as a surfactant in pesticide formulations applied to growing crops only. This regulation was requested by Finetex, Inc.

EFFECTIVE DATE: July 17, 1985.

ADDRESS: Written objections may be submitted to the:

Hearing Clerk (A–110), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

By mail: N. Bhushan Mandava, Registration Support and Emergency Response Branch, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, 703–557–7700.

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the Federal Register of April 17, 1985 (50 FR 15188), which announced that Finetex, Inc., Elmwood Park, NJ 07470, had requested that 40 CFR 180.1001(d) be amended by establishing an exemption from the requirement of a tolerance for linoleic diethanolamide when used as an inert ingredient as a surfactant in pesticide formulations applied to growing crops only.

Inert ingredients are ingredients that are not active ingredients as defined in 40 CFR 162.3(c), and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): Solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carageenan and modified cellulose; wetting and spreading agents; propellants in aerosol dispensers; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

In the proposed rule, EPA stated the basis for a determination that when used in accordance with good agricultural practices, this ingredient is useful and does not pose a hazard to humans or the environment.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The pesticide is considered useful for the purpose for which the exemption is sought. It is concluded that the exemption from the requirement of a tolerance will protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

BILLING CODE 6560–50–M

40 CFR Part 180

[PP 00000/R761; FRL 2863–4]

Sodium Metasilicate and Sodium Propionate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule adds sodium metasilicate and expands the exemption for sodium propionate for the additional use as a plant desiccant in the pesticide chemicals listed as generally recognized as safe (GRAS) when used as plant desiccants for the purpose of section 408(a) of the Federal Food, Drug, and Cosmetic Act. This rule was requested by the PQ Corp.

EFFECTIVE DATE: July 17, 1985.

ADDRESS: Written objections, identified by the document control number [PP 00000/R761], may be submitted to the:

Hearing Clerk (A–110), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

By mail: N. Bhushan Mandava, Registration Support and Emergency Response Branch, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 724A, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, 703–557–7700.

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the Federal Register of April 17, 1985 (50 FR 15189), which announced that the PQ Corp. sought this rule in conjunction with the expected use of a a mixture of sodium metasilicate, sodium propionate, and sodium carbonate for the purpose of accelerating the field drying (desiccation) of freshly cut hay.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted and other relevant material have been evaluated and discussed in the proposed rulemaking. The pesticide chemicals are considered useful for the purposes sought. It is concluded that the uses will protect the public health, and they are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Dated: July 1, 1985.

Susan H. Sherman,

Acting Director, Office of Pesticide Programs.

Therefore, Part 180 is amended as follows:

PART 180—[AMENDED]

1. The authority citation for 40 CFR Part 180 continues to read as follows:

Authority: 21 U.S.C. 346a.

2. Section 180.2(a) is revised by adding alphabetically an entry for sodium metasilicate and expanding the use for sodium propionate to include its use as a plant desiccant. As revised, paragraph (a) reads as follows:

§ 180.2 Pesticide chemicals considered safe.

(a) As a general rule, pesticide chemicals other than benzaldehyde (when used as a bee repellent in the harvesting of honey), ferrous sulfate, lime, lime-sulfur, potassium carbonate, potassium polysulfide, potassium sorbate, sodium carbonate, sodium chloride, sodium hypochlorite, sodium polysulfide, sodium sesquicarbonate, sorbic acid, sulfur, and, when used as plant desiccants, sodium metasilicate (not to exceed 4 percent by weight in aqueous solution) and sodium propionate, and when used as postharvest fungicides, citric acid, fumaric acid, oil of lemon, oil of orange, sodium benzoate, and sodium propionate are not for the purposes of section 408(a) of the Act generally recognized as safe.

BILLING CODE 6560–50–M

40 CFR Part 180

[PP 3E2819/R773; FRL–2865–1]

Pesticide Tolerance for Chlorpyrifos

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for the combined residues of the insecticide chlorpyrifos and its metabolite in or on the raw agricultural crop group *Brassica* (cole) leafy vegetables. This regulation to establish a maximum permissible level for residues of the insecticide in or on the crop group was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

EFFECTIVE DATE: Effective on July 17, 1985.

ADDRESS: Written objections, identified by the document control number, [PP 3E2819/R773], may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

By mail: Donald Stubbs, Emergency Response and Minor Use Section (TS–767C), Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202. (703–557–1192).

SUPPLEMENTARY INFORMATION: EPA issued a notice of proposed rulemaking, published in the Federal Register of May 29, 1985 (50 FR 21876), which announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 3E2819 to EPA on behalf of Dr. Robert H. Kupelian, National Director, IR–4 Project and the Agricultural Experiment Stations of Hawaii, Idaho, Michigan, New Jersey, Washington, Wisconsin, and the U.S. Department of Agriculture proposing the establishment of a tolerance for the combined residues of the insecticide chlorpyrifos [*O,O*-diethyl *O*-(3,5,6-trichloro-2-pyridyl) phosphorothioate] and its metabolite 3,5,6-trichloro-2-pyridinol in or on the raw agricultural commodity crop group *Brassica* (cole) leafy vegetables, as defined in 40 CFR 180.34(f) at 2 parts per million (ppm), of which no more than 1 ppm is chlorpyrifos.

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule. The pesticide is considered useful for the purpose for which the tolerance is sought. Based on the data and information submitted, the Agency has determined that the establishment of the tolerance will protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation

deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the

for the objections. A hearing will be granted if the objections are supported

1985, the Circular No. in the heading should read as set forth above.

insurance is no longer available in the community. However, those

deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the gounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

BILLING CODE 6560-50-M

40 CFR Part 180

[PP 4F2969/R772; FRL 2865-2]

Flucythrinate; Pesticide Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the insecticide flucythrinate in or on the raw agricultural commodity cabbage. This regulation to establish a maximum permissible level for residues of the insecticide in or on the commodity was requested pursuant to a petition by the American Cyanamid Co.

EFFECTIVE DATE: Effective on July 17, 1985.

ADDRESS: Written objections, identified by the document control number [PP 4F2969/R772], may be submitted to the Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

By mail: George T. LaRocca, Product Manager (PM) 15, Registration Division (TS-767C), Environmental Protection Agency, 401 M. St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 207, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-2690).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of November 30, 1983 (48 FR 54116), which announced that the American Cyanamid Co., PO Box 400, Princeton, NJ 08540, had submitted a pesticide petition (PP 4F2969) to EPA proposing to amend 40 CFR 180.400 by establishing a tolerance for residues of the insecticide flucythrinate ((±)cyano(3-phenoxyphenyl)methyl(±)-4-(difluoromethoxy)-alpha-(1-methylethyl) benzeneacetate)) in or on the raw agricultural commodity cabbage at 1.5 parts per million (ppm).

The petition was subsequently amended by increasing the proposed tolerance for cabbage to 2.0 ppm (49 FR 30789; August 1, 1984).

No comments were received in response to the notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicology data considered in support of the tolerance include an acute oral rat toxicity study with a median lethal dose (LD_{50}) of 81 milligrams (mg)/kilogram (kg) for male rats and 67 mg/kg for female rats; a 21-day delayed neurotoxicity hen study with a no-observed-effect level (NOEL) of 5,000 mg/kg, the highest dose tested (HDT); teratology studies (in rats and rabbits), with a NOEL of 6.0 mg/kg/day (HDT) for rats and a NOEL of 60 mg/kg/day (HDT) for rabbits; a 3-generation rat reproduction study with a NOEL of 30 ppm; 90-day subchronic rat and dog feeding studies with a NOEL of 60 ppm (HDT) for rats and 150 ppm (HDT) for dogs; a 24-month rat chronic-feeding/oncogenicity study that resulted in a systemic NOEL of 60 ppm in which no oncogenic effects were noted at dosage levels of 30, 50, and 120 ppm (120 ppm (mg/kg) being the highest dosage level tested) under the conditions of the study; an 18-month mouse oncogenic study in which no oncogenic effects were noted at dosage levels of 30, 60, and 120 ppm (120 ppm (mg/kg) being the highest dosage level tested) under the conditions of the study; and the following mutagenicity studies: an Ames test at 1,000 micrograms (μg)/Plate (HDT) and a rat dominant-lethal test at 10.0 mg/kg/ (HDT), both negative.

A 1-year dog feeding study previously identified as desirable has been submitted and is being reviewed by the Agency.

The acceptable daily intake (ADI) is calculated to be 0.015 mg/kg/day based on the 3-generation rat reproduction study and its NOEL of 30 ppm (1.50 mg/kg/day) using a 100-fold safety factor. The maximum permissible intake (MPI) is calculated to be 0.900 mg/day for a 60-kg person. Published and pending tolerances result in a theoretical maximum residue contribution (TMRC) of 0.1561 mg/day based on a 1.5-kg diet and use 17.35 percent of the ADI. The establishment of these tolerances will increase the TMRC to 0.1617, resulting in the total use of 17.96 percent of the ADI.

The nature of the residues is adequately understood for this tolerance. An adequate analytical method, gas chromatography, is available for enforcement purposes. Any secondary residue resulting in milk and meat, fat and meat byproducts of cattle, goats, horses, and sheep from this use will not exceed the established tolerances for these commodities. There are currently no regulatory actions pending against continued registration of this pesticide, and there are no other relevant considerations in establishing this tolerance.

The pesticide is considered useful for the purpose for which the tolerance is sought. Based on the information cited above, the Agency has determined that the establishment of the tolerance for residues of the insecticide flucythrinate in or on the commodity will protect the public health. Therefore, the tolerance is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this document in the Federal Register, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

FEDERAL EMERGENCY MANAGEMENT AGENCY

National Flood Insurance Administration

44 CFR Part 64

[Docket No. FEMA 6667]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If FEMA receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the Federal Register.

EFFECTIVE DATES: The third date ("Susp.") listed in the 4th column.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646-2717, 500 C Street, Southwest, FEMA—Room 416, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) unless an appropriate public body shall have adopted adequate floodplain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR part 59 et. seq.). Accordingly, the communities are suspended on the effective date in the 4th column, so that as of that date flood insurance is no longer available in the community. However, those communities which, prior to the suspension date, adopt and submit documentation of legally enforceable flood plain management measures required by the program, will continue their eligibility for the sale of insurance. Where adequate documentation is received by FEMA, a notice withdrawing the suspension will be published in the Federal Register.

In addition, the Director of Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the 5th column of the table. No direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood-prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Director finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6-month, 90-day, and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in Section 2 of the Flood Disaster Protection Act of 1973, the establishment of local floodplain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole.

This rule in and of itself does not have a significant economic impact. Any

required for community participation. In each entry, a complete chronology of

Paperwork Reduction Act (44 U.D.C. 3501 et seq.).

General Services Administration Acquisition Regulation; Acquisition Circular AC-85-1;

1. *The authority citation for Part 64* continues to read as follows:

2. *Effective.* July 23, 1985.

3. *Expiration date.* The General Services

This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate floodplain management, thus placing itself in noncompliance of the Federal standards required for community participation. In each entry, a complete chronology of effective dates appears for each listed community.

GENERAL SERVICES ADMINISTRATION

48 CFR Part 552

[GSAR AC-85-1, Supplement 1]

Payment Due Date—Construction Contracts

AGENCY: General Services Administration.

ACTION: Temporary regulation.

SUMMARY: This supplement to the General Services Administration Acquisition Regulation Acquisition Circular AC-85-1 extends the expiration date to January 23, 1986. The intended effect is to extend the policies and procedures as established in AC-85-1, which revised the Payment Due Date clause for construction contracts at GSAR 552.232-70(f).

DATES: Effective date: July 23, 1985.

Expiration date: This circular expires January 23, 1986, unless extended or canceled.

FOR FURTHER INFORMATION CONTACT: Ida Ustad, Office of GSA Acquisition Policy and Regulations (VP), (202) 523-4754.

Regulatory Impact

The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted agency procurement regulations from Executive Order 12291. The exemption applies to this rule. When AC-85-1 was originally issued, the General Services Administration certified under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) that the document would not have a significant economic effect on a substantial number of small entities. Therefore, no regulatory analysis was prepared. The rule does not contain information collection requirements that require the approval of OMB under the

Paperwork Reduction Act (44 U.D.C. 3501 et seq.).

Proposed Rules

Federal Register
Vol. 50, No. 137
Wednesday, July 17, 1985

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 71 and 91

[85-PR-5A; Docket No. 24496]

Minimum Upper Limit for Terminal Control Areas (TCA); Lower Altitude for Requiring Mode C

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Reopening of Comment Period on Petition for Rulemaking.

SUMMARY: This notice reopens the period for comments on a petition for rulemaking submitted by the Air Line Pilots Association. The petition for rulemaking seeks to amend the Federal Aviation Regulations (FAR) by raising to 10,000 feet mean sea level (MSL) the upper altitude limit of any TCA, Category I or II, that is not currently at 10,000 feet MSL or higher, and by lowering the minimum altitude at which automatic altitude reporting Mode C transponders are required from 12,500 feet MSL to 10,000 feet MSL. The petitioner proposes these changes to improve safety by providing air traffic controllers with more precise information.

DATE: Comments must be received on or before September 6, 1985.

ADDRESSES: Comments on this petition for rulemaking may be mailed or delivered in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-204), Docket No. 24496, 800 Independence Avenue, SW., Washington, D.C. 20591. The official docket may be examined in the Rules Docket, Room 916, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. Paul C. Smith, Airspace and Air Traffic Rules Branch, ATO-230, Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Office of the Associate Administrator for Air Traffic, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-8626.

SUPPLEMENTARY INFORMATION

Comments Invited

This petition was published in summary form in the Federal Register on May 3, 1985 (50 FR 18869), with a comment period closing date of July 8, 1985. This notice reopens the closing date for comments to September 6, and sets forth the petition verbatim for clarity.

The FAA has not analyzed the value or the effect that this petition would have on operations, either in TCA locations or nationally, on the aircraft owner/pilot community in general or on air traffic control. The FAA, in publishing substantive parts of the petition for rulemaking, is inviting the public to comment and assist the FAA in determining the need, if any, for raising the upper altitude limit of all TCA's to a minimum of 10,000 feet MSL and for lowering the altitude above which the use of Mode C automatic altitude reporting equipment is required to 10,000 feet MSL. Interested persons are requested to participate by reviewing the information provided by the petitioner and submitting such data, views, and arguments as they may desire in writing. Comments that provide a factual basis supporting the views and suggestions presented are particularly helpful in developng reasoned regulatory decisions. Comments should identify the docket number and be submitted in duplicate to the address listed above. It should be noted that this summary does not propose a regulatory rule for adoption, represent an FAA position, or otherwise commit the agency on the merits of the petition. The FAA intends to proceed to consider the petition under the applicable procedure of FAR Part 11 and reach a conclusion on the merits of the petition after it has had an opportunity to evaluate it carefully in light of the comments received and other relevant matters presented. If the FAA concludes that it should initiate public rulemaking action on the petition, appropriate rulemaking action, including an evaluation of the proposal, will be published.

Background/Supporting Information

TCA Minimum Ceiling 10,000 feet MSL. FAR § 71.12 (14 CFR 71.12) defines the upper altitude limit of TCA's as extending" . . . to specified altitudes . . . ." The upper limits of each TCA are specified in the individual airspace description of the TCA. These limits are presently based upon site specific operational requirements and are not standardized. The following summary is set forth verbatim from the petition.

At the present time, there is no standardized top altitude for the existing TCAs. Some terminate at 7,000 ft., others higher, based on local airspace configurations and TRACON/ARTCC letters of agreement. This is another example of the nonstandard airspace configurations within the National Airspace System. If FAR 91.24 were revised to require Mode C transponders for all operations at 10,000 ft. and above, and the top of all TCAs were raised to that level, air traffic controllers would be provided the opportunity to have precise information on all traffic that could affect the safety of air carrier/commuter arrival and departure flights at TCA-designated airports and thus affort a majority of the traveling public a higher degree of safety. This concept would also serve to standardize airspace configurations throughout the NAS and thus help remove any misunderstanding by general aviation pilots about the configuration of TCAs.

Note.—Each of the following TCA's has an upper limit as indicated and would be affected by the requested rule. 7,000 feet MSL: Logan International Airport; Chicago O'Hare International Airport; Los Angeles International Airport; Miami International Airport; John F. Kennedy International Airport; LaGuardia Airport; Newark International Airport; Washington National Airport; Houston Intercontinental Airport; New Orleans International Airport; Philadelphia International Airport; and Seattle-Tacoma International Airport. 8,000 feet MSL: Dallas-Ft. Worth Airport; San Francisco International Airport; Cleveland-Hopkins International Airport; Kansas City International Airport, Minneapolis-St. Paul International Airport; Greater Pittsburg Airport; and St. Louis International Airport. 9,000 feet MSL: Honolulu International Airport and McCarran International Airport. Some areas within the TCA at San Diego, CA, have an upper limit of 6,000 feet MSL.

Mode C Transponders Above 10,000 feet MSL. Existing FAR § 91.24(b)(4) requires that all aircraft operating above 12,500 feet MSL in controlled airspace, except gliders under certain conditions, have an operable transponder with automatic altitude reporting capability.

The following summary is set forth verbatim from the petition:

At the present time, FAR 91.24 requires Mode C equipped transponders only above 12,500 ft. FAR § 91.70 authorizes speeds above 250 knots when operating at 10,000 ft. or above. In that 2,500 ft. altitude structure, operations can be conducted at high speeds that reduce a pilot's ability to 'see and avoid.' Air traffic controllers are deprived of essential altitude information from VFR aircraft that could be used to provide traffic advisories to aircraft operating within the ATC system. Revising FAR § 91.24 to require Mode C at 10,000 ft. and above would provide compatibility with FAR § 91.70, enable controllers to assist pilots in meeting their 'see and avoid' responsibilities, and at the same time elevate the level of safety provided the traveling public.

Issued in Washington, D.C., on July 12, 1985.

John H. Cassady,
Assistant Chief Counsel, Regulations and Enforcement Division.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 822-3101]

John Treadwell, d.b.a. Trans-Continental Industries; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require John Treadwell, doing business as Trans-Continental Industries, to cease, among other things, making any performance claims for any gasoline additive without competent and reliable evidence; claiming that tests support its performance claims without proper substantiation; and misrepresenting the results of conclusions of any tests pertaining to gasoline additives or the potential profits or marketing assistance that will be provided for distributors of its products. Further, respondent would be required to maintain records of substantiation for three years; file a compliance report with the Commission within 60 days; and notify the Commission of the discontinuace of his present employment and any future employment in similar areas for five years.

DATE: Comments must be received on or before September 16, 1985.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th St. and Pa. Ave., NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Paul W. Turley, Director, Los Angeles Regional Office, Federal Trade Commission, 11000 Wilshire Blvd., Los Angeles, CA 90024. (213) 209-7575.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Before the Federal Trade Commission

[File No. 822-3101]

Agreement Containing Consent Order to Cease and Desist

In the matter of John Treadwell, and individual doing business as Trans-Continental Industries.

The Federal Trade Commission having initiated an investigation of certain acts and practices of John Treadwell, an individual doing business as Trans-Continental Industries, hereinafter some times referred to as "proposed respondent," and it now appearing that proposed respondent is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between John Treadewll and counsel for the Federal Trade Commission that:

1. Proposed respondent John Treadwell is an individual doing business as Trans-Continental Industries, a sole proprietorship, with its office and principal place of business located at 2489 Burlingham Place, Simi Valley, California 93063.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

a. Any further procedural steps;

b. The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

c. All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent: (1) Issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed-to order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right he may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement

may be used to vary or contradict the terms of the order.

the resale of respondent's products, or misrepresenting, directly or by

may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. He understands that once the order has been issued, he will be required to file one or more compliance reports showing that he has fully complied with the order. Proposed respondent further understands that he may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

I

It is ordered that respondent John Treadwell, an individual doing business as Trans-Continental Industries or under any other name or names, his successors and assigns, and respondent's agents, representatives and employees, directly or through any corporation, subsidiary, division or other device, in connection with the manufacturing, advertising, labeling, offering for sale, sale or distribution of the gasoline additive known as 20% Plus Organic Fuel Catalyst ("20% Plus") or any other gasoline, oil, or fuel-saving product, in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

a. Representing, directly or by implication, that any such product will or may result in fuel economy improvement when used in an automobile, truck, recreational vehicle or other motor vehicle unless, at the time of making such representation, respondent possesses and relies upon written results of competent and reliable testing that isolates the effects of the product and substantiates the representation. Respondent may use such tests as the then current urban dynamometer driving schedule (40 CFR Part 86, Appendix I) or the then current highway fuel economy driving schedule (40 CFR Part 600, Appendix I) established by the Environmental Protection Agency or other tests of an equivalent competency and reliability;

b. Representing, directly or by implication, that any performance claim about any such product is based upon any competent and reliable test(s) or survey(s), unless such representation is true;

c. Misrepresenting, directly or by implication, the purpose, content, or conclusion of any test or survey pertaining to any such product;

d. Misrepresenting, directly or by implication, the past, present or future sales, profits or earnings available from the resale of respondent's products, or misrepresenting, directly or by implication, the past or present sales, profits or earnings of respondent's sales agents;

e. Misrepresenting, directly or by implication, the advertising or promotional efforts to be undertaken by respondent to assist distributors in the resale of respondent's products.

For the purposes of Part I, a competent and reliable test means one in which persons qualified to do so conduct the test and evaluate its results in an objective manner using procedures that ensure accurate and reliable results.

II

It is further ordered that respondent, his successors and assigns, in connection with the manufacturing, advertising, labeling, offering for sale, sale or distribution of any gasoline, oil, or fuel-saving product in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, shall for at least three years after the last date of dissemination by respondent either directly or through any business entity of any representation about any such product maintain and upon request make available to the Federal Trade Commission for inspection and copying, copies of, and dissemination schedules for, all advertisements, labels, sales promotional materials and post-purchase materials for such product and copies of all test materials and results upon which such representation is based.

III

It is further ordered that respondent forthwith distribute a copy of this order to all present or future personnel, agents or representatives or respondent having sales, advertising, or policy responsibilities with respect to the subject matter of this order, and that respondent secure from each such person a signed statement acknowledging receipt of said order and maintain that statement in its files for at least three years.

IV

It is further ordered that respondent shall promptly notify the Commission of the discontinuance of his present business or employment and that for a period of five (5) years from the date of service of this order respondent shall promptly notify the Commission of each affiliation with a new business or employment in telephone sales, or in connection with the manufacturing, advertising, labeling, offering sale, sale or distribution of any gasoline additive or any other gasoline, oil, or fuel-saving product, each such notice to include the new business address of respondent and a statement of the nature of the business or employment in which the respondent is newly engaged, as well as a description of the respondent's duties and responsibilities in connection with the new business or employment.

V

It is further ordered that respondent shall within sixty (60) days after service upon him of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which he has complied with this order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from John Treadwell, an individual doing business as Trans-Continental Industries.

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make final the agreement's proposed order.

The Complaint charges that John Treadwell and Trans-Continental Industries made false and misleading claims that their gasoline additive product, "20% Plus," was proven by laboratory and road tests to reduce fuel costs 20 to 25%. The Complaint also charges that the respondent falsely represented that most distributors of "20% Plus" have made substantial profits via resales and that the respondent would assist distributors in the advertising and resale of "20% Plus."

The order prohibits the respondent from making fuel savings claims about any gasoline additive product unless the claim is true and supported by competent and reliable testing. The order also prohibits misrepresentations regarding the profitability of distributors and the extent of assistance to distributors by the respondent. Mr. Treadwell is further required to notify the Commission of any endeavor involving telephone sales over the next five (5) years.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 210

[Release Nos. 33-6598; 34-22219; IC-14623; File No. S7-36-85]

Accounting for Distribution Expenses

AGENCY: Securities and Exchange Commission.

ACTION: Proposed rule amendment.

SUMMARY: The Commission is proposing to amend Regulation S-X to require that registered investment companies account for net costs incurred as a result of a 12b-1 plan as expenses. The amendment would achieve consistent accounting for 12b-1 expenditures thereby ensuring greater uniformity in the accounting practices of investment companies and allowing investors to more accurately compare investment results among investment companies.

DATE: Comments must be received by September 30, 1985.

ADDRESS: Three copies of all comments should be submitted to John Wheeler, Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Comment letters should refer to File No. S7-36-85. All comments received will be available for public inspection in the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. 20549.

FOR FURTHER INFORMATION CONTACT: John W. Albert, Office of Chief Accountant (202) 272-2130, Jay Gould, Attorney, Office of Disclosure and Adviser Regulation, (202) 272-2107, or Lawrence A. Friend, Senior Accountant, Office of Disclosure Policy and Review, (202) 272-2106, Division of Investment Management, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549.

SUPPLEMENTARY INFORMATION: The Commission is publishing for comment a proposed amendment to Rule 6-07 of Regulation S-X [17 CFR 210.6-07]. The amendment to Rule 6-07 would require an investment company filing financial statements to include as an expense in its Statement of Operations all costs incurred under a rule 12b-1 plan net of any amounts retained by or paid to the fund in connection with the plan. The Commission is proposing the amendment to require consistent accounting treatment of rule 12b-1 expenses.

Background

Rule 12b-1 under the Investment Company Act of 1940 (the "Act")[1] prescribes the circumstances under which a registered open-end investment company may finance any activity primarily intended to result in the sale of fund shares including, but not limited to, advertising, compensation of underwriters, dealers and sales personnel, the printing and mailing of prospectuses to other than current shareholders, and the printing and mailing of sales literature. Among other things, the rule requires that payments by the fund associated with distribution of fund shares be made under a written plan (hereafter, referred to as a "12b-1 plan") approved by fund shareholders and directors. Since the adoption of rule 12b-1 in 1980, an increasing number of investment companies have adopted 12b-1 plans.[2]

Typically, rule 12b-1 plans provide for an amount (usually a percentage of the fund's net asset value) to be paid annually by the fund for expenses incurred in selling the fund's securities irrespective of the actual amount of these sales. In preparing required financial statements, these funds account for the amounts spent on the plans as expenses.

A few investment companies have adopted 12b-1 plans which differ in certain respects from the typical plans. In these funds, fund shares are offered to investors at net asset value without any initial sales charge. When shares are sold, the fund pays its principal underwriter a percentage of the price paid to the fund on each sale. This amount is paid to the underwriter from fund assets (not from investor proceeds). The principal underwriter retains a portion of this amount and reallows the remainder to dealers for making sales.

[1] Rule 12b-1 was adopted in 1980 under section 12(b) of the Act which makes it unlawful for any registered open-end management investment company (other than a company complying with section 10(d) of the Act) to act as distributor of securities of which it is the issuer, except through an underwriter, contrary to such rules as the commission may prescribe as necessary or appropriate in the public interest or for the protection of investors.

[2] While in 1982, 104 funds had 12b-1 plans, as of March 31, 1985, 435 funds had 12b-1 plans. *Lipper-Directors' Analytical Data*, June 1985, Special Study of 12b-1 plans.

These funds recover from shareholders all or some of these distribution expenses by imposing a contingent deferred sales charge applicable to redemptions within a specified period of time after purchase. The amounts collected under the contingent deferred sales charge are paid to or retained by the fund, not the underwriter. In the required financial statements of these funds, the amounts paid to underwriters have been accounted for as charges against capital, and the contingent deferred sales loads have been treated as credits to capital.

The rationale for this accounting treatment appears to be that the payments to the underwriters under these plans are paid only upon sales and, as costs directly related to the sale and issuance of additional fund shares, are properly treated as adjustments to capital rather than operating expenses. Supporters assert that this approach is consistent with the treatment given underwriting costs incurred by industrial companies when raising capital.

Proposed Amendment to Rule 6-07

Article 6 of Regulation S-X governs the contents of financial statements filed by registered investment companies. Rule 6-07 of Regulation S-X sets forth the requirements for investment company Statements of Operations. The instructions to Rule 6-07 do not currently specify a particular accounting treatment for distribution expenses resulting from a 12b-1 plan. The proposed amendment to rule 6-07 of Regulation S-X would require all costs incurred by an investment company under a rule 12b-1 plan to be (1) reflected as an expense in the calculation of net investment income, and (2) reduced by any amounts retained by or paid to the fund with respect to the plan.

The Commission believes that a uniform accounting treatment for 12b-1 expenditures is necessary and appropriate for several reasons. In the Commission's view, transactions by investment companies which are essentially the same should be accounted for in the same manner. Distribution expenses under 12b-1 plans are incurred for the same purpose by all funds—selling fund shares. That funds differ in how fees incurred because of sales are paid should not cause a difference in the accounting treatment of the expenses associated with sales. The proposed amendment to Rule 6-07, if adopted, would achieve consistent

accounting treatment for 12b-1 plan

rely heavily on fund yield calculations

DEPARTMENT OF ENERGY

requests to participate in the conference.

and set forth in the Department

Office of Juvenile Justice and

accounting treatment for 12b–1 plan expenditures without regard to whether the fund is operating under a typical 12b–1 plan and paying a percentage of its assets for the sale of fund shares (whether sold or not), or operating under a different arrangement and paying a percentage of its assets for the sale of shares only if such shares are sold.

In addition, the Commission is not persuaded that the treatment by industrial companies of underwriting and stock issuance expenses as charges to capital necessarily should permit similar treatment of these kinds of expenses by investment companies. Unlike industrial companies, open-end investment companies are in the business of continuously offering their securities to investors. The costs of underwriting and stock issuance (distribution) are not incurred on an occasional basis but continuously as a part of a fund's normal operating expenses. Hence, treatment of these costs as expenses rather than capital charges is appropriate.[3]

Finally, the Commission believes the proposal is necessary to eliminate a discrepancy in fund yield calculations which can result from the inconsistent treatment of 12b–1 plan expenses. Yield for investment companies is based on comparing dividends from net investment income to net asset value. Because funds distribute all their net investment income in the form of dividends, the fund which charges 12b–1 plan costs to expenses will have higher expenses, distribute smaller dividends and thereby report a lower yield than a fund which is identical in every respect, including increases in net asset value, except that it charges capital for the same 12b–1 expenditures and thus has lower expenses and higher dividends.[4] The Commission believes that eliminating this unnecessary discrepancy will aid investors who often rely heavily on fund yield calculations in choosing in which fund to invest.

[3] It is also appropriate that the contingent deferred sales load, which represents a recovery of distribution expenses, be offset against the 12b–1 expenditures, and the proposed amendment to Rule 6–07 contains specific language to this effect.

[4] The accounting and tax effects of the difference are that the shareholders of the fund capitalizing such expenses receive these amounts as current income at ordinary tax rates. The shareholders of funds expensing these expenditures receive the same amount as part of the redemption proceeds and are taxed at capital gain rates.

The difference is accounting treatment of 12b–1 expenses described above does not affect the calculation of "total return," which compares net asset value at the beginning of a period with net asset value at the end of that period. As a general matter, yield appears to be the more significant factor in investor decision making.

Regulatory Flexibility Act Certification

I, John S.R. Shad, Chairman of the Securities and Exchange Commission, hereby certify, pursuant to 5 U.S.C. 605(b), that the proposed amendment to Rule 6–07 under Regulation S–X set forth in Release Nos. 33–6598; 34–22219; IC–14623; if promulgated will not have a significant economic impact on a substantial number of small entities. The reason for this certification is that the amendment will affect approximately 12 investment companies out of 435 that have adopted 12b–1 plans and only four of these would be classified as small entities under the Regulatory Flexibility Act.

Dated: July 10, 1985.

John S.R. Shad,

Chairman.

BILLING CODE 8010–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 2, 154, 157, 161 and 284

[Docket No. RM85–1–000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol; Rescheduling of Conference Date

Issued: July 10, 1985.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking; rescheduling of conference date.

SUMMARY: The Commission is rescheduling the conference to be held on its notice of proposed rulemaking concerning regulations applicable to the transportation of natural gas by interstate pipelines and intrastate pipelines on behalf of other shippers.

DATES: The conference will be held on Thursday, August 1, 1985 at 10:00 a.m., instead of Tuesday, July 30, 1985. The last date for filing written requests to participate at the conference is July 22, 1985, and remains unchanged.

ADDRESS: The public conference will be held at the Commission's offices at 825 North Capitol St., N.E., Washington, D.C. 20426 in Hearing Room A. Requests to participate should be filed with the Secretary at the same street address.

SUPPLEMENTARY INFORMATION: On May 30, 1985, the Federal Energy Regulatory Commission (Commission) issued a Notice of Proposed Rulemaking, 50 FR 24,130 (June 7, 1985), to amend its current regulations and adopt new regulations applicable to the transportation of natural gas by interstate pipelines and intrastate pipelines on behalf of other shippers.

The May 30, 1985, Notice scheduled a public conference for Tuesday, July 30, 1985. Recently, however, the Commission's Chairman has been invited by the Chairman of the Subcommittee on Energy Conservation and Power of the Committee on Energy and Commerce of the U.S. House of Representatives to testify on July 30, 1985, in a hearing to address proposed hydroelectric relicensing legislation. Because of this scheduling conflict, the public conference on the Commission's May 30, 1985, Notice is being rescheduled.

Notice is hereby given that the public conference on the Notice of Proposed Rulemaking is rescheduled for Thursday, August 1, 1985, at 10:00 a.m. The last day for the filing of written requests to participate in the conference, namely, July 22, 1985, is not changed.

Kenneth F. Plumb,

Secretary.

DEPARTMENT OF JUSTICE

Office of the Attorney General

28 CFR Part 30

[Order No. 1102–85]

Department of Justice Programs and Activities Covered by Executive Order 12372

AGENCY: Office of the Attorney General, Justice.

ACTION: Notice of Covered Programs and Request for Comments on Proposed Excluded Programs.

SUMMARY: The primary purposes of this notice are to list the Department of Justice programs and activities that are covered by Executive Order 12372, "Intergovernmental Review of Federal Programs," and to invite public comment on the proposed exclusion of certain programs and activities from coverage under the Order. The notice also advises that section 304 of the Demonstration Cities and Metropolitan Development Act of 1966 does not apply to the U.S. Marshals Service's Cooperative Agreement Program.

DATES: All interested persons are invited to submit written comments on the proposed exclusion of certain programs and activities on or before September 3, 1985.

ADDRESS: Comments should be sent to the Office of Legal Policy, Room 4234, Department of Justice, Washington, D.C. 20530.

FOR FURTHER INFORMATION CONTACT: Paul P. Colborn, Office of Legal Policy, Room 4248, Department of Justice, Washington, D.C. 20530 (202/633–4582).

SUPPLEMENTARY INFORMATION:

Covered Programs

Section 30.3 of the Department of Justice regulations implementing E.O. 12372 (28 CFR Part 30; published at 48 FR 29238, June 24, 1983) requires the Department to publish a list of those federal financial assistance and direct federal development programs and activities for which each state may choose to avail itself of the intergovernmental consultation procedures established by the Order and set forth in the Department regulations.

To reflect recent changes in Justice Department programs and activities, the Department is publishing the following revision to the list of "covered" programs and activities that we published on June 24, 1983 (48 FR 29248) (the parenthetical numbers are Catalog of Federal Domestic Assistance references):

Drug Enforcement Administration—Suppression of Diversion of Controlled Substances Program (16.006) (funds not yet appropriated).

Community Relations Service—Cuban and Haitian Entrant Resettlement Program (16.201).

Office of Juvenile Justice and Delinquency Prevention—Formula Grant Program (16.540)

Office of Juvenile Justice and Delinquency Prevention—Special Emphasis and Technical Assistance Grants, except grants which are national in scope (16.541).

Bureau of Justice Statistics—Criminal Justice Statistics Development Grants (16.550).

Bureau of Justice Assistance—Criminal Justice Block Grants (16.573).

Bureau of Justice Assistance—Criminal Justice Discretionary Grants, except grants to non-governmental entities for national scope purposes (16.574).

National Institute of Corrections—Technical Assistance Grants, except contracts to individuals for specialized assistance (16.603).

Bureau of Justice Assistance—Transfer of Surplus Real Property for Correctional Purposes (no CFDA Number).

Bureau of Justice Assistance—Regional Information Sharing Systems (no CFDA Number).

Bureau of Prisons—Construction projects such as correctional institutions and detention centers (no CFDA number)

Immigration and Naturalization Service—Construction projects such as border patrol stations (no CFDA number)

U.S. Marshals Service—Cooperative Agreement Program (no CFDA number).

Proposed Exclusions

The Department is committed to seeking public comment on any proposed exclusion of a financial assistance or direct development program or activity from coverage under E.O. 12372. We are therefore requesting public comment on the following proposed exclusions. After identifying each program or activity that we propose to exclude, we justify the exclusion either by referring to exclusion criteria listed in the White House Fact Sheet that accompanied E.O. 12372 or by explaining why the program or activity does not directly affect the state and local governments.

We welcome comments on the following proposed exclusions:

Office of Juvenile Justice and Delinquency Prevention—Special Emphasis and Technical Assistance Grants (16.541). Excluded under the White House Fact Sheet category of "Research and development national in scope" would be those grants which have as their primary purpose national scope research, development, training of technical assistance; assistance to particular states or local governments would remain covered.

National Institute for Juvenile Justice and Delinquency Prevention Grants (16.542)—Excluded under the White House Fact Sheet category of "Research and development national in scope."

Office of Juvenile Justice and Delinquency Prevention—Missing Children's Assistance (16.543). Excluded under the White House Fact Sheet category of "Research and development national in scope." Most of the funds for this program are for research (national incidence study, national study of police practices and other research studies). A small amount for purposes other than research will be awarded to a national organization, which will allocate funds or services to other groups. The award will not identify particular states or local governments to receive sub-grants and thus will not directly affect state and local governments.

National Institute of Justice—Research and Development Project Grants (16.560). Excluded under the White House Fact Sheet category of "Research and development national in scope."

National Institute of Justice—Visiting Fellowships (16.561). Excluded under the White House Fact Sheet category of "Research and development national in scope."

National Institute of Justice—Research Development Graduate Research Fellowships (16.562). Excluded under the White House Fact Sheet category of "Research and development national in scope."

Bureau of Justice Assistance—Public Safety Officers Benefit Program (16.571). Excluded under White House Fact Sheet category of "Direct payments to individuals."

Bureau of Justice Assistance—Mariel Cubans (16.572). Budget authority appropriated in FY 1985; terminated April 1, 1985. Excluded due to termination of program.

Bureau of Justice Assistance—Criminal Justice Discretionary Grants (16.574). Only grants under this program to non-governmental entities for national scope purposes would be excluded. These activities do not directly affect any specific state or local

government and probably would not be performed by state and local

fourteenth line, "Department of" should read "Department for"

Agency, Room 716 CM #2, 1921 Jefferson Davis Highway, Arlington, VA

ingredient may or may not be

The Office of Management and Budget

ACTION: Proposed rule.

government and probably would not be performed by state and local governments on their own.

Office for Victims of Crime—Crime Victim Assistance (16.575). Excluded under the White House Fact Sheet category of "Financial transfer for which Federal agencies have no funding discretion or direct authority to approve specific sites or projects." Each state is given $100,000 plus a portion determined by population. States determine individual awards.

Office for Victims of Crime—Crime Victim Compensation (16.576). Excluded under the White House Fact Sheet category of "Financial transfer for which Federal agencies have no funding discretion or direct authority to approve specific sites or projects." Funds awarded to a state are based on a percentage of the state's awards during the preceding fiscal year for victims compensation. The state determines where the funds go.

Section 204

Finally, we wish to retract the statement, which we made in our June 24, 1983 **Federal Register** notice of programs and activities covered by E.O. 12372 (48 FR 29248), that the U.S. Marshals Service's Cooperative Agreement Program is subject to the requirements of section 204 of the Demonstration Cities and Metropolitan Development Act of 1966 (42 U.S.C. 3334). The Department has now determined, in consultation with the Office of Management and Budget, that section 204 does *not* apply to that program.

Dated: July 5, 1985.

Edwin Meese III,

Attorney General.

[OPP-300135; FRL-2863-2]

Mineral Oil; Tolerance Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes to expand the exemption from the requirement of a tolerance for mineral oil when used as an inert ingredient diluent, carrier, and solvent in pesticide formulations. This proposed regulation was requested by Malcolm Nicol and Co.

DATE: Written comments, identified by the document control number [OPP-300135], must be received on or before August 16, 1985.

ADDRESS: By mail, submit comments to: Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

In person, deliver comments to: Registration Support and Emergency Response Branch, Registration Division (TS-767), Environmental Protection Agency, Room 716 CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential, by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail: N. Bhushan Mandava, Registration Support and Emergency Response Branch, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460.

Office location and telephone number: Registration Support and Emergency Response Branch, Rm. 724A, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-557-7700.

SUPPLEMENTARY INFORMATION: At the request of Malcolm Nicol and Co., the Administrator proposes to amend 40 CFR 180.1001(c) by expanding the existing exemption from the requirement of a tolerance for mineral oil (U.S.P.). The ingredient is listed for use a diluent, solvent in pesticide formulations. The exemption would expand the entry to read "Mineral oil, U.S.P., or conforming to 21 CFR 172.878 or 178.3620(a), (b)" and the additional use as a carrier in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest. A separate entry is not necessary to reflect this change.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 162.3(c), and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting and spreading agents; propellants in aerosol dispensers; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

Preambles to proposed rulemaking documents of this nature include the common or chemical name of the substance under consideration, the name and address of the firm making the request for the exemption, and toxicological and other scientific bases used in arriving at a conclusion of safety in support of the exemption.

Name of inert ingredient. Mineral oil, U.S.P, or conforming to 21 CFR 172.878 or 178.3620 (a), (b).

Name and address of requestor. Malcolm Nicol and Co., Lyndhurst, NJ 07071.

Bases for approval. 1. Petroleum oils are cleared under 40 CFR 180.1001(b)(3) for use on growing crops.

2. Mineral oil (U.S.P.) is cleared under 40 CFR 180.1001(c) for use as a diluent of solvent.

3. Mineral oil, U.S.P., or conforming to Title 21, § 172.878 or § 178.3620 (a), (b) is cleared under 40 CFR 180.1001(e) for use as a solvent or diluent.

4. White Mineral oil is cleared under 21 CFR 172.878 for use in foods.

5. Mineral oil is cleared under 21 CFR 178.3620 (a) and (b) for use as a component of nonfood articles intended for use in contact with food.

Based on the above information, and review of its use, it has been found that when use in accordance with good agricultural practices this ingredient is useful and does not pose a hazard to humans or the environment. It is concluded, therefore, that the proposed amendment to 40 CFR Part 180 will protect the public health, and it is proposed that the regulation be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains this inert ingredient may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating both the subject and the petition and document control number, [OPP-300135]. All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the Registration Support and Emergency Response Branch at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: July 2, 1985.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

PART 180—[AMENDED]

1. The authority citation for 40 CFR Part 180 continues to read as set forth below:

Authority: 21 U.S.C. 346a.

2. Section 180.1001(c) is amended by revising the entry mineral oil (U.S.P.), to read as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

[OPP-300133; FRL-2864-8]

Octyl Epoxytallate, Stearic Acid, 4,4'-Isopropylidene-Diphenol Alkyl (C_{12}-C_{15}) Phosphites, Carbon Black, Chlorinated Polyethylene, and Epoxidized Soybean Oil; Tolerance Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This document proposes that octyl epoxytallate, stearic acid, 4,4'-isopropylidenediphenol alkyl (C_{12}-C_{15}) phosphites, carbon black, chlorinated polyethylene, and epoxidized soybean oil be exempted from the requirement of a tolerance when used as inert ingredients in pesticide formulations in animal ear tags. These proposed regulations were requested by Zoecon Industries.

DATE: Written comments, identified by the document control number [OPP-300133], must be received on or before August 16, 1985.

ADDRESS: By mail, submit comments to: Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460.

In person, deliver comments to: Registration Support and Emergency Response Branch, Registration Division (TS-767), Environmental Protection Agency, Rm. 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail: N. Bhushan Mandava, Registration Support and Emergency Response Branch, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460.

Office location and telephone number: Registration Support and Emergency Response Branch, Rm. 724A, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-7700).

SUPPLEMENTARY INFORMATION: At the request of Zoecon Industries, the Administrator proposes to amend 40 CFR 180.1001(e) by establishing exemptions from the requirement of a tolerance for octyl epoxytallate, stearic acid, 4,4'-isopropylidenediphenol alkyl

(C_{12}–C_{15}) phosphites, carbon black, and chlorinated polyethylene when used as inert ingredients in pesticide formulations in animal ear tags, and amending the existing exemption from the requirement of a tolerance for epoxidized soybean oil for the additional use as a plasticizer in pesticide formulations for animal ear tags.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 162.3(c), and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrangeenan and modified cellulose; wetting and spreading agents; propellants in aerosol dispensers; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

Preambles to proposed rulemaking documents of this nature include the common or chemical name of the substance under consideration, the name and address of the firm making the request for the exemption, and toxicological and other scientific bases used in arriving at a conclusion of safety in support of the exemption.

Name of inert ingredients. Octyl epoxytallate, stearic acid, 4,4'-isopropylidenediphenol alkyl (C_{12}-C_{15}) C_{15}) phosphites, carbon black, chlorinated polyethylene, and epoxidized soybean oil.

Name and address of requestor. Zoecon Industries, Dallas, TX 75234.

Bases for approval. The ear tags are to be used as controlled-release pesticide-dispensing devices, the active ingredient being incorporated into the plastic matrix in the same manner as flea and tick collars that are made for domestic pets.

1. Octyl epoxytallate is the epoxidized octyl ester of tall oil. Tall oil contains predominantly oleic and linoleic acids and minor amounts of rosin acids. Soybean oil contains predominantly the triglycerides of oleic, limoleic and linolenic acids. Therefore, tall oil is similar to soybean oil regarding its fatty acid content. Tall oil is cleared under 40 CFR 180.1001(c) for use as a surfactant, related adjuvants of surfactants, in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest. Epoxidized soybean oil is cleared under 40 CFR 180.1001(e) for use as a stabilizer in pesticide formulations applied to animals. When used as proposed, octyl epoxytallate is considered to be toxicologically equivalent to epoxidized soybean oil.

2. Stearic acid is cleared under 40 CFR 180.1001(c) for use as a diluent in pesticide formulations applied to growing crops or to raw agricultural commodities after harvest.

3. 4,4'-Isopropylidenediphenol alkyl (C_{12}–C_{15}) phosphites are cleared under 21 CFR 178.2010 as antioxidants and stabilizers used in polymers in contact with food at levels not to exceed 1.0 percent by weight in the rigid polymer.

4. Carbon black is cleared under 21 CFR 175.300 as a pigment/colorant for resinous and polymeric coatings in contact with foods.

5. Chlorinated polyethylene is cleared under 21 CFR 177.1610 for use as a component of food-contact articles or as a food-contact article.

6. Epoxidized soybean oil is cleared under 21 CFR 181.27 as a plasticizer; under 40 CFR 180.1001(c) for use as a surfactant, related adjuvant of surfactant in pesticide formulations applied to grownig crops or to raw agricultural commodities after harvest; and under 40 CFR 180.1001(e) for use as a stabilizer in pesticide formulations applied to animals. The present clearance under 40 CFR 180.1001(e) can be amended to include the additional use as a plasticizer in animal ear tags.

Based on the above information, and review of their uses, it has been found that, when used in accordance with good agricultural practices, these ingredients are useful and do not pose a hazard to humans or the environment. It is concluded, therefore, that the proposed amendments to 40 CFR Part 180 will protect the public health, and it is proposed that the regulation be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of these inert ingredients, may request within 30 days after publication of this notice in the **Federal Register** that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating both the subject and the petition and document control number, [OPP–300133]. All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the Registration Support and Emergency Response Branch at the address given above from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601–612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated July 5, 1985.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, it is proposed that 40 CFR Part 180 be amended as follows:

1. The authority citation for Part 180 continues to read as set forth below:

Authority: 21 U.S.C. 346a.

2. Section 180.1001(e) is amended by revising the entry for epoxidized soybean oil and by adding and alphabetically inserting the inert ingredients as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * *

(e) * * *

Inert ingredients	Limits	Uses
• • • • •		
Carbon black (CAS Reg. No. 1333–86–4).		Colorant/ pigment in animal tag.
• • • • •		
Chlorinated polyethylene (CAS Reg. No. 64754–90–1).		Resin, component animal tag.
• • • • •		
Epoxidized soybean oil (CAS Reg. No. 8013–07–8).		Stabilizer, plasticizer component animal tag.
• • • • •		
4,4'-Isopropylidenediphenol alkyl (C_{12}–C_{15}) phosphites (CAS Reg. No. 92906–32–2).	Not to exceed 1 percent of polymer.	Stabilizer, component animal tag.
• • • • •		
Octyl epoxytallate (CAS Reg. 61788–72–5).		Plasticizer, component animal tag.

Inert ingredients	Limits	Uses
• • • • •		
Stearic acid (CAS Reg. 57–11–4).		Lubricant, component animal tag.
• • • • •

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 71

[OST Docket No. 6; Notice 85–9A]

Standard Time Zone Boundary in the State of Indiana; Schedule of Public Hearings

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: In the **Federal Register** of Friday, June 21, 1985 (50 FR 25856), DOT published a proposal to relocate a portion of the State of Indiana from the central to the eastern time zone. The schedule of public hearings was not finalized at the time that proposal was published; it is now, and the schedule is set forth below. The public hearings will be chaired by a representative of DOT. The hearings will be informal and will be tape recorded for inclusion in the docket. Persons who desire to speak at the hearings—either to express opinions or ask questions—need not reserve in advance the opportunity to do so. To the greatest extent practicable, the DOT representative will provide an opportunity to speak for all those wishing to do so. Priority will be accorded those who have not previously spoken. The deadline date and address for written comments was inadvertently omitted from the proposal and are stated below.

DATES: Written comments must be received by Tuesday, August 20, 1985, to be assured of consideration. Comments received after that date will be considered to the extent practical. The dates of the hearings are listed below.

ADDRESS: Comments should be sent to Documentary Services Division, Attention: OST Docket No. 6, Department of Transportation, C–55, Room 4107, Washington, DC 20590. Persons who wish acknowledgment that their comments have been received should include a self-addressed stamped postcard, on which the Docket Clerk will note the date and time of receipt.

FOR FURTHER INFORMATION CONTACT: Joanne Petrie, Office of the General Counsel, C–50, Department of Transportation, Washington, DC 20590, (202) 472–5577.

SUPPLEMENTARY INFORMATION:

Schedule of Public Hearings

Monday, July 22, 1985

10 a.m.—Municipal Building, 222 First Street, Henderson, Kentucky 42420

6:30 p.m.—University of Evansville, Hyde Hall, Room 126, Evansville, Indiana 47702

Tuesday, July 23, 1985

11 a.m.—Heritage Hills High School, Highway 162, Lincoln City, Indiana 47552

7 p.m.—Owensboro City Hall, 4th and Allen Street, Owensboro, Kentucky 42301

Wednesday, July 24, 1985

11 a.m.—Mount Vernon City Hall, Corner of Sixth and Main Street, Mount Vernon, Indiana 47620

6:30 p.m.—Municipal Building, Council Room, 225 East Main Street, Carmi, Illinois 62821

Thursday, July 25, 1985

10 a.m.—City Hall, 219 Market Street, Mount Carmel, Illinois 62863

6:30 p.m.—Princeton Community High School, Old Highway 41 North, Princeton, Indiana 47670

Friday, July 26, 1985

11 a.m.—Knights of Columbus Hall, Main Street, Jasper, Indiana 47546

6:30 p.m.—City Council Chambers, 17 South Fourth Street, Vincennes, Indiana 47591.

The authority citation for this document is: Act of March 19, 1918, as amended by the Uniform Time Act of 1966 and Public Law 97–449, 15 U.S.C. 260–64; 15 CFR 1.57(a).

Issued in Washington, DC, on July 15, 1985.

Rosalind A. Knapp,

Deputy General Counsel

[FR Doc. 85–17057 Filed 7–16–85; 8:45 am]

BILLING CODE 4910–62–M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Public Hearing and Reopening of Comment Period on Proposed Endangered Status for "Achyranthes Rotundata"

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; notice of public hearing and reopening of comment period.

SUMMARY: The U.S. Fish and Wildlife Service gives notice that a public hearing will be held on the proposed determination of endangered status for *Achyranthes rotundata* and that the comment period on the proposal is reopened. The proposal was published in the **Federal Register** on April 22, 1985 (50 FR 15764). This plant is known from only two populations, one located at Ka'ena Point and the second at Barbers Point, island of Oahu, Hawaii. The Ka'ena Point population consists of only two individuals and is believed to be near extirpation. The Barbers Point population is vulnerable to any substantial habitat alteration and faces the potential threat of complete habitat destruction during conversion of existing sites to industrial use. This hearing and the reopening of the comment period will allow comments on this proposal to be submitted from all interested parties.

DATES: The comment period on the proposal is reopened July 17, 1985. The public hearing will be held from 7:00 to 9:00 p.m., on Monday, August 5, 1985, in Ewa Beach, Hawaii. The comment period, which originally closed on June 21, 1985, now closes August 26, 1985.

ADDRESSES: The public hearing will be held at the Ewa Beach Community

199, 93 Stat. 1225; Pub. L. 97–304, 96 Stat.

for Pacific whiting. Regulations at

the most recent data available. The action is taken under authority of 50

on the proposed release of the Pacific

50 CFR Part 663

ADDRESSES: The public hearing will be held at the Ewa Beach Community School Library, Humanities Room, 91–950 N. Road, Ewa Beach, Hawaii. Written comments and material should be sent to the Regional Director, U.S. Fish and Wildlife Service, Lloyd 500 Building, 500 N.E. Multnomah Street, Suite 1692, Portland, Oregon 97232. Comments and materials received will be available for public inspection during normal business hours, by appointment, at the Regional Endangered Species Division at the above Regional Office address.

FOR FURTHER INFORMATION CONTACT: For information on the public hearing, contact Mr. Ernest Kosaka, Project Leader, U.S. Fish and Wildlife Service, 300 Ala Moana Blvd., Room 6307, P.O. Box 50167, Honolulu, Hawaii 96850 (808/546–7530).

SUPPLEMENTARY INFORMATION:

Background

Achyranthes rotundata was first recorded in 1819 by C. Gaudichaud during the voyage of the Uranie. It was later formally described by W. Hillerbrand in 1888 as a variety of *Achyranthes splendens*. The species is a low shrub, 1½ to 8½ feet in height and is covered with short, silvery hairs. Small inconspicuous flowers are borne in terminal spikes with prominent floral and rachis bracts. H. St. John (1976) first recognized this taxon as a species endemic to the island of Oahu, and described it as abundant on the seaward portions of the 'Ewa Coral Plain. He concluded that it may have once been distributed all along the arid and semi-arid coastal lowlands of the island, from Barbers Point to Ka'ena Point. *Achyranthes rotundata* is now unknown except for two populations.

The comment period on the proposal originally closed on June 21, 1985. In order to accommodate the hearing, the Service reopens the public comment period. Written comments may now be submitted until August 26, 1985, to the Service office in the Addresses section.

Author

The primary author of this notice is Mr. Wayne White, U.S. Fish and Wildlife Service, Lloyd 500 Building, 500 N.E. Multnomah Street, Suite 1692, Portland, Oregon 97232 (503/231–6131).

Authority

The authority for this action is the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*; Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411).

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 663

[Docket No. 41155–4175]

Foreign Fishing and Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of proposed inseason adjustment and request for comments.

SUMMARY: NMFS issues a preliminary reassessment of domestic annual harvest (DAH) and domestic annual processing (DAP) for Pacific whiting and announces its intent to increase the total allowable level of foreign fishing (TALFF) of Pacific whiting in the fishery conservation zone (FCZ) off Washington, Oregon, and California. The TALFF would be increased by releasing a 35,000 metric ton (mt) reserve which is surplus to domestic needs. The action would not affect the amount of fish harvested and processed by the domestic industry, but would provide the flexibility to allow additional allocations of Pacific whiting to foreign countries, if appropriate.

DATE: Comments must be submitted on or before August 1, 1985.

ADDRESS: Send comments to Rolland A. Schmitten, Director, Northwest Region, NMFS, 7600 Sand Point Way NE., BIN C15700, Seattle, WA 98115.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten, 206–526–6150.

SUPPLEMENTARY INFORMATION:

Background

The fishery management plan (FMP) for the Pacific Coast groundfish fishery was implemented on October 5, 1982 (47 FR 43964, October 5, 1982). Under § 611.70 and Part 663, the Secretary of Commerce (Secretary) annually specifies a numerical optimum yield (OY), DAH, DAP, joint venture processing (JVP), TALFF, and a reserve for Pacific whiting. Regulations at § 611.70(d)(2) also establish procedures to reassess DAH, DAP and JVP on or about July 1 each year, and to increase TALFF during the fishing year by any part of the reserve that the Secretary determines will not be harveted by U.S. fishermen.

The following table lists the 1985 fishing year initial specifications for Pacific whiting (50 FR 471, January 4, 1985) and the proposed revised specification of TALFF.

REVISED SPECIFICATIONS FOR FISHING YEAR JANUARY 1, 1985 THROUGH DECEMBER 31, 1985

[In metric tons (mt)]

Terms	Pacific whiting	
	Initial specifications	Revised specifications
OY	175,000	
DAH	95,000	
DAP	10,000	
JVP	85,000	
TALFF	45,000	80,000
Reserve	35,000	0

The initial DAP and JVP for 1985 were based on the projected needs of the U.S. industry, as surveyed by the NMFS Northwest Region in December 1984. The industry was surveyed again in June 1985 to determine whether there was any change in the domestic intent and capacity to harvest and process Pacific whiting, and U.S. catch, effort, and processing performance were projected to the end of the season. The results of the June survey indicate that the initial DAP, JVP, and DAH are adequate to meet domestic needs during the remainder of 1985. There is no current information to indicate any biological problem with the stock nor any need to reassess OY. The Secretary has determined that no part of the reserve will be harvested by U.S. fishermen during the remainder of 1985 and thus is available for release to TALFF.

The purpose of releasing the Pacific whiting reserve, which is surplus to domestic needs, is to provide the flexibility to allow additional allocation to foreign countries, if appropriate. There is no certainty that all of the additional TALFF will be allocated to foreign countries during 1985. Poland was allocated 50,000 mt of Pacific whiting for directed fishing at the beginning of the year. The Soviet Union was allocated 5,000 mt.

Classification

The preliminary reassessment of DAH and DAP and the proposal to release the Pacific whiting reserve are based upon the most recent data available. The action is taken under authority of 50 CFR Parts 611 and 663, is in compliance with Executive Order 12291, and is covered by the regulatory flexibility analysis and environmental impact statement prepared for the authorizing regulations. The action contains no collection of information requirement for purposes of the Paperwork Reduction Act.

The public has had opportunity to comment on the preliminary reassessment of DAP, JVP and DAH, and will be able to discuss and comment on the proposed release of the Pacific whiting reserve during the July 1985 meeting of the Pacific Fishery Management Council. Written public comments also will be accepted for 15 days after publication of this notice in the Federal Register.

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

July 12, 1985.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Officer, USDA, OIRM, Room 404–W Admin. Bldg., Washington, D.C. 20250, (220) 447–2118.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, Attn: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

Soil Conservation Service

Beardsley Watershed, California; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Beardsley Watershed, Ventura County, California.

FOR FURTHER INFORMATION CONTACT: Eugene E. Andreuccetti, State Conservationist, Soil Conservation Service, 2828 Chiles Road, Davis, California, 95616, telephone (916) 449–2848.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Eugene E. Andreuccetti, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns construction of a grade stabilization structure in Beardsley Wash with associated bank stabilization.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Eugene E. Andreuccetti.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

Illinois Advisory Committee; Agenda and Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a meeting of the Illinois Advisory Committee to the Commission will convene at 10:00 a.m and adjourn at 3:00 p.m. on August 9, 1985, at the U.S. Commission on Civil Rights, Midwestern Regional Office, 230 S. Dearborn Street, Chicago, Illinois. The purpose of the meeting is to discuss future project plans and make subcommittee assignments connected with those plans.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Hugh J. Schwartzberg or Clark Roberts, director of the Midwestern Regional Office at (312) 353–7371.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, D.C., July 9, 1985.

Bert Silver,
Assistant Staff Director for Regional Programs.

Mississippi Advisory Committee; Agenda for Notice of Public Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Mississippi Advisory Committee to the Commission will convene at 1:00 p.m. and adjourn at 4:00 p.m. on August 5, 1985, at the Walthall Hotel, 225 East Capitol Street, the Wheeler Room, Jackson, Mississippi. The purpose of the meeting is to report on the National Chairpersons' Conference.

Persons desiring additional information, or planning a presentation to the Committee, should contact Committee Chairperson, Louis Westerfield or Bobby Doctor, Director of the Southern Regional Office at (404) 221–4391.

The meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., July 11, 1985.

Bert Silver,
Assistant Staff Director for Regional Programs.

DEPARTMENT OF COMMERCE

International Trade Administration

Carnegie Institution of Washington; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C.

Docket No. 84–236. Applicant: Carnegie Institution of Washington, Washington, DC 20015. Instrument: Mass Spectrometer, Model VG MM354 with Accessories. Manufacturer: VG Isotopes Ltd., United Kingdom. Intended Use: See notice at 49 FR 35167.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific vaule to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides a variable space, multiple (5) collector system capable of simultaneous detection of several ion beams. The National Bureau of Standards advises in its memorandum dated May 20, 1985 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Cornell University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C.

Docket No. 85–028. Applicant: Cornell University, Ithaca, NY 14853. Instrument: Oscillator-Amplifier Excimer Laser, Model EMG 150ES–C, FL 2002E. Manufacturer: Lambda Physik, West Germany. Intended use: See notice at 49 FR 47647.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides high power, diffraction limited and tunable laser radiation at 157, 193, 222, 249, 308 and 351 nanometers for Raman shifting. The National Bureau of Standards advises in its memorandum dated April 13, 1985 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Docket No. 83–345R. Applicant: Cornell University, Ithaca, NY 14853. Instrument: Electrophoresis Apparatus and Rotating Prism. Original notice of this resubmitted application was published in the Federal Register of November 21, 1983.

This application is a resubmission of Docket Number 83–345 which was denied without prejudice to resubmission for informational deficiencies.

Comments: None received.

Decision: Approved No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides a cylindrical cell immersed in a thermostatted tank to reduce convective circulation and to control temperature accurately up to 80 degrees centigrade. The National Bureau of Standards advises in its memorandum dated May 2, 1985 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument operates in the nanosecond to millisecond range, with a pulse light mode providing time-correlated single photon counting. The capability of the foreign instrument described above is pertinent to the applicant's intended purpose. We know of no domestic instument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

National Voluntary Laboratory Accreditation Program: Publication of Directory Supplement

AGENCY: National Bureau of Standards, Commerce.

ACTION: Publication of NVLAP Directory Supplement

SUMMARY: The National Bureau of Standards (NBS) announces laboratory accreditation actions taken during the seond quarter of 1985..

FOR FURTHER INFORMATION CONTACT: Dr. Stanley I. Warshaw, Manager, Laboratory Accreditation, ADMIN A603, National Bureau of Standards, Gaithersburg, MD 20899 (301) 921-3751.

SUPPLEMENTARY INFORMATION: This supplement to the 1984 NVLAP Director of Accredited Laboratories (NBS Special Publication 687 issued February 1985) is published pursuant to section 7.6(b) of the National Voluntary Laboratory Accreditation Program (NVLAP) Procedures (15 CFR 7.6(b)).

The following table summarizes NVLAP accreditation actions for the period April 1, 1985, through June 30, 1985.

	TIM	CON	CAR	STO	ACO	CPL	DOS	Totals
Initial accreditations	1	1				1	2	5
Suspensions						-1		-1
Balance	36	31	24	10	9	2	25	139

TIM—Insulation LAP.
CON—Concrete LAP.
CAR—Carpet LAP.
ACO—Acoustical Testing Services LAP.
STO—Stove LAP.
CPL—Commercial Products LAP (Paint, Paper, Mattresses).
DOS—Dosimetry LAP.

The laboratories awarded initial accreditations are:

Insulation LAP—Celotex Tracy Plant, Tracy, CA

Concrete LAP—GAI Consultants, Monroeville, PA

Commercial Products LAP—MacMillan Bloedel, Pine Hill, AL

Dosimetry LAP—Texas Utilities, Glen Rose, TX; Gulf States Utilities, St. Francisville, LA

The laboratory whose accreditation has been suspended due to temporary inoperation is:

Commercial Products LAP—Chemray, Middlesex, NJ

Dated: July 11, 1985.

BILLING CODE 3510-13-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Import Restraint Limits for Certain Cotton Textile Products Produced or Manufactured in Bangladesh Under New Bilateral Agreement

July 12, 1985.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on July 18, 1985. For further information contact Diana Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On June 28, 1985, the Governments of the United States and Bangladesh exchanged letters on a new Bilateral Cotton Textile Agreement. The agreement establishes specific limits of 55,000 dozen and 330,000 dozen, respectively, for men's and boys' other cotton coats in category 334 and men's and boys' woven cotton shirts in Category 340, produced or manufactured in Bangladesh and exported, in the case of Category 334, during the twelve-month period which began on Junuary 29, 1985 and extends through Jaunary 28, 1986; and, in the case of Category 340, during the twelve-month period which began on March 1, 1985 and extends through February 28, 1986.

The import charges to the limit for Category 340 are being adjusted to account for imports in the amount of 199,120 dozen charged to the level for the restraint period established prior to negotiation of the new agreement. This prior level was filled.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1983 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1985).

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

July 12, 1985.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: This directive cancels and supersedes the directives of April 15, and April 25, 1985 from the Chairman of the Committee for the Implementation of Textile Agreements concerning cotton textile products in Categories 334 and 340, produced or manufactured in Bangladesh and exported during specified twelve-month periods.

Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854) and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton Textile Agreement effected by exchange of notes dated June 28, 1985, between the Governments of the United States and Bangladesh; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on July 18, 1985, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Category 334 produced or manufactured in Bangladesh and exported during the twelve-month period which began on January 29, 1985 and extends through January 28, 1986, in excess of 55,000 dozen.[1]

Also effective on July 18, 1985, you are directed to prohibit entry and withdrawal from warehouse for consumption in the United States of cotton textile products in Category 340, produced or manufactured in Bangladesh and exported during the twelve-month period which began on March 1, 1985 and extends through February 28, 1986 in excess of 330,000 dozen.[1]

Textile products in Category 334 and 340 which have been exported to the United States prior to the first days of the restraint periods established in this directive shall not be subject to this directive.

Textile products in Category 334 and 340 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The foregoing limits are subject to adjustment in the future according to the provisions of the bilateral agreement which provide, in part, that: (1) specific limits may be exceeded by not more than six percent for swing during an agreement year; (2) carryforward of six percent is available during the initial twelve-month period; and (3) carryover may be available up to 11 percent during the subsequent agreement period.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annoted (1985).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 85-16968 Filed 7-16-85; 8:45 am]

BILLING CODE 3510-DR-M

[1] The restraint limits have not been adjusted to reflect any imports exported after January 28, 1985 (Cat 334) or February 28, 1985 (Cat 340). Charges in the amount of 199,120 dozen should be made to the limit for Category 340 to account for imports exported during the previous restraint period.

COMMODITY FUTURES TRADING COMMISSION

Chicago Rice and Cotton Exchange; Proposed Amendments Relating to the Rough Rice Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of proposed contract market rule changes.

SUMMARY: The Chicago Rice and Cotton Exchange ("CRCE" or "Exchange") has submitted a proposal which would amend the terms and conditions of its rough rice futures contract. The principal amendments being proposed by the CRCE would redefine the delivery area from the four-state delivery area of Arkansas, Louisiana, Mississippi and Texas currently specified in the contract to an area encompassing twelve Arkansas counties; revise the contract's procedures for establishing locational price differentials; reduce the position limit for the May delivery month and require that rice hedge exemptions from the contract's position limits be subject to prior CRCE approval under the hedge definitions and exemptions contained in CRCE Chapter X; extend the last trading day of the September delivery month to the last business day of September and extend the last delivery day for the September delivery month to the tenth business day of October; and delete July as a delivery month. In addition, the proposal would modify the quality differentials applicable to the delivery of rough rice with different percentages of head rice. The Commodity Futures Trading Commission ("Commission") has determined that the proposal is of major economic significance and that, accordingly, publication of the proposal is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments should be received on or before August 16, 1985.

SUPPLEMENTARY INFORMATION: The current terms and conditions of the rough rice contract specify that delivery of rough rice on the contract may occur in regular warehouses located in the states of Louisiana, Taxas, Mississippi and Arkansas. Under the CRCE proposal, the contract's current four-state delivery area would be reduced to an area encompassing twelve counties in Arkansas.

The Exchange believes that the proposed twelve county Arkansas delivery area would increase the pricing and hedging utility of the rough rice contract. The Exchange indicates that the proposed delivery area accounts for over 60 percent of Arkansas' total long grain rice production, serves as the concentration and processing point for additional long grain rice, includes over 28 warehouses accounting for most of Arkansas' public warehouse rice storage capacity, and includes all 13 of Arkansas' commercial rice processing mills that in aggregate account for over 40 percent of the total U.S. long grain mill production.

Under the current CRCE rough rice contract, the only par delivery location is the milling center of Stuttgart, Arkansas. Locational price differentials (premiums or discounts) for delivery of rough rice at warehouses at any other milling center are establishd quarterly and reflect the cost of shipping milled rice by rail from each milling center to Gulf ports, including placement free alongside ship (F.A.S.), relative to the costs of such shipment from Stuttgart. Warehouse not located at a milling center are currently assigned an additional differential (discount) based on the cost of truck movement of rough rice to the nearest milling center. The existing rules in effect provide a transportation credit for deliveries of rough rice at local warehouses or regional milling centers which are closer than Stuttgart to the major Gulf export centers of Lake Charles and Houston, because the value of rough rice increases as its location is nearer the Gulf ports.

Under the CRCE proposal, rough rice stored at all mill-site warehouses located within the proposed twelve county delivery area would be deliverable at par. Delivery of rough rice in regular warehouses not located at mill sites would be subject to a schedule of fixed discounts, which are based on the prevailing costs of moving rough rice by truck to the mill site warehouse nearest to each such regular warehouse, according to the Exchange. The CRCE maintains that the majority of rough rice is transported by truck within the

proposed delivery area and, therefore,

satisfaction of the rough rice futures contract at rice mill warehouses at the

constitute the locational differentials applied on a quarterly basis to

Other materials submitted by the CRCE in support of the proposed

proposed delivery area and, therefore, truck rates would be the most applicable. The Exchange further maintains that the proposed locational differentials would be consistent with cash market practices.

The CRCE proposal also includes amendments to the terms and conditions of the rough rice contract which the Exchange is adopting to avoid possible problems with respect to deliverable supplies of rough rice during specific delivery months. These include: (1) The deletion of July as a delivery month, (2) a reduced position limit for the May delivery month: (3) an extension of the last trading day in the September delivery month to the last business day of September; and (4) an extension of the last delivery day in the September delivery month to the tenth business day of October. In addition, the Exchange proposes to amend Chapter X of its rule book to require rough rice hedgers who desire to hold positions in excess of the contract's position limits to obtain prior approval by the Exchange before establishing such positions.

In addition, the rough rice contract currently specifies a premium or discount of 1.0 percent of the contract price for each percent of head rice milling yield above or below 55 percent, the contract's par requirement for head rice milling yield. Under the proposed amendments, the premium and discount schedule for head rice milling yield would be revised to 1.75 percent of the contract price.

The Exchange indicates that the current 1.0 percent premium and discount schedule for head rice milling yields is not reflective of actual cash market values. The Exchange maintains that the existing 1.0 percent premium and discount schedule penalizes the delivery of higher quality rice on the contract while rewarding the delivery of lower quality rice. The Exchange believes the proposed 1.75 percent premium and discount schedule is more reflective of actual cash market prices, which would allow producers, merchandisers and processors of rough rice to better utilize the rough rice futures contract for price basing and hedging.

The proposed amendments would be implemented within ten days after Commission approval for all currently listed contract months as well as all contract months subsequently listed by the Exchange for trading.

FOR FURTHER INFORMATION CONTACT: Fred Linse, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581, (202) 254–7303.

SUPPLEMENTARY INFORMATION: In accordance with section 5a(12) of the Commodity Exchange Act, 7 U.S.C. 7a(12) (1982), the Commission has determined that the proposal submitted by the CRCE concerning its rough rice futures contract is of major economic significance. Accordingly, the principal amendments being proposed by the CRCE are printed below, using bracketing to indicate deletions and Italics to indicate additions:

* * * * *

1101.01 Contract Specifications

* * * * *

To be deliverable, rough rice shall have a milling yield of not less than 65%, including not less than 48% head rice. Each precent of head rice over or below 55% shall receive a [one] *1.75* percent premium or discount, respectively, toward the settlement price for long grain rough rice and each percent of broken rice over or below 15% shall receive a .5% premium or discount, respectively. All rough rice shall be of a Southern origin or such other origin as the Exchange may approve.

1101.02 *Trading Months and Hours*—Futures contracts shall be traded initially for delivery during the months of September, November, January, March, *and* May [, and July] of each year. Thereafter, trading shall commence in each contract, for delivery during the twelfth eighteenth month hence, on the first business day immediately following the current delivery month of the same contract. Trading shall be conducted from 8:45 a.m. to 1:45 p.m. except in the expiring contract on the last day of trading when trading shall cease at 12:00 Noon.

* * * * *

1101.06 *Termination of Trading*—No trades shall be made during the last seven business days of the trading month. Any trades remaining open during this period shall be settled by delivery or a bona fide exchange of futures for the cash commodity. *Provided however, that for the September delivery month no trade shall be made following the last business day of September.*

* * * * *

1101.08 *Position Limits and Trading Limits*—The limit on the maximum net long or net short position in long grain rough rice on or subject to the Rules of the Exchange which any person may hold or control is 250 contracts in any one future month and 500 contracts in all future months combined. *On or after the first trading day preceding the first notice day of the expiring futures month of May the limit will be reduced to 150 contracts.* The foregoing limits do not apply to bona fide heding [operations as defined in the regulations of the CFTC.] *positions in accordance with rules 1001 and 1002.*

In determining whether any person has exceeded the limits established under this rule, all positions in accounts for which such person by power of attorney or otherwise directly or indirectly controls trading shall be included with the positions held by such person.

Such limits upon positions shall apply to positions held by 2 or more persons, acting pursuant to an expressed or implied agreement or understanding, the same as if the positions were held by a single person.

A position of 50 or more contracts representing a long or short position in any one futures month shall be a reportable position. Every member, or partner or corporation for which a membership is registered under rule 202, shall report each and every such reportable position to the Department of Surveillance, Audits and Investigations at such times, and in such form and manner as shall be prescribed by the Business Conduct Committee.

* * * * *

1102.03 *Delivery Dates*—Delivery may be made by the seller upon any business day of the delivery month the seller may select. Delivery must be made no later than the last business day of the delivery month. *Provided however, that delivery for the September delivery month may be made through the 10th business day of October.*

* * * * *

1102.06 *Par Delivery Point*—The par delivery [point for delivery of rough rice shall be Stuttgart, Arkansas. When delivering a warehouse receipt for long-grain rough rice issued by a warehouse located other than in Stuttgart, Arkansas, the rice shall be priced at a premium or discount to rice located in Stuttgart, Arkansas, in accordance with a schedule of such premiums or discounts, established and published by the Exchange pursuant to paragraph 1102.07 for each such warehouse.] *points for rough rice shall be mill site warehouses within the boundaries of the Arkansas counties of Craighead, Jackson, Poinsett, Woodruff, Cross, St. Francis, Lonoke, Prairie, Monroe, Jefferson, Arkansas and DeSho. A mill site warehouse shall be defined as a warehouse which is attached or directly adjacent (within 200 yards) to a rice mill regardless of municipal boundaries. Rough rice may be delivered in satisfaction of the rough rice futures contract at rice mill warehouses at the contract price. Rough rice may be delivered at regular warehouses within the twelve-county area which are not at mill sites in accordance with a schedule of discounts established and published by the Exchange pursuant to rule 1102.07. No warehouse regular for delivery of rough rice shall be located outside the twelve Arkonsas counties listed above.*

1102.07 *Location Differentials*—[The Exchange shall establish location differentials for each regular warehouse for the immediately following calendar quarter.

Exchange officials shall not collect on a routine basis for each warehouse not located within the municipal boundaries of a regional milling center information for the preceding calendar quarter as to all quantities of rough rice shipped, and actual truck rates paid for shipment thereof, to the following regional milling center: Greenville, Mississippi; Crowley, Louisiana; Houston, Texas; Jonesboro, Arkansas; or Stuttgart Arkansas. Exchange Officials shall collect the same information for the same period with respect to milled rice shipped by rail from Stuttgart, Arkansas; Jonesboro, Arkansas; Crowley, Louisiana; and Greenville, Mississippi to Lake Charles, Louisiana and for milled rice moved from warehouse to port within the Houston switching district.

Exchange officials shall establish a regional differential for each regional milling center in the following manner. The cost of shipping a single fully loaded boxcar of milled rice (bagged) from said regional milling center to its respective Gulf port shall be added to the port charge (unloading charges, wharfage, and other costs incidental to placing milled rice "free alongside ship") for rice. The result shall be known as the "F.A.S. differential." The F.A.S. differential for each regional milling center shall be subtracted from the corresponding figure for the par delivery location, Stuttgart, Arkansas and multiplied by the rough to milled rice conversion factor of .55. The result shall be the inter-regional milling center location differential.

Exchange officials shall establish a local differential for each regular warehouse not located within the municipal boundaries of a regional milling center based on a combination of the rates paid for shipment of rough rice from such warehouse to its nearest regional milling center and the regional differential established for said regional milling center.

The regional and local differentials established as provided above shall constitute the locational differentials applied on a quarterly basis to deliveries on the rough rice contract.

In establishing the location differentials for both the regional milling centers and their tributary warehouses, Exchange officials shall use rates within the range of such rates actually paid during the preceding calendar quarter. If no actual shipments have been made during such a period by any warehouse, Exchange officials may establish a differential for such warehouse on the basis of the percentage change in actual rates gathered with respect to the next nearest warehouse from the preceding quarter to the quarter for which such differential is being established.

In accordance with this rule, Exchange officials will propose to the Rice Committee specific F.A.S. differentials and local differentials for each regular warehouse. If the Rice Committee disagrees with any particular F.A.S. or local differentials, it may alter that differential to more accurately reflect true costs of transportation or charges for placing rice F.A.S. and shall record in detail its reasons for making any changes. The Exchange shall publish a schedule of location differentials no later than the last business day of the calendar quarter preceding the calendar quarter for which they shall be effective.] *Delivery of rough rice in satisfaction of the rough rice futures contract at regular warehouses other than regular mill site warehouses shall be subject to discounts based on the costs of moving rough rice by truck to the mill site warehouse nearest to such regular warehouses. The nearest mill site warehouse to a warehouse not located at a mill site shall be determined on the basis of the minimum number of miles on roads suitable for conveyance of rough rice by truck to the nearest mill site warehouse.*

The discounts which are applicable to delivery at regular warehouses other than regular mill site warehouses shall be as follows:

Miles to Nearest Mill Site/Differential

[Cents per cwt]

	Cents
Less than 5 miles	−5
5 but less than 15 miles	−10
15 but less than 30 miles	−15
30 but no more than 40 miles	−20

Pursuant to the provisions of this rule the Exchange shall publish for each regular warehouse its applicable discount.

* * * * *

Other materials submitted by the CRCE in support of the proposed amendments may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1984)), except to the extent that they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the proposed amendments should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, by August 16, 1985.

Issued in Washington, DC on July 11, 1985.

Jean A. Webb,

Secretary of the Commission.

DEPARTMENT OF DEFENSE

Department of the Army

Performance Review Boards; Names of Additional Members

ACTION: Notice.

SUMMARY: Notice is hereby given of the names of additional members of the Performance Review Boards for the Department of Army for 1985.

EFFECTIVE DATE: July 15, 1985.

FOR FURTHER INFORMATION CONTACT: Carol D. Smith, Senior Executive Service Office, Directorate of Civilian Personnel, Headquarters, Department of the Army, the Pentagon, Washington, DC 20310–0300, (202) 697–2204.

SUPPLEMENTARY INFORMATION: Section 4314(c) (1) through (5) of Title 5 U.S.C., requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more performance review boards. The boards shall review and evaluate the initial appraisal of senior executive's performance by the supervisor and make recommendations to the appointing authority or rating official relative to the performance of the senior executives. Publication of this notice corrects the notice published in 50 FR, No. 133, dated 11 July 1985, pages 28244, to account for additions to the

membership of those boards previously published.

Name of the Committee: Army Science Board (ASB).

Title: Annual Survey of Children in Institutions for Neglected or

the name, address, telephone number and type of institution, as well as tuition

Room 5673, Regional Office Building #3, 7th and D Streets SW., Washington, D.C.

membership of those boards previously published.

The additional members of the Performance Review Board for the U.S. Army Corps of Engineers are:

1. Brigadier General James W. van Loben Sels, Commander, U.S. Army Engineer Division, Europe.

2. Brigadier General Thomas A. Sands, Commander, U.S. Army Engineer Division, Lower Mississippi Valley.

3. Mr. Herbert H. Kennon, Chief, Engineer Division, U.S. Army Engineer Division, U.S. Army.

4. Brigadier General Paul F. Kavanaugh, Commander, U.S. Army Engineer Division, North Pacific.

5. Mr. Kenneth H. Murdock, Chief, Planning Division, U.S. Army Engineer Division, North Central.

The additional members of the Performance Review Board for the U.S. Army Materiel Command are:

1. Mr. Alan M. Moss, Technical Director, U.S. Army Armament Research and Development Center.

2. Dr. Richard G. Rhoades, Associate Director for Technology, U.S. Army Missile Laboratory.

3. Mr. Richard Vitali, Deputy Chief of Staff for Technology, Planning, and Management, Headquarters, U.S. Army Materiel Command.

4. Mr. Colin F. MacDonnell, Jr., Director of Engineering, U.S. Army Communications-Electronics Command.

Carol D. Smith,

Chief, Senior Executive Service Office.

Army Science Board; Meeting Change

The following meeting of the Army Science Board 1985 Summer Study on Manpower Implications of Logistics Support for AirLand Battle (Chair and Three subpanel Chairs—Active/U.S. Army Reserve, Army National Guard, and Mobilization Base/Industrial Perspective), which was originally scheduled for 30 July 1985 (50 FR 27481, July 8, 1985), has been changed to 9 August 1985.

Place: The Pentagon, Washington, DC.

Sally A. Warner,

Administrative Officer, Army Science Board.

[FR Doc. 85-16943 Filed 7-16-85; 8:45 am]

BILLING CODE 3710-08-M

Army Science Board; Closed Meeting

In accordance with section 10(a) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: Wednesday, 31, July-1 August 1985.

Place: St. Louis, MO.

Time: 31 July-0900-1500 hours; 1 August-0900-1500 hours:

Agenda: The Training Technology Subpanel of the Army Science Board 1985 Summer Study on Training and Training Technology-Applications for AirLand Battle and Future Concepts will meet for planning and consolidation of information for a preliminary report writing session, and discussions involving advance simulations and display systems. This meeting will be closed to the public in accordance with section 552(c) of Title 5, U.S.C. specifically subparagraph (1) thereof, and Title 5, U.S.C., Appendix 1, subsection 10(d). The classified and nonclassified matters to be discussed are so inextricably intertwined so as to preclude opening any portion of the meeting. The Army Science Board Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039/7046.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

Army Science Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of Meeting: Friday, 9 August 1985.

Times of Meeting: 0800-1700 hours.

Place: Hay Group, Inc., Washington, DC.

Agenda: The Army Science Board 1985 Summer Study on Manpower Implications of Logistic Support for AirLand Battle—Chair and three subpanel Chairs (Active/U.S. Army Reserve, Army National Guard, and Mobilization Base/Industrial Perspective)—will meet to draft a final report. This meeting is open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (202) 695-3039/7046.

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Deputy Under Secretary for Management invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before August 16, 1985.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place NW., Room 3208, New Executive Office Building, Washington, D.C. 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue SW., Room 4074, Switzer Building, Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster, (202) 426-7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public and early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Department Under Secretary for Management publishes this notice containing proposed information collection requests prior to the submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of the collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract.

OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: July 12, 1985.

Linda M. Combs,

Deputy Under Secretary for Management.

Office of Elementary and Secondary Education

Type of Review Requested: Extension

Title: Annual Survey of Children in Institutions for Neglected or Delinquent Children or in Adult Correctional Institutions under Chapter 1 of the Education Consolidation and Improvement Act of 1981

Agency Form Number: ED 4376

Frequency: Annually

Affected Public: State or local governments

Reporting Burden—Responses: 52; Burden Hours: 2,000

Recordkeeping Burden—Recordkeepers: 0; Burden Hours: 0

Abstract: An annual survey is conducted to collect data on (1) the average daily attendance of children in State-operated or supported institutions for neglected or delinquent children or in adult correctional institutions and (2) the October caseload of children in local institutions for neglected or delinquent children. These data are used in the statutory formula for computing entitlements under Chapter 1 of the Education Consolidation and Improvement Act of 1981.

Office of Management

Type of Review Requested: New

Title: Authorization of Automatic Preauthorized Debits

Agency Form Number: R80-4P

Frequency: One-time

Affected Public: Individuals or households; Businesses or other for-profit; Non-profit institutions

Reporting Burden—Responses: 10,000; Burden Hours: 1,700

Recordkeeping Burden—Recordkeepers: 10,000; Burden Hours: 300

Abstract: This report relates to the collection of recurring payments, such as loan repayments, fees, premiums and other payments. A signed authorization to collect these funds via debit (charge) to a payor's bank account is required.

Office of Educational Research and Improvement

Type of Review Requested: New

Title: Institutional Characteristics of Postsecondary Institutions, 1985-86

Agency Form Number: G50-12P

Frequency: Annually

Affected Public: State or local governments; Non-profit institutions; Small businesses or organizations

Reporting Burden—Responses: 12,000; Burden Hours: 6,000

Recordkeeping Burden—Recordkeepers: 0; Burden Hours: 0

Abstract: This survey collects characteristics of institutions of postsecondary education in order to develop and maintain the Integrated Postsecondary Education Data System control file. The data requested includes the name, address, telephone number and type of institution, as well as tuition and fees information. Institutional accreditation is also verified.

BILLING CODE 4000-01-M

Office of Special Education and Rehabilitative Services

National Institute of Handicapped Research; Application Notice for Special Projects and Demonstrations for Spinal Cord Injuries

Applications are invited for new projects for the Special Projects and Demonstrations for Spinal Cord Injuries program for Fiscal Year 1985 under the National Institute of Handicapped Research.

Authority for this program is contained in section 311 (a) and (b) of the Rehabilitation Act of 1973, as amended by Pub. L. 95-602 and Pub. L. 98-221 (29 U.S.C. 777a (a) and (b)).

Closing Date for Transmittal of Applications: Applications for new awards must be mailed or hand delivered on or before August 16, 1985.

Applications Delivered by Mail: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.133N, 400 Maryland Avenue SW., Washington, D.C. 20202.

An applicant must show proof of mailing consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) A private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered.

Applications Delivered by Hand: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building #3, 7th and D Streets SW., Washington, D.C. 20202.

The Application Control Center will accept a hand delivered application between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays. Applications that are hand delivered will not be accepted after 4:30 p.m. on the closing date.

Available Funds: NIHR has approximately $1,300,000 remaining for this program for Fiscal Year 1985. The Secretary expects to fund up to 4 projects, through either grants or cooperative agreements, at approximately $325,000 per project per year.

However, these estimates do not bind the Department of Education to a specified number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulation.

Program Information: In Pub. L. 98-221, the 1984 amendments to the Rehabilitation Act, Congress transferred a program of model spinal cord injury (SCI) demonstration projects from the Rehabilitation Services Administration to NIHR. While projects have been funded under the Model Spinal Cord Injury Systems program since 1970, the program has evolved on the basis of experience and Congressional interest. In Fiscal Year 1984, seventeen projects were funded under this program.

This is a program of research as well as a demonstration effort, as evidenced by the Congressionally-mandated objectives of research and evaluation of new clinical methods and techniques, collection of data related to cost effectiveness, and evaluation of new and innovative methods of service delivery.

The preliminary results and benefits of the model system have been widely disseminated, and new clinical research results are disseminated through the medical and scientific literature and professional conferences. Criteria used in evaluating these programs have been adopted by the Commission on Accreditation of Rehabilitation Facilities (CARF) and the American Spinal Injury Association (ASIA) for establishing national standards for all accredited spinal cord injury rehabilitation programs.

The regulations for this program emphasize a new scope of work. This scope of work emphasizes collaborative research and investigator-initiated clinical research to solve the medical management and rehabilitation problems of spinal cord injury. The

concept of a Model System will be retained to facilitate continued study of service delivery issues. The Special Projects and Demonstrations also coordinate work with the NIHR spinal cord injury Research and Training Centers and focus on research efforts of mutual and complementary interest.

NIHR intends to fund SCI projects this year which will be more comprehensive in scope and will include the added emphasis on collaborative clinical research and evaluation. These projects are for the purpose of providing model rehabilitation services to SCI patients in a mulitdisciplinary setting, demonstrating and evaluating the benefits of a service system, conducting research and demonstrations concerning new and innovative treatment methods, and contributing to a national analysis of data on system results.

Application Forms: Application forms and further information may be obtained by writing to or calling the National Institute of Handicapped Research, U.S. Department of Education, Mailstop 3070–2305, Switzer Office Building, 400 Maryland Avenue SW., Washington, D.C. 20202 (Attention: Peer Review Unit), Telephone (202) 732–1207. Deaf and hearing impaired individuals may call (202) 732–1198 for TTY services. Requests should refer to applications for Spinal Cord Injury Systems grants, 84.133N.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the program information packages. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or grantee performance requirement beyond those imposed under the statute and regulations.

(Approved by the Office of Management and Budget under Control Number 1820–0027)

Applicable Regulations: The following regulations are applicable to these programs:

(a) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77, and 78).

(b) National Institute of Handicapped Research Regulations (34 CFR Parts 350 and 359, published in the **Federal Register** on April 26, 1985 at 50 FR 16672).

For Further Information Contact: Betty Jo Berland, National Institute of Handicapped Research, U.S. Department of Education, Switzer Office Building, Room 3070, 330 C Street SW., Washington, D.C. 20202. Telephone (202) 732–1139; deaf and hearing impaired individuals may call (202) 732–1198 for TTY services.

(29 U.S.C. 760–762)

(Catalog of Federal Domestic Assistance No. 84.133, National Institute of Handicapped Research)

Dated: July 12, 1985.

Madeleine Will,

Assistant Secretary for Special Education and Rehabilitative Services.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Radioactive Waste Management System Draft; Project Decision Schedule

AGENCY: Office of Civilian Radioactive Waste Management, DOE.

ACTION: Notice of availability of the radioactive waste management system draft project decision schedule.

SUMMARY: Section 114(e) of the Nuclear Waste Policy Act (NWPA) of 1982 (Pub. L. 97–425), requires the Secretary of Energy, in cooperation with all affected Federal agencies, to prepare a Project Decision Schedule that portrays the optimum way to attain the operation of a geologic repository by 1998 and that identifies the key activities, decision points, and deadlines for Federal agency action that are integal to such initiation of operations.

A preliminary draft Project Decision Schedule was issued on January 4, 1985 (50 FR 1616) and comments were sought from Federal agencies regarding the completeness, accuracy, and clarity of the agency actions identified therein.

Comments received have been incorporated in a Draft Project Decision Schedule (DOE/RW–0018; July 1985), which is being provided at this time to all affected Federal agencies for review and comment and is being made available for information to the public.

The Project Decision Schedule will be issued subsequent to the consideration of comments received from Federal agencies. At such time as the Project Decision Schedule is formally issued, the provisions of section 114(e)(2) of the NWPA will take effect that requires affected Federal agencies to report to the Secretary of Energy and Congress that they cannot comply or have failed to comply with a deadline established by the Project Decision Schedule for taking action.

Copies of the Draft Project Decision Schedule may be obtained by writing: Office of Scientific and Technical Information, Technical Information Center, P.O. Box 62, Oak Ridge, Tennessee 37831.

Request for the Draft Project Decision Schedule should also make reference to the Department of Energy Document Identification Number—DOE/RW–0018; July 1985.

Copies of the document will also be available for public review at the following address: Office of Public Affairs, Room 1E–206, 1000 Independence Avenue SW., Washington, D.C. 20585.

Issued in Washington, D.C., July 11, 1985.

Ben C. Rusche,

Director, Office of Civilian Radiooctive Waste Management.

Federal Energy Regulatory Commission

[Docket No. ID–2182–000]

William B. Bookhart, Jr.; Application

July 11, 1985.

Take notice that on May 17, 1985, William B. Bookhart, Jr. (applicant) file an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Director—South Carolina Electric and Gas Company

Director—South Carolina Generating Company, Inc.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before July 22, 1985. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. ID–2203–000]

John C. Duffett; Application

July 11, 1985.

Take notice that on May 24, 1985, John C. Duffett (applicant) filed an application pursuant to section 305(b) of the Federal Power Act to hold the following positions:

Senior Vice President and Director—Public Service Company of New Hampshire

Director—Connecticut Yankee Atomic Power Company

Any person desiring to be heard or protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before July 22, 1985. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Project No. 3189–005]

Joseph M. Keating; Application for Transfer of Major License

July 12, 1985.

Public notice is hereby given that an application was filed on May 17, 1985, under the Federal Power Act, 16 U.S.C. 791(a)—825(r), by Mr. Joseph M. Keating, Licensee, and Rock Creek Limited Partnership, Transferee, for transfer of major license for the Rock Creek Project No. 3189. The project is located on South Fork American River in El Dorado County, California. Correspondence should be directed to William Kriegel, 1801 Avenue of the Star, Suite 815, Los Angeles, California 90067, and Mr. David T. Mercer, Jones, Day, Reavis & Pogue, One Century Plaza—Suite 3600, 2029 Century Park East, Los Angeles, California 90067.

Transferee states that it will comply with all applicable laws of the State of California as required by section 9(b) of the Federal Power Act.

Anyone desiring to be heard or to make any protest about this application should file a motion to intervene or a protest with the Commission, in accordance with the requirements of its Rules of Practice and Procedure, 18 CFR 385.211 or 385.214. Comments not in the nature of a protest may also be submitted by conforming to the procedures specified for protests. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but a person who merely files a protest or comments does not become a party to the proceeding. To become a party or to participate in any hearings, a person must file a motion to intervene in accordance with the Commission's Rules. Any comments, protests, or motions to intervene must be received on or before August 19, 1985. The Commission's address is: 825 North Capitol Street, N.E., Washington, DC 20426. the application is on file with the Commission and is available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. GT85–18–000]

Mountain Fuel Resources, Inc., Proposed Change in FERC Gas Tariff

July 11, 1985.

Take notice that Mountain Fuel Resources, Inc. (MFR) on July 2, 1985, tendered for filing and acceptance the following tariff sheets to its FERC Gas Tariff:

First Revised Volume No. 1

First Revised Sheet No. 2

Original Volume No. 3

First Revised Sheet No. 1
First Revised Sheet No. 12

MFR's filing is made pursuant to Commission Order No. 319–B in Docket No. RM81–29–000, which provided that the Additional Incentive Charge program (AIC) as set forth in § 157.209(f) of the Regulations would expire on January 31, 1985. First Revised Sheet No. 12 of Original Volume No. 3 reflects the expiraon of MFR's AIC rate schedule. First Revised Sheet No. 1, Original Volume No. 3, and First Revised Sheet No. 2, First Revised Volume No.1, reflect this expiration in the Table of Contents.

MFR has requested an effective date of January 31, 1985, to allow its FERC Gas Tariff to remain consistent with the termination date of the Additional Incentive Charge program and has requested waiver of § 154.22 of the Commission's Regulations to establish January 31, 1985, as the effective date of its tendered tariff sheets.

A copy of this filing was served upon MFR's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C., 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before July 19, 1985. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. CI85–529–000]

Ohio Gas Marketing Corp.; Application for Blanket Limited-Term Certificate of Public Convenience and Necessity, Limited Partial Abandonment Authorization and Declaration of Limited Jurisdiction

July 12, 1985.

Take notice that on June 28, 1985, Ohio Gas Marketing Corporation ("OGMC") 3933 Price Road, Newark, Ohio 43055, filed an application pursuant to sections 4 and 7 of the Natural Gas Act, 15 U.S.C. 717c, 717f, and the provisions of 18 CFR Part 157, for a blanket limited-term certificate of public convenience and necessity authorizing OGMC to conduct a short-term spot sales marketing program, hereinafter referred to as Ohio Gas Marketing Program ("OGMP"), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Approval would (1) authorize the sale of natural gas for resale in interstate commerce; (2) permit limited-term, partial abandonment of certain natural gas sales, (3) confer pre-granted abandonment authorization for sales of natural gas made pursuant to the requested certificate; (4) authorize transportation of natural gas by interstate pipeline companies able and willing to participate in OGMP; and (5) confer pre-granted abandonment

authorization for the transportation service allowed under the requested

However, the information required by Part I.A.3. of the permit must be

excluded from coverage under the

discharges are given in Part II. A. of the

UMI

authorization for the transportation service allowed under the requested certificate. OGMC also requests the Commission to declare that, with respect to OGMC and its activities, the Commission will only assert Natural Gas Act jurisdiction over sales for resale and transportation not otherwise exempt from the NGA.

Under OGMP, OGMC proposes to sell natural gas qualifying for the section 102, 103, 107 and 108 rates under the Natural Gas Policy Act of 1978 (NGPA), 15 U.S.C. 3301–3432. Only contractually committed gas will be sold. OGMC and participating producers will seek temporary releases of gas from the purchasers in order to meet market demand for natural gas sales. Releasing purchasers will be absolved from take-or-pay liability for any volumes of gas released and sold under the program. Arrangements for transporting the released gas will be made on a case-by-case basis.

Any person desiring to be heard or to make any protest with reference to said application should on or before July 29, 1985, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rule of Practice and Procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Under this procedure herein provided for, unless Applicant is otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[Docket No. CI85–516–000]

Shell Western E&P Inc.; Petition for Waiver of Condition

July 12, 1985

On June 7, 1985, Shell Western E&P Inc. ("SWEPI") filed with the Federal Energy Reulatory Commission a petition for waiver of condition pursuant to section 502(c) of the Natural Gas Policy Act, 15 U.S.C. 3412(c) and Rule 207 of the Commission's Rules of Practice and Procedure. In its petition, SWEPI seeks a waiver of Ordering Paragraph (B) of the Commission's "Order Denying Rehearing And Modifying Settlement' issued in *Montana-Dakota Utilities Co.*, 9 FERC ¶ 61,012 (October 2, 1984), *reh. denied and clarified*, 30 FERC ¶ 61,018 (January 14, 1985), as to natural gas production from the Pavillion Field, Fremont County, Wyoming.

The procedures applicable to the conduct of this proceeding are found in Subpart K of the Commission's Rules of Practice and Procedure.

Any person desiring to participate in this proceeding must file a motion to intervene in accordance with the provisions of such Subpart K. All motions to intervene must be filed within 15 days after publication of this notice in the **Federal Register**.

BILLING CODE 6717–01–M

ENVIRONMENTAL PROTECTION AGENCY

[OW–10–FRL–2865–4]

Draft General NPDES Permit for Oil and Gas Operations on the Outer Continental Shelf and in State Waters of Alaska; Cook Inlet/Gulf of Alaska

AGENCY: Environmental Protection Agency.

ACTION: Notice of Draft General NPDES Permit.

SUMMARY: The Regional Administrator, Region 10, is proposing to issue a draft general National Pollutant Discharge Elimination System (NPDES) permit for oil and gas stratigraphic test and exploration wells on the Alaskan Outer Continental Shelf (OCS) and in offshore and coastal waters of the State of Alaska. The proposed permit would authorize exploratory discharge in all areas offered for lease by the U.S. Department of the Interior's Minerals Management Service (MMS) in Federal Lease Sales 55 (Gulf of Alaska) and 60 (Cook Inlet). Additionally, the authorized exploratory discharge sites include all Cook Inlet blocks previously offered for lease by the State of Alaska or offered under State lease sales held during the effective period of this permit.

The proposed Cook Inlet/Gulf of Alaska general permit will also cover discharges from oil and gas development and production operations in coastal waters of the State of Alaska located in Upper Cook Inlet (i.e., north of the Forelands) (Figure 1).

When issued, the proposed permit will establish effluent limitations, standards, prohibitions, and other conditions on discharges from facilities in these areas. These conditions are based on existing national effluent limitations guidelines and material contained in the administrative record. A brief description of the basis for the conditions and requirements of the proposed general permit is given in the fact sheet published below.

Issuance of the final general permit will constitute Agency action under the Administrative Procedure Act (5 U.S.C. 558(c)) and will render null and void all individual permits in the area covered by this general permit which have been continued under 40 CFR 122.6 and the Administrative Procedure Act. There are twenty facilities (listed in Table 1) with individual NPDES permits in this category. Each of these individual permittees have complied with reissuance application procedures and has indicated a preference to be covered under this general permit. Therefore, Region 10 hereby announces its intention to cover these facilities under this general permit. If any individual objects to this automatic coverage, the objection should be submitted in writing during the public comment period.

Public Comment Period

Interested persons may submit comments on the draft general permit to EPA, Region 10, at the address below. Comments must be received in the Regional Office by 4 p.m. on August 19, 1985.

Public Hearing

A public hearing on the proposed general permit is tentatively scheduled to be held at the Federal Building, Room C109, 701 "C" Street, Anchorage, Alaska on August 19, 1985, from 9 a.m. until all persons have been heard. Persons interested in making a statement at the hearing must contact Kerrie Schurr at the address listed below or at (206) 442–1774 by 4 p.m. on August 13, 1985. The hearing will be cancelled if insufficient interest is expressed in it. Interested persons can contact Kerrie Schurr between the hours of 8:30 a.m. and 4 p.m. on August 14, 15, or 16 to confirm that the hearing will take place. At the hearing, interested persons may submit oral or written statements concerning the draft general permits.

Request For Coverage

Facilities receiving automatic coverage under the general permit need not submit a formal request for coverage prior to commencement of discharges.

However, the information required by Part I.A.3. of the permit must be submitted within 14 days of the effective date of the permit. Specific permit numbers under the general permit will be assigned to each permittee of this type at the time of final permit issuance.

For all other facilities, written request for coverage and authorization to discharge under the general permit shall be provided to EPA, Region 10, at least 60 days prior to intitiation of discharges, as described in Part I.A. of the draft permit. The 60-day notification requirement may be waived for those permittees who notify EPA during the public comment period for the draft permit. Authorization to discharge requires written notification from EPA that coverage has been granted and that a specific permit number has been assigned to operations at the discharge site. The permit also requires permittees to notify EPA within 7 days prior to the initiation of discharges at the site, and prior to the initiation of discharges from each new well at a given site.

Administrative Record

The administrative record for the draft permit is available for public review at EPA, Region 10, Room 10D, at the address listed below.

ADDRESS: Public comments and requests for coverage should be sent to: Environmental Protection Agency, Region 10, Attn: Ocean Programs Section M/S 430, 1200 Sixth Avenue, Seattle, Washington 98101.

FOR FURTHER INFORMATION CONTACT: Kerrie Schurr, Region 10, at the address listed above or telephone (206) 442–1774. Copies of the draft general permit and todays notice will be provided upon request.

SUPPLEMENTARY INFORMATION:

Fact Sheet

I. General Permits and Requests for Individual NPDES Permit.

Section 301(a) of the Clean Water Act (the Act) provides that the discharge of pollutants is unlawful except in accordance with the terms of an NPDES permits.

The Regional Administrator has determined that oil and gas facilities operating in the areas described in the proposed general NPDES permit are more appropriately controlled by a general permit than by individual permits. This decision is based on 40 CFR 122.28, 40 CFR Part 125 (Subpart M) and the Agency's recent permit decisions in other Alaskan OCS areas.

Any owner and/or operator authorized to discharged under a general permit may request to be excluded from coverage under the general permit by applying for an individual permit as provided by 40 CFR 122.28(b). The operator shall submit an application together with the reasons supporting the request to the Director, Water Division, EPA, Region 10 ("Director").

A source located within the general permit area, excluded from coverage under the general permit solely because it already has an individual permit (i.e., a permit that has not been continued under the Administrative Procedures Act), may request that its individual permit be revoked, and that it be covered by the general permit. Upon revocation of the individual permit, the general permit shall apply. Procedures for modification, revocation, termination, and processing of NPDES permits are provided by 40 CFR 122.62–122.64. As in the case of individual permits, violation of any condition of a general permit constitutes a violation of the Act that is enforceable under section 309 of the Act.

II. Covered Facilities and Nature of Discharges

A. Nature of Discharges

The proposed permit will authorized discharges from exploratory operations in all areas, and from development and production operations only in state waters of Upper Cook Inlet, north of the Forelands (see Parts II. B. and C., below).

Exploratory operations involve drilling to determine the nature of potential hydrocarbon reserves. Under the permit, exploratory operations would be limited to a maximum of five wells per site. Development operations are engaged in the drilling and completion of production wells. Those operations may occur prior to or simultaneously with production operations, which are engaged in active recovery of hydrocarbons from producing formations.

The proposed general permit will authorize the following discharges: Drilling mud; drill cuttings and washwater; deck drainage; sanitary wastes; domestic wastes; desalination unit wastes; blowout preventer fluid; boiler blowdown; fire control system test water; non-contact cooling water; uncontaminated ballast water; uncontaminated bilge water; excess cement slurry; and mud, cuttings, and cement at the seafloor. Waterflooding discharges, produced water discharges, and well treatment fluids (other than tests fluids) will also be authorized for Upper Cook Inlet development and production operations. Descriptions of discharges are given in Part II. A. of the draft permit.

The discharge of produced solids as defined in Part II. A. of the draft permit is not authorized.

Operators of existing facilities are strongly encouraged to consider whether the above categories will cover all discharges at their facilities. If additional categories are necessary, notification should be given to EPA, Region 10, during the public comment period.

Drilling muds and cuttings are the major pollutant sources discharged from exploratory and development drilling operations. The major production operation pollutant sources are produced water and well treatment fluids.

The Agency considers it appropriate to include exploration discharges with development and production discharges in this proposed permit. First, although some development and production discharges vary from those of exploration, all exploratory discharges are a subset of those occurring in development and production. Second, the vast majority of development and production operations to be covered under this permit are the existing Cook Inlet production facilities. The only other development operation expected in the near-term will be located in the same area as the existing facilities. The existing facilities have been discharging to the high energy, low productivity environment of Upper Cook Inlet for more than 15 years. The locations and types of discharges from these facilities are known. Thus, the Cook Inlet region differs from other offshore regions of Alaska, where development and production are either nonexistent or in the early stages of planning. Additionally, the discharge environments in other regions are generally of lower energy, or of greater biological productivity.

B. Facilities and Areas of Coverage in Federal Waters

The proposed general permit will authorized discharges in all areas offered for lease by MMS in Federal Lease Sales 55 (Gulf of Alaska) and 60 (Cook Inlet). At this time, proposed Sale 88 (Gulf of Alaska/Cook Inlet) has been postponed idefinitely. Because it remains unknown when operations and thus discharges would occur in this area, Region 10 will not include the Sale 88 area in this proposed general permit.

Federal waters are located at least three miles from the ordinary low tide mark along the shoreline (i.e., at least three miles from the inner boundary of

the territorial seas). Operations in these areas are included in the Offshore

Inlet (Figure 1), where the existing

mg/l as possible in discharges from

The types of equipment and processes employed in exploratory development

determinations of BPT. Therefore, no incremental cost will be incurred

has included several monitoring requirements in this permit, as listed in

the territorial seas). Operations in these areas are included in the Offshore Subcategory of the Oil and Gas Extraction Point Source Category (40 CFR Part 435, Subpart A). The Offshore Subcategory includes discharges to all waters located seaward of the inner boundary of the territorial seas (Figure 1).

At the present time, specific development and production operations are not planned (and do not presently exist) in the above Federal waters. The permit will therefore cover only exploratory operations in Federal waters, including those operating under existing exploratory permits which expired on June 30, 1984, and were continued under 40 CFR 122.6 and the Administrative Procedures Act (5 U.S.C. 558(c)). Continued permits which will be replaced by the final general permit for exploratory operations in Federal waters include Chevron—Lower Cook Inlet (Permit No. AK–003778–8), and Chevron—Shelikof Strait (Permit No. AK–003731–1).

C. Facilities and Areas of Coverage in State Waters

The proposed general permit will authorize discharges from all Cook Inlet blocks previously offered for lease by the State of Alaska, or offered under state lease sales held during the effective period of this permit. For the purposes of the permit, the southern boundary of Cook Inlet is defined to be the line between Cape Douglas on the west and Port Chatham on the east.

Discharges from new exploratory operations would be allowed in all state waters in Cook Inlet. These include operations in both the Coastal and Offshore Subcategories (40 CFR Part 435, Subparts A and D). Operations in the Offshore Subcategory in state waters would be located within three miles of the ordinary low tide mark along the shoreline, or of closure lines. Closure lines determine the inner boundary of the territorial seas at the mouth of certain embayments. These lines also form the boundary between the Offshore and Coastal Subcategories (Figure 1). Operations in the Coastal Subcategory would be located inside the closure lines. The only existing exploratory permit for operations in state waters which Region 10 intends to replace with the final general permit is the continued exploratory permit for ARCO—Fire Island (Permit No. AK–004054–1).

Discharges from development and production operations would be allowed only for Coastal Subcategory operations north of the Forelands in Upper Cook Inlet (Figure 1), where the existing production platforms are located.

The permit is intended to replace existing continued individual permits (listed in Table 1) for fourteen production platforms, as well as three shore-based facilities which discharge produced water extracted at several of the platforms. The permit would also cover discharges from future platforms such as one planned to be built near platforms in the Trading Bay area in 1986.

EPA, Region 10, has excluded potential development and production in other areas from this permit because (1) the number and precise nature of such future operations is poorly known, in contrast to existing operations in Upper Cook Inlet; and (2) other areas are generally richer in biota and more sensitive to discharges than Upper Cook Inlet.

The proposed permit will not authorize discharges into any wetlands adjacent to the territorial waters of the State of Alaska, or from facilities in the Onshore Subcategory as defined in 40 CFR part 435, Subpart C.

III. Statutory Basis for Permit Conditions

Sections 301(b), 304, 308, 401, 402, and 403 of the Act provide the basis for the permit conditions contained in the draft permit. The general requirements of these sections fall into three categories, which are described below. A discussion of the basis for specific permit conditions follows in Part IV.

A. Technology-Based Effluent Limitations

1. *BPT Effluent Limitations.* The Act requires particular classes of industrial dischargers to meet effluent limitations established by EPA. EPA promulgated effluent limitations guidelines requiring Best Practicable Control Technology Currently Available (BPT) for the Offshore and the Coastal Subcategories of the Oil and Gas Extraction Point Source Category (40 CFR Part 435, Subparts A and D) on April 13, 1979.

BPT effluent limitations guidelines required "no discharge of free oil" for discharges of deck drainage, drilling muds, drill cuttings, and well treatment fluids. This limitation required that a discharge shall not cause a film or sheen upon or discoloration on the surface of the water or adjoining shorelines, or cause a sludge or emulsion to be deposited beneath the surface of the water or upon adjoining shorelines (40 CFR 435.11(d)). The BPT effluent limitation guideline for sanitary waste required that the concentration of chlorine be maintained as close to 1/ mg/l as possible in discharges from facilities housing ten or more persons. No floating solids were allowed as a result of sanitary waste discharges from facilities continuously manned by nine or fewer persons or intermittently manned by any number, or as a result of domestic waste discharges. BPT limitations on oil and grease in produced water allowed a daily maximum of 72 mg/l and a monthly average of 48 mg/l.

2. *BAT and BCT Effluent Limitations.* All permits issued after July 1, 1984, are required by section 301(b)(2) of the Act to contain effluent limitations for all categories and classes of point sources which: (1) control toxic pollutants (40 CFR 401.15) through the use of Best Available Technology Economically Achievable (BAT), and (2) represent Best Conventional Pollutant Control Technology (BCT). BCT effluent limitations apply to conventional pollutants (pH, BOD, oil and grease, suspended solids, and fecal coliform). In no case may BCT or BAT be less stringent than BPT. Permits must impose effluent limitations which control nonconventional pollutants by means of BAT no later than July 1, 1987.

BAT and BCT effluent limitations guidelines and New Source Performance Standards (NSPS) are currently under development and will be proposed in the near future for the Offshore Subcategory. Guidelines and NSPS are not yet under development for the Coastal Subcategory. In the absence of effluent limitations guidelines for both the Offshore and Coastal Subcategories, permit conditions must be established using Best Professional Judgment (BPJ) procedures (40 CFR 122.43, 122.44, and 125.3). This proposed permit incorporates BAT and BCT effluent limitations based on the Agency's Best Professional Judgment. Previous BPJ determinations for oil and gas exploratory operations in the Offshore Subcategory were incorporated into the general permits for the Bering and Beaufort Seas (49 FR 23734, June 7, 1984), and for Norton Sound (50 FR 23578, June 4, 1984).

As required by section 304(b)(2)(B) of the Act, in developing the BPJ/BAT permit conditions, the Agency considered the age of equipment and facilities involved, the process employed, the engineering aspects of the application of various types of control techniques, process changes, the cost of achieving such effluent reduction, non-water quality environmental impact (including energy requirements), and such other factors as the Director deemed appropriate.

The types of equipment and processes employed in exploratory, development, and production operations are well known to the Agency. Region 10 has issued numerous individual permits for such operations, as well as several general permits for exploratory operations. The records for this permit and those earlier permits thoroughly discuss the types of equipment, facilities and processes employed in exploratory, development, and production operations. With regard to the engineering aspects of the application of various types of control techniques, there are no BAT permit limitations based on installation of control equipment. All proposed BAT permit limitations can be achieved through product substitution. Any costs of achieving the effluent limitations and any non-water quality environmental impacts were also evaluated. A discussion of such evaluations is presented below with respect to any limitation where applicable.

As required by section 304(b)(4)(B) of the Act, the Agency considered the same factors in determining BPJ/BCT permit conditions, but with one exception. Rather than considering "the cost of achieving such effluent reduction," any BCT determination includes "consideration of the reasonableness of the relationship between the costs of attaining a reduction in effluents and the effluent reduction benefits derived and the comparison of the cost and level of reduction of such pollutants from publicly owned treatment works to the cost and level of reduction of such pollutants from a class or category of industrial sources." BCT effluent limitations cannot be less stringent than BPT; therefore, if the candidate industrial technology fails the BCT "cost test," BCT effluent limitations are set equal to BPT.

The Agency's evaluation of the BAT factors, as discussed above, is also applicable to BCT, as well as to the Agency's best professional judgment determinations of BPT in cases where there is no BPT effluent limitation guideline for a particular waste stream. Unlike the BAT permit limitations, there are two BCT limitations based on installation of control equipment. There is a 10% limit on the oil content of cuttings, based on the use of cuttings washers. In addition, the oil and grease limits for produced water are based on the use of oil-water separators. With respect to the BCT "cost test," all BCT limitations are equal to the BPT effluent limitations guidelines or to the Region's best professional judgment determinations of BPT. Therefore, no incremental cost will be incurred.

B. Ocean Discharge Criteria

Section 403 of the Act requires that an NPDES permit for a discharge into marine waters located seaward of the inner boundary of the territorial seas (i.e., state and federal offshore waters) be issued in accordance with guidelines for determining the degradation of the marine environment. These guidelines, referred to as the Ocean Discharge Criteria (40 CFR Part 125, Subpart M), and Section 403 are intended to "prevent unreasonable degradation of the marine environment and to authorize imposition of effluent limitations, including a prohibition of discharge, if necessary, to ensure this goal" (45 FR 65942, October 3, 1980).

If EPA determines that the discharge will cause unreasonable degradation, an NPDES permit will not be issued. If a determination of unreasonable degradation cannot be made because of a lack of sufficient information, EPA must then determine whether a discharge will cause irreparable harm to the marine environment and whether there are reasonable alternatives to on-site disposal. To assess the probability of irreparable harm, EPA is required to make a determination that the discharger, operating under appropriate permit conditions, will not cause permanent and significant harm to the environment during a monitoring period in which additional information is gathered. If data gathered through monitoring indicate that continued discharge may cause unreasonable degradation, the discharge must be halted or additional permit limitations established.

Preliminary Ocean Discharge Criteria Evaluations for Sales 55 and 60, and a Revised Preliminary Ocean Discharge Criteria Evaluation for Sale 88 and state lease sales located in Cook Inlet, have been completed for discharges from operations in these lease sale areas.

C. State of Alaska Standards and Limitations

All discharges to state waters, either offshore or coastal, must comply with water quality standards and with limitations imposed by the State as part of its certification of NPDES permits under section 401 of the Act.

D. Section 308 of the Clean Water Act

Under Section 308 of the Act and 40 CFR 122.44(i), the Director must require a discharger to conduct monitoring to determine compliance with effluent limitations and to assist in the development of effluent limitations. EPA has included several monitoring requirements in this permit, as listed in the table below.

IV. Specific Permit Conditions

A. Approach

The determination of appropriate conditions for each discharge was accomplished through:

(1) Consideration of technology-based effluent limitations to control conventional pollutants under BCT;

(2) Consideration of technology-based effluent limitations to control toxic pollutants under BAT;

(3) Evaluation of the Ocean Discharge Criteria for discharges in the Offshore Subcategory, assuming conditions in parts (1) and (2) were in place; and

(4) For state waters, inclusion of permit terms necessary to ensure compliance with state water quality standards and stipulations of state lease sales.

Discussions of the specific effluent limitations and monitoring requirements derived from (1) through (4) appear below in Sections B. through E., respectively. Additional monitoring requirements based on the determinations in (1) and (2) are discussed in Section F. For convenience, these conditions and the regulatory basis for each are cross-referenced by discharge in the following table:

Discharge and permit condition	Statutory basis
Drilling muds and cuttings:	
Authorized muds and additives only.	BAT.
No free oil	BCT.
No oil-based muds	BCT.
No diesel	BAT.
10% max. oil limitation on cuttings.	BCT
50 mg/l oil & grease—elutriate test.	State Water Quality Standards (WQS).
3 mg/kg cadmium and 1 mg/kg mercury in barite.	BAT.
Monitoring of metals and toxicity.	Section 308.
Inventory of added substances.	Section 308.
Monitor volume discharged	Section 308.
Flow rate limitations	Section 403(c).
Depth related limits	Section 403(c).
Environmental monitoring requirement.	Section 403(c).
Deck drainage:	
No free oil	BCT.
Monitor flow rate	Section 308.
Sanitary wastes:	
No floating solids	BCT.
Chlorine 1.0 mg/l (facilities with more than 10 people).	BCT.
Monitor flow rate	Section 308.
BOD and suspended solids	State WQS.
Domestic wastes:	
No floating solids	BCT.
Monitor flow rate	Section 308.
Miscellaneous discharges (008–015 as defined in permit):	
No free oil	BCT.
Monitor flow rate in cooling water.	Section 308.

Discharge and permit condition	Statutory basis
Produced water:	
Oil & grease limitations	BAT.
Monitor flow rate	Section 308.
Treatment chemicals	Section 308.
Well treatment fluids:	
No free oil	BCT.
No diesel	BAT.
Monitor flow rate	Section 308.
Well completion fluids:	
No free oil	BCT.
No diesel	BAT.
Monitor flow rate	Section 308.
Well test fluids:	
No free oil	BCT.
No diesel	BAT.
Monitor flow rate	Section 308.
Well workover fluids:	
No free oil	BCT.
No diesel	BAT.
Monitor flow rate	Section 308.
Miscellaneous fluids:	
No free oil	BCT.
No diesel	BAT.
Monitor flow rate	Section 308.
Treatment chemicals	Section 308.
Domestic wastes:	
No floating solids	BCT.
Monitor flow rate	Section 308.
Sanitary wastes:	
No floating solids	BCT.
Chlorine 1.0 mg/l (facilities with more than 10 people).	BCT.
Monitor flow rate	Section 308.
BOD and suspended solids	State WQS.
Deck drainage:	
No free oil	BCT.
Monitor flow rate	Section 308.
Desalination unit discharge:	
Monitor flow rate	Section 308.
Treatment chemicals	Section 308.
Blowout preventer fluid:	
No free oil	BCT.
No diesel	BAT.
Monitor flow rate	Section 308.
Uncontaminated ballast water:	
No free oil	BCT.
No diesel	BAT.
Monitor flow rate	Section 308.
Excess cement slurry:	
No free oil	BCT.
No diesel	BAT.
Monitor flow rate	Section 308.
Mud/cuttings cement:	
No free oil	BCT.
No diesel	BAT.
Monitor flow rate	Section 308.
Cooling water:	
Monitor flow rate	Section 308.
Treatment chemicals	Section 308.
Uncontaminated freshwater:	
Monitor flow rate	Section 308.
Uncontaminated seawater:	
Monitor flow rate	Section 308.
Treatment chemicals	Section 308.

previous BPT permits. Thus, for test fluids, the requirement will incur no cost

pollutant "diesel oil" is being used as an "indicator" of the listed toxic pollutants

additives used, and on the unquantified changes in toxic pollutant

Discharge and permit condition	Statutory basis
Produced water:	
Oil & grease limits	BCT, State WQS, and Marine Water Quality Criteria (MWQC).
pH 6.5–8.5	BCT
Monitor flow rate	Section 308.
Environmental monitoring requirements.	Section 403(c).
Well treatment fluids:	
No free oil	BCT.
No oil-based fluids	BCT.
ph 6.5–8.5	BCT, State WQS, and MWQC.
Monitor volume	Section 308.
Monitor oil and grease	Section 308.
All discharge:	
No halogenated phenol compounds, diesel oil, trisodium nitrilotriacetic acid, sodium chromate, or sodium dichromate.	BAT.
No biocides not FIFRA registered.	BAT.
No floating solids, or visible foam.	BCT.
No oily wastes	State WQS.
Area and depth related requirements.	Section 403(c), State WQS.
Discharge monitoring study	Section 308.

B. BCT Requirements

1. *Oil and grease in produced water:* Oil and grease concentrations in discharges of produced water from all facilities except Phillips Platform A will be limited to a 48 mg/l monthly average and a 72 mg/l daily maximum based on oil/water separation technologies. These limits are the same as the BPT effluent limitation guidelines. Oil and grease limitations from Phillips Platform A, a gas platform, will be set as 15 mg/l monthly average and 20 mg/l daily maximum. The limitations for Phillips Platform A are equal to those in the most recent BPT permit for that facility, limitations with which Phillips is currently in compliance. More stringent limits than 48/72 and 15/20 were considered for all of the oil and gas facilities covered by the permit, but the Region does not have sufficient technology performance data available at this time on which to base more stringent limitations. As these BCT limitations are equal to the BPT level of control, there is no incremental cost involved.

2. *Free oil and oil-based muds.* No discharge of free oil is permitted from the discharges of drilling mud, drill cuttings and washwater, deck drainage, and well treatment fluids. Region 10 has determined that the BPT effluent limitations guideline of no discharge of free oil should also apply to all miscellaneous discharges, including uncontaminated bilge water, uncontaminated ballast water, desalination unit wastes, boiler blowdown, non-contact cooling water, excess cement slurry, blowout preventer fluid, fire control system test water; mud, cuttings and cement at the seafloor; and waterflooding discharges. Thus, the no free oil limitation is Region 10's best professional judgment determination of BPT controls for these discharges. All of these discharges except waterflooding discharges have been subject to a no free oil limitation in previous permits issued by Region 10, and past practices have not resulted in violations of this limitation. Region 10's best professional judgment of BPT controls on free oil also extends to waterflooding discharges, which generally have no free oil.

Under the draft permit, the discharge of oil-based drilling fluids and well treatment fluids (with oil as the continuous phase and water as the dispersed phase) is prohibited since oil-based fluids would violate the BCT effluent limitations of no discharge of free oil.

No technology performance data available to Region 10 indicate that more stringent standards are appropriate at this time. Region 10 has, therefore, set BCT limitations equal to the BPT level of control. As such, these limitations impose no incremental costs.

Compliance with the free oil limitation for deck drainage and miscellaneous discharges will be by visual observation for sheen on the receiving water, except for deck drainage and bilge water under the conditions described below.

Compliance with the free oil limitation will be monitored by year-round use of Static Sheen Test for mud, cuttings, and well treatment fluids. The Static Sheen Test will also be required for monitoring of deck drainage and bilge water during unstable or broken ice and stable ice conditions. The Static Sheen Test is being required for well treatment fluids because these represent a significant discharge from production operations and are likely to be contaminated with oil. Use of the Static Sheen Test will prevent a violation of the free oil limitation due to those discharges most likely to be contaminated with oil. This would not be possible with an after-the-fact visual observation of a sheen on the receiving water.

3. *Oil content of cuttings.* The draft general permit restricts the discharge of oil-contaminated cuttings by prohibiting the discharge of free oil (see Part IV.B.2.) and by limiting the maximum mineral oil content of cuttings. The limitation of 10% by weight on oil content is based on the efficiency of currently available cuttings washers in removing mineral oil from drill cuttings. Region 10 expects that if mineral oil-based drilling muds or water-based muds with high concentrations of mineral oil additives are used, drill cuttings would have to be washed by cuttings washers to meet the free oil limitation. The limitation on the maximum oil content content of drill cuttings has been imposed as an additional means of effectively controlling the discharge of oil from cuttings associated with these muds.

Region 10 expects that cuttings washers will routinely be required only for drilling operations which use mineral oil-based drilling muds or water-based muds with high concentrations of mineral oil additives, and not for all drilling operations. Due to the rare usage of such muds by exploratory drilling operations, very few, if any, exploratory facilities will require the installation of cuttings washers. Such muds may be used more frequently by development or production facilities. However, any facility requiring a cuttings washer to meet the 10% oil limit would already require a cuttings washer to meet the BPT effluent limitation of no free oil. Therefore, there is no incremental cost involved beyond the cost of monitoring compliance, and the 10% oil limitation passes the BCT cost test.

The permit requires an analysis of cuttings for oil content daily when oil-based drilling fluids or oil additives are used. Analysis is also required daily when drilling fluids could be contaminated with hydrocarbons from the formation. In addition, analysis is required immediately on any sample that has failed the daily Static Sheen Test if a discharge has occurred. Two alternative analytical methods for determining the oil content of drill cuttings are specified in the permit: (1) The soxhlet extraction procedure for oil and grease (as specified in 40 CFR Part 136), and (2) the American Petroleum Institute retort distillation procedure for oil.

4. *pH.* The pH of discharged well treatment fluids (which may have a substantially different pH from that of the ambient receiving water) has been limited to a range of 6.5–8.5 at the point of discharge. In the Agency's best professional judgment, this limitation appropriately equals a BPT level of control. No more stringent standard has been identified by the Agency at this time. Therefore, the Agency is setting a BCT effluent limitation for the pH of well treatment fluids equal to that of BPT. This limitation will ensure that pH changes greater than 0.1 pH unit for state waters and 0.2 pH unit for federal waters will not occur beyond the edge of the 100-meter mixing zone (40 CFR 125.121(c)). This requirement for test fluids, a subset of well treatment fluids, has been and is routinely complied with by exploratory operations under

previous BPT permits. Thus, for test fluids, the requirement will incur no cost incremental to BPT. The cost to comply with this limitation for other types of well treatment fluids is expected to be minimal, particularly since well treatment fluids commingled with produced water have been subject to pH limits of 6–9 in all existing BPT permits for Cook Inlet production facilities.

The pH produced water has been limited to a range of 6.5–8.5 at the point of discharge. Previous BPT permits for production facilities in Cook Inlet contained a limitation of pH 6–9. There is thus a minimal cost incremental to BPT.

5. *Floating soilds.* The BCT prohibition of floating solids is equal to the BPT level of control for sanitary and domestic wastes. Region 10 has determined that the BPT effluent limitations guideline of no discharge of floating solids from the discharge of sanitary wastes should apply to all other discharges as well. They have been subject to this limitation in previous permits issued by Region 10, and past practices have not resulted in violations of this limitation. No technology performance data available to Region 10 indicate that a more stringent standard is appropriate at this time. Therefore, Region 10 has determined that BCT effluent limitation on floating solids from these discharges is equal to the BPT level of control. As such, the extension of this limitation to all discharges will involve no incremental cost.

6. *Chlorine.* Chlorine is being regulated as a BCT pollutant because its purpose is to control the conventional pollutant fecal coliform. The requirement of maintaining residual chlorine levels as close as possible to, but no less than 1 mg/l in sanitary discharges for facilities manned by 10 or more people is a BCT determination equal to BPT. There is therefore no incremental cost to the industry.

C. BAT Requirements

1. *Diesel oil.* The discharge of muds which have been contaminated by diesel oil (i.e., those drilling muds which have contained diesel) or drill cuttings associated with these muds is prohibited. Diesel, which is sometimes added to a water-based mud system, is a complex mixture of petroleum hyerocarbons, known to be highly toxic to marine organisms and to contain numerous toxic and nonconventional pollutants. While this limitation thereby controls the toxic as well as nonconventional pollutants present in diesel, the Agency's primary concern is to control the toxic pollutants. The pollutant "diesel oil" is being used as an "indicator" of the listed toxic pollutants present in diesel oil which are controlled through compliance with the effluent limitation (i.e., no discharge). The technology basis for this limitation is product substitution of less toxic mineral oil for diesel oil.

The Agency selected "diesel" as an "indicator" as an alternative to establishing limitations on each of the specific toxic and nonconventional pollutants present in the diesel-contaminated waste streams. The listed toxic pollutants found in various diesel oils include napthalene, benzene, ethylbenzene, phenanthrene, toluene, fluorene, and phenol. Diesel oil may contain from 20 to 60 percent by volume aromatic hydrocarbons. The light aromatic hydrocarbons, such as benzenes, napthalenes, and phenanthrenes, constitute the most toxic major components of petroleum products. Mineral oils, with their lower aromatic hydrocarbon content and lower toxicity, contain lower concentrations of toxic pollutants than do diesel oils. Diesel oil also contains a number of nonconventional pollutants, including polynuclear aromatic hydrocarbons such as methylnaphthalene, dimethylnaphthalene, methylphenanthrene, and other alkylated forms of each of the listed toxic pollutants.

The Region has determined that eliminating the discharge of drilling fluids contaminated with diesel oil will reduce the levels of toxic pollutants present in discharged fluids. Studies show that when the amount of diesel is reduced in drilling muds, the concentrations of toxic pollutants and the overall toxicity of the fluid generally is reduced. Available data clearly establish that diesel oils as a class contain significantly higher levels of toxic pollutants than do mineral oils as a class. It is reasonable and appropriate to conclude that BAT-level control of toxic pollutants (i.e., reduction in concentrations through substitution of mineral oil for diesel oil) will be achieved by regulating diesel oil as an indicator pollutant.

Region 10 has concluded that establishing effluent limitations for each of the seven toxic pollutants present in diesel oil is not economically or technically feasible at this time. The level achievable by BAT controls on the specific toxics can be calculated using available data on the three mineral oils which have been extensively characterized. However, the limited data on the many diesel and mineral oils, mud formulations, and the various additives used, and on the unquantified changes in toxic pollutant concentrations during drilling, all frustrate an attempt to develop specific toxic pollutant effluent limitations at this time.

Not only is it infeasible to establish limitations on the specific toxic pollutants, but to comply with specific limitations on each of the toxic pollutants would be costly and technically complex. The analytical costs for specific pollutant analyses would be much greater than the cost of analyzing for diesel by gas chromatography alone. The high cost of compliance monitoring, which may include awaiting results of analyses, which must be conducted onshore, possibly outside the State of Alaska, also would be unwarranted. Either operators would have to delay discharge until monitoring results confirmed compliance or they would discharge and risk permit noncompliance. A permit limitation that prohibits the discharge of diesel oil is economically and technologically feasible and allows a determination of permit compliance prior to discharge.

The prohibition on the discharge of diesel is a technology-based BAT limitation based on product substitution. Low toxicity mineral oils are available as product substitutes for diesel oil, and do not impose unreasonable additional costs on industry. The Agency has relied primarily on the increased cost of mineral oil over diesel oil as a basis for this determination. For example, mineral oil costs Alaskan operators approximately $2.60 per gallon more than does diesel oil. The increased costs associated with using mineral oil rather than diesel oil for 50 barrels (2,100 gallons) of oil (the maximum amount generally expected in a concentrated spotting or "pill" formulation used to free stuck drill pipe) would therefore be equal to approximately $5,500. Since the frequency of differential sticking of drill pipe requiring the use of oil-based spotting formulations is low for most drilling operations (less than once per well on an average), this cost would not be incurred for each operation. The Agency has evaluated other costs associated with either diesel or mineral use in response to comments on the draft Norton Sound permit (50 FR 28589, Response to Comment 10). Both analyses show that the cost associated with the prohibition on the discharge of diesel oil clearly is economically achievable.

Region 10 has considered limiting "free oil," "oil-based drilling fluids," and "oil content of cuttings" as indicators of

toxic pollutants. While the Agency has determined that such effluent limitations

the limitations. The Agency solicits comments and supporting data from

preliminary bioassay data are submitted and EPA determines that additional

used to verify that mercury and cadmium limits on barite are adequately

(Figure 2): From latitute 60°04'06" N, longitide 152°34'12" W to the southern

is not as great in shallow waters as in deeper waters. However, at any

toxic pollutants. While the Agency has determined that such effluent limitations will control the discharge of toxic pollutants in these oils, it is unnecessary to designate these pollutants as indicators since the same levels of control have been established under BCT, which are equal to levels of control required by the BPT effluent limitations guidelines. Therefore, redundant limitations under BAT have not been imposed for these pollutant parameters.

2. *Mercury and cadmium in barite:* The proposed permit contains limits of 1 mg/kg/ mercury and 3 mg/kg cadmium on barite, a major constitutent of drilling muds. These restrictions are designed to limit the discharge of mercury, cadmium, and other potentially toxic metals which can occur as contaminants in some sources of barite. An identical limitation is included in the Bering and Beaufort Seas and Norton Sound general permits.

As discussed in the fact sheets for the above permits, the justification for the limitation under BAT is product substitution, i.e., Alaskan operators can substitute "clean" barite which meets the above limitations for contaminated barite which does not meet the limitations. Numerous offshore exploratory wells have been drilled in Alaska over the past year, and chemical analyses have shown that the barite used has not exceeded the limitations. Given that "clean" barite is available and that operators in the Bering and Beaufort Seas have been complying with an identical limitation, Region 10 believes that this limitation is both technologically feasible and economically achievable.

Region 10 has determined that it is impractical at this time to place the limitations on drilling mud until additional data are collected. Furthermore, if the limitation were placed on the drilling mud rather than on the barite, it would not be feasible for an Alaskan operator to determine in advance if the discharge complied with the permit requirements since metals analyses must be conducted at commercial laboratories onshore.

EPA does recognize the possibility of changes in the available supply of "clean" barite. The draft permit contains a provision which would allow the Director the discretion to grant a waiver from the limitations on a case-by-case basis if the permittee (1) satisfactorily demonstrates that barite which meets the limitations is not available, and (2) provides results of analyses of the substitute barite. In determining the availability of "clean" barite under this provision, Region 10 will reasonably consider all relevant factors, including the cost of obtaining barite which meets the limitations. The Agency solicits comments and supporting data from those individuals who do not believe they can meet the above limitations. The Agency also solicits data indicating any increased costs that a permittee has incurred in meeting the barite limitations contained in the general permits for offshore drilling in the Beaufort and Bering Seas (49 FR 23734, June 7, 1984).

3. *Generic muds and authorized additives.* The draft permit limits the discharge of toxic substances in drilling fluids by allowing only the discharge of generic drilling muds (listed in Table 1 of the draft permit) and additives for which acceptable bioassay or chemical data are available. Permittees are required to certify in advance of discharge that only generic drilling muds and authorized additives will be discharged.

Permittees may discharge additives listed in Table 2 of the draft permit up to the specified concentrations without special permission. This table is the same as Table 2 in the Norton Sound general permit (50 FR 23578, June 4, 1985). The permit contains a provision (Table 2) which will allow the discharge of additives which are listed in Table 2 of subsequent Region 10 general permits, unless otherwise stated in the new permits. For operations under this permit, any additive receiving authorization in this manner will be evaluated according to the regional criteria used for this permit.

Any discharge of a generic mud which has been modified other than by addition of an additive listed in Table 2 requires submission of information demonstrating that it passes the critieria in Part II.C.1.e of the permit or prior authorization by EPA, Region 10. Permittees may request authorization to discharge additives (including mineral oils) not listed in Table 2 by submitting appropriate information and bioassay data in advance of discharge. Region 10 will determine whether the use of the requested additives is likely to cause the mud system to be more toxic than Generic Mud No. 1, which is the base mud formulation the Agency uses to determine acceptable toxicity levels for discharge of fluids. Other criteria (e.g., persistence and degradation), as appropriate, are also considered in the evaluation process. The propsed permit furthermore contains a provision (Part II.C.1.g. of the permit) which allows an exception for the discharge of mineral oil-containing muds which exceed the toxicity of Mud No. 1 if the least toxic available alternative is discharged.

In some cases, interim discharge authorizations may be granted if preliminary bioassay data are submitted and EPA determines that additional bioassay testing is required. Such testing may be required, for example, to examine possible cumulative or synergistic effects if the additive is to be used in combination with a number of other additives. Because the additional testing may take a considerable amount of time to conduct, interim authorization to discharge may be granted so that operations are not impaired for an unreasonable amount of time. Interim authorizations may also require testing a used drilling mud from a rig.

This approach to limiting toxicity is expected to control the discharge of listed toxic as well as nonconventional pollutants in drilling muds. For example, the toxicity of muds containing lubricants, including mineral oil products, may vary widely, and such additives may greatly increase the toxicity of the mud. Studies on diesel-contaminated drilling muds have shown toxicity to be strongly correlated with content of aromatic hydrocarbons, which include listed toxic pollutants. Some mineral oils also contain aromatic hydrocarbons which are listed toxics, such as fluorene, naphthalene, and phenanthrene. The toxicity of muds containing these oils is assumed to be caused, in part, by the listed toxic pollutants as well as by the noconventional pollutants. Region 10 has determined that it is technically and economically infeasible to directly limit the toxic pollutants in drilling muds, as discussed in Part IV.C.1. Therefore, the Region has determined that the toxicity limitations (e.g., generic muds and approved additives) constitute a reasonable approach which is expected to control not only listed toxic pollutants, but other toxic substances (i.e., toxic nonconventional pollutants) as well.

The technology basis for this permit condition is product substitution; i.e., mud additives and components which would cause the toxicity of mud system to exceed that of Generic Mud No. 1 can be replaced by less toxic mud additives and components.

Under section 308 of the Act, compliance with this proposed permit condition will be monitored in two ways: first, by requiring that permittees certify that only generic muds and authorized additives will be discharged; and second, by requiring that permittees submit an end-of-well inventory listing all chemicals and the amounts of each added to each mud system. In addition, permittees must analyze one or more mud samples per well for metals content and toxicity. The metals data will be used to verify that mercury and cadmium limits on barite are adequately controlling metal concentrations in discharged muds. The Drilling Fluids Toxicity Test, performed on the end-of-well mud system, will provide a comparison between the toxicity of used muds containing mixtures of additives and the bioassay data submitted on individual additives prior to discharge.

4. *Other toxic and nonconventional compounds.* Under the permit, discharges of the followng pollutants are prohibited: halogenated phenol compounds, trisodium nitrilotriacetic acid, sodium chromate, and sodium dichromate. The class of halogenated phenol compounds includes toxic pollutants, and sodium chromate and dichromate contain chromium, also a toxic pollutant. Trisodium nitrilotriacetic acid is a nonconventional pollutant. The discharge of these compounds was previously prohibited in the BPT general permits for the Beaufort Sea and Norton Sound (48 FR 54881, December 7, 1983) as well as in the BAT/BCT general permits for the Bering and Beaufort Seas and Norton Sound. These compounds are therefore subject to BAT limitations. Because operators complied with this provision in the BPT permits, there is no additional cost to the industry.

The proposed permit contains an additional restriction on all discharges under BAT. Discharges of biocides are limited to those biocides registered with EPA under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for the use(s) in which they are intended (e.g., noncontact cooling water, or waterflooding operations). Discharges shall be in accordance with product registration labeling. The discharge of all other biocide is prohibited.

D. Requirements Based on the Ocean Discharge Criteria Evaluation

1. *Prohibited areas for all dischorges from Offshore Subcategory operations.* The proposed general permit prohibits discharges from Offshore Subcategory exploratory operations in the following areas:

(1) Water depths less than 5 m (as measured from mean lower low water).

(2) Within 1,000 m of a coastal marsh, river delta, river mouth, designated Area Meriting Special Attention (AMSA), game refuge, game sanctuary, or critical habital area.

(3) In Kamishak Bay west of a line from Cape Douglas to Chinitna Point.

(4) In Chinitna Bay inside a line (see Figure 2) from latitude 59°52'45" N, longitude 152°48'18" W to latitude 59°46'12" N, longitude 153°00'24" W; in Tuxedni Bay inside of the following lines on either side of Chisik Island (Figure 2): From latitute 60°04'06" N, longitide 152°34'12" W to the southern tip of Chisik Island (latitude 60°04'06" N, longitude 152°33'30" W) and from latitude 60°13'45" N, longitude 152°32'42" W to the point on the north side of Snug Harbor on Chisik Island (latitude 60°06'36" N, longitude 152°32'54" W).

These restrictions are necessary to ensure that unreasonable degradation of these areas will not occur.

Discharges are prohibited in waters shallower than 5 m because shallow nearshore waters in Lower Cook Inlet are an important habitat for many species. In addition, dilution and dispersion of drilling mud discharges in waters less than 5 m deep is uncertain given that the field data are limited and that the available models of mud dilution and dispersion are not field-verified for shallow depths. A similar condition on drilling muds and cuttings was included in an individual BAT/BCT permit (No. AK-004155-6) for Champlin Petroleum's operations near Kalgin Island.

The condition restricting discharges within 1,000 m of coastal marshes, river deltas, and other areas is necessary to comply with local and state Coastal Management Plan prohibitions on discharges of silt materials in these areas, or on activities that may alter the protected biological resources of these areas.

Chinitna, Tuxedni, and Kamishak Bays are, or are contiguous with, areas of high resource value. In addition, Kamishak Bay is a known net depositional environment where accumulation of drilling mud solids and other pollutants would be likely to occur if allowed to be discharged in this area.

Development and production facilities to be covered by the permit are restricted to Upper Cook Inlet north of the Forelands. They are in the Coastal Subcategory and are not subject to a 403(c) evaluation.

2. *Muds and cuttings.* Several additional restrictions on these discharges are necessary to ensure no unreasonable degradation of the marine environment. The discharge rate limitation of 1,000 bbl/hr on total muds and cuttings into waters greater than 40 m in depth was established through the Ocean Discharge Criteria Evaluation process in order to allow adequate dispersion of the discharges. In addition, the muds and cuttings discharge rate is restricted to 750 bbl/hr in water depths greater than 20 m but not more than 40 m, and to 500 bbl/hr in 5 to 20 m of water. These limits are necessary because for any given discharge rate, the dilution of drilling muds and cuttings is not as great in shallow waters as in deeper waters. However, at any particular water depth, greater dilution close to the discharge point will be achieved with a lower discharge rate. These maximum rates will ensure that acceptable toxicity limits will not be exceeded at the edge of the 100 m mixing zone (Tetra Tech, 1984).

3. *Deck drainage, sanitary and domestic wastes, and miscelloneous discharges.* These discharges are adequately controlled by the technology-based limitations above to ensure no unreasonable degradation of the maine environment.

E. Requirements to Ensure Compliance with State Quality Standards

1. *Elutriate test.* As part of its certification under section 401 of the Act, the State of Alaska will require that muds and cuttings not be discharged to state waters if they contain more than 50 mg/l of oil and grease as measured by the elutriate test.

2. *pH.* The pH of well treatment fluids and produced water will be limited to a pH of 6.5–8.5 at the point of discharge. The pH of these fluids must be within 0.1 pH unit of the ambient condition at the edge of a 100-m mixing zone.

3. *Prohibited areas for all discharges in state waters.* State waters covered by the general permit are located in Cook Inlet, and include both Offshore and Coastal Subcategory operations. Prohibited discharge areas for Offshore Subcategory operations, as determined through the Ocean Discharge Criteria Evaluation process (described in Part IV.D.1. above), are sufficient to ensure that Alaska Water Quality Standards will be met.

Prohibited discharge areas for Coastal Subcategory operations were determined as discussed below:

First, all discharges will be prohibited within 1000 m of a coastal marsh, river delta, river mouth, designated Areas Meriting Special Attention (AMSA), game refuge, game sanctuary, or critical habitat area. This is consistent with the discharge restriction on these areas for Offshore Subcategory operations.

Second, all discharges are prohibited to intertidal areas and to waters shoreward of the 5 m isobath (as measured from mean lower low water). Where terms of state lease sales prohibit discharges shoreward of isobaths deeper than 5 m, the deeper isobath shall be the boundary instead. The 5 m restriction will have a significant effect on the three shore-based facilities which discharge produced water well above the mean lower low water mark. The Marathon

Granite Point facility presently discharges approximately 0.2 MGD of

as part of the Ocean Discharge Criteria Evaluation process. Preliminary

Cook Inlet will likely carry discharged materials from the development and

platforms for 1 year, under a variety of operational and ambient weather

trimethylnaphthalenes;
tetramethylnaphthalenes; xylenes;

B. Endangered Species Act

VOL 50 ISS 137 JL 17 1985 UMI

Granite Point facility presently discharges approximately 0.2 MGD of produced water. The water is piped from the facility down a cliff, whereupon it flows through a ditch in a saltwater slough and through a culvert under a road, before discharging to the beach above the high tide line. At Marathon's Trading Bay facility, a monthly average discharge of approximately 2.8 MGD is piped to 1.7 m below the mean high tide mark, whereupon it flows over the mud flats. Finally, Shell's East Foreland facility discharges a monthly average of 0.2 MGD. The produced water is piped down a cliff, and presently discharges to the base of the cliff before flowing over the beach.

EPA often defines a mixing zone as extending 100 m laterally in all directions from a discharge point (40 CFR 125.21(c)). If a 100 m miximg zone is assumed, discharges from these shore-based facilities will violate the state water quality standards for total hydrocarbons (15 μg/l) and total aromatic hydrocarbons (10 μg/l) at the edge of the mixing zone, based on computer modeling results. This finding is based on computer modeling of plume dispersion using the PLUME model for nearfield dilution and a two-dimensional advection/diffusion model (EPA's MPN model) for farfield dilution. Based on discharge data available from the facilities, which indicates a total aromatic hydrocarbon concentration of 5 to 20 mg/l, a dilution of 2000:1 would be necessary for the discharges to meet the state water quality standard of 10 μg/l. Dilutions based on the computer modeling for a depth of 5 m would range from 3:1 to 33:1 for the Trading Bay facility depending on current speed, and from 17:1 to 100:1 for the East Foreland and Granite Point facilities. Although modeling for depths greater than 5 m showed only slightly greater dilutions, EPA believes that removal of the three facilities' discharges to this depth (and possible use of outfall diffusers) will be a significant improvement over the current situation, where discharges run out over the beach at low tide. The discharges would be submerged at all times including extreme low tides, and during the vast majority of the tidal cycle would have 5–11 m of water overlying the outfall.

Region 10 has assumed a 100 m miximg zone for each of the three facilities in the absence of proposed mixing zone determinations by ADEC under 18 AAC 70.032. This size is consistent with that used to evaluate discharge dilution and dispersion in offshore waters (both federal and state) as part of the Ocean Discharge Criteria Evaluation process. Preliminary discussions with ADEC staff members indicate that ADEC may propose mixing zones of as much as several kilometers for determining compliance with State Water Quality Standards. Such mixing zones would be likely to allow the companies to continue discharging well above the mean lower low water mark. ADEC's proposal will be based in part on computer modeling data presently being compiled by Marathon and Shell. Region 10 and ADEC request that Marathon and Shell provide this data during the public comment period. The agencies also request any other information and comments relevant to the mixing zone determinations.

A prohibition on discharges to waters shoreward of the 5 m isobath and to intertidal areas would be consistent with a lease term in State of Alaska leases for oil and gas operations in Cook Inlet. Any new operator wishing to locate in areas leased in State Sales 32, 33, 35, 40 and 46A would not be allowed to discharge produced water or muds and cuttings to an intertidal area. In addition, under the same lease term, the discharge of muds and cuttings to waters 5.5 m (3 fathoms) or less would be allowed only during the period from 2 hours before to 2 hours after each high tide. This lease term is intended to "protect shallow areas," "help maintain the sale area as a pollution-free environment," "mitigate disturbance to marine mammals," "help maintain the integrity of avian habitats and prevent disturbances to avian wildlife," and "protect anadromous fish and their habitat."

EPA believes that the protection of marine mammal, avian, and anadromous fish resource from potential adverse effects of new operations should extend to potential effects from existing facilities. Each of the existing facilities is, in fact, located in an area covered by a past lease sale, or to be covered in the near future by a lease sale.

4. *Environmental monitoring of muds and cuttings discharges from new development and production facilities.* New development and production facilities which discharge drilling muds or drill cuttings within 1500 m of an area of biological significance, such as a coastal marsh, river delta, river mouth, designated Area Meriting Special Attention, game refuge, game sanctuary, or critical habitat area, will be required to undertake environmental monitoring of the fate and effects of the discharges. The monitoring is needed because the active natural transport processes in Cook Inlet will likely carry discharged materials from the development and production operations into these sensitive areas. Region 10 has identified a need for further information on the fate and effects of muds and cuttings discharges from long-term production and development operations.

The specifics of each monitoring program, including survey design, analytical techniques, participants, and reporting requirements, will be determined by EPA, Region 10, in consultation with the South Central Regional Office of ADEC and the permittee. Monitoring shall include, but not be limited to, relevant hydrographic, sediment hydrocarbon, and heavy metal data from surveys conducted before and during drilling mud disposal operations and for at least one year after drilling operations cease.

Region 10, in consultation with ADEC, will consider granting exemptions from this monitoring requirement if the permittee can satisfactorily demonstrate that information on the fate and effects of the discharge is available and/or the discharge will have insignificant impacts on the area of biological significance.

5. *BOD and suspended solids.* As part of its certification under Section 401 of the Act, the State of Alaska will require that sanitary waste discharge to state waters comply with the following limits on BOD and suspended solids:

For 30 consecutive day, 30 mg/l mean.
For 7 consecutive days, 45 mg/l mean.
For a 24 hour period, 60 mg/l mean.

F. Discharge Monitoring Study

Region 10 has limited data on discharges from development and production facilities. In order to extend the data base for these discharges, a discharge monitoring study has been proposed in Part VI of the general permit. Development and production operators will have the choice of (1) participating in the proposed joint study, which would not examine discharges at every facility in detail, or (2) being subject to similar monitoring requirements on each of the operators' individual facilities. The advantage of the larger study is that operators would have a single contractor undertake sampling, analyses, and compilation of data at the various facilities. This would ensure uniformity of work procedures, and better data as an end result. It would also be less expensive for the operators than having to arrange that the work be done for each of their facilities.

1. *Deck drainage.* Samples of deck drainage shall be collected from two platforms for 1 year, under a variety of operational and ambient weather conditions. Samples will be analyzed for oil and grease, and for total phenols. In addition, operators must report information on products present in significant amounts in deck drainage. Region 10 has discharge data which indicate that oil and grease may be as high as 450 mg/l, and phenols as high as 60 mg/l, in discharges from production platforms. The monitoring requirements would increase whether such concentrations occur on a routine basis, and the relationship of operational and weather factors to those concentrations.

2. *Non-contact cooling water and desalination wastes.* Samples of both wastes shall be collected bimonthly at all platforms for 1 year. Samples will be analyzed for BOD, COD, and biocides which may be present in the discharges. BOD and COD were high in some production discharges. Region 10 wishes to investigate how widespread biocide usage and high BOD and COD levels are in these discharges from production facilities. Additionally, operators will be asked to monitor flow rate of these discharges, and to provide chemical inventories of products added to these discharges.

3. *Blowout preventer fluid, boiler blowdown, fire control system test water, uncontaiminated ballast water, uncontaminated bilgewater, and waterflooding discharges.* Flow rates shall be measured and chemical inventories reported for a period of 6 months for all platforms.

4. *Excess cement slurry, and mud, cuttings, cement at seafloor.* The total volumes shall be estimated and chemical inventories reported for the first five development or production wells drilled and completed under the general permit.

5. *Produced water.* In order to get a broader spectrum of data on produced water in Alaska, sampling will be undertaken once each summer and in winter from the three shore-based facilities and three of the five platforms which discharge directly into Cook Inlet. The three flatforms shall include two oil platforms located on different fields, and the sole existing gas platform in Cook Inlet. Additionally, one of the oil platforms to be sampled in summer and winter shall be sampled in fall and spring of the same year.

Flow rates and chemical inventories shall be estimated for each sample. In addition, chemical analyses shall be performed on each sample as follows: ph; oil and grease; dissolved oxygen; BOD; COD; TOC; NH_3; salinity; total aromatic hydrocarbons; total naphthalenes; dimethylnaphthalenes; trimethylnaphthalenes; tetramethylnaphthalenes; xylene; benzene; ethylbenzene; naphthalene; toluene; phenol; 2,4-dimethylphenol; bis (2-ethylhexy) phthalate; anthracene; phenanthrene; zinc.

All of the pollutants including benzene and listed after benzene are priority pollutants which were found in at least 50% of produced water samples analyzed by EPA as part of a 30-platform survey in the Gulf of Mexico. These pollutants, along with xylene, have also been reported in Cook Inlet produced water discharges.

There are very few toxicity data available on produced water in general, and for Cook Inlet operations in particular. Toxicity testing would, therefore, also be required with adult and juvenile stages of the dock shrimp, *Pandalus danae*, which is an Alaskan species, and with the juvenile stage of the mysid, *Mysidopsis bahia*, which is a non-Alaskan standard test species.

6. *Well treatment fluids.* These fluids are among the most poorly characterized of production discharges. To increase the available information on them, the following requirements are included in the study.

First, the total volumes of fluid collected and discharged, the job type, and composition of the fluid shall be reported for the first ten discharged jobs or for each job for a period of 1 year, whichever is more. The first ten jobs to be discharged must be sampled and analyzed for pH, oil and grease, dissolved oxygen, BOD, COD, TOC, and salinity.

Second, there is a special concern that highly acidic well treatment fluids may leach greater amounts of metals from the formation. To investigate this concern, well treatment fluids for the first three acidizing jobs (with an initial pH of 4 or less) will be sampled and analyzed for cadmium, chromium, copper, mercury, zinc, and lead.

V. Other Legal Requirements

A. Oil Spill Requirements

Section 311 of the Act prohibits the discharge of oil and hazardous materials in harmful quantities. Routine discharges specifically controlled by the permit are excluded from the provisions of Section 311. However, this permit does not preclude the institution of legal action or relieve permittees from any responsibilities, liabilities, or penalties for other, unauthorized discharges of oil and hazardous materials which are covered by Section 311 of the Act.

B. Endangered Species Act

Based on information in the Preliminary Ocean Discharge Criteria Evaluation (PODCEs) for OCS Sales 55 and 60, and the Revised PODCE for Sale 88 and state lease sales in Cook Inlet, and on formation in the Environmental Impact Statements prepared for the federal lease sale areas, EPA has concluded that the discharges authorized by this general permit will neither jeopardize the continued existence of any endangered or threatened species nor adversely affect their criteria habitat. EPA is requesting comments from the U.S. Fish and Wildlife Service and the National Marine Fisheries Service and will consider their comments in making the final permit decision. EPA will initiate consultation should new information reveal impacts not previously considered, should the activities be modified in a manner beyond the scope of the original opinion, or should the activities affect a newly listed species.

C. Coastal Zone Management Act

EPA has determined that the activities authorized by this general permit are consistent with local and state Coastal Management Plans. The proposed permit and consistency determination will be submitted to the State of Alaska for state interagency review at the time of public notice. The requirements for State Coastal Zone Management Review and approval must be satisfied before the general permit may be issued.

D. Marine Protection, Research, and Sanctuaries Act

No marine sanctuaries as designated by this Act exist in the vicinity of the permit area.

E. State Water Quality Standards and State Certification

Since state waters are involved in the proposed general permit, the provisions of section 401 of the Act will apply. The portion of Cook Inlet receiving waters located within the territorial seas of the State of Alaska and shoreward of the inner boundary of the territorial seas are classified by the State Water Quality Standards as Class II A(i)(ii)(iii), B(i)(ii), C, and D for use in aquaculture; seafood processing and industrial water supply; water contact and secondary recreation; growth and propagation of fish, shellfish, aquatic life and witdlife; and harvesting for consumption of raw mollusks or other raw aquatic life.

F. Executive Order 12291

The Office of Management and Budget has exempted this action from the

review requirements of Executive Order 12291 pursuant to section 8(b) of that order.

G. Paperwork Reduction Act

EPA has reviewed the requirements imposed on regulated facilities in this draft general permit under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. Most of the information collection requirements of the permit have already been approved by the Office of Management and Budget (OMB) in submissions made for the NPDES permit program under the provisions of the Act. In addition, the environmental monitoring requirements pursuant to section 403(c) of the Act in Part II.B. of this permit are similar to the monitoring requirements that were approved by OMB for the recently issued Beaufort Sea general NPDES permit (June 7, 1984; 49 FR 23734) and the Norton Sound general permit (50 FR 23578, June 4, 1985). The final general permit will explain how the information collection requirements respond to any OMB or public comments.

H. The Regulatory Flexibility Act

After review of the facts presented in the notice of intent printed above, I hereby certify, pursuant to the provisions of 5 U.S.C. 605(b), that this general permit will not have a significant impact on a substantial number of small entities. This certification is based on the fact that the regulated parties have greater than 500 employees and are not classified as small businesses under the Small Business Administration regulations established at 49 FR 5024 et seq. (February 9, 1984). These facilities are classified as Major Group 13—Oil and Gas Extraction SIC 1311 Crude Petroleum and Natural Gas.

Dated: July 11, 1985.

L. Edwin Coate,

Acting Regional Administrator, Region 10.

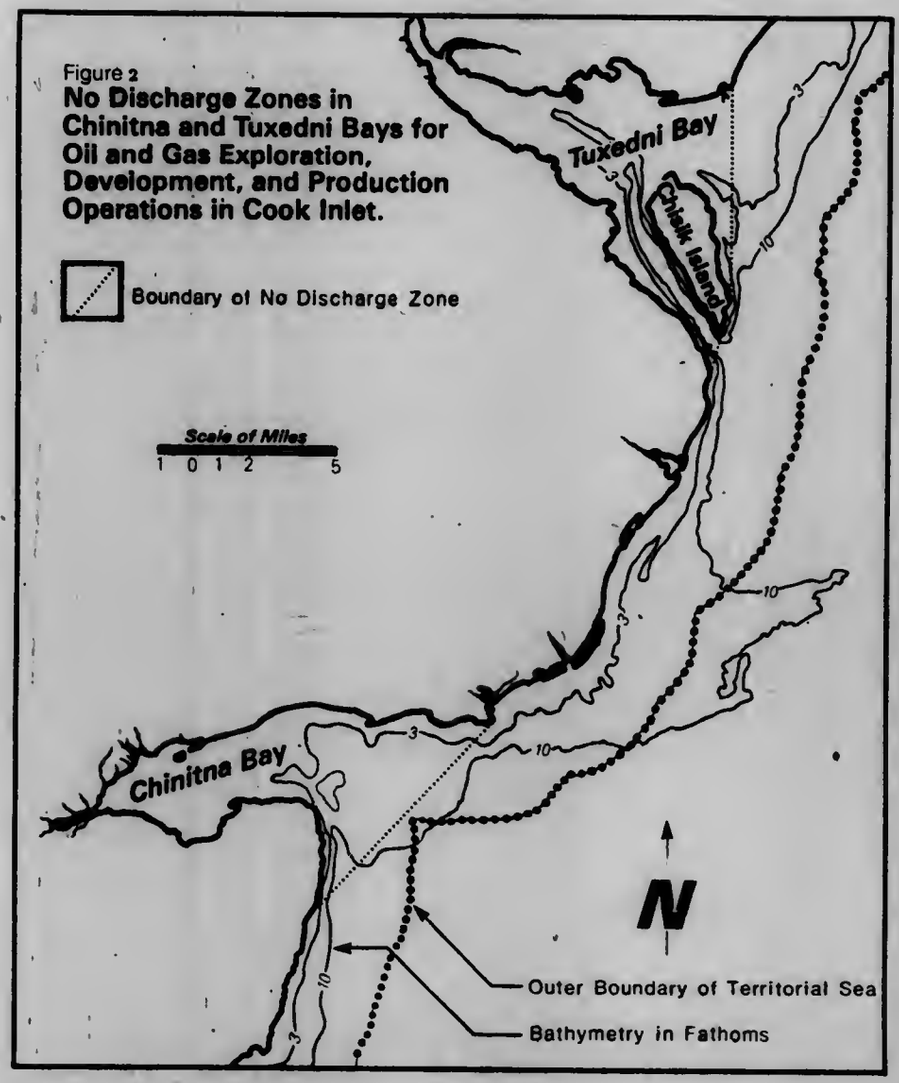
Applicability of Regulations to Discharges in Cook Inlet



[OPP-30100; FRL-2866-3]

Registration of Compound 1080

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's issuance of a conditional registration for sodium monofluoroacetate (Compound 1080) for use as livestock protection collar under EPA Registration Number 6704–85.

EFFECTIVE DATE: The Agency anticipates that judicial challenge of this action may be likely. For the purpose of assuring orderly judicial review, the EPA action herein shall become final and effective at 1 p.m., Eastern Daylight Time, on July 18, 1985.

FOR FURTHER INFORMATION CONTACT:

By mail: William H. Miller, Product Manager 16, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 211, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–2600).

SUPPLEMENTARY INFORMATION: The Environmental Protection Agency issued a conditional reistration on July 11, 1985 for sodium monofluoroacetate (Compound 1080) Livestock Collar, to the U.S. Department of the Interior, Fish and Wildlife Service, Washington, D.C. 20240, under EPA Registration Number 6704–85.

Dated: July 12, 1985.

J.A. Moore,

Assistant Administrator for Pesticides and Toxic Substances.

BILLING CODE 6560–50–M

[OPP–250066A; FRL #2864–3]

FIFRA Scientific Advisory Panel; Appointments

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Notice is given of the appointment of three members to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel established pursuant to section 25(d) of FIFRA, as amended (86 Stat. 973 and 89 Stat. 751; 7 U.S.C. 136 et seq.). Public notice of nominees along with a request for public comments appeared in the **Federal Register** of April 11, 1985 (50 FR 14286).

FOR FURTHER INFORMATION CONTACT:

By mail: Philip H. Gray, Jr., Executive Secretary, FIFRA Scientific Advisory Panel (TS–766C), Office of Pesticide Programs,

Office location and telephone number: Rm. 1115, Crystal Mall Building No. 2, Arlington, VA (703–557–7096).

SUPPLEMENTARY INFORMATION: Congress mandated that the Scientific Advisory Panel would consist of seven members, selected from candidates nominated by the National Science Foundation (NSF and the National Institutes of Health (NIH). Congress also mandated that the terms of appointment would be staggered. Accordingly, seven members were appointed in March 24, 1983, to the Panel (which, at the time, was constituted under the Federal Advisory Committee Act rather than FIFRA), with the terms of two members scheduled to expire on September 30, 1984, the terms of three members scheduled to expire on September 30, 1985, and the terms of the remaining two members scheduled to expire on September 30, 1986.

One panel member, Dr. Robert Menzer, whose term was scheduled to end September 30, 1985, resigned in July 1984 due to his impending prolonged absence from the country. As a result, EPA appointed three new Panel members on November 15, 1984.

One of those new members, Dr. Richard Griesemer, resigend in May 1985 as a result of his appointment to chair a subcommittee of EPA's Science Advisory Board. Thus EPA was again faced with the need for appointing three new Panel members. In accordance with the statutory requirement, lists of nominees were obtained from NIH and NSF, and a public notice of nominees, including biographical data, appeared in the **Federal Register** of April 11, 1985 (50 FR 142686). No comments were received in response to this Notice.

My decision to appoint the following three nominees to serve as members of the Scientific Advisory Panel is based upon several factors including the need for a disciplinary mix, depth of scientific experience and the need for wide geographic representation:

Thomas W. Clarkson, professor, radiation biology, biophysics, pharmacology and toxicology, University of Rochester. Expertise: toxicology. Born: August 1, 1932. Education: University of Manchester, BS, 1953; PhD (biochemistry) 1956. Professional experience: Medical Research Council fellow, University of Rochester, 1957–1961; science officer, Medical Research Council, United Kingdom, 1962–1964; senior fellow, Weizmann Institute, 1964–1965; associate professor, biophysics, pharmacology and radiation biology, 1965–1967; professor, radiation biology, biophysics, pharmacology and toxicology, University of Rochester, 1971-present; director, Environmental Health Science Center, 1975-present. Concurrent position: Member, Committee for Food Protection, National Academy of Science-National Academy of England, 1973–1976; Subcommittee on Toxicology, 1972–1976; member Toxicology Advisory Board, Food and Drug Administration, 1975–1977; member, Toxicology Study Section, NIH, 1976–1977. Societies: AAAS; Health Physics Society; British Pharmacology Society; Society of Toxicology; Chemical Society. Research: cellular physiology; reabsorption mechanisms in intestine and kidney; heavy metal toxicology; action of metals on cellular level in intestine, kidney and red blood cells.

John James Lech, professor of pharmacology, Medical College of Wisconsin, Milwaukee. Expertise: pharmacology. Born: June 21, 1940. Education: Rutgers University, Newark, BS 1962; Marquette University, PhD (pharmacology) 1967. Professional experience: from instructor to assistant professor, 1967–1974; associate professor, pharmacology, 1974–1980; professor, pharmocology and toxicolgy, Medical College of Wisconsin, 1980-present. Concurrent position: American Heart Association grant, Medical College of Wisconsin, 1972–1975. Societies: AAAS; Society of Toxicology; American Fisheries Society; American Society of Pharmacology and Experimental Therapeutics. Research: cardiac triglyceride metabolism; metabolism of foreign compounds by fish.

James Arthur Swenberg, head, biochemical, toxicology and pathology department, Chemical Industry Institute of Toxicology. Expertise: Veterinary pathology. Born: January 15, 1942. Education: University of Minnesota, DVM, 1966; Ohio State University, MS, 1968; PhD (veterinary pathology), 1970. Professional experience: NIH trainee in pathology, Ohio State University, 1966–1970; research associate, 1970; assistant professor, 1970–1972; associate professor, 1972; research scientist in pathology, UpJohn Company, 1972–1977; head, biochemical, toxicology, and pathology, Chemical Industrial Institute of Toxicology 1978-present. Concurrent position: consultant, Battelle Memorial Institute, 1971–1972. Societies: American Association of Cancer Research; AAAS; American Association of Neuropathologists; American College of Veterinary Pathologists. Research:

cancer research, including chemical carcinogenesis, neurooncogenesis and chemotherapy, and short-term test for carcinogens; DNA damage/mutagenesis; improved toxicology and data handling methods.

Meetings of the Scientific Advisory Panel are always announced in the **Federal Register** at least 15 days prior to each meeting. It is expected that the next meeting will take place on July 8 and 9, 1985.

Dated: July 3, 1985.

A. James Barnes,

Deputy Administrator.

BILLING CODE 6560–50–M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–002827–003.
Title: Alameda Terminal Agreement.
Parties:
Encinal Terminals (Encinal)
Crescent Wharf and Warehouse Company (Crescent)

Synopsis: Agreement No. 224–002827–003 modifies the parties' basic agreement providing for Crescent's lease of certain property at Alameda, California, to be operated as a public marine terminal. The amended agreement restates the basic agreement, and extends the term of the lease to September 30, 1987, and thereafter on a year to year basis. The amount of rent paid by Crescent to Encinal will be altered, and changes will also be made in the alteration and improvements clause of the agreement. Various other minor changes will be made in the clauses of the agreement.

Agreement No.: 224–010780.
Title: Seattle Terminal Agreement.
Parties:
Port of Seattle (Port)
Matson Terminals, Inc. (Matson)

Synopsis: The agreement provides that the Port will lease to Matson 15 acres of marine container yard with improvements, including 800 feet of vessel berth, and the preferential use of one container crane at the Port's Terminal 18. The term of the lease is for 2 years. Up to 2 acres can be added to the premises without amending the lease. Matson shall use the premises for the loading and discharging of vessels of Matson Navigation Company and other ocean carriers who are its customers. This lease shall terminate the current lease covered by Agreement No. T–4049, as amended.

Dated: July 12, 1985.

By Order of the Federal Maritime Commission.

Bruce A. Dombrowski,

Acting Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Canebrake Bancshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than August 8, 1985.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Canebrake Bancshares, Inc.*, Uniontown, Alabama; to become a bank holding company by acquiring 80 percent of the voting shares of Canebrake Bank, Uniontown, Alabama.

2. *The Nashville Holding Company*, Nashville, Georgia; to acquire 80.42 percent of the voting shares of Adel Banking Company, Adel, Georgia.

B. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vic President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Mid-South Bancorp, Inc.*, Franlin, Kentucky; to acquire 100 percent of the voting shares of Adairville Banking Company, Adairville, Kentucky.

C. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *Arlington Commonwealth Corporation*, Arlington, Texas; to acquire 100 percent of the voting shares of Mercantile National Bank of Arlington, Arlington, Texas.

D. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *First Commerce Bancorp, Inc.*, Phoenix, Arizona; to become a bank holding company by acquiring 100 percent of the voting shares of First Commerce National Bank, Phoenix, Arizona (in organization).

Board of Governors of the Federal Reserve System, July 11, 1985.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6201–01–M

Centennial Beneficial Corp.; Notice of Application To Engage de Novo in Permissible Nonbanking Activities.

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted througout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for

inspection at the offices of the Board of Governors. Interested persons may

No additional information or routine uses are created. As no new information

DEPARTMENT OF HEALTH AND

policy interpretations or amendments to regulations, we are not providing a

Congress, 2nd session, June 23, 1984) for

schedule for Part B laboratory services

inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 6, 1985.

BILLING CODE 6210-01-M

GENERAL SERVICES ADMINISTRATION

Report on Revised System of Records Under the Privacy Act of 1974

AGENCY: General Services Administration.

ACTION: Notification of revised system of records.

SUMMARY: The purpose of this document is to give notice, under the provisions of the Privacy Act of 1974, 5 U.S.C. 552a, of intent to revise a system of records being maintained by GSA. The system of records, Contracted Travel Services Program, GSA/GOVT-4, is revised to change the retention and disposal requirements of travel agencies' records. No additional information or routine uses are created. As no new information is being collected by GSA, the proposed revision is not considered as being within the purview of the provisions of 5 U.S.C. 552a(o) which would require submission of an altered report to Congress and the Office of Management and Budget.

DATES: Any interested party may submit written comments about this revised system. Comments must be received on or before the 30th day following publication of this notice. The routine use will become effective without further notice on the 30th day following publication of this notice unless comments are received that would result in a contrary decision.

ADDRESS: Address comments to General Services Administration (ATRAI), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Mr. William Hiebert, GSA Privacy Act Officer, telephone (202) 535-7647.

Background

The system of records, Contracted Travel Services Program, GSA/GOVT-4, is being revised to change the retention and disposal requirements for travel agencies' records from according to their needs to not longer than 3 years. This system of records notice was published in the **Federal Register** on May 15, 1985, 50 FR 20294.

The amended system of records is as follows:

GSA/GOVT-4

SYSTEM NAME:

Contracted Travel Services.

* * * * *

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

* * * * *

RETENTION AND DISPOSAL:

Records kept by the Federal agency are held for 3 years and then destroyed. Records kept by the travel agency are held and destroyed no longer than 3 years.

* * * * *

Dated: July 9, 1985.

Johnny T. Young,

Acting Director, Information Management Division.

Health Care Financing Administration

[BERC-298-GN]

Medicare and Medicaid Programs; Deficit Reduction Act of 1984; Information Notice on Medicare and Medicaid Amendments

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: General notice.

SUMMARY: This notice describes briefly some of the provisions of Title III of Division B of the Deficit Reduction Act of 1984 (Pub. L. 98-369, enacted July 18, 1984). These provisions, referred to as the Medicare and Medicaid Budget Reconciliation Amendments of 1984, affect eligibility benefits, reimbursement, and administration of the Medicare and Medicaid programs. The provisions in this notice are, in whole or in large part, self-explanatory and are now or will soon be effective. These provisions are so clear and explicit that regulations are not required for their implementation.

DATES: *Effective date:* The effective date of each statutory provision is given in the "Supplementary Information" section of this document.

Comment period: since this notice merely contains a brief description of statutory changes and does not contain policy interpretations or amendments to regulations, we are not providing a specified period for receipt of comments. However, we will consider all comments received in our review of the need for regulations, administrative action, or departmental legislative initiatives.

ADDRESS: Address comments in writing to: Health Care Financing Administration, Department of Health and Human Services, Attention: BERC-298-GN, P.O. Box 26676, Baltimore, Maryland 21207.

In commenting, please refer to file code BERC-298-GN.

If you prefer, you may deliver your comments to Room 309-G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C., or to Room 132, East High Rise Building, 6325 Security Boulevard, Baltimore, Maryland.

Comments will be available for public inspection as they are received, beginning approximately three weeks after publication, in Room 309-G of the Department's offices at 200 Independence Avenue SW., Washington, D.C., on Monday through Friday of each week from 8:30 a.m. to 5:00 p.m. (202-245-7890).

FOR FURTHER INFORMATION, CONTACT: Matt M. Plonski, (301) 594-9710.

SUPPLEMENTARY INFORMATION:

Background

On July 18, 1984, the Deficit Reduction Act of 1984, Pub. L. 98-369, was enacted. Title III of Division B of this Act (the Medicare and Medicaid Budget Reconciliation Amendments of 1984) added a number of new provisions that affect beneficiaries and providers of services, as well as State agencies and fiscal intermediaries involved in the operation of the Medicare and Medicaid programs.

This notice describes briefly some of the provisions of the new legislation relating to the Medicare and Medicaid programs that are sufficiently complete and clear that we believe they can take effect without issuance of regulations. This notice is not intended to be an exhaustive listing of new provisions that are self-implementing, nor is it intended to represent the complete text of the provisions. We are providing a summary of these provisions, along with budget estimates that reflect the impact of the provisions, to give notice to program administrators, providers of services, beneficaries, and the general public that they are being implemented. Readers are encouraged to review the Act itself and accompanying reports (e.g., see the Conference Report to accompany H.R. 4170, H.R. Report No. 98-861, 98th Congress, 2nd session, June 23, 1984) for information of interest to them. We are also incorporating many of these provisions in conforming regulations and program issuances.

There are provisions in the new law that conflict with current regulations, or portions of current regulations. To the extent that the new statutory provisions conflict with our existing regulations, the provisions of the new law supersede those portions of the regulations. Other portions of the same regulations and all other existing regulations remain in effect.

We note that with respect to all Medicaid provisions that are self-implementing, States may adopt their own lawful interpretation of these new provisions, unless and until regulations offering a contrary interpretation are adopted on those subjects or different interpretations are otherwise issued by the Department. This document describes the provisions as enacted. Readers should be aware that legislation is pending which could further modify several of these provisions.

Summary of Specific Provisions

(The section numbers cited before each item refer to the provisions of the Deficit Reduction Act of 1984.)

1. *Section 2302—Medicare Part B premium set at 25 percent of progrom costs for two calendar years (1986 and 1987).* This provision extends the existing temporary provision, which sets the monthly premium paid by enrollees at an amdunt equal to 25 percent of the Supplementary Medical Insurance program costs for aged beneficiaries through calendar years 1986 and 1987. However, this section also provides that if there is no social security cost-of-living adjustment (COLA), an individual's monthly Part B premium would not be increased for that year above the amount for the prior December. If there is a social security COLA, a January increase in premium for a beneficiary who is entitled to Social Security benefits for the prior November and December may not reduce the beneficiary's social security monthly payment received in January below the level of the payment received in December. This provision applies to calendar years 1986 and 1987.

Amends: Section 1839(e) of the Social Security Act (the Act).

Adds: Section 1839(f) to the Act.

Effective: For premiums for months beginning January 1986.

Budget Impact: $0 (FY 85); Savings of $439 million (FY 86).

2. *Section 2303—Payment for clinical diagnostic laboratory services.* This provision requires establishment of a fee schedule for Part B laboratory services furnished on or after July 1, 1984, except for services furnished by a hospital or performed by a skilled nursing facility for its inpatients. The fee schedule for independent clinical laboratories, and for laboratory services conducted in physicians' offices is to be established at 60 percent of the prevailing charge for the 12-month period beginning July 1, 1984. For hospital-based laboratory services furnished to hospital outpatients, the fee schedule is set at 62 percent of the prevailing charges. Any additional adjustments, such as those due to medical emergencies, low volume high-cost tests, and wage variations will be addressed in the rulemaking process.

Assignment is mandatory for independent laboratories in order to have payment made for their services under Part B of Medicare. When assignment is accepted, or when the service is furnished by a Medicare "provider," the payment will be 100 percent of the lesser of the billed charge or the fee schedule amount. When assignment is not accepted by a physician, the usual coinsurance and deductible provisions of Medicare apply.

The amendments made by this section also provide that, in the case of assigned claims, and in the case of claims for services furnished by a "provider of services" on an outpatient basis, payment may be made only to the person or entity which performed or supervised the performance of the test with two exceptions:

- Payment may be made to another physician who shares his or her medical practice with the physician who performed or supervised the performance of the test.
- Payment for a clinical diagnostic laboratory test performed at the request of a laboratory by another laboratory may be made to the referring laboratory.

In the case of unassigned claims, payment may be made to the beneficiary on the basis of an itemized bill from the person or entity which performed or supervised the performance of the test.

In addition, when hospitals are operating under a waiver granted under section 602(k) of the Social Security Amendments of 1983, Pub. L. 98-21, payment will continue to be made to the outside supplier under Part B reasonable charge methodology, rather than in accordance with fee schedules. Under this waiver, payment will continue on the basis of reasonable charges, except that when the laboratory accepts assignment, payment will be 100 percent of the reasonable charge, and

coinsurance and deductibles do not

economic index adjustment for

Act, which reschedule the annual

Budget Impact: $ Undetermined (FY

Budget Impact: $ Negligible (FY 84-

Amends: Sections 1816(c), (e)(4), and

VOL 50 ISS 137 JL 17 1985 UMI

coinsurance and deductibles do not apply.

The provision is also applicable to the Medicaid program. For calendar quarters beginning October 1, 1984, Federal matching funds will not be available to the extent a State paid more for laboratory test than would be paid under the Medicare fee schedule.

Amends: Sections 1833(a)(1)(D); 1833(a)(2); 1833(b); 1833(h); 1842(h); 1866(a)(2)(A); 1902(a)(42), (43), and (44); 1903(i)(6) and (7) of the Act.

Effective: July 1, 1984, for Medicare provisions; October 1, 1984, for Medicaid provisions.

Budget Impact: Savings of $30 million (FY 84); $135 million (FY 85).

3. *Section 2305—Elimination of special payment provisions for preadmission diagnostic testing.* These amendments repeal certain provisions of sections 932 and 942 of the Omnibus Budget Reconciliation Act of 1980 (Pub. L. 96-499). These sections authorized 100 percent Medicare Part B reimbursement, subject to the applicable Part B deductible, on a reasonable cost or charge basis for preadmission diagnostic testing, either in a hospital's outpatient department or in a physician's office within seven days before a hospital admission.

These amendments do not prohibit payment under Medicare Part B, subject to applicable copayments, for preadmission diagnostic testing performed in a physician's office or in a hospital's outpatient department, to the extent that testing is otherwise reimbursable under current regulations.

Repeals: Amendments enacted by section 932 and, in part, section 942 of Pub. L. 96-499, The Omnibus Budget Reconciliation Act of 1980.

Amends: Section 1833(a)(1), (a)(2), (a)(3), (a)(4), (a)(5), 1833(b), and 1833(i)(3) of the Act.

Effective: July 18, 1984.

Budget Impact: $ Negligible (less than $1 million) (FY 84-85).

4. *Section 2306—Limitation of physician fee prevailing and customary charge levels; Participating physicians and suppliers.* Section 2306, in part, limits Medicare customary and prevailing charges for physicians' services for a 15-month period beginning on July 1, 1984, and ending on September 30, 1985, to the level in effect for the period July 1983-June 1984. Future updates of customary and prevailing charges will take effect October 1 instead of July 1 of each year beginning after 1984. The data to be used for any such updates will be charges for services in the period April 1 to March 31 preceding the update. When prevailing charges are increased by the economic index adjustment for physicians' services furnished after September 1985, there will be no "catch-up" for the economic index adjustments that are not made during the limitation period.

We have issued instructions relating to the process for physician enrollment as Medicare "participating physicians"—that is, physicians who voluntarily enter into an agreement with the Secretary to accept assignment for all Medicare claims during 12-month periods beginning October 1, 1984. Section 2306(c) enacted sections 1842 (h), (i), and (j) of the Social Security Act, which contains provisions governing "participating physicians." Under these amendments, participating physicians will be allowed to increase their actual charges during the 15 month period and have these recognized in the calculation of their customary charges effective with the October 1, 1985, and October 1, 1986 updates. Nonparticipating physicians are prohibited under the new provision from charging Medicare beneficiaries more for services during the period July 1, 1984, through September 30, 1985, than they charged for services in the period April 1, 1984, through June 30, 1984. Any increases in their actual charges for services furnished during the period July 1, 1984, through September 30, 1985, will be excluded from the computation of the physician's customary charges in the October 1, 1985, and October 1, 1986 updates. In addition, a nonparticipating physician who knowingly and willfully increases his charges in violation of this charge limitation is potentially subject to civil money penalties (up to $2,000 per violation); assessments of up to double the amount of each improper charge; as well as exclusion from the Medicare program for up to 5 years under the provisions of section 1862(d) of the Act. A participating physician who violates his participation agreement is potentially liable to criminal penalties under section 1877(d) of the Act. A participating physician is also subject to assessments of up to double each improper charge, and civil money penalties up to $2,000 per violation under section 1128A(a)(2) of the Act.

This section also establishes the concept of participating suppliers—suppliers who agree to enter into an agreement to accept assignment for all their Medicare claims during 12 month periods, beginning October 1 of each year.

Amends: Sections 1128A(a)(2), 1842(b); and 1877(d) of the Act.

Adds: New section 1842(b)(4), (h), (i), and (j).

Effective: July 1, 1984, except for provisions of section 1842(b)(3) of the Act, which reschedule the annual update, and apply to services furnished beginning October 1, 1985.

Budget Impact: Savings of $75 million (FY 84); $350 million (FY 85).

5. *Section 2314—Revaluation of assets.* The amendments made by this section limit the increase in capital-related cost reimbursement to a new owner that would result from the revaluation of hospital or skilled nursing facility (SNF) assets acquired on or after July 18, 1984, unless an enforceable agreement to acquire the assets was entered into before that date. The capital-related cost to the new owner will be based on the lesser of: (a) Historical cost (the allowable acquisition cost to the owner of record as of July 18, 1984, or, in the case of an asset not in existence as of that date, the first owner of record of the asset after that date), or (b) the acquisition cost of the asset to the new owner. The amendments also prohibit payment for the costs (including legal fees, accounting and administrative costs, travel costs and the costs of feasibility studies) attributable to the negotiation or settlement of the sale or purchase of any capital asset, by acquisition or merger, for which any payment has previously been made under Medicare. The Secretary is required to continue recapture of depreciation as under current policy. This provision applies to both hospitals and SNFs participating in Medicare.

The amendments also limit State Medicaid payments resulting from a change of ownership of a hospital, SNF or intermediate care facility (ICF). States are required to assure the Secretary that the methodologies used to establish payments to hospitals, SNFs or ICFs can reasonably be expected not to increase those payments more than they would increase under Medicare policy as a result of change of ownership of a facility.

Amends: Section 1902(a)(13) of the Act.

Adds: Section 1861(v)(1)(O) to the Act.

Effective date for Medicare: Changes in ownership occurring on or after July 18, 1984.

Effective date for Medicaid: Effective with medical assistance furnished on or after October 1, 1984, with respect to changes in ownership occurring on or after July 18, 1984. When State legislation is necessary, the State will not be considered out of compliance with Title XIX solely on the basis of section 1902(a)(13)(B) until the first day of the first calendar quarter after the close of the first regular State legislative session that begins after July 18, 1984.

Budget Impact: $ Undetermined (FY 84-85).

6. *Section 2318—Emergency room services.* This provision establishes a statutory definition of "bona fide emergency services" under Medicare for purposes of the exemption from special limits on hospital outpatient services and associated physicians' services. "Emergency services" are defined as "services provided in a hospital emergency room after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) such that the absence of immediate medical attention could reasonably be expected to result in—(I) placing the patient's health in serious jeopardy; (II) serious impairment to bodily functions; or (III) serious dysfunction of any bodily organ or part."

Amends: Section 1861(v)(1)(K) of the Act.

Effective date: July 18, 1984.

Budget Impact: $ Negligible (FY 84-85).

7. *Section 2321—Cost sharing for durable medical equipment as a home health benefit.* This provision substitutes coverage of durable medical equipment for coverage of the use of medical appliances as a home health benefit and makes Medicare payment for this equipment consistent with existing payment rules that require Medicare enrollees to pay a 20 percent coinsurance on durable medical equipment furnished by medical equipment suppliers other than home health agencies.

Amends: Sections 1814(b); 1833(a)(2)(A); 1833(a)(2)(B); 1866(a)(2)(A)(ii); 1833(f)(1), (f)(2), (f)(3); 1861(m)(5); 1861(s)(8); 1861(cc)(1)(G); and 1814(j)(2).

Adds: Sections 1814(k), 1861(n).

Redesignates: Revised section 1833(f) as section 1889.

Effective date: July 18, 1984.

Budget Impact: $ Negligible (FY 84), savings of $6 million (FY 85).

8. *Section 2324—Coverage of hemophilia clotting factor.* This provision makes an exception to the exclusion of drugs and biologicals under Medicare to permit coverage for blood clotting factors, and the supplies necessary for administration of the clotting factors for hemophilia patients competent to use these factors to control bleeding without medical or other supervision. This expansion of coverage is subject to utilization controls that the Secretary may develop as deemed necessary.

Amends: Section 1861(s)(2) of the Act.

Adds: Section 1861(s)(2)(I) of the Act.

Effective: July 18, 1984.

Budget Impact: $ Negligible (FY 84-85).

9. *Section 2325—Payment for debridement of mycotic toenails.* This section places a restriction on payments under Part B of Medicare for a physician's care of toenails with a fungal infection (i.e., debridement of mycotic toenails). Payment may not be made for services furnished more frequently than once every 60 days, unless the medical necessity for more frequent treatment is documented by the billing physician.

Effective: July 18, 1984.

Budget Impact: $0 (FY 84-85).

10. *Section 2326—Contracts for Medicare claims processing.* This section includes the following self-explanatory provisions.

A. *Provider nomination* (section 2326(a), in part). Section 2326 included provisions whereby the Secretary may use competitive bidding to replace a contractor that over a period of time has been in the lowest 20th percentile as measured by the Secretary's cost and performance criteria (section 2326(a)). In FY 85 and again in FY 86, the Secretary may enter into two intermediary and two carrier agreements based on competitive bidding.

The Secretary may waive the right of a provider to nominate an intermediary of its choice when a contract for fiscal intermediary services is competitively bid, and for the duration of the competitively-bid contract. This new authority is in addition to existing authority to assign and reassign a provider where the Secretary determines that it would result in more effective administration of the program. The new authority may be applied to not more than two fiscal intermediary agreements during each of the Federal fiscal years 1985 and 1986.

B. *Cost reimbursement* (section 2326(d)). This section provides that, in determining an intermediary's or carrier's necessary and proper cost of administration, the Secretary will take into account the amount that is reasonable and adequate to meet the costs that must be incurred by an efficiently and economically-operated intermediary or carrier in carrying out the terms of its agreement.

C. *Other provisions.* In addition, section 2326(b) requires that the Secretary reduce the number of designated regional intermediaries for home health agencies to no more than 10, to be completed within 3 years.

Section 2326(c) provides that performance standards and criteria for fiscal intermediaries and carriers shall be published in the Federal Register for public comment prior to implementation.

Amends: Sections 1816(c), (e)(4), and (f); 1842(b)(2) and (c) of the Act.

Effective: July 18, 1984, except that the amendments made by section 2326(d) apply to agreements and contracts entered into or renewed after September 30, 1984.

Budget Impact: $0 (FY 84); Savings of $12 million (FY 85).

11. *Section 2331—Repeal of exclusion of for-profit organizations from research and demonstration projects.* This provision removes a restriction so that the Secretary may enter into research and demonstration projects with organizations that are operated for profit. Certain provisions of prior law permitted the Secretary to award the research and demonstration projects they authorized only to States, public or other non-profit organizations.

Amends: Section 1110(a)(1) of the Act, and section 402(a)(1) of Pub. L. 90-248, as amended.

Effective: July 18, 1984.

Budget Impact: $0.

12. *Section 2335—Repeal of special tuberculosis treatment requirements under Medicare and Medicaid.* This amendment repeals special conditions and requirements applicable to coverage of services provided to Medicare and Medicaid patients by institutions which primarily provide diagnosis and treatment of tuberculosis. These special conditions were originally intended to assure that the services provided by such institutions were not custodial and could reasonably be expected to improve the patient's condition or result in the condition being noncommunicable. The amendment also eliminates the special provider category for tuberculosis hospitals.

Amends: Sections 1814(a); 1861(e); 1861(j); 1863; 1866(b)(3); 1866(d); 1902(a)(28); and 1905(a)(1), (a)(4), (a)(14), (a)(15) and (a)(18).

Repeals: Section 1861(d) and (g).

Effective: July 18, 1984.

Budget Impact: $ Undetermined.

13. *Section 2338—Enrollment and Premium Penalty with Respect to Working Aged Provision.* This section provides for a special Medicare Part B enrollment period for those workers and spouses age 65 through 69 who elect an employer group health plan as primary payer for medical care. In these cases, the 7-month enrollment period will begin with the third month before the month an individual reaches age 70, or with the first month in which the individual is no longer enrolled in the employer group health plan (whichever results in earlier coverage). In calculating the premium surcharge (penalty) for late enrollment, months beginning with January 1983 in

which an individual was covered under Medicare Part A and an employer health

second amendment specifies that when the PRRB determines that it is without

Budget Impact: Costs of $20 million (FY 84) and $20 million (FY 85)

immediately contact the above named individual's

redelgated by the Assistant Secretary—

which an individual was covered under Medicare Part A and an employer health plan are excluded. This exclusion applies to the surcharge on premiums due September 1984. The amendment also specifies when Part B coverage begins under various circumstances.

Amends: Section 1839(b) of the Act.

Adds: Sections 1837(i) and 1838(e) to the Act.

Effective: September 1, 1984, for the premium surcharge; November 1, 1984, for the special enrollment provision.

Budget Impact: $Negligible.

14. *Section 2340—Qualifications of psychiatric hospitals.* This section repeals the statutory requirements that psychiatric hospitals be accredited by the Joint Commission on the Accreditation of Hospitals (JCAH) in order to participate in Medicare and Medicaid, and that psychiatric units which are distinct parts meet equivalent requirements. This section does not repeal existing requirements in section 1861(f)(2) of the Act that psychiatric hospitals meet the requirements applicable to hospitals in section 1861(e)(3)–(9) of the Act.

Amends: Sections 1861(f); and 1905(h)(1)(A).

Effective: July 18, 1984.

Budget Impact: $ Undetermined.

15. *Section 2341—Including podiatrists in definition of "physician" for outpatient physical therapy services and including podiatrists and dentists in the definition of "physician" for outpatient surgery performed in a physician's office.*

A. *Definition of "physician" for outpatient physical therapy services.* This provision includes podiatrists (when acting within the scope of their practice as defined by State law) in the Medicare definition of "physician" for the purpose of the requirement that outpatient physical therapy services are covered by Medicare only when the beneficiary is under the care of a "physician." The amendment also has the effect of permitting a podiatrist to establish and review a plan of care for physical therapy.

B. *Definition of "physician" for outpatient surgery performed in a physician's office.* This Medicare provision includes dentists and podiatrists in the definition of "physician" for purposes of qualifying for payment of facility services in connection with outpatient surgery performed under certain conditions in a physician's office.

Amends: Sections 1861(p)(1); 1832(a)(2)(F)(ii), and 1861(r)(3) of the Act.

Effective: July 18, 1984.

Budget Impact: $ Undetermined.

16. *Section 2342—Establishment by physical therapists of plans for physical therapy.* This amendment provides that Medicare payment for outpatient physical therapy services (which includes services furnished by a physical therapist in independent practice) furnished to a beneficiary may be made if either a physician or a qualified physical therapist providing the services establishes a plan of care. A physician would still be required to review periodically all plans of care.

Amends: Sections 1861(p)(2); 1835(a)(2)(C)(ii).

Effective: For plans of care established on or after July 18, 1984.

Budget Impact: $ Undetermined.

17. *Section 2344—Medicare recovery against certain third parties.* This provision makes explicit the Federal Government's right to recover Medicare payment directly from third parties where Medicare is the secondary payer.

The amendment states that the Government (1) is subrogated to the right of any individual or other entity to receive payment from a third party payer to the extent of the Medicare payment; (2) may join or intervene in an action related to the events that gave rise to the need for items and services for which Medicare has paid; and (3) can recover Medicare payments from:

Any entity responsible for payment (such as an employer or insurance carrier responsible for paying workers' compensation; an automobile, medical or no-fault insurer; any liability insurer; or an employer group health plan which is primary to Medicare); and

Any entity (such as a beneficiary, physician or provider) which has received payment from a third party which is primary to Medicare.

Amends: Section 1862(b) of the Act.

Effective: July 18, 1984.

Budget Impact: $ Undetermined.

18. *Section 2345—Confidentiality of accreditation surveys.* This provision extends the prohibition against disclosure by the Medicare program of accreditation survey information furnished by the JCAH, to similar survey information provided by the American Osteopathic Association or any other national accreditation association.

Amends: Section 1865(a) of the Act.

Effective: July 18, 1984.

Budget Impact: $ Undetermined.

19. *Section 2351—Judicial review of provider reimbursement review board decisions (PRRB).* One amendment made by this section specifies that those Medicare providers that brought a group appeal before the PRRB because of a common question of fact, or interpretation of law or regulation, must bring any judicial appeal as a group. A second amendment specifies that when the PRRB determines that it is without authority to decide a question of law or regulations, the provider's request for judicial review must be brought within 60 days after receipt of notification of the PRRB decision, rather than within 60 days of the decision.

Amends: Section 1878(f)(1) of the Act.

Effective: July 18, 1984.

Budget Impact: $ Undetermined.

20. *Section 2361—Medicaid coverage for pregnant women and young children.* This provision requires that States provide Medicaid coverage to the following groups: (1) Qualified pregnant women, defined to include a woman whose pregnancy has been medically-verified and who (a) would be eligible for AFDC (or would be eligible for AFDC if coverage under the State's AFDC plan included an unemployed parents program) if the child had been born to her and was living with her in the month of payment; or (b) is a member of a family that would be eligible for AFDC if the State's AFDC plan included an unemployed parents program; and (2) Qualified children, defined as those who are under 5 years of age, who were born after September 30, 1983, and who meet the income and resource requirements under the State's approved AFDC plan.

Amends: Section 1902(a)(10)(A)(i); and 406(g).

Adds: Section 1905(n).

Effective: October 1, 1984, except that when State legislation is necessary, the State will not be considered out of compliance with Title XIX solely on the basis of sections 1902(a)(10)(A)(i)(III) and 1905(n) until the first day of the first calendar quarter after the close of the first regular State legislative session that begins after July 18, 1984.

Budget Impact: Costs of $40 million (FY 85) and $105 million (FY 86).

21. *Section 2365—Increase in Medicaid ceiling amount for Puerto Rico, the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa.* This amendment raises the annual ceiling on the amount of Federal matching payments for Medicaid services to the following jurisdictions:

Jurisdiction	Federal ceiling
Puerto Rico	$63.4 million.
Virgin Islands	$2.1 million.
Guam	$2.0 million.
Northern Mariana Islands	$550,000.
American Samoa	$1.15 million.

Amends: Section 1108(c) of the Act.

Effective: for fiscal years beginning on or after October 1, 1983.

Budget Impact: Costs of $20 million (FY 84) and $20 million (FY 85).

Authority: Sec. 2302, 2303, 2305, 2306, 2314, 2318, 2321, 2324, 2325, 2326, 2331, 2335, 2336, 2340, 2341, 2342, 2344, 2345, 2351, 2361, and 2365 of Title III of Division B of the Deficit Reduction Act of 1984, Pub. L. 98–369.

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance; Program No. 13.773, Medicare-Hospital Insurance Program; and Program No. 13.774, Medicare-Supplementary Medical Insurance Program)

Dated: April 29, 1985.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

BILLING CODE 4120–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Availability of Final Environmental Impact Statement on the Proposed Norton-Tesuque 115 kV Transmission Line and Substation in Santa Fe County, NM

July 2, 1985.

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice advises the public that the Final Environmental Impact Statement (FEIS) on the proposed Norton-Tesuque 115 kV Overhead Transmission Line and Substation in Santa Fe County, New Mexico is available for public review. The Public Service Company of New Mexico is proposing to be granted a right-of-way from the existing Norton Station for approximately 9.1 miles east of a new substation site, in order to construct a 115 kV overhead transmission line. The project area is located approximately three miles north of Santa Fe, New Mexico.

DATES: Written comments are due 30 days from the date of this notice.

ADDRESSES: Comments should be addressed to Mr. Vincent Little, Area Director, Albuquerque Area Office, P.O. Box 8327, Albuquerque, New Mexico 87198.

FOR FURTHER INFORMATION CONTACT: Mr. William C. Allan, Area Environmental Quality Specialist, Albuquerque Area Office, Bureau of Indian Affairs, P.O. Box 8327, Albuquerque, New Mexico 97198, telephone (505) 766–3374. Individual wishing copies of this Final Environmental Impact Statement should immediately contact the above named individual.

SUPPLEMENTAL INFORMATION: The Bureau of Indian Affairs (BIA), Department of the Interior, has prepared a FEIS on its proposal to approve a right-of-way for the Public Service Company of New Mexico on lands belonging to the Pueblo of Tesuque.

This action is designed to provide reliable electrical service to an area of increasing development and will also result in impacts to the visual character of the area, effects upon wildlife, vegetative cover, erosion, lifestyles, property values and sales.

The principal alternatives under consideration that were analyzed and evaluated during planning are: A. No action, B. Approval of proposed rights-of-way and necessary construction for eight alternative routes, and C. Construction alternatives including: (1) Underground transmission lines and, (2) construction of overhead transmission lines with various materials and design alternatives.

Other Government agencies and members of the public contributed to the planning and evaluation of the proposal and the preparation of this Environmental Impact Statement (EIS). The Notice of Intent was published in the Federal Register on September 21, 1983. Three scoping meetings were held; one on September 15, 1983, (at Tesuque Pueblo, and two in Santa Fe on September 20, 1983, and October 25, 1983.) The October 25 meeting was announced in the Federal Register, while the September 20 meetings were announced in the Santa Fe New Mexican. Cooperating Agencies include the Bureau of Land Management, the U.S. Fish and Wildlife Service and the County of Santa Fe.

A public meeting was held for the purpose of receiving oral comments on March 27, 1985, in Santa Fe, New Mexico.

Dated: July 2, 1985.

Hazel E. Elbert,

Acting Deputy Assistant Secretary—Indian Affairs (Operations).

BILLING CODE 4310–20–M

Irrigation Operation and Maintenance Charges; Water Charges and Related Information on the Flathead Irrigation Project, MT

This notice of proposed operation and maintenance rates and related information is published under the authority delegated to the Assistant Secretary—Indian Affairs by the Secretary of the Interior in 230 DM 1 and redelgated by the Assistant Secretary—Indian Affairs to the Area Director in 10 BIAM 3.

This notice is given in accordance with § 191.1(e) of Part 191, Subchapter T, Chapter I, of Title 25 of the Code of Federal Regulations, which provides for the Area Director to fix and announce the rates for annual operation and maintenance assessments and related information of the Flathead Irrigation Project for Calendar Year 1985 and subsequent years.

This notice sets forth changes to the operations and maintenance charges and related information applicable to the Flathead Irrigation Project, St. Ignatius, Montana. These charges were proposed pursuant to the authority contained in the Acts of August 1, 1914 and March 7, 1928, (38 Stat. 583, 25 U.S.C. 382; 45 Stat. 21025 U.S.C. 387).

In compliance with the above, the operation and maintenance charges for the lands under the Flathead Irrigation Project, Montana, for the season of 1985 and 1986 and subsequent years until further notice, are hereby fixed as follows:

For the season of 1985 for lands not included in an Irrigation District but including land held in trust for Indians, the rate per acre for the various divisions are as follows:

Jocko	$11.26/acre
Mission Valley	$10.94/acre
Camas	$10.46/acre

For the season of 1986 for lands included in an Irrigation District, the Project charge per acre is as follows:

Jocko Valley Irrigation District	$6.49/acre
Mission Irrigation District	$8.65/acre
Flathead Irrigation District	$10.00/acre

Payments

The water charges become due on April 1 each year or as biannually billed. To all assessments on lands in non-Indian ownership, remaining unpaid 60 days after the due date, there shall be added a penalty of one and one-half percent per month, or fraction thereof, from the due date until paid. No water shall be delivered to any farm unit until all irrigation charges have been paid.

Wilford W. Bewker,

Acting Area Director.

Receipt of Petition for Federal Acknowledgement of Existence as an Indian Tribe

This is published in the exercise of authority delegated by the Secretary of

the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Land Managmenet, P.O. Box 1449, Santa Fe, New Mexico 87501. Copies of the

[A-19365]

Lands to be transferred from the

forms of appropriation under the public

the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Pursuant to 25 CFR 83.8(a)(formerly 25 CFR 54.8(a)) notice is hereby given that the Chukchansi Yokotch Tribe, c/o Ms. Karen Tex Morris, P.O. Box 277, Coarsegold, California 93614, has filed a petition for acknowledgment by the Secretary of the Interior that the group exists as an Indian tribe. The petition was received by the Bureau of Indian Affairs on May 9, 1985. The petition was forwarded and signed by members of the group's governing body.

This is a notice of receipt of petition and does not constitute notice that the petition is under active consideration. Notice of active consideration will be sent by mail to the petitioner and other interested parties at the appropriate time.

Under § 83.8(d) (formerly 54.8(d)) of the Federal regulations, interested parties may submit factual or legal arguments in support of or in opposition to the group's petition. Any information submitted will be made available on the same basis as other information in the Bureau of Indian Affairs files.

The petition may be examined by appointment in the Branch of Acknowledgement and Research, Code 440B, Bureau of Indian Affairs, Interior South Building Room 32, 1951 Constitution Avenue, N.W., Washington, D.C. 20245.

Sidney L. Mills,

Acting Deputy Assistant Secretary, Indian Affairs.

Winnemucca District Grazing Advisory Board; Meeting

Notice is hereby given in accordance with Pub. L. 92–163 that a meeting of the Winnemucca District Grazing Board will be held on September 5, 1985. The meeting will begin at 10:00 a.m. in the conference room of the Bureau of Land Management Office at 705 East Fourth Street, Winnemucca, Nevada.

The agenda for the meeting will include:

1. Review Proposed Range Improvement Projects (8100) and Set Priorities for FY 1986.
2. Update on current (FY85) Range Improvement Projects.
3. BLM response time for Range Improvement Requests.
4. Grazing permittee's responsibility for Range Improvement Maintenance Requirements.
5. Public Comments.

The meeting is open to the public. Interested persons may make oral statements for the Board's consideration. Anyone wishing to make an oral statement must notify the District Manager, 705 East Fourth Street, Winnemucca, Nevada 89445 by August 22, 1985. Depending on the number of persons wishing to make oral statements, a per person time limit may be established by the District Manager.

Summary minutes of the Board Meeting will be maintained in the District Office and available for public inspection (during regular business hours) within 30 days following the meeting.

Dated: July 9, 1985.

Rules of Conduct and Supplementary Rules Of Yuma District, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Designation of developed recreation area and establishment of supplementary rules.

SUMMARY: The following area is designated a developed recreation site for the purposes of applying the rules of conduct contained in 43 CFR 8365.2.

Area	Type	Location
1. Squaw Lake...	Campground.....	T. 15 S., R. 24 E., S. 5, (G&SRM).

In addition to the regulations contained in 43 CFR 8365.2, the following suplementary rules will apply to the developed recreation site listed above:

a. Reserving camping space is prohibited. Camping space will be allocated on a first come first served basis. Checkout time is 12 noon for overnight campers.

b. Campground speed limit is 10 miles per hour. Only street legal vehicles driven by licensed drivers may be operated on the site. Motorized vehicle free play is prohibited. Motorized vehicles will be used for access to and from the campsite only.

c. Permit receipts must be displayed so that they are plainly visible from the street side of trailers, campers, or other primary vehicle.

d. Trash must be deposited in bins. Dishes or clothes must not be washed in the restrooms. Water must not be dumped on the ground.

e. Cutting or damaging trees or plants is prohibited. No wood collecting is permitted.

f. Boats are prohibited in the swimming area and must be operated in a safe manner in the launching area. Squaw Lake is a no-wake zone. A maximum speed of 5 miles per hour is required.

EFFECTIVE DATE: August 23, 1985.

FOR FURTHER INFORMATION CONTACT: Hal Hallett, Outdoor Recreation Planner, Yuma District, Yuma Arizona 85364, (602) 726–6300.

SUPPLEMENTARY INFORMATION: The authority for establishing supplementary rules is contained in 43 CFR 8365.1–6. These rules will be available in each local office having jurisdiction over the lands, sites, or facilities affected. These rules will also be posted near and/or within the lands, sites, or facilities affected.

Dated: July 5, 1985.

J. Darwin Snell,

District Manager.

[CA 16173]

Land Exchange; Shasta/Trinity Counties, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, Exchange of Public Lands, Shasta County, California, CA 161673.

SUMMARY: The following described public land has been determined to be suitable for disposal by exchange under the provisions of Sec. 206 of the Act of October 21, 1976 (90 Stat. 2756; 43 U.S.C. 1716):

T. 33 N., R. 5 W., M.D.B. & M.
Sec. 35, SW¼NW¼SE¼
(containing 10 acres)

In exchange for these lands, the United States will acquire the following described lands from Robert F. Snell and Ila M. Snell, P.O. Box 84, Douglas City, California 96024:

T 33 N., R. 9 W., M.D.B. & M.
Sec. 13, SE¼NW4¼SW¼
(containing approximately 10 acres) and
Sec. 28, A parcel of land containing approximately 10.00 acre described by metes and bounds, lying within the NE¼

The purpose of this exchange is to acquire these private lands which have high public values for preservation and control of cultural significance, and recreation purposes. The subject private land lying in section 13 contains significant cultural values. The parcel in Section 28 lies along the Trinity River, a designated "recreation river" under the Wild and Scenic Rivers Act (P.L. 95–625). Acquisition is consistent with the approved Trinity River Recreation Area Management Plan (which provides for land tenure adjustments through exchange), and Redding Resource Area Land Use Plans.

The values of the lands to be exchanged are approximately equal; full equalization of values will be in accordance with regulations cited in 43 CFR 2201.3. Appraisal values will be available prior to consummation of the exchange at the BLM Area Office, Redding, California.

Lands to be transferred from the United States will be subject to the following reservations, terms, and conditions:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

Publication of this notice in the Federal Register segregates the public land described herein from all forms of appropriation under the public land laws, including the mining laws, for a period of two years from the date of first publication.

Evidence of title acceptable to the Department of Justice is required on private lands conveyed to the United States.

Detailed information concerning the exchange, including the Land Report, environmental assessment, and the report of non-federal participation, is available for review at the Redding Resource Area Office, 355 Hemsted Drive, Redding, California 96002.

DATE: For a period of 45 days from the date of first publication, interested parties may submit comments to Robert J. Bainbridge, Area Manager, Redding Resource Area.

ADDRESS: Comments should be sent to: Area Manager, Redding Resource Area, Bureau of Land Management, 355 Hemsted Drive, Redding, California 96002.

Objections will be reviewed by the California State Director, who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Robert J. Bainbridge, (916) 246–5325.

Dated: July 5, 1985.

Robert J. Bainbridge,

Redding Area Manager.

BILLING CODE 4310-DQ-M

[U–55635]

Realty Action; Sale of Public Lands in Kane County, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Under section 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716) public land described as Lot 5, Sec. 26, T. 40 S., R. 7 W., SLB&M, Utah, containing .69 acres, is proposed for direct noncompetitive sale to Keith and Ramona Walker at no less than fair market value. The lands described are hereby segregated from all forms of appropriation under the public land laws, including the mining laws, pending disposition of this action.

SUMMARY: The purpose of the sale is to dispose of public land that is difficult and uneconomical to manage by a government agency.

DATES: Comments will be accepted until September 5, 1985. The land would be offered for sale on September 25, 1985.

ADDRESS: Detailed information concerning the sale is available at the Kanab Area Office, 320 North First East, Kanab, Utah 84741, (801) 644–2672. Comments should also be sent to the same address.

SUPPLEMENTARY INFORMATION: The terms and conditions applicable to the sale are:

1. The sale will be for the surface estate only. Minerals will remain with the United States Government.
2. There is reserved to the United States a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 43 U.S.C. 945.
3. Title transfer will be subject to valid existing rights.

Any comments received during the comment period will be evaluated and the District Manager may vacate or modify this realty action. In the absence of any objections, this realty action notice will be the final determination of the Department of the Interior.

Dated: July 9, 1985.

Morgan S. Jensen,

District Manager.

Fish and Wildlife Service

Annual Waterfowl Status Meeting and Meetings of FWS Migratory Bird Regulations Committee

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meetings.

SUMMARY: The U.S. Fish and Wildlife Service, Office of Migratory Bird Management will conduct an open meeting to review the status of waterfowl populations and the 1985 fall flight forecast for ducks. The Service Regulations Committee will meet to develop 1985–86 waterfowl hunting regulations recommendations for presentation at the August 1 public hearing to be held in Washington, DC (as announced in the March 14, 1985, **Federal Register** at 50 FR 10277), and will meet immediately after the public

hearing to review the public comments presented at the hearing and develop

attended by persons outside the Department, the meetings of July 31 and

procedures are set out in revised § 250.34 of Title 30 of the CFR

Dated: July 9, 1985.

Minerals Management Service is

LEASE AND BLOCK NUMBERS

hearing to review the public comments presented at the hearing and develop proposed 1985–86 waterfowl hunting regulations frameworks.

DATES: Waterfowl Status Meeting, July 25, 1985; Service Regulations Committee Meetings, July 31, 1985 and August 1, 1985.

ADDRESS: The Waterfowl Status Meeting will be held at the Sheraton-Denver Airport Hotel in Denver, Colorado. The Service Regulations Committee Meetings will be held in Room 7000 A/B, Main Interior Building, 18th and C Streets, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Rollin D. Sparrowe, Chief, Office of Migratory Bird Management, Room 536 Matomic U.S. Fish and Wildlife Service, Department of the Interior, Washington, DC 20240, telephone (202) 254–3207.

SUPPLEMENTARY INFORMATION: On July 25 at 8:30 a.m. at the Sheraton-Denver Airport Hotel in Denver, Colorado, the U.S. Fish and Wildlife Service, Office of Migratory Bird Management will review for State and Federal officials and any other interested parties or individuals results of the various field investigations and data analyses that are used annually to determine the status of waterfowl populations and the fall flight forecast for ducks. The information presented will have a bearing on regulations and the regulatory proposals; however, the meeting is not a regulations meeting. Public comment will be limited to that which supplements the status information presented.

The U.S. Fish and Wildlife Service Migratory Bird Regulations Committee, including Flyway Council Consultants to the Committee, will meet in Washington, DC on July 31 at 8:30 a.m. and August 1 at 1:00 p.m. in Room 7000 A/B, Main Interior Building. The meeting on July 31 is to review discussions that occurred at the flyway council meetings and to discuss and develop recommendations for 1985–86 waterfowl hunting regulations to be presented at the public hearing to be held in Washington, DC on August 1 at 9:00 a.m. The August 1 meeting of the Service Regulations Committee is to review the public comments presented at the hearing and to determine on the basis of those comments whether any modifications need to be recommended to the Director in regard to the regulations recommendations presented at the hearing.

In accordance with Departmental policy regarding meetings of the Service Regulations Committee that are attended by persons outside the Department, the meetings of July 31 and August 1 will be open to public observation. Members of the public may submit to the Director written comments on the matters discussed.

Dated: July 12, 1985.

F. Eugene Hester,

Acting Director.

DATE: The subject DOCD was deemed submitted on July 2, 1985. Comments must be received within 15 days of the date of this Notice or 15 days after the Coastal Management Section receives a copy of the DOCD from the Minerals Management Service.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday). A copy of the DOCD and the accompanying Consistency Certification are also available for public review at the Coastal Management Section Office located on the 10th Floor of the State Lands and Natural Resources Building, 625 North 4th Street, Baton Rouge, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday). The public may submit comments to the Coastal Management Section, *Attention OCS Plans*, Post Office Box 44396, Baton Rouge, Louisiana 70805.

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service; Gulf of Mexico OCS Region; Rules and Production; Plans, Platform and Pipeline Section; Exploration/Development Plans Unit; Phone (504) 838–0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review. Additionally, this Notice is to inform the public, pursuant to § 930.61 of Title 15 of the CFR, that the Coastal Management Section/Louisiana Department of Natural Resources is reviewing the DOCD for consistency with the Louisiana Coastal Resources Program.

Revised rules governing practices and procedures under the Minerals Management Service makes information contained in DOCDs available to affected states, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: July 8, 1985.

John L. Rankin,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

Environmental Documents Prepared for Proposed Oil and Gas Operations on the Alaska Outer Continental Shelf

ACTION: Notice of availability of environmental documents prepared for Outer Continental Shelf (OCS) mineral prelease and exploration proposals on the Alaska OCS.

SUMMARY: The Minerals Management Service (MMS), in accordance with Federal regulations (40 CFR 1501.4 and 1506.6) that implement the National Environmental Policy Act (NEPA), announces the availability of NEPA-related environmental assessments (EA's) and findings of no significant impact (FONSI's) prepared by the MMS for the following oil and gas prelease and exploration activities proposed on the Alaska OCS. The listing includes all proposals for which environmental documents were prepared by the Alaska OCS Region in the 3-month period preceding this notice.

Activity/Operator.—Exploration Drilling Program for Beaufort Sea, Diapir Field (Sale 87) Union Oil Company, as operator for itself and others.

Location.—Union is proposing to drill up to 7 exploratory wells. Subsequent wells will depend upon the results of drilling, testing, and evaluation of the initial well. The location of Union's leases is described as follows:

LEASE AND BLOCK NUMBERS

Lease	Protraction No.	Block

Environmental Assessment.—No. AK–85–06.

FONSI Date.—April 19, 1985.

SUPPLEMENTARY INFORMATION: The MMS prepares EA's and FONSI's for proposals which relate to exploration for oil and gas resources on the Alaska OCS.

The EA's examine the potential environmental effects of activities described in the proposals and present MMS conclusions regarding the significance of those effects. The EA's are used as a basis for determining whether approval of the proposals constitutes major Federal actions that significantly affect the quality of the human environment in the sense the NEPA section 102(2)(C). A FONSI is prepared in the instances where the MMS finds that approval will not result in significant effects on the quality of the human environment. The FONSI briefly presents the basis of that finding and includes a summary of copy of the EA.

The FONSI and associated EA for the activity listed above are available for public inspection between the hours of 7:30 a.m. and 4:30 p.m., Monday through Friday at: Minerals Management Service, Alaska OCS Region Library, 949 East 36th Avenue, Room 502, Anchorage, Alaska 99508. Phone: (907) 261–4435.

Persons interested in reviewing specific environmental documents, or obtaining information about EA's and FONSI's prepared for activities on the Alaska OCS, are encouraged to contact the above listed MMS office.

This notice constitutes the public notice of availability of environmental documents required under the NEPA regulations.

Alan D. Powers,

Regional Director.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–221]

Certain Apparatus for the Disintegration of Urinary Calculi; Review and Partial Reversal of Initial Determination Amending Notice of Investigation to Name Additional Respondents

AGENCY: International Trade Commission.

ACTION: The Commission has determined to review and partially reverse an initial determination (ID) (Order No. 3) of the administrative law judge (ALJ) amending the notice of investigation to add as parties to the above-captioned investigation two involuntary respondents.

SUMMARY: The Commission has reversed that portion of the ID adding Med Inventio, A.G. (Med Inventio), and Karl Storz GmbH Co. (Karl Storz) as involuntary respondents and affirmed those portions of the ID denying joinder of Blackstone Ultrasonics, Inc. (Blackstone Ultrasonics) as an involuntary party and denying a request to dismiss the complaint for failure to include indispensable parties.

FOR ADDITIONAL INFORMATION CONTACT: Brenda A. Jacobs, Esq., Office of General Counsel, U.S. International Trade Commission, Washington, D.C. 20436, telephone 202–523–1627.

SUPPLEMENTARY INFORMATION: On May 2, 1985, respondent Richard Wolf Medical Instruments Corp. (Wolf Medical), filed a motion (Motion No. 221–1) seeking the dismissal of the complaint on the grounds that the Commission had failed to include three indispensable parties to the investigation and, in the alternative, a motion (Motion No. 221–2) seeking the addition of those three firms as "involuntary complainants" in the investigation. Wolf Medical alleged that (1) Blackstone Ultrasonics, the wholly-owned subsidiary of complainant Blackstone Corp., (2) Med Inventio, a Swiss licensee of complainant, and (3) Karl Storz, the West German manufacturer of a component of the product at issue, were indispensable parties to the investigation.

On June 6, 1985, an ID amending the notice of investigation was issued by the ALJ. The ID denied the motion to dismiss and granted, in part, the motion to add parties to the investigation. The ALJ added Med Inventio and Karl Storz as "respondents" in the investigation on the grounds that Med Inventio and Karl Storz may have some interest in the patent at issue and respondent Wolf Medical therefore should have the protection of having those companies named as parties. Complainant filed a petition for review.

Notice of this investigation was published in the **Federal Register** on April 24, 1985 (50 FR 16169).

Copies of the Commission's Action and Order, the Memorandum Opinion to be issued in connection therewith, the ID, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436, telephone 202–523–0161.

Issued: July 11, 1985.

[Investigation No. 337–TA–211]

Certain Electrical Connectors; Review and Affirm Initial Determination Terminating Two Respondents on the Basis of a Settlement Agreement

AGENCY: International Trade Commission.

ACTION: Termination of two respondents on the basis of a settlement agreement.

SUMMARY: The U.S. International Trade Commission has determined to review an initial determination (ID) terminating the above-captioned investigation as to respondents ODU-Kontakt GmbH & Co. KG (ODU-Kontakt) and Otto Dunkel GmbH. (Otto Dunkel) on the basis of a settlement agreement. The Commission has further determined to affirm the initial determination with a correction.

FOR FURTHER INFORMATION CONTACT: Judith M. Czako, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0359.

SUPPLEMENTARY INFORMATION: On May 21, 1985, complainant Thomas & Betts Corporation and respondents ODU-Kontakt GmbH & Co. KG and Otto Dunkel GmbH filed a joint motion to terminate the investigation as to ODU-Kontakt GmbH & Co. KG and Otto Dunkel GmbH on the basis of a settlement agreement. The Commission investigative attorney filled a response supporting the joint motion.

On June 5, 1985, the presiding administrative law judge issued an initial determination (ID) granting the first motion and terminating the investigation as to ODU-Kontakt and Otto Dunkel on the basis of the settlement agreement. On review the ID was corrected so as to describe the settlement agreement as pertaining to both patents in issue, rather than to only one such patent. Notice of the ID was published in the **Federal Register** of June 12, 1985. 50 FR 24713. No petitions for review were filed, nor were any agency or public comments received, with regard to the ID.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and Commission rules 210.53, 210.55, and 210.56 (49 FR 46,123 (November 23, 1984), to be codified at 19 CFR 210.53, 210.55, and 210.56).

Copies of the public versions of the ID and the settlement agreement and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161.

Issued: July 9, 1985.

[Investigation No. 337-TA-211]

Certain Electrical Connectors; Determination Not To Review Initial Determination Terminating Investigation

AGENCY: International Trade Commission.

ACTION: Termination of investigation.

SUMMARY: The U.S. International Trade Commission has determined not to review an initial determination (ID) terminating the above-captioned investigation.

FOR FURTHER INFORMATION CONTACT: Judith M. Czako, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202-523-0359.

SUPPLEMENTARY INFORMATION: On May 21, 1985, complainant Thomas & Betts Corporation filed a motion to terminate the investigation. The Commission investigative attorney filed a response supporting the motion.

On June 6, 1985, the presiding administrative law judge issued an initial determination (ID) granting the motion and terminating the investigation. No petitions for review were filed, nor were any agency comments received, with regard to the ID.

This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and Commission rule 210.53 (49 FR 46,123 (November 23, 1984), to be codified at 19 CFR 210.53).

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202-523-0161.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-213]

Certain Fluidized Bed Combustion Systems; Extend by 30 Days the Deadline for Determining Whether To Review an Initial Determination Designating the Investigation More Complicated

AGENCY: International Trade Commission.

ACTION: Extension of deadline for determining whether to review an initial determination (ID) designating the above-captioned investigation "more complicated."

SUMMARY: The Commission has determined to extend by 30 days, *i.e.*, until August 9, 1985, the deadline by which it must decide whether to review an ID designating the investigation more complicated.

FOR FURTHER INFORMATION CONTACT: Catherine R. Field, Esq., Office of the General Counsel, telephone 202-523-0161.

SUPPLEMENTARY INFORMATION: On January 10, 1985, the Commission voted to institute the investigation to determine whether there was a violation of section 337 in the unlawful importation into the United States of certain fluidized bed combustion systems, or in their sale, by reason of alleged: (1) infringement of claims 1, 4, 5, or 8 of U.S. Letters Patent 4,279,205; (2) infringement of claims 1, 2, 4, or 5 of U.S. Letters Patent 4,303,023; (3) misappropriation of trade secrets; and (4) fraudulent inducement to enter into a license agreement, the effect or tendency of which is to destroy or substantially injure an efficiently and economically operated industry in the United States and/or prevent the establishment of such an industry.

On June 4, 1984, complainant Wormser Engineering, Inc. (Wormser) filed a motion to designate the investigation more complicated within the meaning of § 210.59 of the Commission's rules. The motion was supported by the Commission investigative attorney (IA) and opposed by respondents ASEA STAL Inc., and ASEA STAL AB (collectively referred to as Stal Laval). On June 7, 1985, the ALJ issued an ID (Order No. 12) granting complainant Wormser's motion and designating the investigation more complicated.

On June 14, 1985, Stal Laval filed a petition for review of the ID. Wormser and the IA opposed Stal Laval's petition.

The authority for the Commission's action is contained in section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) and § 210.53 of the Commission's Rules of Practice and Procedure (19 CFR 210.53).

Copies of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202-523-0161.

Issued: July 11, 1985.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 22-47]

Import Investigations; Certain Tobacco

February 15, 1985.

Findings and recommendations

On the basis of the information developed in the course of the investigation, the Commission [1] finds that flue-, fire-, and dark air-cured tobacco and burley tobacco, in unmanufactured form, provided for in items 170.20, 170.25, 170.32, 170.35, 170.40, 170.45, 170.50, 170.60, and 170.80 of the Tariff Schedules of the United States (TSUS), are not being or are not practically certain to be imported into the United States under such conditions and in such quantities as to render or tend to render ineffective, or materially interfere with, the price support and production adjustment assistance programs for tobacco of the U.S. Department of Agriculture (USDA).

Background

On September 10, 1984, the Commission received a letter from the President directing it to make an investigation under section 22(a) of the Agricultural Adjustment Act (7 U.S.C. 624(a)) to determine whether flue-, fire-, and dark air-cured tobacco and burley tobacco, in unmanufactured form, wherever classified in the TSUS, are practically certain to be imported under such conditions and in such quantities as to materially interfere with the tobacco price support and production adjustment programs now conducted by the USDA.

Notice of the Commission's investigation was published in the **Federal Register** on October 11, 1984 (49 FR 39926). A public hearing was held in Washington, DC on January 3-4, 1985. All interested parties were afforded an opportunity to appear and to present information for consideration by the Commission.

This report is being frunished to the President in accordance with section 22(a) of the Agricultural Adjustment Act. The information in the report was obtained from responses to Commission questionnaires, from information presentd at the public hearing, from interviews by members of the Commission's staff, from information provided by other Federal agencies, and from the Commission's files, submissions by the interested parties, and other sources.

The Commission transmitted its report on the investigation to the President on February 15, 1985. A public version of the Commission's report, *Certain Tobacco* (investigation No. 22-47, USITC Publication 1644, 1985), contains the statements of the Commission and information developed during the investigation.

Issued: July 9, 1985.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 85-16999 Filed 7-16-85; 8:45 am]

BILLING CODE 7020-02-M

[1] Commissioner Eckes dissents in part. Commissioner Eckes finds that flue-cured and burley tobacco, in unmenufactured form, provided for in items 170.20, 170.25, 170.32, 170.35, 170.40, 170.45, 170.50, 170.60, and 170.80 of the TSUS are being or are practically certain to be imported into the United States under such conditions and in such quantities as to render or tend to render ineffective, or materially interfere with, the price support and production adjustment programs for tobacco of the U.S. Department of Agriculture (USDA). Commissioner Eckes recommends that the President proclaim a quota on imports of flue-cured tobacco of 64.4 million pounds per crop year (July 1-June 30, farm-sales weight) and a quota on imports of burley tobacco of 99.9 million pounds per crop year (October 1-September 30, farm-sales weight).

Continued

[Investigation No. 104-TAA-26]

Termination of Portions of the Investigation Regarding the Sugar Content of Certain Articles From Australia

AGENCY: International Trade Commission.

ACTION: Termination of portions of a review investigation under section 104(b) of the Trade Agreements Act of 1979, concerning the *Sugar Content of Certain Articles from Australia.*

EFFECTIVE DATE: July 12, 1985.

FOR FURTHER INFORMATION CONTACT: Stephen McLaughlin, Esq., (202-523-0421) Office of General Counsel, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436.

SUPPLEMENTARY INFORMATION: On September 9, 1982, the International Trade Commission received a request from the Government of Australia under section 104(b) of the Trade Agreements Act of 1979 seeking a review of the outstanding countervailing duty order on the sugar content of certain articles from Australia. On May 30, 1985, the Commission published a notice in the **Federal Register** instituting a review investigation (Inv. No. 104-TAA-26) of that outstanding countervailing duty order (50 FR 23006). On June 4, 1985, the Commission published a notice in the **Federal Register** requesting public comment on the proposed termination of all or part of investigation No. 104-TAA-26 (50 FR 23533). That notice stated that, in the absence of an expression of interest by interested parties representing an industry producing all or some of the subject products, the Commission may terminate the investigation as to those products.

During the public comment period, expressions of interest were filed by interested parties representing industries producing canned pears, canned peaches, canned fruit mixtures, and semi-processed confectionery containing chocolate or cocoa as provided for in TSUSA item numbers 156.25, 156.3045, 156.3050, 156.3065, and 156.47. An expression of interest was also filed by the Apricot Producers of California, but it was subsequently withdrawn. No other comments were received. Accordingly, the Commission has determined to continue its review investigation, but to narrow the scope of that investigation to canned pears, canned peaches, canned fruit mixtures, and semi-processed confectionery containing chocolate or cocoa as provided for in the TSUSA items listed above. The investigation has, therefore, been terminated as to all other products covered by the outstanding countervailing duty order with a finding that no domestic industry would be materially injured or threatened with material injury, nor would the establishment of a domestic industry be materially retarded, by reason of the revocation of the countervailing duty order. Accordingly the Commission is requesting that the Department of Commerce revoke the countervailing duty order as to those products.

Issued: July 12, 1985.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731-TA-202 (Final)]

Tubular Steel Framed Stacking Chairs From Italy

Determination

On the basis of the record [1] developed in the subject investigation, the Commission unanimously determines, pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)), that an industry in the United States is not materially injured or threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of imports from Italy of tubular steel framed stacking chairs, provided for in item 727.70 of the Tariff Schedules of the United States, which have been found by the Department of Commerce to be sold in the United States at less than fair value (LTFV).

Background

The Commission instituted this investigation effective March 14, 1985, following a preliminary determination by the Department of Commerce that imports of tubular steel framed stacking chairs from Italy were being sold at LTFV within the meaning of section 731

[1] The record is defined in § 207.2(i) of the Commission's rules of practice and procedure (19 CFR 207.2(i)).

of the Act (19 U.S.C. 1673). Notice of the institution of the Commission's investigation and issue a report by March 3, 1986.

as amended by 49 FR 32569, Aug. 15, 1984)).

and milepost F-262.6 near McKenzie, in

Protection Board's (MSPB) proposal to

of the Act (19 U.S.C. 1673). Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of April 10, 1985 (50 FR 14169). The hearing was held in Washington, DC, on June 3, 1985, and all persons who requested the opportunities were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on July 11, 1985. The views of the Commission are contained in USITC Publication 1722 (July 1985), entitled "Tubular Steel Framed Stacking Chairs from Italy: Determination of the Commission in Investigation No. 731–TA–202 (Final) Under the Tariff Act of 1930, Together With the Information Obtained in the Investigation."

By order of the Commission.

Issued: July 11, 1985.

BILLING CODE 7020–02–M

[332–217]

U.S. Trade-Related Employment; Notice of Investigation

AGENCY: International Trade Commission.

ACTION: Institution of an investigation under section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)) for the purpose of estimating U.S. trade-related employment.

EFFECTIVE DATE: July 11, 1985.

FOR FURTHER INFORMATION CONTACT: Dr. Donald Rousslang, Chief, Research Division, Office of Economics, U.S. International Trade Commission, Washington, D.C. 20436 (Phone 202–523–0075).

Background: The Commission instituted this investigation, No. 332–217, on its own motion. The study will provide estimates of the labor content of U.S. trade with all countries combined and of U.S. trade with particular partners, including Japan, the European Community, the newly industrializing countries, the less developed countries, and the nonmarket economies. These labor content estimates will be made for disaggregate industries. The study will update the results of investigation 332–154 which was issued in October 1983. The Commission plans to complete this investigation and issue a report by March 3, 1986.

Written submissions: Interested persons are invited to submit written statements concerning the investigation. Commercial or financial information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's Rules of Practice and Procedure (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. To be assured of consideration by the Commission, written statements should be submitted at the earliest practicable date, but no later than October 15, 1985. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on, (202) 724–0002.

By order of the Commission.

Issued July 11, 1985.

Kenneth R. Mason,

Secretary.

[Investigation No. 731–TA–212 (Final)]

Certain Welded Carbon Steel Pipes and Tubes From Venezuela

AGENCY: International Trade Commission.

ACTION: Rescheduling of the hearing to be held in connection with the subject investigation.

SUMMARY: The Commission hereby announces the rescheduling of the hearing to be held in connection with the subject investigation from 10:00 a.m. on August 22, 1985, to 10:00 a.m. on October 29, 1985.

For further information concerning the conduct of the investigation, hearing procedures, and rules of general application, consult the Commission's rules of practice and procedure, Part 207, subparts A and C (19 CFR Part 207), and Part 201, subparts A through E (19 CFR Part 201, as amended by 49 FR 32569, Aug. 15, 1984).

EFFECTIVE DATE: July 18, 1985.

FOR FURTHER INFORMATION CONTACT: Tedford Briggs (202–523–4612), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

SUPPLEMENTARY INFORMATION:

Background.—On June 3, 1985, the Commission instituted the subject investigation and scheduled as hearing to be held in connection therewith for August 22, 1985 (50 FR 26638, June 27, 1985). Subsequently, the Department of Commerce extended the date for its final determination in the investigation from Augest 12, 1985, to October 16, 1985. The Commission, therefore, is revising its schedule in the investigation to conform with Commerce's new schedule. As provided in section 735(b)(2)(B) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)(2)(B)), the Commission must make its final determination in antidumping investigations within 45 days of Commerce's final determination, or in this case by November 29, 1985.

Staff report.—A public version of the prehearing staff report in this investigation will be placed in the public record on October 8, 1985, pursuant to section 207.21 of the Commission's rules (19 CFR 207.21).

Hearing.—The Commission will hold a hearing in connection with this investigation beginning at 10:00 a.m. on October 29, 1985, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, DC. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on October 21, 1985. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 9:30 a.m. on October 18, 1985, in room 117 of the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is October 22, 1985.

Testimony at the public hearing is governed by section 207.23 of the Commission's rules (19 CFR 207.23). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. Any written materials submitted at the hearing must be filed in accordance with the procedures described below and any confidential materials must be submitted at least three (3) working days prior to the hearing (see § 201.6(b)(2) of the Commission's rules (19 CFR 201.6(b)(2)

as amended by 49 FR 32569, Aug. 15, 1984)).

Written submissions.—All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with § 207.22 of the Commission's rules (19 CFR 207.22). Posthearing briefs must conform with the provisions of section 207.24 (19 CFR 207.24) and must be submitted not later than the close of business on November 5, 1985. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before November 5, 1985.

A signed original and fourteen (14) copies of each submission must be filed with the Secretary to the Commission in accordance with § 201.8 of the Commission's rules (19 CFR 201.8, as amended by FR 32569, Aug. 15, 1984). All written submissions except for confidential business data will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired must be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6, as amended by 49 FR 32569, Aug. 15, 1984).

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20, as amended by 49 FR 32569, Aug. 15, 1984).

By order of the Commission.

Issued: July 12, 1985.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

[Docket No. AB–55 (Sub-No. 150X)]

Seaboard System Railroad, Inc.; Abandonment in Henry and Carroll Counties, TN; Exemption

Applicant has filed a notice of exemption under 49 CFR Part 1152 Subpart F—*Exempt Abandonments* to abandon its 6.6-mile line of railroad between milepost F–256.0 near Henry and milepost F–262.6 near McKenzie, in Henry and Carroll Counties, TN.

Applicant has certified (1) that no local traffic has moved over the line for at least 2 years and that overhead traffic is not moved over the line or may be rerouted, and (2) that no formal complaint filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

As a condition to use of this exemption, any employee affected by the abandonment shall be protected pursuant to *Oregon Short Line R. Co.-Abandonment-Goshen*, 360 I.C.C. 91 (1979).

The exemption will be effective August 16, 1985 (unless stayed pending reconsideration). Petitions to stay must be filed by July 29, 1985, and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by August 6, 1985, with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicant's representative: R. Lyle Key, Jr., General Attorney, 500 Water Street, Jacksonville, FL 32202.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: July 15, 1985.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

James H. Bayne,

Secretary.

MERIT SYSTEMS PROTECTION BOARD

Privacy Act of 1974; Systems of Records

AGENCY: Merit Systems Protection Board.

ACTION: Notice of proposed routine use for existing system of records.

SUMMARY: The purpose of this document is to provide information for public comment concerning the Merit Systems Protection Board's (MSPB) proposal to add a routine use to system MSPB/GOVT–1, Appeal and case records.

DATE: Any interested party may submit written comments regarding the proposed new routine use. Comments on this notice must be received on or before August 16, 1985.

ADDRESS: Comments may be mailed to Robert E. Taylor, Clerk of the Board, Merit Systems Protection Board, 1120 Vermont Avenue, NW., Washington, D.C. 20419.

FOR FURTHER INFORMATION CONTACT: Stephanie M. Conley, (202) 653–8902.

SUPPLEMENTARY INFORMATION: The MSPB is required by statute to conduct special studies relating to the civil service system and to other merit systems in the executive branch, and report to the President and to the Congress as to whether the civil service is adequately protected. 5 U.S.C. 1205(a)(3). In order to carry out this function, the MSPB may find it necessary, on occasion, to provide individuals in the Office of Personnel Management (OPM) and other Federal and State agencies certain identifying information about individuals who have filed appeals with the Board. This identifying information will be used to obtain from the appropriate agencies or individuals the information necessary to support MSPB's statutorily mandated research projects. The information provided by these sources will not be used in a personally identifiable manner in the resulting projects. The information will be used only as a basis for developing aggregate statistics. Further, the information obtained will not be used to make decisions about the rights, benefits or privileges of specific individuals. Upon completion of the project for which information was obtained, the MSPB will ensure that any personal identifying information is destroyed.

For example, in order to obtain current location information on federal employees for the purpose of developing an address listing for use in mailing out questionnaires, the Board may provide social security numbers from its appeal files to OPM. The information will be matched with OPM's listing of the servicing personnel offices for those federal employees whom the Board wishes to contact for study participation. The Board will then obtain the employee's address from information provided by the servicing personnel office. Questionnaires will be mailed to the survey population. Data from the returned questionnaires will only be reported in the aggregate.

Personally identifiable information, such as the employee's address, will not be

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–394]

Environmental Assessment and Finding of No Significant Environmental Impact Regarding Proposed Termination of Facility Operating License No. R–121, California Polytechnic State University

The Nuclear Regulatory Commission (the Commission) is considering issuance of an Order terminating Facility Operating License No. R–121 for the California Polytechnic State University, San Luis Obisbo, California.

The Order will terminate the Operating License in accordance with the licensee's request dated April 30, 1981, as supplemented.

Environmental Assessment

Identification of Proposed Action

The Order would terminate Operating License No. R–121, issued for the California Polytechnic State University AGN 201 Training Reactor in San Luis Obisbo, California.

Need for the Proposed Action

The California Polytechnic State University Training Reactor has been dismantled and component parts disposed of. The final inspection and termination approval have been completed and show that all relevant regulatory requirements have been satisfied. Therefore, there is no longer any need for the Operating License to be in effect.

Environmental Impacts of the Proposed Action

Since the reactor is completely dismantled and residual contamination has been decreased to acceptable levels, termination of the license is the next appropriate administrative action. This action will have no environmental impact.

Alternative Use of Resources

This action does not involve the use of resources beyond those needed for its administrative processing.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's dismantling plan and conducted the final inspection of the site. The State of California Radiological Health Branch was consulted with respect to termination of this license. (Letter F. A. Wenslawski, USNRC to D. Honey, State of California Radiological Health Branch, dated April 4, 1985).

Finding of No Significant Impact

On the basis of the Environmental Assessment, the Commission has concluded that termination of the license will have no significant environmental impact on the quality of the human environment. The Commission has determined not to prepare an Environmental Impact Statement for the proposed action.

For further details with respect to this action see the licensee's request for authorization to dismantle the facility and terminate operating license No. R–121 dated April 30, 1981, as supplemented September 8, 1981 and January 30, 1985, and the Commission's Order Authorizing Dismantlement of the Facility and Disposition of Component Parts dated October 6, 1981, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555.

Dated at Bethesda, Maryland, this 10th of July, 1985.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Assistant Director Division of Licensing.

BILLING CODE 7590–01–M

[Docket No. 50–302]

Florida Power Corp. et al.; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of exemptions from the requirements of 10 CFR Part 50 to the Florida Power Corporation (the licensee) for the Crystal River Unit No. 3 Nuclear Generating Plant (CR–3) located in Citrus County, Florida.

Environmental Assessment

Identification of Proposed Action

The exemptions are related to section III.G of Appendix R to 10 CFR Part 50. Section III.G calls for fire protection features to protect structures, systems, and components important to safe shutdown. This protection can be obtained by separation, utilization of fire barriers, installation of fire detection and suppression systems, enclosure of cable and equipment, and alternative or dedicated shutdown capability. The licensee requested exemptions for Crystal River Unit 3 in the areas of separation of redundant safe shutdown trains by 3-hour fire rated barriers, and alternative or dedicated shutdown capability with fire detection and suppression systems.

These exemptions are responsive to the licensee's letters requesting exemptions dated September 24, October 5, 1984 and December 11, 1984.

The Need for the Proposed Action: The proposed exemptions are needed because the features described in the licensee's request regarding the existing fire protection at their plant for these items are the most practical method for meeting the intent of Appendix R and literal compliance would not significantly enhance the fire protection capability.

Environmental Impacts of the Proposed Action

The proposed exemptions will provide a degree of fire protection that is equivalent to that required by Appendix R for other areas of the plant such that there is no increase in the risk of fires at this facility. Consequently, the probability of fires has not been increased and the post-fire radiological releases will not be greater than previously determined nor do the proposed exemptions otherwise affect radiological plant effluents. Therefore, the commission concludes that there are no significant radiological environmental impacts associated with the proposed exemptions.

With regard to potential non-radiological impacts, the proposed exemptions involve features located entirely within the restricted areas as defined in 10 CFR Part 20. They do not affect non-radiological plant effluents and have no other environmental impact. Therefore, the Commission concludes that there are no significant non-radiological environmental impacts associated with the proposed exemptions.

Alternative Use of Resources

This action involves no use of resources not previously considered in the Final Environmental Statement (construction permit and operating license) for Crystal River Unit 3.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Findings of no Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemptions.

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the letters requesting the

Issuance of Amendment To Transfer Facility Operating License From Union Carbide Subsidiary B, Inc., to Cintichem, Inc.

Correction

In FR Doc. 85-16407 appearing on page 28129 in the issue of Wednesday, July 10, 1985, make the following correction: In the heading, the docket number should read as it appears above.

BILLING CODE 1505-01-M

NRC Form 398, Personal Qualifications Statement—Licensee; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, revision, or extension: Extension
2. The title of the information collection: Personal Qualifications Statement—Licensee
3. The form number if applicable: NRC 398
4. How often the collection is required: On occasion and biennially
5. Who will be required or asked to report: Individual requiring a license to operate the controls at a nuclear facility.
6. An estimate of the number of responses: 2800 annually
7. An estimate of the total number of hours needed to complete the requirement or request: 5300
8. Section 3504(h), Pub. L 96-511 does not apply.
9. Abstract: NRC Form 398 requests detailed information that should be submitted by a licensing candidate when applying for a new or renewal license to operate the controls at a nuclear facility. This information, once collected, would be used for licensing actions and for providing statistical analyses on the Operator Licensing Program.

ADDRESSES: Copies of the submittal will be made available for inspection or copying for a fee at the NRC Public Document Room, 1717 H Street, NW., Washington, D.C. 20555.

FOR FURTHER INFORMATION CONTACT: Comments and questions should be directed to the OMB reviewer Jefferson B. Hill, (202) 396-7340.

NRC Clearance Officer is R. Stephen Scott, (301) 492-8585.

Dated at Bethesda, Maryland, this 11th day of July 1985.

For the Nuclear Regulatory Commission.

Patricia G. Norry,

Director, Office of Administration.

BILLING CODE 7590-01-M

Bi-Weekly Notice; Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (Pub. L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular bi-weekly notice. Pub. L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This bi-weekly notice includes all amendments issued, or proposed to be issued, since the date of publication of the last bi-weekly notice which was published on July 3, 1985 (50 FR 27502), through July 8, 1985.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

By August 16, 1985, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR § 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Branch Chief*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the local public document room for the particular facility involved.

Carolina Power and Light Company, Docket No. 50-261, H.B. Robinson Steam Electric Plant, Unit No. 2, Darlington County, South Carolina

Date of amendment request: May 15, 1985.

Description of amendment request: The proposed amendment would change the Technical Specifications to add requirements for: (1) Shift manning overtime limits and (2) reporting of challenges and failures of the safety and relief valves.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance

concerning the application of its standards set forth in 10 CFR 50.92 for

margin of safety. The staff, therefore,

Attorney for licensee: Mr. Robert G.

included in the technical specifications.

be operable and allows any one of the

Duke Power Company, Dockets, Nos.

concerning the application of its standards set forth in 10 CFR 50.92 for no significant hazards considerations by providing certain examples published in the **Federal Register** on April 6, 1983 (48 FR 14864). One of the examples of an amendment which will likely be found to involve no significant hazards considerations is a change that constitutes the additional limitation, restriction, or control not presently included in the TS; for example, a more stringent surveillance requirement. The proposed changes fall within the Commission's example (ii) of changes not likely to involve a significant hazards consideration because the change adds limitation and restrictions. Therefore, the staff has made a proposed determination that the application involves no significant hazards consideration.

Local Public Document Room location: Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535.

Attorney for licensee: Shaw, Pittman, Potts, and Trowbridge, 1800 M Street NW., Washington, D.C. 20036.

NRC Branch Chief: Steven A. Varga.

Commonwealth Edison Company, Docket No. 50-249, Dresden Nuclear Power Station, Unit No. 3, Grundy County, Illinois

Date of amendment request: May 30, 1985.

Description of amendment request: The amendment would delete License Condition 3.F from the Dresden Unit 3 license and change section 4.6.2 of the Technical Specification (TS) to indicate the removal of the equalizer line between the two recirculation loops and its two valves during a plant modification to be done during the refueling and maintenance outage scheduled to start in Fall, 1985. License Condition 3.F and section 4.6.2 reflect the requirement set out in Amendment 5 to the Dresden 3 license and TS that the valves in the equalizer line remain closed at all times during plant operation. Since there is never any flow in the line during plant operation, comlete removal of the line and valves does not effect operation of the unit.

Basis for proposed no significant hazards consideration determination: Operation of the unit in accordance with the changes proposed by the amendment is unchanged and, therefore, such operation does not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The staff, therefore, proposes to determine that this revision does not involve a significant hazards consideration.

Local Public Document Room Location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60451.

Attorney for licensee: Robert G. Fitzgibbons, Jr., Isham, Lincoln and Beale, Three First National Plaza, Suite 5200, Chicago, Illinois 60602.

NRC Branch Chief: John A. Zwolinski.

Commonwealth Edison Company, Docket Nos. 50-254 and 50-265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County, Illinois

Date of amendment:T1: April 22, 1985.

Description of amendment request: The proposed amendments will put into place new Technical Specification requirements for the newly-installed sump pumps and double check valves in the residual heat removal (RHR) service water vault drain system. This new system replaces the old floor and equipment drains in the six RHR service water vault spaces and provides improved ability to drain these spaces.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for determining whether a license amendment is likely to involve a significant hazards consideration by providing examples (48 FR 14870, April 6, 1983). One example of an action not likely to involve a significant hazards consideration is (ii) a change that constitutes additional restrictions or controls not presently included in the Technical Specifications.

The residual heat removal service water vault drain system previously required that floor drains in the vault spaces be manually uncapped before the spaces could be drained. Automatic sump pumps have been installed in each of the six RHR service water vaults, with double check valves between the discharge side of each pump and its return to the service water system. With installation of the new drainage system, appropriate Technical Specifications are proposed to ensure continued operability of the system even under potential flooding conditions. The new system and the Technical Specifications for the system constitute an additional control over the potential for flooding of the vault spaces, so the change is similar to example (ii) of the Commission guidance. Therefore, the Commission proposes to determine that the proposed change involves no significant hazards consideration.

Local Public Document Room location: Moline Public Library, 504—17th Street, Moline, Illinois 61265.

Attorney for licensee: Mr. Robert G. Fitzgibbons, Jr., Isham, Lincoln, and Beale, Three First National Plaza, Suite 5200, Chicago, Illinois 60602.

NRC Branch Chief: Domenic B. Vassallo.

Connecticut Yankee Atomic Power Company, Docket No. 50-213, Haddam Neck Plant, Middlesex County, Connecticut

Date of amendment request: May 29, 1985, superseding January 18, 1979 submittal.

Description of amendment request: This amendment request was originally noticed on July 20, 1983 (48 FR 33078). The proposed amendment would approve technical specifications for radiological effluent monitoring (RETS) which incorporate the requirements of Appendix I 10 CFR Part 50 into Appendix A, "Technical Specifications," and would delete Appendix B, "Environmental Technical Specifications."

Basis for proposed no significant hazards consideration determination: This amendment would incorporate Radiological Effluent Technical Specifications to meet the requirements of Appendix I of 10 CFR Part 50 into Appendix A Technical Specifications. The amendment would approve new Technical Specification sections defining limiting conditions for operation and surveillance requirements for radioactive liquid and gaseous effluent monitoring, for effluent concentrations and for treatment of liquid, gaseous and solid wastes. This action would also incorporate into the technical specifications the bases that support the operation and surveillance requirements.

The Commission, in a revision to Appendix I, 10 CFR Part 50, required licensees to improve and modify their radiological effluent systems in a manner that would keep releases of radioactive material to unrestricted areas during normal operation as low as is reasonably achievable. In complying with this requirement, it became necessary to add additional restrictions and controls to the technical specifications to assure compliance. This cause the proposed addition of the technical specifications described above.

The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870) of actions not likely to involve a significant hazards consideration. Example (ii) relates to changes that constitute additional restrictions or controls not presently included in the technical specifications. The staff has reviewed the licensee's application and concludes that the proposed addition of the above technical specifications falls within the envelope of example (ii).

With regard to the deletion of Appendix B, the original submittal dated January 18, 1979, did not request that the effluent technical specifications be incyded in Appendix A but chose to add them to the existing appendix for effluent technical specifications, Appendix B. With the latest submittal, the licensee has proposed to incorporate the effluent technical specifications currently located in Appendix B into Appendix A, thus eliminating the need for a separate Appendix B to the license. This is purely an administrative change because it merely relocates existing technical specifications into Appendix A.

Example (i) (48 FR 14870) relates to purely administrative changes to technical specifications. The licensee's request to incorporate all radiological effluent technical specifications into Appendix A and to delete Appendix B falls within the envelope of example(i).

Therefore, the staff proposes to determine that the application does not involve a significant hazards consideration since the changes include both administrative changes and additional restrictions and controls that are not currently included in the technical specifications in order to meet the requirements of 10 CFR 50.34a and 50.36a that radioactive material in effluents released to unrestricted areas be kept as low as is reasonably achievable.

Local Public Document Room location: Russell Library, 123 Broad Street, Middletown, Connecticut 06457.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry and Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Branch Chief: John A. Zwolinski.

Duke Power Company, Docket Nos. 50-369 and 50-370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of amendment request: April 1, 1985.

Description of amendment request: The proposed amendments would revise Technical Specification 3.7.10.1, "Fire Suppression System" and its associated bases to require that either fire suppression pumps A and C or pumps B and C be operable at all times, and to no longer permit an indefinite inoperability of fire suppression pump C. The existing specification requires at least two of the fire suppression pumps (pump A, B or C) be operable and allows any one of the three pumps to be indefinitely inoperable.

Basis for proposed no significant hazards consideration determination: Appendix R to 10 CFR Part 50 requires that a plant be able to recover from the effects of a fire and achieve cold shutdown with a loss of offsite power.

The proposed amendments would eliminate a concern under the present Technical Specification 3.7.10.1 that a fire could cause the loss of offsite power to pumps A and B simultaneously with an inoperable pump C, and therefore, the total loss of the fire suppression water system. The concern exists because fire suppression pumps A, B, and C are powered, respectively, by the Unit 2 switchgear in the main switchyard, the Unit 1 switchgear in the main switchyard, and the dedicated 44 kilowatt substation (which is independent of the McGuire Station Auxiliary Power System).

The Commission has provided guidance concerning the application of its standards set forth in 10 CFR 50.92 for no significant hazards consideration by providing certain examples published in the **Federal Register** on April 6, 1983 (48 FR 14870). One of the examples of an amendment likely to involve no significant hazards consideration relates to changes (ii) that constitute additional limitations, restrictions, or controls not presently included in the Technical Specifications. The proposed amendments of the Technical Specifications match the example because they would impose more restrictive conditions for operation with an inoperable fire pump than the current Specification 3.7.10.1. The proposed changes require the operability of either the A or B fire suppression pumps as well as the C pump at all times to eliminate the possibility of total loss of Fire Suppression Water System during a concurrent loss of offsite power with a plant fire. Therefore, the Commission proposes to determine that the proposed amendments do not involve a significant hazards consideration.

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte, (UNCC Station), North Carolina 28223.

Attorney for licensee: Mr. Albert Carr, Duke Power Company, P.O. Box 33189, 422 South Church Street, Charlotte, North Carolina 28242.

NRC Branch Chief: Elinor G. Adensam.

Duke Power Company, Dockets, Nos. 50-269, 50-270, and 50-287, Oconee Nuclear Station, Units Nos. 1, 2 and 3, Oconee County, South Carolina

Date of amendment request: May 31, 1985.

Description of amendment request: The proposed amendments would revise the Station's common Technical Specifications (TSs) to support the operation of Oconee Unit 3 at full rated power during the upcoming Cycle 9. The proposed amendment request changes the following areas:

1. Core Protection Safety Limits (TS 2.1);
2. Protective System Maximum Allowable Setpoints (TS 2.3);
3. Rod Position Limits (TS 3.5.2); and
4. Power Imbalance Limits (TS 3.5.2).

To support the license amendment request for operation of Oconee Unit 3, Cycle 9, the licensee submitted, as an attachment to the application, a Duke Power Company (DPC) Report, DPC-RD-2005, "Oconee Unit 3, Cycle 9 Reload Report." A summary of the Cycle 9 operating parameters is included in the report, along with safety analyses.

During the refueling outage, 146 fuel assemblies will be reinserted, similar to those previously used, and 31 fuel assemblies will be discharged and replaced by new but substantially similar assemblies of the Mark BZ type. Additionally, Cycle 9 will incorporate gray (less-absorbing) axial power shaping rods (APSRs) instead of the previously used black (highly-absorbing) APSRs.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). Example (iii) of the types of amendments not likely to involve significant hazards considerations is an amendment to reflect a core reload where:

(1) No fuel assemblies significantly different from those found previously acceptable to the Commission for a previous core at the facility in question are involved;

(2) No significant changes are made to the acceptance criteria for the Technical Specifications;

(3) The analytical methods used to demonstrate conformance with the Technical Specifications and regulations are not significantly changed; and

(4) The NRC has previously found such methods acceptable.

This particular reload involves the reinsertion of 146 fuel assemblies of a type previously approved and used and

the insertion of 31 fuel assemblies of the Mark BZ type. The Mark BZ fuel

Duquesne Light Company, Docket No. 50-334, Beaver Valley Power Station,

Technical Specifications (TSs) related to the High Pressure Injection (HPI) Flow

Basis for proposed no significant hazards consideration determination:

Requirements provides for a more extensive inspection of steam generator

Basis for proposed no significant hazards consideration determination:

the insertion of 31 fuel assemblies of the Mark BZ type. The Mark BZ fuel assemblies are the same as previously approved assemblies in terms of fuel rods, end grid, end fittings, and guide tubes and differ only slightly in the use of Zircaloy spacer grids rather than Inconel intermediate spacer grids. The use of the Mark BZ fuel assembly had been previously reviewed and approved by the Commission.

The Cycle 9 control rods differ from those of Cycle 8 in that gray APSRs are to be utilized instead of the previously used black APRSs. The gray APSRs have a greater absorber length than the APRSs used in previous reloads and utilize and Inconel absorber instead of the Ag-In-Cd alloy. According to the analyses described in DPC–RD–2005, "Oconee Unit 3, Cycle 9 Reload Report," the gray APSRs will not adversely affect Cycle 9 operation. The Commission has previously approved the use of gray APSRs.

Thus, this core reload involves the use of fuel assemblies and control rods that are not significantly different from those found previously acceptable to the Commission for previous core at this facility. The request for amendment changes the TSs to reflect new operating limits based on the fuel and control rods to be inserted into the core. These parameters are based on the new physics of the core and fall within the acceptance criteria.

In the analyses supporting this reload, there have been no significant changes in acceptance criteria for the Technical Specifications, the analytical methods used to demonstrate conformance with the Technical Specifications and the regulations were not significantly changed, and those analytical methods have been previously found acceptable. Thus, this reload and the proposed license amendments reflecting it appear to be encompassed by example (iii) of amendments not likely to involve significant hazards considerations. On this basis, the Commission proposes to determine that these amendments do not involve significant hazards considerations.

Local Public Document Room location: Oconee County Library, 501 West Southbroad Street, Walhalla, South Carolina

Attorney for licensee: J. Michael McGarry, III, Bishop, Liberman, Cook, Purcell, and Reynolds, 1200 17th Street, NW., Washington, D.C. 20036

NRC Branch Chief: John F. Stolz.

Duquesne Light Company, Docket No. 50-334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of amendment request: June 17, 1985.

Description of amendment request: The proposed amendment would remove specifications for the iodine sampler cartridge from Tables 3.3–13 and 4.3–13, both referring to radioactive gaseous effluent monitoring instrumentation.

The monitors specified in Tables 3.3–13 and 4.3–13 were incorporated into the technical specifications to reflect the guidelines contained in the NRC standard Radiological Effluent Technical Specifications (RETS). After the RETS were incorporated by Amendment 66, additional iodine sampling and analysis equipment has been installed. Therefore, the iodine sampler cartridge specifications are being removed from Tables 3.3–13 and 4.3–13 since charcoal filter sampling and analysis is performed by the effluent pathway monitors in accordance with Table 4.11–2, "Radioactive Gaseous Waste Sampling and Analysis Program".

Basis for proposed no significant hazards consideration determination: Based on the above discussion, there is no relaxation of effluent monitoring. While the iodine sampler cartridge requirements would be removed, their functions would be transferred to newly installed equipment. We conclude that the proposed amendment would not involve any significant increase in the probability or consequences of an accident previously evaluated, would not create the possibility of a new or different kind of accident from any accident previously analyzed, and would involve no reduction in the margin of safety. We, therefore, propose to characterize the proposed amendment as involving no significant hazards consideration.

Florida Power Corporation, et al., Docket No. 50–302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus, County, Florida

Date of amendment request: May 1, 1985, as revised June 14, 1985.

Brief description of amendment: The proposed amendment would modify the Technical Specifications (TSs) related to the High Pressure Injection (HPI) Flow Balance Testing, HPI Pump and Valve Test, and the Emergency Diesel Generator (EDG) Load Test to allow testing during appropriate operating modes. Specifically, the proposed amendment is needed to provide clarification and resolve conflicts between current TSs and commitments made to the Commission involving low temperature over-pressurization protection, as follows:

1. TS 4.5.2.g currently requires HPI flow balance testing of pump and discharge lines during shutdown. However, pressure-temperature considerations prevent testing during Modes 4, 5, or 6. Thus, Mode 3 is the most appropriate time to perform the test.

2. TS 4.5.2.f currently requires that the HPI valve manual actuation be performed during shutdown (Modes 4 and 5), which conflicts with low temperature overpressure commitments which require "racking out" of these valves in these modes. The TS amendment would allow actuation of valves during Mode 6.

3. TS 4.8.1.1.2.c. presently requires that tests be performed during shutdown (Modes 4 or 5) which, for TS 4.8.1.1.2.c.3 and 5, conflict with low temperature over-pressurization protection commitments. The amendment would permit those tests to be performed in Mode 3. In addition, the 18-month frequency requirement would be changed for this cycle only to permit performance of these tests during the startup for Cycle 6. The specification would also be changed to permit other tests in this section to be performed in Mode 6.

Date of publication of individual notice in **Federal Register:** June 21, 1985 (50 FR 25802).

Expiration date of individual notice: July 22, 1985.

Local Public Document Room location: Crystal River Public Library, 66 NW First Avenue, Crystal River, Florida.

Indiana and Michigan Electric Company, Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of amendment request: May 31, 1985, supplemented by letter dated June 7, 1985.

Brief of amendment request: The proposed amendment would revise the Technical Specifications by deleting the program and records retention requirements pertaining to environmental qualification of equipment.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for determining whether license amendments involve no significant hazards consideration by providing certain examples (48 FR 14870, April 6, 1983). One of these examples (vii) is a change to make a license conform to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations. The proposed change is directly related to this example in that 10 CFR 50.49 "Environmental Qualification of Electrical Equipment Important To Safety For Nuclear Power Plants" (48 FR 2733, January 21, 1983, as amended at 49 FR 45576, November 19, 1984) now contains the regulatory requirements for the environmental qualification program and retention of related records. The proposed change removes the duplicative and limited requirements from the license. On this basis, the Commission proposes to determine that the amendments involve no significant hazards consideration.

Local Public Document Room location: Maude Reston Palenske Memorial Library, 500 Market Street, St. Joseph, Michigan 49085.

Attorney for licensee: Gerald Charnoff, Esquire, Shaw, Pittman, Potts and Trowbridge, 1800 M Street NW., Washington, DC 20036.

NRC Branch Chief: Steven A. Varga.

Maine Yankee Atomic Power Company, Docket No. 50–309, Maine Yankee Atomic Power Station, Lincoln County, Maine

Date of amendment request: March 5, 1985, as supplemented June 11, 1985 and modified June 20, 1985.

Description of amendment request: The proposed amendment would change the Technical Specifications to require more extensive inspection of steam generator tubes in critical areas. Critical areas are defined as areas of the steam generator where degraded and/or defective tubes exist due to a steam generator physical and/or operating characteristic which would promote tube degeneration in that area. The remainder of the steam generator tubes would be subjected to normal sampling inspection before being determined operable. The March 5, 1985 application was previously noticed on May 21, 1985 (50 FR 20969 at 20983).

Basis for proposed no significant hazards consideration determination: This proposed change to the Technical Specifications concerning Steam Generator Tube Surveillance Requirements provides for a more extensive inspection of steam generator tubes where degradation is expected with normal sampling of the remainder of the tubes. This meets example (ii) (48 FR 14870) of the Commission's examples of amendments considered not likely to involve a significant hazards consideration, because this change constitutes an additional limitation not presently in the Technical Specifications.

Therefore, the Commission proposes that the requested amendment involves no significant hazards consideration.

Local Public Document Room location: Wiscasset Public Library, High Street, Wiscasset, Maine.

Attorney for licensee: J. A. Ritscher, Esq., Ropes and Gray, 225 Franklin Street, Boston, Massachusetts 02210.

NRC Branch Chief: Edward J. Butcher, Acting.

Nebraska Public Power District, Docket No. 50–298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: April 22, 1985.

Description of amendment request: The proposed amendment would revise the Technical Specifications to (1) consolidate requirements for refueling operations in one location and (2) clarify existing requirements and add new rquirements for conducting special plant tests.

(1) *Refueling Requirements.* The proposed change would consolidate in one section all the requirements relating to plant refueling operations. This change involves the verbatim transfer, into one section, limiting conditions of operation (LCOs) for the standby gas treatment system, diesel generators, core standby cooling systems and the control room air treatment system during refueling. At present, these requirements are located in the sections related to the individual systems. In addition, the proposed amendment would change references to Low Pressure Coolant Injection (LPCI) to read "LPCI mode of Residual Heat Removal System" to achieve consistency with plant usage. The two types of nomenclature are identical.

(2) *Special Tests.* The proposed amendment would change the location of existing requirements in the Technical Specifications and add new requirements for the performance of special tests where plant conditions are not in the normal modes of startup or shutdown. The existing and additional requirements would be grouped together in a new section 3/4.22 "SPECIAL TESTS/EXCEPTIONS".

Basis for proposed no significant hazards consideration determination:

(1) *Refueling Requirements.* The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). One of the examples of actions involving no significant hazards considerations is example (i) which relates to purely administrative changes to the Technical Specifications, for example to achieve consistency throughout the Technical Specifications, correction of an error or a change in nomenclature. The changes proposed for refueling requirements involve a change in format in the Technical Specifications and the substitution of one type of nomenclature for another where both types have the identical meaning. These changes are purely administrative in nature and, as such, fall within the scope of example (i). On this basis, the Commission proposes to determine that these changes involve no significant hazards considerations.

(2) *Special Tests.* The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). Examples of actions not likely to involve significant hazards considerations include actions specified as (i) purely administrative changes to the Technical Specifications, and (ii) changes that constitute an additional limitation, restriction, or control not presently included in the Technical Specifications. Part of the changes related to Special Tests involve relocating existing requirements into a new section to clarify the requirements for the operator. This change would not result in a change to existing requirements and as such is administrative in nature and falls within the scope of example (i) above. The other part of the proposed change would add new LCOs and surveillance requirements not presently covered in the Cooper Technical Specifications. The addition of these controls and requirements is therefore similar to example (ii) above. On this basis, the Commission proposes to determine that these changes involve no significant hazards considerations.

surveillance testing, (2) increase the load to be applied to the diesel

diesel generator reliability. The licensee proposed to modify the surveillance

(2) Create the possibility of a new or different kind of accident from any

encompassed by example (i) cited above. On this basis, the Commission

Technical Specification count rate on the source range monitors (SRMs)

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: April 26, 1985.

Description of amendment request: The proposed amendment to the Technical Specifications would revise the surveillance requirements and bases for the station batteries to improve the demonstration of battery system operability. The existing battery system surveillance requirements lack sufficient detail to ensure full operability and verification that the batteries fully satisfy their design function. The proposed change would provide separate surveillance requirements for the 125 VDC unit batteries and 250 VDC unit batteries which would be more detailed than the single set of requirements for both types of batteries. The proposed surveillance requirements incorporate guidance from NRC Regulatory Guides, NRC-endorsed industry standards and battery manufacturer's recommendation and are more stringent than the current Technical Specifications.

Basis for proposed no significant hazards consideration determination:

The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). One of the examples of actions involving no significant hazards considerations, i.e. example (ii), relates to a change that constitutes an additional limitation, restriction or control not presently in the Technical Specifications. The proposed change would result in more stringent requirements for station battery surveillance and is, therefore, similar to this example. The Commission therefore proposes to determine that this action involves no significant hazards considerations.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Attorney for licensee: Mr. G.D. Waston Nebraska Public Power District, Post Office Box 499, Columbus, Nebraska 68601.

NRC Branch Chief: Domenic B. Vassallo.

Nebraska Public Power District , Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: May 15, 1985.

Description of amendment request: The proposed amendment would revise the Technical Specifications (TS) to (1) reduce the frequency of diesel generator surveillance testing, (2) increase the load to be applied to the diesel generators during monthly operability testing, and (3) achieve consistency in the nomenclature applied to the standby gas treatment system (SGTS).

(1) *Diesel Generator Surveillance Test Frequency.* This proposed change was submitted in response to NRC Generic Letter (GL) 84-15, "Proposed Staff Actions to Improve and Maintain Diesel Generator Reliability," dated July 2, 1984. In this Generic Letter, the NRC staff identified cold fast starts of diesel-generator sets as contributing to premature diesel engine degradation due to unnecessary wear. The NRC has concluded that the frequency of diesel generator fast start tests from ambient conditions should be reduced. Specifically, GL 84-15 states the NRC position that requirements for testing diesel generators while emergency core cooling equipment is inoperable be deleted from Technical Specifications. Accordingly, the license proposed to deleted from Cooper Nuclear Station TS requirements for diesel generator testing when it is determined that a core spray subsystem, residual heat removal (RHR) pump, low pressure coolant injection (LPCI) subsystem, or containment cooling subsystem is inoperable. The Bases sections for the core spray and containment spray system would also be modified to reflect the above proposed TS changes.

In addition, the licensee has proposed other TS modifications that would reduce the frequency of diesel generator testing in accordance with the findings of GL 84-15. That is, the licensee proposed to modify the surveillance requirements for the standby gas treatment system (SGTS) to make it clear that the diesel generator associated with an operable SGTS need not be demonstrated operable when the other SGTS is determined to be inoperable. The licensee also proposed to reduce the number of required diesel generator tests when a diesel generator is determined to be inoperable. At present, the Technical Specifications require a diesel generator to be tested immediately and daily thereafter when the other diesel generator is determined to be inoperable. The licensee proposes to retain the requirement for an immediate test but delete the requirement for subsequent daily test starts.

(2) *Diesel Generator Test Load.* The proposed change would increase the minimum percent of rated load that must be carried to show operational readiness during the monthly diesel generator surveillance test. The purpose of the proposed change is to enhance diesel generator reliability. The licensee proposed to modify the surveillance requirements of section 4.9.A.2.a to increase the diesel generator test load from 35 percent to rated load to 50 percent of rated load. The Bases on section for the diesel generators would be modified accordingly.

(3) *SGTS Nomenclature.* The licensee proposed to change section 4.7.B.4.c of the TS to make this section consistent with the rest of the TS with regard to nomenclature of the SGTS. This change involves changing the word "circuit" to "standby gas treatment system" when referring to each of the redundant standby gas treatment equipment safety divisions.

Basis for proposed no significant hazards consideration determination:

(1) *Diesel Generator Surveillance Test Frequency.* The licensee submittal of May 15, 1985 provided an evaluation of the proposed change and a basis for a proposed no significant hazards consideration determination. The licensee has stated that the proposed change does not delete diesel generator operability requirements when components of an emergency core cooling system, emergency containment cooling system, SGTS or one diesel generator is determined to be inoperable. Diesel generator fast start operability is still present to mitigate the consequences of a large loss of coolant accident coincident with a loss of offsite power. Diesel generator operability will still be demonstrated by monthly routine tests and immediately after one diesel generator is determined to be inoperable. The NRC staff has determined that excessive diesel generator testing contributes to premature engine degradation and that an overall improvement in reliability and availability can be gained by eliminating excessive fast starts. The licensee has stated that the proposed change that reduces the frequency of diesel generator testing is consistent with the objectives expressed in GL 84-15 and may therefore result in enhanced reliability.

Based on the above, the staff concludes that the proposed amendment will not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated because, although some diesel generator tests would be eliminated, operability is still demonstrated by other required surveillance tests. The reduced number of fast starts may, in fact, increase the probability of a diesel generator availability in the event of an accident.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated because the proposed change introduces no new mode of plant operation and no physical modifications are required to be performed to the plant.

(3) Involve a significant reduction in the margin of safety. It is anticipated that any reduction in the margin of safety would be insignificant since the purpose of the proposed change is to conform to the NRC guidelines of GL 85-15. The recommendations in GL 84-15 were promulgated to increase diesel generator reliability and thereby cause an increase in the overall margin of safety in the plant.

Based on the above evaluation, the staff finds that the criteria for a no significant hazards consideration determination, as set forth in 10 CFR 50.92(c), are met. The staff has, therefore, made a proposed determination that the proposed amendment involves no significant hazards consideration.

(2) *Diesel Generator Test Load.* The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). One of the examples of actions involving no significant hazards considerations, i.e., example (ii), relates to a change that constitutes an additional limitation, restriction or control not presently in the Technical Specifications. The proposed change, by increasing the load that must be applied during diesel generator testing, results in more stringent requirements for the test. The proposed change is, therefore, encompassed by example (ii) cited above. The Commission therefore proposes to determine that this action involves no significant hazards considerations.

(3) *SGTS Nomenclature.* The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). One of the examples of actions involving no significant hazards considerations, i.e., example (i), relates to purely adminstrative changes to the Technical Specifications, for example to achieve consistency throughout the Technical Specifications, correction of an error or a change in nomenclature. The proposed substitution of "standby gas treatment system" for "circuit" in the SGTS surveillance requirements does not change the meaning or intent of the TS. In this case the two terms are interchangeable and the proposed term will result in greater consistency in the TS. The proposed change is, therefore, purely administrative in nature and is encompassed by example (i) cited above. On this basis, the Commission proposes to determine that this change involves no significant hazards considerations.

Omaha Public Power District, Docket No. 50-285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska

Date of amendment request: June 11, 1985.

Description of amendment request: the amendment would change the testing frequency of the auxiliary feedwater pumps from quarterly to monthly.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). One of the examples, (ii), of actions not likely to involve a significant hazards consideration relates to changes that constitute additional restrictions or controls not presently included in the technical specifications. The proposal to increase the testing frequency of the auxiliary feedwater pumps comes under this example. On this basis, the staff proposes to determine that the application does not involve a significant hazards consideration.

NRC Branch Chief: Edward J. Butcher, Acting.

Pennsylvania Power & Light Company, Docket No. 50-388, Susquehanna Steam Electric Station, Unit 2, Luzerne County, Pennsylvania

Date of amenment request: April 9, 1985.

Description of amendment request: The proposed amendment change to the Technical Specification would permit Susquehanna SES refueling operations (fuel loading and unloading) to take place without using Fuel Loading Chambers (FLCs). This change would allow up to eight fuel assemblies to be loaded in order to attain the required Technical Specification count rate on the source range monitors (SRMs) without creating any safety concern.

During the Susquehanna SES Unit 1 end-of-cycle defueling, the FLCs, which were being used to provide neutron monitoring, produced anomalous readings which were attributed to a detector saturation condition caused by the high gamma flux from the irradiated fuel. The need to revise the Unit 2 Technical Specifications is based on the fact that for the Unit 2 first refueling outage the licensee will again need to off load the entire core and as a result experience the same problems experienced during the Unit 1 first refueling outage. The FLCs are B-10 lined proportional detectors which are connected to the SRM circuitry, while the SRMs are miniature fission chambers. The B-10 lined detectors are prone to degraded and unpredictable response in a high gamma flux, whereas the SRMs are not as susceptible to the same phenomena. Furthermore, although the energy deposited by a gamma in a B-10 detector is less than that deposited by a neutron, in a large gamma flux a pulse "pile-up" condition occurs which results in several gammas being counted together thereby producing about the same signal as a neutron; and if the detector electronics are set to reduce the pulse pile-up effect, a reduction in neutron detection efficiency occurs. In comparison the energy deposited by a neutron in a fission chamber is much greater than that of a gamma, thus making the neutron counts easily distinguished from the gammas. Therefore the SRM circuitry can more easily discriminate the gamma flux and thus the SRMs provide a more reliable, well characterized signal than the FLCs in a high gamma environment (i.e., in the presence of irradiated nuclear fuel).

The licensee has stated that based on previous SRM response calculations one irradiated fuel assembly adjacent to a SRM should provide at least 0.7 cps, and two assemblies around a SRM would assure at least 0.7 cps. Therefore although the proposed Technical Specification changes will allow loading of up to eight fuel assemblies before requiring the necessary SRM counts, no loss of neutron monitoring capability is expected to occur.

In order to assure a safe subcritical condition during the loading of the first eight fuel assemblies the licensee performed calculations assuming maximum reactivity conditions (i.e., cold, clustered, uncontrolled, peak reactivity) which concluded that eight fuel assemblies, as analyzed, would remain subcritical. These calculations

were bounding for all the fuel to be used during Susquehanna SES Unit 2 Cycle 2.

The licensee has stated that during a typical core reloading, two irradiated fuel assemblies will be loaded around each SRM to produce greater than the minimum required count rate. In addition the loading schemes will be selected to provide for a continuous multiplying medium to be established between the required operable SRMs and the location of the core alteration to enhance the ability of the SRMs to respond to the loading of each fuel assembly. During a core unloading, the last fuel to be removed is that fuel adjacent to the SRMs.

Basis for Proposed No Significant Hazards Consideration Determination: A review of the licensee's submittal dated April 9, 1985 in accordance with the standard of 10 CFR 50.92 provides sufficient information to conclude that the proposed amendment to allow up to eight fuel assemblies to be loaded to attain the required Technical Specification count rate on the SRMs does not involve a significant hazards consideration. Based on the above safety assessment the Commission agrees with the licensee that the proposed Technical Specification change will result in improved safety because: The SRMs are more reliable in detecting neutrons than the FLCs in the presence of irradiated nuclear fuel; conservative analyses have shown that criticality is not a problem during the loading of the first eight fuel assemblies; and the risk of dropping loose objects into the reactor is reduced by eliminating the use of the FLCs. The proposed change does not involve a significant increase in the probability or consequences of a previously analyzed accident, does not create the possibility of a new or different kind of accident from any accident previously evaluated, and does not significantly reduce a safety margin. Therefore, based on these considerations and the three criteria given above, the Commission has made a proposed determination that the amendment request involves no significant hazards consideration.

Local Public Document Room Location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Attorney for Licensee: Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, D.C. 20036.

NRC Branch Chief: Walter R. Butler.

Public Service Co. of Colorado, Docket No. 50-267, Fort St. Vrain Nuclear Generating Station, Platteville, Colorado

Date of amendment request: June 10, 1985.

Description of amendment request: The proposed changes to the Administrative Controls Technical Specifications reflect recent organizational changes within the Public Service Company of Colorado. The proposed changes involve further revision of a position title which was proposed in the January 14, 1985 application which was noticed on February 27, 1985 (50 FR 8004) and propose an additional requirement for a Fuel Surveillance Program.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14970). The examples of actions that are considered not likely to involve significant hazards considerations include a purely administrative change to Technical Specifications (TS): For example, a change to achieve consistency throughout the TS, correction of an error, or a change in nomenclature; and changes that constitute an additional limitation, restriction or control not presently included in the TS. Based on an initial review of the application, the staff considers the proposed changes to be administrative changes and additional limitations of the types referred to above.

Therefore, we propose to determine that this is an action which would involve no significant hazards considerations.

Local Public Document Room Location: Greeley Public Library, City Complex Building, Greeley, Colorado.

Attorney for licensee: Bryant O'Donnell, Public Service company of Colorado, P.O. Box 840, Denver, Colorado 80201.

NRC Branch Chief: Eric H. Johnson.

Public Service Electric and Gas Company, Docket No. 50-272, Salem Nuclear Generating Station, Unit No. 1, Salem County, New Jersey

Date of amendment request: October 15, 1985.

Description of amendment request: The proposed amendment would add Mode 2 to APPLICABLE MODES column on Table 3.3-3 for Item 8e, Emergency Trip of Steam Generator Feed Pumps—start Motor Driven (Auxiliary Feedwater) Pumps. This Applicability requirement was inadvertently listed as MODE 1 for Unit No. 1.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870). The examples of actions which involve no significant hazards consideration include administrative changes to the technical specification (Example i); for example changes that achieve consistency or correct errors. Therefore, the staff proposes to determine that the proposed change does not involve a significant hazards consideration.

Local Public Document Room Location: Salem Free Library, 122 West Broadway, Salem, New Jersey 08079.

Attorney for licensee: Conner and Wetterhann, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, D.C. 20006.

NRC Branch Chief: Steven A. Varga.

Public Service Electric and Gas Company, Docket No. 50-311, Salem Nuclear Generating Station, Unit No. 2, Salem County, New Jersey

Date of amendment request: October 15, 1985.

Description of amendment request: The proposed amendment would correct a referenced specification in LCO 3.1.2.1a and 3.1.2.1b. These limiting conditions for operation reference LCO 3.1.2.7a and 3.1.2.7b which do not exist. The correct LCOs to be referenced are 3.1.2.5a and 3.1.2.5b, respectively.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870). The examples of actions which involve no significant hazards consideration include administrative changes to the technical specification (Example i); for example changes that achieve consistency or correct errors. the requested change corrects and error. Therefore, the staff proposes to determine that the proposed change does not involve a significant hazards consideration.

Local Public Document Room Location: Salem Free Library, 122 West Broadway, Salem, New Jersey 08079.

Pennsylvania Avenue, NW., Washington, D.C. 20006.

NRC Branch Chief: Steven A. Varga.

Public Service Electric and Gas Company, Docket No. 50-272 and 50-311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of amendment request: September 21, 1985.

Description of amendment request: The amendments request would modify the existing fire protection systems technical specifications pages and add new pages for both units. The proposed changes would:

(1) Unify the requirements and language of surveillance testing and action statements for both units.

(2) Provide technical specifications which reflect completion and implementation of the fire protection requirements as given in Amendment 21.

(3) Eliminate those portions of the existing technical specifications that are not applicable to the Salem Units, such as references to motor driven fire pumps and water system automatic valves.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain example (48 FR 14870). The examples of actions which involve no significant hazards consideration include administrative changes to the technical specification (Example i); for example changes to achieve consistency or correct errors; and changes that constitute additional limitations and controls not presently included in the technical specifications (Example ii). All the proposed actions in the amendments request either (1) achieve consistency between the two basically indentical units, (2) constitute additional limitations and controls not presently included in the technical specifications, or (3) correct several errors where equipment reference in the technical specifications do not exist in the Salem Units. Therefore, the staff proposes to determine that the proposed change does not involve a significant hazards consideration.

Local Public Document Room Location: Salem Free Library, 122 West Broadway, Salem, New Jersey 08079.

Attorney for licensee: Conner and Wetterhann, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, D.C. 20006.

NRC Branch Chief: Steven A. Varga.

Public Service Electric and Gas Company, Docket Nos. 50-272 and 50-311, Salem Nuclear Generating Station, Unit Nos. 1 and 2, Salem County, New Jersey

Date of amendment request: October 15, 1985.

Description of amendment request: The proposed amendments request would: (1) Change limitng condition for operation 3.4.1.2b to read as follows:

b. At least one of the above coolant loops shall be in operation* when the rod control system is de-energized**.

(2) Add limiting condition for operation 3.4.1.2C as follows:

c. At least two of the above coolant loops shall be in operation when the rod control system is energized**.

(3) Change the note with the single asterisk (*) to read as follows: *All reactor coolant pumps may be de-energized for up to 1 hour provided: (1) No operations are permitted that would cause dilution of the reactor coolant system boron concentration (2) core outlet temperature is maintained at least 10°F below saturation temperature, and (3) the rod control system is de-energized**.

(4) Add the following note with a double asterisk (**): (**)The rod control system shall be considered de-energized when one or more of the following conditions exist:

(1) Both Rod Drive MG set motor breakers are open.

(2) Both Rod Drive MG set generator breakers are open.

(3) A combination of at least three of the Reactor Trip and/or Reactor Trip Bypass Breakers are open.

If none of the above conditions for de-energizing the rod control system are met; the system shall be considered energized.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870). The examples of actions which involve no significant hazards consideration include changes that constitute additional limitations and controls not presently included in the technical specifications (Example ii). Since the amendments request would add new limitations and controls, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: Salem Free Library, 122 West Broadway, Salem, New Jersey 08079.

Attorney for licensee: Conner and Wetterhann, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, D.C. 20006.

NRC Branch Chief: Steven A. Varga.

South Carolina Electric & Gas Company, South Carolina Public Service Authority, Docket No. 50-395, Virgil C. Summer Nuclear Station, Unit 1, Fairfield County, South Carolina

Date of amendment request: April 9 and May 20, 1985.

Description of amendment request: The amendment would delete Technical Specification 3/4.5.4, "Boron Injection System," modify bases section B 3/4.5.5, "Refueling Water Storage Tank," and incorporate the necessary administrative changes to the index and page numbering that result from the Technical Specification deletion. These changes will allow for the removal of the boron injection (BIT) and other piping and components related to BIT operation.

Basis for proposed no significant

new piping, sufficient negative reactivity

stress on engine parts. This will

simplify the table, (3) delete references

locking these valves closed in Modes 1,

10 CFR 50.92(c) for determining whether

Basis for proposed no significant hazards consideration determination: The boron injection system ensured that sufficient negative reactivity was injected into the core to counteract any positive increase in reactivity caused by reactor coolant system (RCS) cooldown. RCS cooldown can be caused by inadvertant depressurization, a loss-of-coolant accident or a steam line break.

Of these three accidents, the steam line break is the only one in which the analysis depends on boron to terminate a return to power. The other accident scenarios produce boiling in the core, which introduces negative reactivity and assures the reactor will not become critical and return to power. The re-evaluation of the steam line break demonstrates that sufficient negative reactivity exists in the system without the BIT to prevent an inadvertent return to power in the event of this accident.

Removal of the BIT was determined not to decrease the departure from nucleate boiling ratio (DNBR) below the limit of 1.3 for the steam line break scenario. Removal of the BIT does not affect the other accident scenario conclusions involving DNBR and fuel damage because the presence of the BIT is not a factor in those resulting accident conditions.

The containment mass and energy releases for postulated main steam line breaks with the BIT removed do not vary significantly from the original release data. This new containment analysis based on BIT removal indicates energy release rates have in fact decreased. The mass and energy release calculations for outside containment are not significantly affected by the presence or absence of the BIT

To remove the BIT requires piping changes which introduce new pipe fittings and alter the calculated loads of present piping and supports. Therefore new pipe break and pipe whip analyses were performed as required of all high energy piping systems. These new analyses demonstrated that surrounding equipment required to safely shut down the plant is not compromised by the addition of the new piping.

The Commission has provided certain examples (48 FR 14870) of actions likely to involve no significant hazards considerations. The request involved in this case does not match any of those examples. However, the staff has reviewed the licensee's request for the above amendment and has determined that should this request be implmented, it will not (1) involve a significant increase in the probability or consequences of an accident previously evaluated because the pipe break and whip analyses are acceptable for the new piping, sufficient negative reactivity exists to prevent return to power, DNBR remains above 1.3, and containment mass and energy releases are not increased. Also, it will not (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the pipe break and whip analyses show that the new pipe does not compromise the surrounding equipment required to safely shut down the plant, or (3) involve a significant reduction in a margin of safety because DNBR remains above 1.3 and pressure/temperature response is less severe than the original analysis results. Accordingly, the Commission proposes to determine that this change does not involve significant hazards considerations.

South Carolina Electric & Gas Company, South Carolina Public Service Authority, Docket No. 50–395, Virgil C. Summer Nuclear Station, Unit 1, Fairfield County, South Carolina

Date of amendment request: June 10, 1985.

Description of amendment request: The amendment would revise Technical Specification 3/4.8.1, "A.C. Sources," and its bases. This proposed revision is based on NRC Generic Letter 84–15, "Proposed Staff Actions to Improve and Maintain Diesel Generator Realiability." The proposed revision will reduce the number of severity of diesel generator starts, thereby decreasing engine wear and increasing reliability. The proposed revision also restructures the action and surveillance statements for clarity and useability.

Basis for proposed no significant hazards consideration determination: The Commission has provided certain examples (48 FR 14870) of actions likely to involve no significant hazards considerations. The request involved in this case does not match any of those examples. However, the staff has reviewed the licensee's request for the above amendment and determined that should this request be implemented, it will not (1) involve a significant increase in the probability or consequences of an accident previously evaluated because the change is a reduction in frequency and severity of diesel generator test starts which will result in less wear and stress on engine parts. This will decrease the probability of an accident due to failure of engine parts, and the consequences of an accident will not change. Also, it will not (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the design and function of the diesel generators is not changed. Finally, it will not (3) involve a significant reduction in a margin of safety because there will be no change in diesel generator automatic response times or emergency loads assumed from that used in the accident analyses. Accordingly, the Commission proposes to determine that this change does not involve significant hazards considerations.

Southern California Edison Company, Docket No. 50–206, San Onofre Nuclear Generating Station, Unit No. 1, San Diego County, California

Date of amendment request: May 9, 1985.

Description of amendment request: The proposed amendment would revise Technical Specification (TS) 3.6.2, Containment Isolation Valves, and Table 3.6.2–1, Power Operated or Automatic Containment Isolation Valve Summary. The proposed change to TS 3.6.2 consist of four parts; (1) a revision to the page format, (2) clarification of the applicability of required actions under Action A in the event of inoperability of a closed system containment penetration that is open and is provided with only one isolation valve, (3) the addition of a specific exception to TS 3.0.4 that would allow operational mode changes with inoperable containment isolation valves under certain specific conditions, and (4) an addition that would permit temporary reactivation of a power-operated valve, that is secured closed under the Action statements, in order to perform valve position verification and testing. The proposed changes to Table 3.6.2–1 would (1) change the title of the table to reflect the fact that certain valves have remote manual controls and modify how the remote manual valves are identified on the table, (2) delete the references to the source of electrical control and operating power in order to simplify the table, (3) delete references to solenoid valves that control the compressed air to pneumatically operated containment valves which were included on the table for informational purposes only, (4) delete containment isolation valves CV–948 and CV–949 which are no longer needed to provide a containment isolation function because the Pressurizer Relief Tank Gas Sample pentration has been removed from service by the installation of pipe caps inside and outside of containment, (5) add automatic containment isolation valves SV–3004 and SV–2004 which provide isolation to a new hydrogen calibration gas pentration, (6) add an outboard containment isolation valve (SV–3302) to the reactor coolant loop sample penetration, (7) remove the objective portion of the footnote regarding manual valves CVS–301 and CVS–313 because the objective is covered in the Basis, and (8) add a new item 29 which adds an automatic check valve outside of containment (SV–3303) and a check valve inside containment to provide isolation for a new reactor coolant sample return penetration.

Basis for proposed no significant hazards consideration determination: Item (1) of the proposed change to TS 3.6.2 and Items 1, 2, 3 and 7 of the proposed changes to Table 3.6.2–1, discussed above, are administrative changes. Change (1) of TS 3.6.2 reformats this TS to be consistent with the format of other TS; there is no substantive change involved. Change (1) to Table 3.6.2–1 modifies the title of the table to reflect the fact that some of the valves listed have remote manual controls. In addition, the double asterisk footnote indicating remote manual valves is deleted and replaced with an RM indication for the applicable valves. Change (2) to the Table would delete all references to the source of electrical control and operating power ("alignment"). The references to valve "alignment" have no bearing on the operability of the isolation valves. Consistent with these changes, the single asterisk footnote describing the logic nest alignment would also be deleted. Change (3) to the table would delete the references to the solenoid valves that control the compressed air to pneumatically operated containment valves. These solenoid valve references were included for informational purposes only and their deletion from the table has no safety impact. Change (7) to Table 3.6.2–1 discussed above, would remove the objective portion of the footnote regarding manual valves CVS–301 and CVS–313. The objective of locking these valves closed in Modes 1, 2, 3, and 4 is discussed in the Basis Section and there is no reason to include it on the table. The Commission has provided guidance concerning the application of standards in 10 CFR 50.92 by providing certain examples (48 FR 14870, April 6, 1983) of amendments not likely to involve significant hazards considerations. One of the examples (i) is a purely administrative change to TS such as a change in nomenclature. Because these proposed changes involve changes of the types specified in example (i) of the Commission guidance, the staff proposes to determine that these changes would not involve a significant hazards consideration.

Another example (ii) in the Commission guidance is a change that constitutes an addtional limitation, restriction or control not presently included in the TS. Proposed changes 5, 6, and 6 to Table 3.6.2–1, discussed above, would add valves to this table which are not currently included. Therefore, these changes are added restrictions of the type in example (ii) of the Commission's guidance and the staff proposes to determine that these proposed changes would not involve a significant hazards consideration.

Proposed change (2) to TS 3.6.2, discussed above, would clarify the required actions under Action A for closed systems. General Design Criterion 57 states that each line that penetrates primary reactor containment and is neither part of the reactor coolant pressure boundary nor connected directly to the containment atmosphere shall have at least one containment insolation valve which shall be either automatic, locked closed, or capable of remote manual operation. For these closd systems, the system pressure boundary provides an insolation boundary. The current TS requires that with one or more insolation valves specified in Table 3.6.2–1 inoperable, at least one insolation valve be maintained operable in each penetration that is open. For these closed systems for which only one isolation valve is required, this requirement of the current specification cannot be satisfied. Application of TS 3.0.3 in such cases would require that either the inoperable valve be closed or shutdown be initiated within 1 hour. The licensee has proposed a clarification of Action A of the TS that would allow a 4 hour time limit to complete the required actions for such closed systems that have only one isolation valve. This time limit is consistent with the time limit where two isolation valves are required. The Commission has provided standards in 10 CFR 50.92(c) for determining whether a significant hazards consideration exists. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. Each of the three criteria is met in relation to the proposed change as follows: (1) The clarification of Action A regarding closed systems with a single isolation value would not involve a significant increase in the probability or consequences of an accident previously evaluated because the pressure boundary of the closed system provides an isolation boundary in addition to the isolation provided by the valve and the 4 hour limit for entering the Action statement is consistent with the time limit where two isolation values are required; (2) The operation of the facility in accordance with the proposed change would not create the possibility of a new or different kind of accident from any accident previously evaluated because the plant would be operated in essentially the same manner and this proposal change would not result in any change to the plant components or configuration; (3) The proposed change would not cause a significant reduction in a margin of safety. As previously stated, the closed system pressure boundaries provide as isolation boundary. This boundary assures that there would not be a significant reduction in a margin of safety should the single isolation value become inoperable and entry into the Action statement became necessary (4–hour limit).

Proposed change (3) to TS 3.6.2 would add a specific exception to TS 3.0.4 which would allow operational mode changes with inoperable containment isolation values under certain specific conditions. Without this exception, the current TS do not permit operational mode changes when an Action statement is entered because of an inoperable isolation value. The licensee has proposed that the TS be modified to permit mode changes with an inoperable containment isolation value under the conditions that (1) within 4 hours, the affected penetration is isolated by a secured closed automatic isolation value, closed manual valve, or blind flange, and (2) the system with an

inoperable containment isolation valve be declared inoperable and the

accident previously evaluated because the temporary reactivation of

above, the caps on the penetration provide the containment isolation

with respect to the system or component specified in the Standard Review Plan

Visual inspections will continue to be performed at five-year intervals

deficiency. T.S. 4.6.1.6a also currently provides specific criteria for

inoperable containment isolation valve be declared inoperable and the applicable Action statements for that system be satisfied. Each of the three criteria for determining that the proposed change involves no significant hazards consideration is met as follows: (1) The operation of the facility in accordance with the proposed change would not involve a significant increase in the probability or consequences of an accident previously evaluated because a secured closed automatic isolation valve, closed manual valve, or blind flange would proved at least an equivalent degree of containment isolation as an operable containment isolation value.

In addition, the system containing the inoperable isolation value would be declared inoperable and the appropriate Action statement would be entered for this system; (2) the operation of the facility in accordance with the proposed change would not create the possibility of a new or different kind of accident from any accident previously evaluated because, as stated earlier, the required isolation of the penetration affected by the inoperable isolation valve would provide at least an equivalent degree of containment isolation as an operable isolation valve. In addition, the system containing the inoperable isolation valve would be declared inoperable; (3) the proposed change would not involve a significant reduction in a margin of safety because the requirement to have a secured closed automatic isolation value, closed manual valve, or blind flange will provide at least an equivalent margin of safety with regard to containment isolation as an operable isolation valve.

Proposed change (4) to TS 3.6.2 would add a provision that would permit the temporary reactivation of deactivated power operated valves to conduct (1) surveillance which may be essential for verification of valve position, and (2) valve testing which would be prerequisite to returning the valve to operable status. Because the addition to the TS would also require that Action statement A.1 be applied during this temporary reactivation, the valve would have to be declared operable within 4 hours or the affected penetration would have to be isolated or plant shutdown commenced as indicated by Action statements A.2, A.3, or A.4. Each of the three criteria for determining that the proposed change involves no significant hazards consideration is met as follows: (1) The operation of the facility in accordance with the proposed change would not involve a significant increase in the probablity or consequences of accident previously evaluated because the temporary reactivation of deactivated power valves would (a) verify that the valve position is correct, and (b) permit testing of the valve prior to returning the value to operable status. Both of these surveillance items will verify that the valves are either positioned properly or are in an operable condition; (2) the operation of the facility in accordance with the proposed change would not create the possibility of a new or different kind of accident from any accident previously evaluated because the verification of valve position would provide confirmation that the appropriate Action statements have been satisfied for the valve and would permit testing of a valve as a prerequisite to returning the valve to operable status. These surveillance tasks would not create the possibility of a new or different kind of accident from any accident previously evaluated; (3) the proposed change would not involve a significant reduction in a margin of safety because the change would permit surveillance tasks to verify correct valve position and testing prior to declaring a valve operable.

Finally, proposed change (4) to Table 3.6.2-1 would delete valves CV-948 and CV-949 which currently are listed as performing the isolation function for the Pressurizer Relief Tank Gas Sample penetration. The licensee has indicated that this penetration has been removed from service by the installation of a pipe cap inside the penetration and also outside of containment. Accordingly, valves CV-948 and CV-949 no longer provide a containment isolation function. Each of the three criteria for determining that the proposed change involves no significant hazards consideration is met as follows: (1) The operation of the facility with the penetration capped and the isolation valves removed would not involve a significant increase in the probability or consequences of an accident previously evaluated because the caps on the penetration would provide the containment isolation function; (2) the operation of the facility in accordance with the proposed change would not create the possibility of a new or different kind of accident from any accident previously evaluated because the plant would be operated in essentially the same manner and this change would result in the containment isolation function for the penetration being performed by the installed caps; (3) the proposed change would not involve a significant reduction in a margin of safety because, as stated above, the caps on the penetration provide the containment isolation function.

Based on the licensee's submittal and the above discussion which demonstrate that the three criteria specified in 10 CFR 50.92 have been met, the staff proposes to determine that the proposed change would not involve a significant hazards consideration.

NRC Branch Chief: John A. Zwolinski.

Southern California Edison Company, et al, Docket Nos. 50-361 and 50-362 San Onofre Nuclear Generating Station, Units 2 and 3, San Diego County, California

Date of Amendment Request: April 28, 1984, January 29, 1985, (Reference PCN-114 and 130).

Introduction: The proposed changes would revise Technical Specification ¾.6.1.6, "Containment Structural Integrity," and License Condition 2.C (4), "Containment Tendon Surveillance," as follows: (1) PCN-114 would clarify the containment tendon surveillance requirements to be consistent with the current surveillance program and to reduce surveillance requirements based on tendon anchorage accessibility. (2) PCN-130 would delete License Condition 2.C (4), since submittal of the currently implemented containment tendon surveillance program meets the intent of the license condition.

Basis for Proposed No Significant Hazards Determination: The Commission has provided guidance concerning the application of standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870) of amendments that are considered not likely to involve significant hazards considerations. Example (i) relates to a purely administrative change to the technical specifications; for example, a change to achieve consistency throughout the technical specifications, a change in nomenclature, or correction of an error. Example (vi) relates to a change which either may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptance criteria

with respect to the system or component specified in the Standard Review Plan (SRP). Each of the specific proposed changes included in PCN-114 and PCN-130 is similar to one of these examples from 48 FR 14870. Therefore it is proposed that these changes do not involve significant hazards considerations. A description of each proposed change to the technical specifications ad a discussion of how each change is similar to these examples from 48 FR 14870 follows.

Specific Changes Requested and Basis for Proposed No Significant Hazards Determination: (1) *PCN-114*— The proposed change would revise Surveillance Requirement 4.6.1.6, "Containment Tendons," of Technical Specification 3/4.6.1.6, "Containment Structural Integrity," for both Units 2 and 3. The purpose of this technical specification is to ensure that containment structural integrity will be maintained for the life of the facility. T.S. 4.6.1.6. specifically concerns the steel containment tendons which reinforce the containment structure by maintaining it in compression. There are two types of containment tendons: hoop tendons, which extend horizontally around the circumference of the cylindrical part of the containment structure, and U tendons, which extend vertically through the cylindrical part of the containment structure and arc through the containment structure hemispherical dome. T.S. 4.6.1.6. defines specific tests which must be performed at reagular intervals in orfer to ensure the structural integrity of the tendons and, therefore, of the containment structure. The proposed change to T.S. 3/4.6.1.6. consists of the following four parts:

(a) T.S. 4.6.1.6 for both Units 2 and 3 currently states, as part of the requirement for demonstrating containment structural integrity, that tendon lift-off force and tendon detensioning tests and material tests and inspections must be performed at the end of one, five, and ten years following the initial structural integrity test (ISIT) and every ten years thereafter. These tests assure that tendons are properly tensioned and free of damage (i.e., corrosion, cracks, etc.). The proposed Unit 3 change will correct the wording in T.S. 4.6.1.6 to be consistent with the existing Table 4.6-1 to state that test intervals are at the end of one and five years following the ISIT and every ten years thereafter. The specified tests will be performed at one, five, fifteen, twenty-five, etc. years following the ISIT, rather than at one, five ten, twenty, thirty, etc. years. Visual inspections will continue to be performed at five-year intervals.

The proposed change described above will revise the statement of when tendon lift-off force and tendon detensioning tests and material tests must be performed for Unit 3. For Unit 3 this proposed change will bring the wording in T.S. 4.6.1.6. into compliance with Table 4.6-1, "Tendon Surveillance," of T.S. 3/4.6.1.6, which currently sets the intervals for performance of these tests at one, five, fifteen, twenty-five, etc. years following the ISIT. Because the proposed change will achieve consistency within the technical specifications, it is administrative and, therefore, is similar to Example (i).

(b) T.S. 4.6.1.6a assures that tendons are properly tensioned by requiring that the lift-off force of tendons specified in this T.S. be determined periodically. The tendons specified in Table 4.6-1 were chosen generally at random during the development of this T.S. The tendons chosen for detensioning and material tests were chosen at random from those with long tails and shims which provide for retensioning. The proposed change to T.S. 4.6.1.6a consists of the following three parts:

(i) T.S. 4.6.1.6a currently implies that the tendon lift off force must be maintained between the maximum and minimum values specified in Table 4.6-2, "Tendon Lift-off Force," The proposed change clarifies that the values specified in Table 4.6-2 are not limits to be strictly adhered to, but are upper and lower tolerance band values which reflect the normal range of variability in long term stress loss predictions and are provided only for comparison with tendon lift-off forces determined by test. This proposed change will more appropriately reflect the intent of the maximum and minimum values listed in Table 4.6-2, which is to provide a normal range of variability for long term stress loss predictions. Because the proposed change provides a change in nomenclature which clarifies T.S. 4.6.1.6a, it is administrative and is similar to Example (i) of 48 FR 14870.

(ii) T.S. 4.6.1.6a states that if the lift-off force for any tendon is found to lie between the prescribed lower limit and 90% of the prescribed lower limit, the tendons on either side of the unacceptable tendon must be detensioned to determine that they have acceptable lift-off forces. If each adjacent tendon is found acceptable, the technical specification currently states that the adjacent tendons must then be restored to the required level of integrity (i.e., retensioned) and that the unacceptable tendon may be considered a single unique and acceptable deficiency. T.S. 4.6.1.6a also currently provides specific criteria for retensioning tendons: If a tendon is tested and found acceptable, it must be retensioned to obtain a lift-off force equal to +0, −5% of the prescribed maximum tendon lift-off force. The proposed change will replace the ambiguous wording which requires acceptable tendons to be restored to the required level of integrity with the previously stated, specific requirement that acceptable tendons be retensioned such that the lift-off force is equal to +0, −5% of the prescribed upper tolerance band value.

The proposed change described above will provide the specific retensioning requirements for tendons which are tested and found acceptable to replace the current general and vague statement of restoring these tendons to "the required integrity." Because the proposed change clarifies T.S. 4.6.1.6a, it is administrative and, therefore, is similar to Example (i) of 48 FR 14870.

(iii) T.S. 4.6.1.6a currently specifies that abnormal tendon degradation is exhibited when more than one tendon in the original sample population is found to have a lift-off force below the prescribed minimum lift-off force or when any selected tendon is found to have a lift-off force below 90% of the prescribed lift-off force lower limit. The proposed change will clarify that the sample population of tendons are those which were previously randomly selected for testing and are specified in Table 4.6-2. Because the proposed change is administrative, it is similar to Example (i) of 48 FR 14870.

(c) T.S. 4.6.1.6c requires that visual inspections of the containment structure be performed periodically. T.S. 4.6.1.6.c.3 relates specifically to the inspection of concrete surfaces. It currently requires that the concrete surfaces adjacent to the end anchorages of tendons specified by T.S. 4.6.1.6a be demonstrated by visual examination of the crack patterns to exhibit no abnormal material behavior. The proposed change will revise T.S. 4.6.1.6.c.3 to state that only the exposed concrete surfaces adjacent to the end anchorages of hoop tendons specified by T.S. 4.6.1.6a must be visually inspected.

This proposed change will require visual inspection of only the exposed concrete surfaces adjacent to the end anchorages of hoop tendons specified by T.S. 4.6.1.6a rather than all concrete surfaces adjacent to both the hoop and U-tendon end anchorages. The concrete surfaces adjacent to the U-tendon end anchorages cannot be visually inspected, because they are covered by

3/8-inch thick plates which are welded to the end anchorages and to steel

and 3. License Condition 2.C(4) states that the Southern California Edison

program has been submitted and implemented, the intent of License

refueling and maintenance activities, the RCS is drained below the nozzle, the

coolant system is refilled and the chloride and fluoride inventory was

safety hazards. Surveillance is used to ensure containment integrity by

3/8-inch thick plates which are welded to the end anchorages and to steel channels embedded in the concrete. Removal of the plates by such methods as grinding and flame cutting is not desirable, because these methods are likely to damage the concrete surfaces underneath the plates. It is not necessary to visually inspect the concrete surfaces near the U-tendon end anchorages because these prestress loads result only in compressing stresses on the adjacent concrete.

For acceptance criteria for inservice testing and surveillance of containment tendons, SRP Section 3.8.1 "Concrete Containments" references Regulatory Guide 1.35, "Inservice Testing of Ungrouted Tendons in Prestressed Concrete Containment Structures." Regulatory Guide 1.35 recommends visual inspection of concrete adjacent to tendon anchorages where practical without dismantling the load-bearing components of the anchorage. It is impractical to remove the plates welded to the end anchores of the U-tendons because this removal method may result in damage to the concrete surface under the plates. This would be counter to the intended purpose of the surveillance. Although this change reduces the existing visual inspection requirements which may result in some decrease in a margin of safety, it meets the visual inspection requirements of R.G. 1.35 and the SRP acceptance criteria. Therefore the propsed change is similar to Example (vi) of 48 FR 14870.

(d) Table 4.6–1 "Tendon surveillance," lists the containment tendons specified to be inspected and tested at the required intervals. The proposed change would correct the designation of one U-tendon in Table 4.6–1 in the Technical specifications of each unit.

The U-tendons are listed in Table 4.6–1 using a two number designation to indicate the tendon end cap numbers for that tendon. In the Unit 2 Table 4.6–1 during the 30 year inspection the designation 69–178 is corrected to 64–178, and in the Unit 3 Table 4.6–1 during the 3 year inspection, the designation 23–139 is corrected to 23–129. Because the propsed change corrects typographical errors, it is administrative and, therefore, is similar to Example (i) of 48 FR 14870.

(2) *PCN/130*—The proposed change would delete License Condition 2.C(4), "Containment Tendon Surveillance," from the San Onofre Nuclear Generating Station Units 2 and 3 Facility Operating Licenses NPF–10 and NPF–15, respectively. The purpose of this license condition is to ensure the implementation of an acceptable tendon surveillance program for both Units 2 and 3. License Condition 2.C(4) states that the Southern California Edison Company (SCE) must provide for Nuclear Regulatory Comission (NRC) approval and implement a tendon surveillance test program which will ensure full conformance with the provisions of Regulatory Guide 1.35, "Inservice Inspection of Ungrouted Tendons in Prestressed Concrete Containments," which provides an NRC accepted basis for developing a tendon surveillance program, and Regulatory Guide 1.35.1, "Determining Prestressing Forces for Inspection of Prestressed Concrete Containments" which provides additional guidance concerning the NRC position in determining tendon prestressing forces. The tendon surveillance test program is required to include a specific program and commitments for tendon retensioning, such that the predicted prestressing force of each tendon will be greater than the required design prestressing force of each tendon for the entire plant life. In accordance with License Condition 2.C(4), SCE has submitted a tendon surveillance test program, "Tendon Surveillance Requirements for the San Onofre Nuclear Generating Station, Units 2 and 3," dated February, 1984, which was implemented in January, 1982, for Unit 2 and in February, 1983, for Unit 3. SCE has submitted Reference 5 to the tendon surveillance test program, "Experimental Determination of the Influence of Individual Tendon Stressing Upon Containment Post-Tensioning Strain, San Onofre Nuclear Generating Station, Units 2 and 3." In addition, the tendon surveillance test program required by License condition 2.C(4) has been incorporated into the Final Safety Analysis Report, Section 3.8.1.7.2 "(Concrete Containment Testing and Inservice Inspection Requirements) Long-Term Surveillance," and into Technical Specification 3/4.6.1.6, "Containment Structural Integrity." The licensee's program does not include retensioning tendons to maintain the prestressing force of each tendon greater than the required design prestressing force for the entire plant life. However, this program satisfies all regulatory requirements including full conformance with the requirements of Regulatory Guide 1.35, Revisioin 2 and Draft Revision 3, and the April 1979 draft of Regulatory Guide 1.35.1, and maintains the average prestress at all locations within the containment above the minimum design prestress.

Therefore, the need for retensioning of tendons, unless required by failure to satisfy program requirements during the life of the plant, is eliminated. Because an acceptable tendon surveillance program has been submitted and implemented, the intent of License Condition 2.C(4) has been met. Therefore, the proposed change would delete License Condition 2.C(4) from Facility Operating Licenses NPF–10 and NPF–15.

This proposed change (PCN–130) is similar to Example (vi) of 48 FR 14870 in that it may in some way reduce a margin of safety but where the results are clearly within the acceptance criteria specified in the Standard Review Plan. In this case, the acceptance criteria are specified in SRP section 3.8.1 "Concrete Containments." SRP section 3.8.1 states that the testing and inservice surveillance program is acceptable if it meets the requirements of Regulatory Guide 1.35. The proposed change will require that the average prestress at all locations within the containment be maintained above the minimum design prestress requirements rather than maintaining the prestressing force of individual tendons greater than the required design prestressing force as is required by the existing license condition. Although this may in some way reduce a margin of safety, the tendon surveillance program is in conformance with Regulatory Guide 1.35. Therefore the proposed change satisifes the SRP acceptance criteria and is similar to Example (vi) of 48 FR 14870.

Attorneys for licensee: Charles R. Kocher, Esq., Southern California Edison Company, 2244 Walnut Grove Avenue, P.O. Box 800, Rosemead, California 91770 and Orrick, Herrington & Sutcliffe, Attention: David R. Pigott, Esq., 600 Montgomery Street, San Francisco, California 94111.

NCR Branch Chief: George W. Knighton.

Virginia Electric and Power Company, Docket No. 50–339, North Anna Power Station, Unit No. 2, Louisa County, Virginia

Date of omendment request: February 11, 1985.

Description of amendment request: The proposed change would revise the NA–2 Technical Specification 3/4.4.7, Table 4.4–3 by eliminating the requirement for sampling chlorides and fluorides when the Reactor Coolant System (RCS) is drained below the reactor pressure vessel nozzles and the reactor internals and/or head are in place. Currently, chlorides and fluorides in the NA–2 RCS require surveillance at least once per 72 hours. To perform refueling and maintenance activities, the RCS is drained below the nozzle, the Reactor Heat Removal System (RHRS) is drained and the upper internals are in place. To obtain the required chloride and fluoride samples on a continuing frequency of 72 hours would require personnel ingress to the area of the upper core internals. Entry into this area, which currently has a radiation field of 10 roentgens per hour, would result in excessive radiation exposure. Prior to fully draining the RCS, the required sampling of chlorides and fluorides would be conducted in accordance with specified sampling procedures. Also, when the RCS and the RHRs are in a drained condition, the inventory of chlorides and fluorides will not change. When the RCS is refilled, the chloride and fluoride sampling will recommence in accordance with the specified sampling requirements. Finally, it is noted that the proposed change was previously reviewed and approved by the NRC for NA–1 as stated in Amendment No. 41 dated August 4, 1982.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The probability of occurrence or the consequences of a malfunction of equipment important to safety and previously evaluated in the FSAR is not increased because the chloride and fluoride inventory in the reactor coolant system will not change since the reactor coolant system and the RHR System are drained and the inventory was known at the last sample. Also, the possibility of a different type of accident or malfunction than was previously evaluated in the FSAR has not been created because the sampling of chlorides and fluorides will resume when the reactor coolant system is refilled to show that the samples are below their required limits. In addition, the margin of safety as described in the BASES section of any part of the Technical Specifications is not reduced because sampling of chlorides and fluorides will resume when the reactor coolant system is refilled and the chloride and fluoride inventory was within specifications at the time of drain down. Additional makeup could be detected.

Finally, the proposed change has been previously reviewed and approved by the NRC as stated in Amendment No. 41 dated August 4, 1982.

Therefore, based on the above, the proposed amendment will not result in a significant increase in the probability or consequences of an accident previously considered, will not create the possibility of a new or different accident from any evaluated previously, and will not significantly reduce a safety margin. Therefore, the NRC staff proposes to determine that the standards for determining that a license amendment involves no significant hazards consideration are met, and that operation of the facility in accordance with the proposed amendment would not involve a significant hazards consideration.

Local Public Document Room locations: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Attorney for licensee: Michael W. Maupin, Esq., Hunton, Williams, Gay and Gibson, P. O. Box 1535, Richmond, Virginia 23212.

NRC Branch Chief: Edward J. Butcher, Acting.

Washington Public Power Supply System, Docket No. 50–397, WNP–2 Richland Washington

Date of amendment request: April 25, 1985.

Description of amendment request: The proposed amendment to Operating License NPF–21 would revise the WNP–2 Technical Specifications to change the Surveillance Requirement 4.6.1.1. The change, if approved, will allow certain containment isolation valves to be excluded from routine surveillance requirements while the plant is at power. The purpose of the proposed change is to avoid unnecessary personnel hazards from both a safety and ALARA standpoint.

During normal operations there are areas within the plant that are subject to high radiation levels and/or very high temperatures either of which make personnel access hazardous. Some of the containment isolation valves are located in these areas or require personnel to pass through these areas in order to perform the 31 day surveillance, currently required by the Technical Specifications, thus creating personnel safety hazards. Surveillance is used to ensure containment integrity by verification of penetration closures.

The amended Technical Specifications would eliminate the requirement to expose personnel to high radiation and temperature hazards while continuing to ensure containment integrity by administratively controlling access to the areas which house the closed valves and blind flanges. The area in which the closures are located will be locked and posted as high radiation areas which require Radiation Work Permits (RWP) for access. An RWP is granted only on an "as need basis." In addition, the valves themselves are locked or otherwise secured in the closed position and sealed. Appropriate authorization is required to break the seal. The integrity of the containment is thus assured.

The Supply System has reviewed this change per 10 CFR 50.59 and determined that no unreviewed safety questions will result from this amendment.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.82(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Supply System has reviewed this change per 10 CFR 50.59 and determined that it does not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated because there is no change to the valves or their positions. This change reflects only access restrictions which prevent position verification while at power; or

(2) Create the possibility of a new or different kind of accident than previously evaluated because this is an administrative change only and does not impact system operation; or

(3) Involve a significant reduction in a margin of safety because it does not change any leakage paths or rates.

The licensee has determined and the NRC staff agrees that these changes have little safety significance and that the proposed amendment will not alter any of the accident analyses.

Based on staff review of the proposed modification, we find that there is

Attorney for licensee: Thomas Dignan, Esquire, Ropes and Gray, 225 Franklin

Baltimore Gas & Electric Company,

Commonwealth Edison Company,

the Commission's March 14, 1983

Date of initial notice in **Federal**

VOL 50 ISS 137 JL 17 1985 UMI

Based on staff review of the proposed modification, we find that there is reasonable assurance that the proposed exclusion of the containment isolation valves from the 31 day routine surveillance requirements will have little or no impact on the public health and safety.

Accordingly, the Commission proposes to determine that the proposed changes to the Technical Specifications involve no significant hazards considerations.

Local Public Document Room location: Richland Public Library, Swift and Northgate Street, Richland, Washington 99352.

NRC Branch Chief: Walter R. Butler.

Yankee Atomic Electric Company, Docket No. 50–29, Yankee Nuclear Power Station, Franklin County, Massachusetts

Date of amendment request: May 7, 1985.

Description of amendment request: The proposed change would add Technical Specifications (TS) to define limiting conditions for operation and surveillance requirements for emergency core cooling (ECC) subsystem leakage.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of standards for making a no significant hazards consideration determination by providing certain examples (April 6, 1983, 48 FR 14870). Example (ii) of actions involving no significant hazards consideration involves a change that constitutes an additional limitation, restriction, or control not presently included in the TS. As a result of staff review of SEP Toxic XV–19, "Loss-of-Coolant Accidents Resulting from Spectrum of Postulated Piping Breaks within the Reactor Coolant Pressure Boundary," the licensee proposed TS to limit leakage from ECC subsystems outside containment to ensure offsite dose remained within the limits of 10 CFR Part 100. The proposed change adds limitations and controls on ECCS subsystem leakage not currently provided in TS.

Based on this discusson, the staff proposes to determine that the requested action would not involve a significant hazards consideration.

Notice of Issuance of Amendment to Facility Operating License

During the period since publication of the last bi-weekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the Federal Register as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Documents Room, 1717 H Street NW., Washington, D.C., and at the local pubic document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Baltimore Gas & Electric Company, Docket Nos. 50–317 and 50–318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of application for amendments: October 11, 1984.

Brief description of amendments: The amendments provide Radiological Effluent Technical Specifications (TS), administrative TS, and changes to the environmental monitoring programs TS. In addition, the remainder of the Appendix B TS are deleted.

Date of issuance: July 1, 1985.

Effective date: July 1, 1985.

Amendment Nos.: 105 and 86.

Facility Operating License Nos. DPR–53 and DPR–69. Amendments revised the Technical Specifications.

Date of initial notice in Federal Register: December 31, 1984 (49 FR 50794 at 50799).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 22, 1985.

No significant hazards consideration comments received: No.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland.

Carolina Power & Light Company, Docket No. 50–325, Brunswick Steam Electric Plant, Unit 1, Brunswick County, North Carolina.

Date of application for amendment: February 13, 1985, as supplemented April 4, 1985.

Brief description of amendment: The amendment changes the Technical Specifications to permit postponement of a flow test of the core spray system until within 48 hours after restoration of the suppression chamber to operable status but, in any case, no later than October 30, 1985.

Date of issuance: June 21, 1985.

Effective date:

Amendment No.: 84.

Facility Operating License Nos. DPR–71. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register. April 23, 1985 (50 FR 15999) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 21, 1985.

No significant hazards consideration comments received: No.

Local Public Document Room location: Southport, Brunswick County Library, 109 W. Moore Street, Southport, North Carolina 28461.

Commonwealth Edison Company, Docket Nos. 50–237/249, Dresden Nuclear Power Station, Unit Nos. 2 and 3, Grundy County, Illinois

Date of application for amendments: October 10, 1984.

Brief description of amendments: They add limiting conditions for operation and surveillance requirements to the Technical Specifications for certain plant modifications required for TMI Action Plan Items included in Generic Letter 83–36. They are Containment High Range Radiation Monitor (II.F.1.3), Containment Pressure Monitor (II.F.1.4), Containment Water Level Monitor (II.F.1.5) and Containment Hydrogen Monitor. Of the five others mentioned in GL 83–36, one, Reactor Coolant System Vents (II.B.1) does not require TS and two, Noble Gas Effluent Monitors (II.F.1.1) and Sampling and Analysis of Plant Effluents (II.F.1.2) have suitable TS. However, two more, Post-Accident Sampling (II.B.3) and Control Room Habitability (III.D.3.4), require further staff review.

Date of issuance: June 24, 1985.

Effective date: June 24, 1985.

Amendment Nos. 90 and 83.

Provisional Operating License No. DPR–19 and Facility Operating License No. DPR–25. The amendments revise the Technical Specifications.

Date of initial notice in Federal Register: May 21, 1985 (50 FR 20972). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 24, 1985.

No significant hazards consideration comments received: No.

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60450.

Connecticut Yankee Atomic Power Company, Docket No. 50–213, Haddam Neck Plant, Middlesex County, Connecticut

Date of application for amendment: November 7, 1984.

Brief description of amendment: The amendment revises the completion date for Item III.D.3.4, Control Room Habitability, specified in the Commission's March 14, 1983 Confirmatory Order, to (1) remove the required completion date of December 1984, (2) replace the completion date with "To Be Determined," and (3) indicate that Item III.D.3.4 is no longer considered part of the Confirmatory Order.

Date of issuance: July 1, 1985.

Effective date: July 1, 1985.

Amendment No. 63.

Facility Operating License No. DPR–61. Amendment revised the license and the Commission's March 14, 1983 Confirmatory Order.

Date of initial notice in Federal Register: December 4, 1984 (49 FR 47463). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated July 1, 1985.

No significant hazards consideration comments received: No.

Local Public Document Room location: Russell Library, 124 Broad Street, Middletown, Connecticut 06457.

Consumers Power Company, Docket No. 50–155, Big Rock Point Plant, Charlevoix County, Michigan

Date of application for amendment: January 30, 1985, as revised February 1, 1985 and June 7, 1985.

Brief description of amendment: This amendment changes the Big Rock Point Administrative Controls Technical Specifications to reflect offsite corporate reorganizations of the Consumers Power Company Quality Assurance Organization and the Nuclear Activities Plant Organization.

Date of issuance: July 1, 1985.

Effective date: July 1, 1985.

Amendment No. 76.

Facility Operating License No. DPR–6. This amendment revised the license and the Technical Specifications.

Date of initial notice in Federal Register: May 21, 1985 (50 FR 20974). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated July 1, 1985.

No significant hazards consideration comments received: No.

Local Public Document Room location: North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

Duke Power Company, Dockets Nos. 50–269, 50–270, and 50–287, Oconee Nuclear Station, Units Nos. 1, 2, and 3, Oconee County, South Carolina

Date of application for amendments: April 30, 1984.

Brief description of amendments: These amendments revise the TSs to incorporate monitoring and control limits of hydrogen concentration in the Waste Gas Holdup Tanks. Other changes requested in the April 30, 1984 submittal have been addressed by a separate Safety Evaluation and approved by license Amendment Nos. 133, 133 and 130 dated January 9, 1985.

Date of issuance: June 24, 1985.

Effective date: June 24, 1985.

Amendments Nos.: 140, 140 and 137.

Facility Operating Licenses Nos. DPR–38, DPR–47 and DPR–55. Amendments revised the Technical Specifications.

Date of initial notice in Federal Register: August 22, 1984 (49 FR 33363) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 24, 1985

Local Public Document Room location: Oconee County Library, 501 West Southbroad Street, Walhalla, South Carolina.

Duquesne Light Company, Docket No. 50–334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of application for amendment: March 21, 1985.

Brief description of amendment: The amendment changes the Technical Specifications for Beaver Valley Unit No. 1 to clarify the reactor plant component cooling pump and river water pump surveillance requirements. The new surveillance requirements specify that each pump develops the required differential pressure and flow rate when tested in accordance with Specification 4.0.5, which in turn requires that certain pumps and valves be tested in accordance with ASME Code Section XI.

Date of issuance: July 5, 1985.

Effective date: July 5, 1985.

Amendment No. 94.

Facility Operating License No. DPR–66. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: May 21, 1985 (50 FR 20976) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated July 5, 1985.

No significant hazards consideration comments received: No

Local Public Document Room location: B.F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Florida Power Corporation, et al., Docket No. 50–302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of application for amendment: May 31, 1984.

Brief description of amendment: This amendment changes the Technical Specifications such that the restriction to mode changes is no longer applicable to the Containment Purge and Exhaust Isolation System and the Spent Fuel Storage Pool. The remaining request contained in the May 31, 1984, application pertaining to the Reactor Coolant Vent System will be addressed by separate action.

Date of issuance: June 26, 1985.

Effective date: June 27, 1985.

Amendment No.: 74.

Facility Operating License No. DPR–

Local Public Document Room location: Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199.

Florida Power and Light Company, Docket Nos. 50-250 and 5-251, Turkey Point Plant Units 3 and 4, Dade County, Florida

Date of application for amendments: February 15, 1985 and supplemented on April 17 and May 8, 1985.

Brief description of amendments: These amendments revise the Technical Specifications (TS) relating to the Moderator Temperature Coefficient (MTC). The current TS allow operation with a positive MTC of $+5 \times 10^{-5}$ delta k/k/°F (change in reactivity per degree Fahrenheit) from zero to 70 percent of rated power and requires a step change at 70 percent of rated power to an MTC of 0 delta k/k/°F. The TS change allows a required linear rampdown from the allowable MTC of $+5 \times 10^{-5}$ delta k/k/°F to zero between 70 percent and 100 percent of rated power in place of the current requirement for a step change at 70 percent of rated power. The change will remove the restrictive requirement for a step change by requiring the linear rampdown.

Date of issuance: June 27, 1985.

Effective date: June 27, 1985.

Amendment Nos. 115 and 109.

Facility Operating Licenses Nos. DPR-31 and DPR-41: Amendments revised the Technical Specifications.

Northeast Nuclear Energy Company (NNECO), Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of application for amendment: November 7, 1984.

Brief description of amendment: The amendment revises the completion date for Item III.D.3.4, Control Room Habitability, specified in the Commission's March 14, 1983 Confirmatory Order, to (1) remove the required completion date of December 1984, (2) replace the completion date with "To be Determined," and (3) indicate that item III.D.3.4 is no longer considered part of the Confirmatory Order.

Date of issuance: July 1, 1985.

Effective date: July 1, 1985.

Amendment No. 93.

Provisional Operating License No. DPR-21. Amendment revised the license and the Commission's March 14, 1983 Confirmatory Order.

Date of initial notice in **Federal Register:** December 4, 1984 (49 FR 47462).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated July 1, 1985.

No significant hazards consideration comments received: No.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Northern States Power Company, Docket Nos. 50-282 and 50-306, Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2, Goodhue County, Minnesota

Date of application for amendments: July 11, 1984, supplemented April 26, 1985.

Brief description of amendments: The amendments revised the Technical Specifications in the areas of (1) reporting requirements, (2) Table of Contents, (3) Refueling Boron Concentration, (4) radioactive source leakage tests, (5) senior reactor operator shift requirements, (6) deletion of snubber table, (7) spray additive tank requirements, (8) discharge canal flow monitoring, (9) radioactive effluent monitoring instrumentation surveillance requirements, (10) radiation environmental monitoring program sample collection and analysis, and (11) changes in management titles. By letter dated January 21, 1985, the licensee withdrew the request associated with the peaking factor limit functions.

Date of issuance: June 25, 1985.

Effective date: June 25, 1985.

Amendment Nos.: 73 and 66.

Facility Operating License Nos. DPR-42 and DPR-60. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** October 24, 1984 (49 FR 42814 at 42827). The licensee's proposed change dealing with the refueling boron concentration was modified in order that it would be consistent with the requirements specified in the Standard Technical Specifications. Specifically, the modification merely expressed the terms of the reactor shutdown margin in the same manner as shown in the Standard Technical Specifications. The modification in no way alters the previous determination regarding the no significant hazards consideration. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 25, 1985.

No significant hazards consideration comments received: No.

Local Public Document Room location: Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota.

Northern States Power Company, Docket Nos. 50-282 and 50-306, Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2, Goodhue County, Minnesota

Date of application for amendments: December 21, 1984 as revised March 14, 1985.

Brief description of amendments: The amendments changed Technical Specifications 3.8.B.1 and 5.6.A, B, and C to permit the use of the spent fuel shipping cask over spent fuel pool No. 1.

Date of issuance: June 26, 1985.

Effective date: June 26, 1985.

Amendment Nos.: 74 and 67.

Facility Operating License Nos. DPR-42 and DPR-60. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** April 23, 1985 (50 FR 15997 at 16007).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 26, 1985.

No significant hazards consideration comments received: No.

Facility Operating License Nos. NPF-14 and NPF-22: Amendments revised

certain valves to add automatic isolation features.

Pennsylvania Power and Light Company, Docket No. 50-388, Susquehanna Steam Electric Station, Unit 2, Luzerne County, Pennsylvania

Date of application for amendment: February 7, 1985.

Brief description of amendment: This amendment to the Technical Specifications (TSs) revises the trip setpoint for isolation of the Reactor Core Isolation Cooling (RCIC) system on high steam line differential pressure. The current value for this trip setpoint was initially based on engineering judgement and operating experience. The proposed revised trip setpoint value is based on actual test data obtained using the startup test program. Technical Specification Table 3.3.2-2 trip function 5a has been revised to reflect the Startup Test data.

Date of issuance: July 2, 1985.

Effective date: Upon issuance.

Amendment No. 13.

Facility Operating License No. NPF-22: Amendment revised the Technical Specifications.

Dates of initial notices in **Federal Register:** March 27, 1985 (50 FR 12156).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated July 2, 1985.

No comments on the proposed no significant hazards consideration determination were received.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Pennsylvania Power and Light Company, Docket Nos. 50-387 and 50-388, Susquehanna Steam Electric Station, Unit 2, Luzerne County, Pennsylvania

Date of application for amendments: October 1, 1984.

Brief description of amendments: The proposed amendments would incorporate controls in the form of limiting condition for operation (LCO) into the Technical Specifications on equipment needed to insure proper functioning of the isolated 480 volt swing busses. The NRC staff has reviewed the Technical Specification changes proposed by the licensee and determined that they are acceptable.

Date of issuance: July 2, 1985.

Effective date: July 2, 1985.

Amendment Nos.: 48 and 14.

Facility Operating License Nos. NPF-14 and NPF-22: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** March 27, 1985 (50 FR 12156).

The Commission's related evaluation of these amendments is contained in a Safety Evaluation dated July 2, 1985.

No comments on the proposed no significant hazards consideration determination were received.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND FINAL DETERMINATION OF NO SIGNIFICANT HAZARDS CONSIDERATION AND OPPORTUNITY FOR HEARING (EXIGENT OR EMERGENCY CIRCUMSTANCES)

During the period since publication of the last bi-weekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before, issuance, its usual 30-day Notice of consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing. For exigent circumstances, a press release seeking public comment as to the proposed no significant hazards consideration determination was used, and the State was consulted by telephone. In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant, a shorter public comment period (less than 30 days) has been offered and the State consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendments. By August 16, 1985, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic

Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the basis for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to (*Branch Chief*): petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

Commonwealth Edison Company, Docket No. 50-374, La Salle County Station, Unit No. 2 La Salle County, Illinois

Date of application for amendment: June 14, 1985.

Brief description of amendment request: This amendment revised the La Salle Unit 2 Technical Specifications, Table 3.3.2-2, to change the response time for the Main Steam Line Low Pressure isloation switches from 1 to 2 seconds.

Date of Issuance: June 20, 1985.

Amendment No.: 12.

Effective Date: June 20, 1985.

Facility Operating License No. NPF-18: Amendment revised the Technical Specifications.

Deletion of E-COM Provisions From the Domestic Mail Classification Schedule and Rate Schedules

AGENCY: Postal Service.

ACTION: Deletion of E-COM provisions from the domestic mail classification schedule and rate schedules.

SUMMARY: Pursuant to its authority under 39 U.S.C. 3625, the Postal Service is deleting the E-COM provisions from the Domestic Mail Classification Schedule and Rate Schedules.

EFFECTIVE DATE: September 3, 1985.

FOR FURTHER INFORMATION CONTACT: Edward W. Senft, (202) 245–5780.

SUPPLEMENTARY INFORMATION: On July 6, 1984, the Postal Service filed, pursuant to Chapter 36, Title 39, United States Code, a request with the Postal Rate Commission for a recommended decision on changes to the Domestic Mail Classification Schedule and the Rate Schedules to delete all provisions concerning E-COM service. An explanation of the Postal Service's proposals and an invitation to participate in Commission Docket No. MC84–2 was published in the **Federal** Register by the Postal Rate Commission on July 17, 1984 (49 FR 28953).

On December 21, 1984, the Postal Rate Commission issued its Opinion and Recommended Decision in Docket No. MC84–2. The Commission recommended that the E-COM provisions be deleted from the Domestic Mail Classification Schedule and the Rate Schedules.

On July 10, 1985, pursuant to 39 U.S.C. 3625, the Governors of the Postal Service decided to approve the Commission's recommended decision and order it into effect. The Board of Governors concurrently determined that the changes would become effective at 12:01 a.m. on September 3, 1985. (The Governors' decision, the Record of the Commission's hearings, and the Commission's Recommended Decision may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20002–4231. The Governors' decision and the Commission's Recommended Decision are available for inspection in the Library at Headquarters, United States Postal Service, 475 L'Enfant Plaza West SW., 20260–1641.)

In accordance with these actions by the Governors and the Board of Governors, the Postal Service hereby gives notice that the classification and rate changes listed below as Appendix A become effective at 12:01 a.m. on September 3, 1985.

(39 U.S.C. 3625)

Fred Eggleston,

Assistant General Counsel, Legislative Division.

Appendix A.—Amendments to the Domestic Mail Classification Schedule and the Rate Schedules

1. Sections 100.024, 100.045, 100.046, 100.051, 100.052, 100.0521, 100.0522, and 100.101 of the DMCS are deleted.

2. Sections 100.020, 100.080 and 100.090 of the DMCS are amended to read as follows:

100.020 REGULAR MAIL

Regular First-Class Mail consists of mailable matter posted at First Class regular rates, weighing 12 ounces or less, and not mailed or eligible for mailing under sections 100.0201, 100.021, 100.0211, 100.022, 100.0221, or 100.023.

* * * * *

100.08 ANCILLARY SERVICES

100.080 First-Class Mail, except as otherwise noted, will receive the following additional services upon payment of appropriate fees:

	Classification schedule
a. Address correction	SS–1
b. Business reply mail (except ZIP + 4 rate category mail).	SS–2
c. Certificates of mailing	SS–4
d. Certified mail	SS–5
e. C.O.D.	SS–6
f. Insured mail	SS–9
g. Registered mail (except ZIP + 4 rate category mail).	SS–14
h. Special delivery	SS–17
i. Merchandise return	SS–20

* * * * *

100.09 RATES AND FEES

100.090 The rates and fees for First-Class Mail are set forth in the following rate schedules:

	Rate schedule
a. Regular	100
b. Postal and post cards	101
c. Presorted	102
d. Zone rated (priority)	103
e. Fees	1000

3. Rate Schedule 104 is deleted.

4. Rate Schedule 1000 is amended to read as follows:

Description	Dollars
First-Class Presorted Mailing Fee	$50
Second-Class Mailing Fees:	
A. Original Entry	220
B. Additional Entry (all zones)	60
Second-Class Reentry Fee	35
Second-Class Registration for News Agents	35
Third-Class Bulk Mailing Fee	50
Fourth-Class Special Mail Presorted Mailing Fee	50
Authorization to Use Permit Imprint	50
Merchandise Return (per facility receiving merchandise return labels)	50

BILLING CODE 7710–12

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–14624; (812–5833) Administrative Proceeding File No. 3–6539]

Narragansett Capital Corp. et al.; Notice of and Order for Hearing on Application

July 10, 1985.

On February 15, 1985, the Commission issued a notice (Investment Company Release No. 14380) of an application filed by Narragansett Capital Corporation ("Narragansett") and Narragansett Venture Corporation ("NVC") (both registered under the Investment Company Act of 1940 ("Act") as closed-end non-diversified management investment companies, and jointly referred to hereinafter as the "Corporate Applicants"), Arthur D. Little, Robert D. Manchester, William P. Lane, Gregory P. Barber, Roger A. Vandenberg, and Paul A. Giusti (collectively, the "Individual Applicants"), Narragansett Capital Associates, Narragansett Capital Partners ("Partners"), Narragansett Acquisition Corporation, Inc., Narragansett General Partners, Narragansett Venture Partners ("Venture"), and Narragansett Management Company (collectively referred to as the "Management Partners' Companies"), Narragansett Administration Corporation, Narragansett Management Partners, Narragansett First Fund, NFF Investments, Inc., and Cable Investments, Inc. (the "Other Applicants") (the Corporate Applicants, Individual Applicants, Management Partners' Companies, and the Other Applicants are hereinafter collectively referred to as the "Applicants"), all of 40 Westminster Street, Providence, RI 02903, requesting an order of the Commission (1) pursuant to sections 17(b) and 57(c) of the Act and Rule 17b–1 thereunder exempting from Sections 17(a) and 57(a) and permitting under sections 17(d) and 57(a)(4) and Rule 17d–1 thereunder transactions by which the Individual Applicants, Narragansett's senior management, would take over Narragansett in a leveraged buyout (the "Purchase") that ultimately would result in a privately-held firm not subject to the Act; (2) pursuant to section 6(c) exempting

Partners, a Rhode Island limited partnership, from all of the provisions of the Act except sections 9, 17, 30, 31, 36(a), 37, 42 and 44; (3) pursuant to sections 6(c) and 17(b) and Rule 17d–1 exempting certain transactions from sections 17(a) and 17(e) and permitting certain transactions under Rule 17d–1; and (4) pursuant to section 6(c) exempting Venture from all provisions of the Act in the event Venture assumes certain obligations of NVC. That notice, which is incorporated herein by reference, gave interested persons until March 11, 1985, to file a request in writing for a hearing on the application accompanied by a statement as to the nature of his interest, the reason for the request, and the issues of fact or law proposed to be controverted.

On March 5 and 6, 1985, requests for a hearing were filed with the Commission by Messrs. Benjamin Stein and Richard Lessler (the "Objectors"), both shareholders of Narragansett. Those requests were supplemented by letters dated March 11, and March 22. Counsel to Narragansett on April 19, 1985, filed a letter responding to the contentions made by the Objectors in their hearing requests, to which Mr. Stein filed a response dated May 1, 1985. The Objectors contend that the terms of the Purchase are unfair to Narragansett's shareholders in regard to the adequacy of the consideration to be paid, the difference in treatment between the Individual Applicants and the shareholders of Narragansett, and the failure to afford Narragansett shareholders who qualify as "accredited investors" under Regulation D the opportunity to invest in Partners. The Objectors contend that the Purchase, therefore, does not meet the standards for exemptive reflief set forth in sections 17(b), 17(d), 57(a)(4) and 57(c), and Rule 17d–1.[1]

It appears to the Commission that it is appropriate in the public interest and in the interest of investors that a hearing be held with respect to the application. Accordingly,

It is ordered, pursuant to section 40(a) of the Act, that a hearing on the application under the applicable provisions of the Act and Rules of the Commission thereunder be held at a time and place to be fixed by further order as provided by Rule 6 of the Commission's Rules of Practice (17 CFR 201.6), and that an Administrative Law Judge to be designated by further order preside at said hearing. Any person, other than the Applicants, desiring to be heard or otherwise wishing to participate in this proceeding is directed to file with the Secretary of the Commission, on or before August 5, 1985, an application as provided by Rule 9(c) of the Commission's Rules of Practice (17 CFR 201.9(c), setting forth the nature and extent of his interest in the proceeding and any issues of fact or law which he desires to controvert, or any additional issues which he deems raised by this Notice and Order or by said application. A copy of that request shall be served personally upon the Applicants at the address noted above, and proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. Persons filing an application to participate or to be heard will receive notice of the date and place of the hearing, and any adjournments thereof, as well as other actions of the Commission involving the subject matter of this proceeding.

The Division of Investment Management has advised the Commission that it has made an examination of the application, the request for hearing, and the response to such request by counsel to Applicant and that, upon the basis thereof, the following matters and questions are presented for consideration without prejudice to its specifying additional matters and questions upon further examination:

(1) Whether the Purchase, including the consideration to be paid for the assets of Narragansett, is fair and reasonable and free and overreaching on the part of any person concerned, consistent with the policies of Narragansett and NVC as stated in their registration statements, and consistent with the provisions, policies and purposes of the Act;

(2) Whether the Individual Applicants are participating in the Purchase on a basis more advantageous than that on which the shareholders of Narragansett are participating, and, if so, whether that difference is fair and reasonable; and

(3) Whether the offer of interests in Partners only to some Narragansett shareholders is fair.[2]

It is further ordered that at the aforesaid hearing attention should be given to the foregoing matters.

It is further ordered that the Division of Investment Management shall be a party to the proceeding.

It is further ordered that the Secretary of the Commission shall give notice of the aforesaid hearing by mailing a copy of this Notice and Order by certified mail to the Applicants at the address noted above and to the Objectors and various other persons who have written to the Commission expressing their views on this matter; that notice to all other persons be given by publication of this Notice and Order in the **Federal Register**; that a copy of this Notice and Order shall be published in the "SEC Docket"; and that an announcement of the aforesaid hearing shall be included in the "SEC News Digest".

By the Commission.

John Wheeler,

Secretary.

[FR Doc. 85–17007 Filed 7–16–85; 8:45 am]

BILLING CODE 8010–01–M

[1] The Objectors also raise a number of other questions. For example, Mr. Stein's hearing request questions the underlying rationale for the Purchase as set out in the application: Narragansett's difficulties in operating as a regulated investment company under the Internal Revenue Code. Mr. Stein also questions whether the negotiations between the Individual Applicants and the Special Committee over the terms of the Purchase were in fact conducted, insofar as possible, in a truly arm's length fashion. The Applicants point to the arm's length nature of the negotiations as supporting the fairness of the Purchase. The Objectors' letters also raise questions concerning possible breaches of fiduciary duty by Narragansett's officers and directors.

[2] As noted in footnote 1, above, the Objectors also raise a number of other questions. The Administrative Law Judge assigned to the hearing will have discretion to allow any of those issues that he deems relevant to be considered.

[File No. 22–13902]

Application and Opportunity for Hearing; Union Tank Car Co.

July 10, 1985.

Notice is hereby given that Union Tank Car Company (the "Applicant") has filed an application under Clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding by the Securities and Exchange Commission (the "Commission") that the trusteeship of The First National Bank of Chicago under five existing indentures, two of which were qualified under the Act, and the proposed trusteeship of The First National Bank of Chicago under a new indenture are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the First National Bank of Chicago from acting as trustee under any of such indentures.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest (as defined in such Section), it shall within ninety days after ascertaining that it has

such conflicting interest either eliminate such conflicting interest or resign.

(4) Such differences as exist between the Series P–4 indenture and the existing

Standard and Poors 100 Index ("OEX") become effective when either a

VOL 50 ISS 137 JL 17 1985 UMI

such conflicting interest either eliminate such conflicting interest or resign. Subsection (1) of such Section provides that, with certain exceptions, a trustee under a qualified indenture shall be deemed to have a conflicting interest if such trustee is trustee under another indenture under which other securities of the same obligor are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operation of this provision another indenture under which other securities of the same obligor are outstanding, if the obligor shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that the trusteeship under such qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under any of such indentures.

The applicant alleges that:

(1) The First National Bank of Chicago is presently acting as trustee under the Company's Series 4 Equipment Trust Agreement dated as of April 1, 1969, Series 16 Equipment Trust Agreement dated as of June 1, 1979, Series C–1 Deed of Trust and Mortgage dated as of September 15, 1974, Series P–1 Equipment Trust Agreement dated as of April 1, 1974 and Series P–2 Equipment Trust Agreement dated as of December 1, 1978. The aggregate principal amount outstanding as of February 28, 1985, was as follows:

Series and Principal Amount
4—$4,990,000
16—$48,935,000
C–1—$13,938,000
P–1—$2,967,052
P–2—$49,410,000

(2) The Equipment Trust Certificates (or, in the case of Series C–1, the First Mortgage Sinking Fund Equipment Notes) issued under the Series 4, Series 16, Series C–1, Series P–1 and Series P–2 Trust Agreements are each secured by a separate lot of identified railraod cars as will be the Equipment Trust Certificates issued under the proposed Series P–4 Agreement, so that, should The First National Bank of Chicago have the occasion to proceed against the security of any of these Equipment Trusts, such action would not affect the security, or the use of any security, under the other Equipment Trusts. Thus, the existence of the other trusteeships should in no way inhibit or discourage the trustee's action.

(3) The Applicant is not in default under any of its Equipment Trust obligations.

(4) Such differences as exist between the Series P–4 indenture and the existing indentures for which The First National Bank of Chicago is presently acting as trustee are not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify The First National Bank of Chicago from acting as trustee under any of said indentures.

The Applicant has waived hearing, notice of hearing, and any and all rights to specify procedures under the Rules of Practice of the Commission with respect to the application.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, which is a public document on file in the Office of the Commission at 450–5th Street, NW., Judiciary Plaza, Washington, D.C. 20549

Notice is further given that any interested person may, not later than August 5, 1985, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon.

Any such request should be addressed: Secretary, Securities and Exchange Commission, 450–5th Street, N.W., Judiciary Plaza, Washington, D.C. 20549. At any time after said date, the Commission may issue an order granting the application, upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and the interest of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

John Wheeler,

Secretary.

[FR Doc. 85–17008 Filed 7–16–85; 8:45am]

BILLING CODE 8010–01–M

[Release No. 22223; File No. SR–CBOE–85–10]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc. ("CBOE"); Order Approving Proposed Rule Change

The Chicago Board Options Exchange, Inc. ("CBOE") submitted on March 22, 1985, copies of proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, to provide that stop and stop limit orders in the Standard and Poors 100 Index ("OEX") become effective when either a transaction has occurred at the stop price or the market quotation on the same side of the market equals the price on the order.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Release No. 21926, April 8, 1985) and by publication in the **Federal Register** (50 FR 14482, April 12, 1985). No comments were received with respect to the proposed rule filing.

The CBOE states that the proposed rule change is intended to make the handling of stop and stop limit orders in OEX options more manageable than they are under the current rule. Due to the noise level and size of the OEX trading pit, it may not be possible for a floor broker to hear a trade causing a stop or stop limit order to become effective. Because current market quotations are displayed on screens, however, a floor broker can see the relationship of the current market quoatation with stop and stop limit orders in his desk. Therefore, in order to permit the use of stop and stop limit orders in OEX on a workable basis, the proposed rule change would cause stop and stop limit orders to become effective based upon relationships with transactions or quotations.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to as self-regulatory organization and, in particular, the requirements of section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to section 19(b)(1) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: July 11, 1985.

John Wheeler,

Secretary.

[Fr Doc. 85–17005 Filed 7–16–85; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–22228; SR–CBOE–85–29]

Self-Regulatory Organizations; Chicago Board Options Exchange, Inc.; Filing and Order Granting Accelerated Approval of Proposed Rule Change

The Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted

on July 5, 1985, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, to amend CBOE Rule 21.25, Interpretation .02 regarding margin requirements for Treasury note ("T-note") options. The rule as amended provides that CBOE approved T-notes, other than T-notes which underlie the T-note option, may collateralize a Treasury security escrow receipt, provided that the notes have a maturity date in excess of one year but less than five years, three months.

The CBOE submitted the proposal in connection with its proposal to trade options on five-year Treasury notes.[1] The Exchange anticipates that options writing programs on T-note contracts will be affected on a covered basis through the use of escrow receipts issued by a bank. The CBOE believes that institutions will use options strategies to hedge portfolios composed of various T-notes, not all of which specifically underlie the T-note options. Under the proposal, notes of a single coupon/maturity could be held in escrow against one specific T-note option contract. The CBOE believes that this approach will provide institutional investors flexibility in managing their investments as well as provide for liquidity in the note options market.

Interested persons are invited to submit written data, views and arguments concerning the proposed rule change within 21 days from the date of publication of the submission in the **Federal Register**. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street NW., Washington, D.C. 20549. Reference should be made to File No. SR–CBOE–85–29.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available at the principal office of the CBOE.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a self-regulatory organization and in particular, the requirements of Section 6 and the rules and regulations thereunder.

The Commission finds good cause for approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof, in that the Commission recently approved the CBOE's proposal to trade a five-year T-note option contract, and trading in the contract commenced on the CBOE on July 8, 1985. In addition, the Commiasion previously has approved the use of escrow receipts collateralized by Treasury bonds in connection with the CBOE's Treasury bond option contract [2] and no comments were directly received by the Commission regarding that proposal.[3]

It is therefore ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change referenced above be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: July 11, 1985.

John Wheeler,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–22218; File No. SR–MSE–85–6]

Self-Regulatory Organizations; Proposed Rule Change by Midwest Stock Exchange, Incorporated Relating to the MSE Trading Floor Manual (Rules and Procedures for Trading on the MSE Floor)

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on June 21, 1985, the Midwest Stock Exchange, Incorporated filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Attached to the filing as Exhibit A are proposed amendments to MSE's Trading Floor Manual (Rules and Procedures for Trading on the Midwest Stock Exchange, Incorporated Floor, "Blue Book") and Article XXX, Rule 6 and Article XXXIV, Rule 9 of the Rules of the Midwest Stock Exchange, Inc.

II. Self-Regulatory Organization's Statement on the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement on the Purpose of, and Statutory Basis for, the Proposed Rule Change

Proposed Amendments to MSE Trading Floor Manual Blue Book Section C, Rule 1—Quoting the Market Before the Opening of an Issue—The current Blue Book rule states that if quotations were given on the MSE Floor before the opening of an issue in the primary market, such quotations would be approximate quotations. Pursuant to the Firm Quote Rule, any quote disseminated must be a firm quote. The Blue Book change will adopt new language which would allow a MSE Specialist to disseminate a quote prior to the opening of an issue as long as such quote is firm and available to any order seeking execution at the disseminated price.

Blue Book Section C, Rule 2—Independent Dual Issue Openings—The proposed rule change will make it a requirement for a MSE Specialist to display a continuous two-sided after-market when such MSE Specialist independently opens a dually listed issue, even if a floor firm fails to provide subsequent orders as may have been previously negotiated.

Blue Book Section C, Rule 10—Limit Orders at the Opening—The intent of the current Blue Book rule is that the MSE Specialist should not be required to fill a limit order only on the basis that the issue opened in the primary market at the same price of the limit order in the MSE Book, but would require price or quote penetration of the price of the order. The proposed change codifies this interpretation and explicitly provides that the Specialists will not have to execute a limit order unless the bid or offer at the limit price is exhausted in the primary market.

Blue Book Section C, Rule 18—Business Hours—The proposed change is designed to insure that the Specialist's Book is properly represented by the Specialist, Co-Specialist or Relief Specialist during the trading session. The proposed rule change also provides that the Post should be adequately staffed during the designated non-trading hours by personnel authorized to check, adjust and correct trades. The change also authorizes the Committee on Floor Procedure to adjust the time requirements in unusual trading periods.

Cabinet Procedures—The Midwest Stock Exchange has reviewed the procedures and practices followed on the MSE Floor with regard to trading in issues designated in the Cabinet Post. The proposed procedures will be incorporated into the MSE Trading Floor Manual when approved.

Proposed Amendments to MSE Rules

Article XXX, Rule 6—Opening the Market Where Unusual Conditions Exist—The proposed change will provide for two members of the Committee on Floor Procedure to be called to rule on the opening of an issue on the MSE Floor where unusual conditions exist. The rule also includes a procedure to break a possible impass by the two members originally called to rule on the matter. This proposed amendment will be incorporated into the proposed Blue Book amendment to Section C, Rule 2, when approved.

Article XXXIV, Rule 9—Openings—The proposed change will codify the current interpretation that Market Makers may participate in the net Midwest Stock Exchange imbalance of purchase and sales orders on the Exchange.

Basis

The proposed rule change is consistent with section 6(b) of the Securities Exchange Act of 1934 in that it is designed to promote just and

equitable principles of trade and will foster cooperation among persons engaged in regulating and facilitating transactions in securities.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Midwest Stock Exchange, Incorporated does not believe that any burdens will be placed on competition as a result of the proposed rule change.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The proposed changes were developed by a subcommittee of the Floor Procedure Committee and subsequently endorsed by the full Committee.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, D.C. Copies of the filing will also be available for inspection and copying at the principal office of the above-referenced self-regulatory organization. All submissions should refer to the caption above and should be submitted by August 7, 1985.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

[Release No. 34–22220; File No. SR–PHLX 85–21]

Self-Regulatory Organization; Proposed Rule Change by the Philadelphia Stock Exchange, Inc. Relating to Deletion of ROT Attendance Requirement

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on June 27, 1985 the Philadelphia Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Philadelphia Stock Exchange, Inc. ("Exchange" or "PHLX") proposes to amend its Rule 1014, Commentary .14, as follows:

[Brackets] indicate material proposed to be deleted:

Within each quarter an ROT [shall spend 50% of the business days on the trading floor of the Exchange and] shall trade as principal a specified number of contracts, such number to be determined from time to time by the Committee on Options. [To meet the percentage requirement of this provision, a member registered as an ROT must spend, for each business day that such member is present, a substantial portion of that business day on the PHLX option floor.]

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statements of the Purpose of, and Statutory Basis for the Proposed Rule Change

The purpose of the proposed rule change is to delete what the Exchange now considers an outdated and unnecessary attendance requirement from an Exchange market-maker's various obligations. It should be noted that this provision was not a requirement under Exchange Rule 1014 as originally adopted. Rather, it was made a part of such rule in 1978 in an attempt to make Exchange options markets deeper, more liquid and more competitive. The Exchange established this attendance requirement to serve as an impetus to market-makers for spending substantial amounts of their time present and trading on the options floor.

Since then, fortunately, the liquidity and activity on the options floor has so grown that this attendance requirement is now believed to be entirely unnecessary.

Moreover, staff have found it difficult to monitor compliance with, and enforce, this requirement daily. Staff, recently, have monitored compliance by having market surveillance department personnel take daily attendance, which has proved to be cumbersome. The benefits of implementing a more effective system of monitoring compliance, such as automated ticket-punching, are believed to be outweighed by the costs of perpetuating a requirement unsuited to present business circumstances.

B. Self-Regulatory Organizations Statement on Burden on Competition

The Exchange believes the proposed rule change will not impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments were neither solicited nor received from the Exchange membership.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and

publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or,

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by August 7, 1985.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

July 10, 1985.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. PE–85–17]

Petition for Exemption; Summary of Petitions Received, Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before: July 29, 1985.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204), Petition Docket No. ———, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC–204), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on July 10, 1985.

Richard C. Beitel,

Acting Assistant Chief Counsel, Regulations and Enforcement Division.

BILLING CODE 4910–13–M

Research and Special Programs Administrations

High Pressure Composite Hoop Wrapped Cylinders 4500 p.s.i.g. Marked Service; Cylinders–85–3

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: DOT–E 7235, Exemption related notice.

SUMMARY: On August 11, 1983 (48 FR 36559), the MTB published a notice that Luxfer USA Limited (Luxfer) had initiated a recall of cylinders manufactured in 1982 under exemption DOT–E 7235 and bearing serial numbers WA43160 through WA50178 and WF 20321 through WF21548. A number of cylinders remain in service and may present a serious safety problem.

FOR FURTHER INFORMATION CONTACT: Arthur J. Mallen, Office of Hazardous Materials Regulation, Materials Transportation Bureau (DMT–22), 400 Seventh Street, SW., Washington, D.C. 20590, (202) 755–4906. Office hours are: 8:30 a.m. to 5:00 p.m., Monday through Friday.

SUPPLEMENTARY INFORMATION: It was the opinion of Luxfer that cylinder failures which prompted the recall were probably caused by a higher than normal composition of lead and bismuth in one cast of material. The **Federal Register** notice (48 FR 36559) required all such cylinders to be removed from service and recommended that they be returned for replacement to the company or distributor from whom they were purchased.

A June 11, 1985 status report from Luxfer indicates that 176 affected cylinders are still unaccounted for and are assumed to be still in service. It is imperative that these remaining cylinders be located and removed from service. The 176 unaccounted for cylinders bear the following serial numbers:

WA43189	WA43252
WA43191	WA43280
WA43208	WA43276
WA43216	WA43291

WA44457	WF21513
WA44464	WF21528
WA44540	WF21546
WA44590	

Users of these cylinders should be advised that serious personal injury, death or property damage could result from the rupture of a cylinder. Accordingly, all persons owning, using or having access to the cylinders subject to the recall should immedaitely take the following precautions:

1. If a cylinder has been filled, its entire contents should be vented in order to relieve internal pressure.

2. The vented cylinders should be segregated from all other cylinders by being placed in a secure place and marked conspicuously with a tag bearing the notation "Do Not Use" or similar warning.

3. Under no circumstances should any of the cylinders in question be sold or otherwise transferred, filled, refilled or used for any purpose.

Once the above procedures have been implemented, all cylinders bearing the serial numbers indicated should be returned for replacement to the company or distributor from whom they were purchased.

(49 U.S.C. 1804(c), 1805(a) and 1808(d)(3))

Issued in Washington, D.C. on July 12, 1985, under authority delegated in 49 CFR Part 106, Appendix A.

Alan I. Roberts,

Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau.

Ideal Mutual Insurance Co.; Surety Companies Acceptable on Federal Bonds: Liquidation

Ideal Mutual Insurance Company, a New York corporation, formerly held a Certificate of Authority as an acceptable surety on Federal bonds and was last listed as such at 48 FR 30535, July 1, 1983. The company's authority was terminated by the Department of the Treasury effective July 20, 1984. Notice of the termination was published in the **Federal Register** of August 3, 1984, on page 31190.

There is printed below a copy of a notice dated February 7, 1985, issued by the New York Insurance Department, indicating the company is now being liquidated. Please note the notice stipulates liabilities are fixed as of February 7, 1985 and that all claims against the company must be filed on or before February 7, 1986.

Government agencies involved in Federal surety bonding operations where third parties such as subcontractors, materialmen, and suppliers may have a claim against the company are requested to use their best efforts to notify such third parties of the liquidation, assist them in filing claims, inform them of their priority status based on section 3713 of the United States Code and provide them with copies of the Notice of Liquidation. if priority status is not being granted, please notify the Department of the Treasury at the address indicated below.

Government agencies should be aware that, where reinsurance was obtained on a bond, the reinsuring company may be liable to the United States Government for the full amount of the reinsurance or the full amount of the default, whichever is less.

Questions concerning claims against the company may be directed to Joseph A. La Monte, Special Deputy Superintendent of Insurance at the address given in the Liquidation Notice. Copies of the Proof of Claim form may be obtained from the same office.

Questions concerning this notice may be directed to the Surety Bond Branch, Finance Division, Financial Management Service, Department of the Treasury, Washington, D.C. 20226, telephone (202) 634-2319. An information notice containing additional information concerning the filing of claims will be distributed by this office to Federal agencies.

Dated: July 2, 1985.

W. E. Douglas,

Commissioner, Financial Management Service.

Sunshine Act Meetings

NOTICE OF LIQUIDATION

STATE OF NEW YORK
INSURANCE DEPARTMENT
LIQUIDATION BUREAU
116 JOHN STREET, NEW YORK, NEW YORK 10038 (212) 285-0500

To the Debtors, Creditors, Policyholders
Stockholders, Persons having claims
against Policyholders, and all other Persons
Interested in the affairs of
IDEAL MUTUAL INSURANCE COMPANY

Notice Is Hereby Given:

I. JAMES P. CORCORAN, Superintendent of Insurance of the State of New York has been directed by an Order of the Supreme Court, New York County, entered on February 7, 1985 to take possession of the property of IDEAL MUTUAL INSURANCE COMPANY and to liquidate its business pursuant to Article 74 of the Insurance Law of the State of New York. The undersigned has, pursuant to said Article, appointed JOSEPH A. LA MONTE, Special Deputy Superintendent of Insurance, as his agent to liquidate the business of said company at the office of the said Deputy, 116 John Street, Borough of Manhattan, City and State of New York, 10038.

II. JAMES P. CORCORAN, Superintendent of Insurance of the State of New York has been directed by an Order of the Supreme Court, New York County, entered on December 26, 1984 to rehabilitate IDEAL MUTUAL INSURANCE COMPANY pursuant to Article 74 of the Insurance Law of the State of New York. Pursuant to this Order the rights and liabilities of said Company and of all persons under insurance obligations of said Company will cease and are fixed as of January 26, 1985, 12:01 A.M. Eastern Standard Time. To have continuing coverage, all persons whose policies are now in force are required to replace such policies in another Company before January 26, 1985.

III. The Liquidation Order further provides that all other subsisting contracts and other obligations of the Company terminate and all other liability thereunder cease and be fixed as of February 7, 1985.

IV. All persons indebted to or having any property of said Company in their possession are hereby required forthwith to render an account of said indebtedness and to pay the same and deliver such property to the Liquidator at his office above stated.

V. All creditors of IDEAL MUTUAL INSURANCE COMPANY and all persons having any unsatisfied claims or demands against it or its policyholders are hereby required to present the same in writing duly subscribed and affirmed by him as true to JOSEPH A. LA MONTE at his office above stated ON OR BEFORE FEBRUARY 7, 1986 WHICH IS THE LAST DAY SET BY THE COURT ORDER FOR THE FILING OF CLAIMS IN THE LIQUIDATION PROCEEDING. A form of proof of claims is furnished herewith.

VI. ALL POLICYHOLDERS ARE REQUIRED TO FILE A CLAIM FOR THEIR POLICY PROTECTION WHETHER OR NOT A CLAIM HAS BEEN FILED AGAINST THE POLICYHOLDER IN THE SAME FORM AS SET FORTH IN PARAGRAPH V OF THIS NOTICE.

VII. All persons and policyholders against whom actions are now pending who do not come within the provisions of Sections 7601, 7603, 7604 of the New York Insurance Law, concerning which the Company may be liable on its policies or contracts and which have been defended up to the date of the order of liquidation by an attorney employed or retained by the Company, are advised that the employment or retention of said attorney has been terminated by the entry of the Order of Liquidation. EACH SUCH PERSON IS THERLFORE ADVISED TO CONTACT THE INSURANCE DEPARTMENT, GUARANTY FUND OR ASSOCIATION IN YOUR STATE. RETAIN THE SAID ATTORNEY AS YOUR ATTORNEY TO CONTINUE TO REPRESENT YOU IN THE ACTION, OR SUBSTITUTE AN ATTORNEY OF YOUR CHOICE, AT YOUR OWN EXPENSE. Reasonable and necessary expenses in relation thereto may be included and be the part of the subject matter of your claim in the liquidation proceeding, if not provided by a State Guaranty Fund or Association.

VIII. Liabilities will be determined as to all claims duly presented and all assets will be distributed in accordance with the Insurance Law of the State of New York without further notice to persons failing to present claims within the aforesaid time.

IX. All communications and transactions relating to the Company and to the liquidation thereof should be addressed to said JOSEPH A. LA MONTE at his office above stated.

Dated: New York, New York, February 7, 1985.

JAMES P. CORCORAN
Superintendent of Insurance
of the State of New York, as Liquidator

JOSEPH A. LA MONTE
Special Deputy Superintendent of Insurance,
as Agent for the Superintendent, as Liquidator

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 3:18 p.m. on Friday, July 12, 1985, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to adopt a resolution making funds available for the payment of insured deposits made in The Crossroads State Bank, Oklahoma City, Oklahoma, which was closed by the Bank Commissioner for the State of Oklahoma on Thursday, July 11, 1985.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director H. Joe Selby (Acting Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to the public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: July 12, 1985.

Federal Deposit Insurance Corporation.
Hoyle L. Robinson,
Executive Secretary.

FEDERAL RESERVE SYSTEM

(Board of Governors)

TIME AND DATE: 11:00 a.m., Monday, July 22, 1985.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Proposed purchase of computers within the Federal Reserve System.
2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202)452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: July 12, 1985.
James McAfee,
Associate Secretary of the Board.

PACFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Notice of Cancellation of Previously-Announced Meeting

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 50 FR 28303, July 11, 1985.

PREVIOUSLY ANNOUNCED TIME, DATE AND PLACE OF THE MEETING: 9:00 a.m., July 17-18, 1985, Council Offices, 850 SW. Broadway, Suite 1100, Portland, Oregon.

CHANGE IN THE MEETING: The Northwest Power Planning Council has cancelled the July 17-18 meeting it has previously announced. Public notice of this cancellation is being issued at the earliest practicable time. The possibility of such cancellation was indicated in the **Federal Register** notice published on July 11, and further notice of the cancellation is being provided to interested parties throughout the region by other means as well. The Council's next meeting will be held August 7-8 at the Council's office in Portland, Oregon.

FOR FORTHER INFORMATION CONTRACT: Ms. Bess Atkins, (503) 222-5161, or toll-free 1-800-222-3355 (Montana, Idaho or Washington) or 1-800-452-2324.

William R. Cook,

Associate Counsel.

POSTAL SERVICE

(Board of Governors)

Notice of Vote To Close Meeting

At its meeting on July 8, 1985, the Board of Governors of the United States Postal Service unanimously voted to close to public observation its meeting scheduled for August 5, 1985, in Anchorage, Alaska. The meeting will involve a discussion of personnel matters.

The meeting is expected to be attended by the following persons: Governors Camp, Griesemer, McKean, Peters, Ryan, Sullivan and Voss; Postmaster General Carlin; Deputy Postmaster General Strange; Secretary to the Board Harris; General Counsel Cox; and Counsel to the Governors Califano.

The Board of Governors has determined that, pursuant to section 552b(c)(6) of Title 5, United States, Code and § 7.3(f) of Title 39, Code of Federal Regulations, the discussion of personnel matters is exempt from the open meeting requirement of the Government in the Sunshine Act (5 U.S.C. 552b(b)), because it is likely to disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy. The Board also determined that the public interest does not require that the Board's discussion of this matter be open to the public.

In accordance with section 552b(f)(1) of Title 5, United States Code, and § 7.6(a) of Title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in his opinion the meeting to be closed may properly be closed to public observation, pursuant to section 552b(c)(6) of Title 5 United States Code, and § 7.3(f) of Title 39, Code of Federal Regulations.

David F. Harris,

Secretary.

RAILROAD RETIREMENT BOARD

Public Meeting

Notice is hereby given that the Railroad Retirement Board will hold a meeting on July 23, 1985, 9:00 a.m., at the Board's meeting room on the 8th floor of its headquarters building, 844 North Rush Street, Chicago, Illinois, 60611. The agenda for this meeting follows:

(1) Proposed Changes in the RUIA Regulations
(2) Canadian Service
(3) Part 261 of the Board's Regulations—Reopening Final Decisions Under the Railroad Retirement Act

The entire meeting will be open to the public. The person to contact for more information is Beatrice Ezerski, Secretary to the Board, COM No. 312-751-4920, FTS No. 387-4920.

Dated: July 12, 1985.

Beatrice Ezerski,

Secretary to the Board.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 414 and 416

[OW-FRL-2863-6]

Organic Chemicals and Plastics and Synthetic Fibers; Point Source Category Effluent Limitations Guidelines Pretreatment Standards; and Standards of Performance for New Sources

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability and Request for Comments.

SUMMARY: The EPA proposed regulations on March 21, 1983, to limit effluent discharges to waters of the United States and the introduction of pollutants into publicly owned treatment works from organic chemicals, plastics and synthetic fibers (OCPSF) manufacturing facilities (48 FR 11828). The comment period on the proposed regulations, originally scheduled to close on June 19, 1983, was extended to August 3, 1983, by the Agency to allow increased participation by interested parties (48 FR 24138). EPA announces today the availability for public review and comment of technical and economic data and related documentation received after proposal of the regulations. Pertinent portions of the public record include: (1) Definition and Subcategorization of the Organic Chemicals, Plastics and Synthetic Fibers Point Source Category, (2) Technology Basis for BPT Regulatory Options and Derivation of Effluent Limitations, (3) Technology Basis for BAT Regulatory Options and Derivation of Effluent Limitations, (4) Technology Basis for PSES Regulatory Options and Derivation of Effluent Standards, (5) Costing Documentation and Notice of New Information Report, (6) Evaluation of the Validity of Using Form 2C Data to Characterize Process Wastewater, and (7) Calculation of Priority Pollutant Waste Loads.

Based upon this new information, EPA has conducted new analyses and presents the results of these analyses and several sets of regulatory options. The final regulations may incorporate any of these options, any of the options previously set forth in the notice of proposed regulations, or any combination of these options. EPA solicits comments on these regulatory options.

DATES: Comments must be submitted on or before October 15, 1985.

ADDRESS: Comments may be mailed to E.H. Forsht, Industrial Technology Division (WH-552), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, Attention: ITD Docket Clerk, Organic Chemicals, Plastics and Synthetic Fibers (OCPSF) Rules; or delivered to the Docket Clerk, Room 911, East Tower, Waterside Mall, between the hours of 9:00 a.m. and 4:00 p.m. The Agency requests that commenters submit their comments and supporting documentation in triplicate. The supplementary information and data received and the revised technical and economic data evaluation summaries will be available for inspection and copying at the EPA Public Information Reference Unit, Room 2402 (Rear), Waterside Mall, 401 M Street, SW., Washington, DC 20460. The EPA information regulation (40 CFR Part 2) provides that a reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: E.H. Forsht (202) 382-7124 for information regarding the technical data, and Renee Rico (202) 382-5386 for information regarding the economic data. Copies of the draft economic analysis may be obtained by writing or calling Ms. Renee Rico, Analysis and Evaluation Division (WH-586), U.S. EPA, 401 M Street, SW., Washington, DC 20460.

VII. Solicitation of Comments

I. Summary of Proposed Regulations

On March 21, 1983, EPA proposed regulations to control the discharge of wastewater pollutants from organic chemicals, plastics and synthetic fibers manufacturing operations to navigable waters and to publicly owned treatment works (POTWs) (48 FR 11828). The proposed regulations included effluent limitations based upon the best practicable control technology currently available (BPT), the best conventional pollutant control technology (BCT), the best available technology economically achievable (BAT), new source performance standards (NSPS), pretreatment standards for existing sources (PSES), and pretreatment standards for new sources (PSNS).

The notice of proposed rulemaking and the supporting technical development document explain the proposal fully. Below is a brief summary of key aspects of the proposal.

The proposed regulation separated the OCPSF industry into four subcategories for BPT, based predominately on the types of product/processes contributing to a plant's wastewater discharge. For BAT, proposed regulations were developed for two categories: one for the discharges from the manufacture of plastics and synthetic fibers (corresponding to the BPT Plastics Only subcategory) and the second for discharges from the manufacture of organic chemicals (corresponding to the other three BPT subcategories). The factors considered for subcategorization included raw materials used; products manufactured; production processes employed; wastewater characteristics and treatability; plant size, location and age; and treatment cost. Further discussion of the subcategorization scheme is presented in section IV(B) of this notice. Subcategorization.

The preamble to the proposed regulation and the development document presented a number of available control and treatment technologies which were generally practiced in the industry and considered in developing the proposed regulations. These technologies include in-process and end-of-pipe physical/chemical treatment systems and end-of-pipe biological treatment systems, as well as post-biological polishing ponds and physical/chemical treatment.

A. BPT

EPA based the proposed limitations on two technologies. The predominant technology used in the OCPSF industry, and thus the primary technology used as a basis for the proposed limitations, was biological treatment preceded by the necessary controls to protect the biota and otherwise assure that the biological system functions effectively and consistently. Activated sludge and aerated lagoons are the primary examples of such biological treatment. Other biological systems, such as aerobic lagoons, rotating biological contractors, and trickling filters, are also used effectively at a few plants and data from such plants were also used to develop the proposed BPT limitations.

The second BPT technology option considered in the proposed BPT regulations for the OCPSF industry was a biological system followed by a polishing pond or filter. This biological/polishing combination achieves effective treatment of BOD and TSS. In some cases, plants originally installed biological systems that had inadequate retention times or were otherwise not designed and operated to optimally treat conventional pollutants. When these plants were required in the late 1970s to upgrade to meet BPT permit limits (established by permit writers in the absence of guidelines on a case-by-case basis, using their best professional judgment), some chose to add polishing ponds or filters rather than to enlarge or otherwise improve their existing biological systems. EPA concluded that the biological/polishing combination thus constitutes an alternative method to meet the proposed BPT limitations.

B. BCT

The proposed BCT limitations are equivalent to BPT.

C. BAT

EPA refrained from specifying a particular set of controls as the basis for the BAT concentration-based limitations. Instead, the proposed BAT limitations were based on the levels of priority pollutant control that were actually achieved at various OCPSF plants using differing treatment configurations.

It was thus infeasible to specify that any particular technology is or is not a "BAT" technology or a "priority pollutant control" technology in the OCPSF industry. Rather, each plant wishing to control its priority pollutant discharges would employ a combination of controls and technologies that result in the desired reduction (see Section IV(D) of this notice for additional details).

D. NSPS

The proposed NSPS are equivalent to BPT for conventional pollutants and BAT for toxic pollutants.

E. PSES

EPA concluded for the OCPSF industry that the toxic metals and organic pollutants that would be regulated under the proposed PSES pass through publicly owned treatment works (POTWs). The proposed PSES are equivalent to BAT for these pollutants.

F. PSNS

The proposed PSNS are equivalent to PSES.

G. Pollutants Excluded From Regulation

Eighteen toxic pollutants were proposed for exclusion from these regulations (see 48 FR 11853, March 21, 1983, Appendix C) because they are pesticides which are not produced as products or co-products and are unlikely to appear as raw contaminants in OCPSF product/processes. Therefore, they are unlikely to be present in OCPSF process wastewater discharges.

Twenty-eight additional toxic pollutants were excluded from the PSES and PSNS regulations because they were determined not to pass through or interfere with, and are not otherwise incompatible with the operation of POTWs (see 48 FR 11853, March 21, 1983, Appendix D).

H. Cost and Economic Impacts

The methodology used to perform the economic assessment for the proposed regulation is presented in the document entitled *Economic Analysis of Proposed Effluent Standards and Limitations for the Organic Chemicals and Plastics, Synthetics, and Fibers Industry*, EPA 440/2-83-004. This report details the investment and annual costs for the industry as a whole and for typical plants covered by the proposed regulation. Compliance costs are based on engineering estimates of incremental capital requirements above the water pollution control equipment already in place. The report assesses the impact of effluent control costs in terms of plant closures, employment effects, balance of trade effects and impacts on small businesses. These impacts are discussed for each of the regulatory levels examined by the Agency.

The economic analysis projected total capital costs, needed for about 1500 existing plants to comply with the proposed regulation, to be about $1.7 billion with annual costs of approximately $750 million, including depreciation and interest (1982 dollars). Twenty-one product/process closures were projected to occur as a result of the compliance cost projections. EPA estimated that eight plants may close. These shut-downs and closures were expected to cause a decrease of 493 jobs, less than 0.2 percent of a total employment of 295,000.

I. Non-Water Quality Impacts and Other Aspects of Proposed Regulations

Discussion of factual and policy findings supporting the proposal are presented at 48 FR 11847-50 and in the development document, and will not be repeated here.

J. Solicitation of Comments

The Agency also solicited additional comments and information on 30 specific issues as part of the notice of proposed rulemaking (refer to Section XIX, 38 FR 11850-51, March 21, 1983). These specific issues related to several general topics, including: (1) the generic process chemistry/unit operation basis for the subcategorization scheme, (2) the use of post-biological polishing ponds and filters as the technology basis for the BPT total suspended solids limitations, (3) the difficulty of meeting BPT limitations due to high or low ambient temperatures, (4) the methodology devised to determine which priority pollutants are likely to be discharged from particular product/processes (5) the technical and economic achievability of meeting the proposed BAT limitations for individual plants, (6) the suitability of not regulating all priority pollutants, (7) the methodology for excluding selected priority pollutants from PSES standards, (8) the unit costs and costing models used for developing BPT and BAT engineering compliance costs, (9) the analytical methods utilized to develop the priority pollutant data base, and (10) the economic impact analysis methodology.

II. Major Issues Raised in Comments

The Agency received numerous comments on the proposed regulation.

These comments criticized data and analyses that were fundamental to the regulation and prompted the Agency to

scheme is based on highly complex process chemistry and that minor

D. Compliance Costs

Many commenters criticized the

percent cost-to-sales benchmark for plant closure.

Commenters also stated that the

Disposal Techniques, and Analytical Data Summaries).

Some plants that received the

however, requested data for 1980—a more representative production year.

These comments criticized data and analyses that were fundamental to the regulation and prompted the Agency to reassess its data based and to reconsider many aspects of the regulation. Interested persons are advised to review the rulemaking record for a complete understanding of the many issues raised in comments. Listed below are those issues that appeared to be of greatest concern to commenters and that warranted further study by the Agency.

A. Adequacy of the Existing Data Base

Many comments disagreed with the Agency's conclusion that the existing data at the time of proposal could be considered representative of the entire industry for the purposes of establishing regulations, assessing costs of treatment required and resulting economic impacts or for assessing the scope of priority pollutant discharges. Some industry representatives questioned the validity of Agency models and assumptions used to extrapolate priority pollutant discharges, costs of additional treatment, and economic impacts from the existing data to the rest of the industry.

A few industry representatives asserted that the data were too old. Although some information was more current, the existing survey data generally characterized the industry in 1976 to 1977. Industry argued that significant advances in wastewater treatment practices have occurred since 1977. Most plants were issued NPDES permits during the period 1976–1977. Since national guidelines were not promulgated, these permits were based on State or EPA regional staffs exercising best professional judgment of limitations required by the Act. Any treatment installed to come into compliance with these permits was not reflected in the existing survey data. Industry argued that, if that treatment were considered, regulation of priority pollutants would not be necessary. However, commenters were also concerned that too much of the BPT data base was post-1977 and suggested that the more current data reflects better treatment than BPT.

B. Subcategorization

The proposed four-subcategory scheme was based on OCPSF generic process chemistry/chemical engineering unit operations and their potential to generate BOD_5 loadings. Industry commented that the proposed scheme is unworkable and arbitrarily groups chemical processes into non-homogeneous groups with respect to effluent treatability. They noted that the scheme is based on highly complex process chemistry and that minor changes in production or product mix could shift the applicable discharge subcategory. Industry commented that the within-subcategory variability was just as large as the between-subcategory variability. Many specific comments questioned whether specific product/processess or product groups were properly placed within the subcategorization scheme.

C. Treatment Effectiveness Data Base and Editing Rules

Many commenters disagreed with the Agency's technology and performance basis for BPT. They claimed that Congress intended BPT limitations to be developed ten to twelve years ago and implemented before 1977. Therefore, they argued that the current BPT data base should not include performance data from treatment systems that were installed or upgraded to meet NPDES permit requirements based upon best professional judgment of BPT technology and water quality considerations. Since many companies utilized various combinations of in-plant waste reduction techniques, water conservation programs, sewer segregation programs, and end-of-pipe biological treatment to meet "BPT" permit requirements, they claim the Agency penalized the OCPSF industry by continuing to use the "average of the best" treatment methodology. Many commenters believe that EPA unreasonably screened the data base for establishing "average of the best" by retaining only plants with 95 percent or better BOD_5 removal or plants with effluent BOD_5 of 50 mg/l or less. They suggested that the Agency should establish a more liberal indicator of BPT performance and should base BPT on biological treatment only.

Many commenters also disagreed with the Agency's technology and performance basis for toxic pollutant control. They suggested that the Agency relied on limited, unrepresentative, and inadequate data; did not accommodate the complexity and diversity of the OCPSF industry; ignored the toxic pollutant reduction progress made to date by treatment systems installed to meet best professional judgment BPT permit limitations; did not adequately accommodate the toxic pollutant analytical uncertainty inherent in part per billion measurements; and proposed too stringent limitations in many cases given available wastewater treatment technology.

D. Compliance Costs

Many commenters criticized the Agency's use of the CAPDET computer model for costing biological treatment systems. They suggested that since the CAPDET model is based on historic costs for municipal sewage treatment facilities, it should not be utilized for costing industrial wastewater treatment systems. They stated that the CAPDET default values and constants were not adequately modified to reflect OCPSF process wastewater characteristics and design parameters. Industry comments also criticized the Agency's methodology for extrapolating BPT costs for 169 individual plants to the entire industry.

Many commenters also criticized the Agency's use of the "55 generalized plant configurations" (GPCs) to model and characterize the industry as a whole for developing engineering costs for toxic pollutant control. Industry comments claim that few primary manufacturing facilities were characterized adequately by the 55 GPCs and they disagreed with the Agency's methodology of extrapolating GPC costs based on relationships among costs, flow and sales.

E. Economic Impact Methodology

EPA received numerous comments on the data base, methodology, and analysis used to estimate the economic impacts resulting from the proposed rules. The comments focused on the following major areas: quality of the plant data used to estimate plant effects, the method used to estimate plant closures, and the methods used in the small business analysis.

EPA received substantial comments that the economic data base used at proposal was inadequate and incomplete. Many dischargers who requested EPA's economic profile data told EPA that the data used were in error. Furthermore, commenters insisted that secondary producers of organics and plastics products also must be included in the analysis to properly evaluate the effect of these rules.

At proposal, EPA based its plant impact analysis on a treatment-cost-to-sales ratio to indicate whether a plant would close as a result of the proposed requirements. A plant's sales value was used to estimate wastewater flow (based on an algorithm developed from a subset of plants), and flow was used to estimate treatment costs (also based on an algorithm). Commenters properly noted that this analysis inevitably underestimated plant closures overall. Commenters also criticized EPA's four

percent cost-to-sales benchmark for plant closure.

Commenters also stated that the Small Business Analysis at proposal was inadequate in capturing the relative economic effects of the regulation among small and large manufacturers.

III. Data Gathering Efforts

A. Technical

In the preamble to the proposed regulation, the Agency recognized the need to gather additional data to assure that the regulation is based upon information that represents the entire industry and to assess wastewater treatment installed since 1977. Therefore, the Agency has conducted an extensive data gathering program to improve the coverage of all types of OCPSF manufacturers. This effort included mailing Section 308 surveys to all manufacturers of OCPSF products and conducting toxic pollutant sampling at 12 additional OCPSF facilities.

For the purposes of the survey, the OCPSF industry was defined generally as all establishments that manufacture: (1) Organic chemical products included within the U.S. Department of Commerce Bureau of the Census Standard Industrial Classification (SIC) major groups 2865 and 2869 and/or (2) plastics and synthetic fibers products included in SIC major groups 2821, 2823, and 2824. However, organic chemical compounds that are produced solely by extraction from natural materials, such as parts of plants and animals, or by fermentation processes are not included in this definition of the OCPSF industry even if classified in one of the OCPSF SIC classifications. Thus, any such products were considered non-OCPSF products for the purposes of the survey.

The questionnaire mailing list was compiled from many references that identify manufacturers of OCPSF products. These sources included the Economic Information Service, SRI Directory, Dun and Bradstreet, Moody's Industrial Manual, Standard and Poor's Index, Thomas Register, and Plastics Red Book as well as internal Agency sources such as the NPDES Permit Compliance System and the TSCA Inventory.

In October 1983, the Agency sent the General Questionnaire to 2,829 facilities to obtain information regarding individual plant characteristics, wastewater treatment efficiency, and the statutory factors expected to vary from plant to plant. The General Questionnaire consisted of three parts: Part I (General Profile), Part II (Detailed Production Information), and Part III (Wastewater Treatment Technology, Disposal Techniques, and Analytical Data Summaries).

Some plants that received the questionnaire had OCPSF operations that were a minor portion of their principal production activities and related wastewater streams. The data collected from these facilities allows the Agency to characterize properly the impacts of ancillary (secondary) OCPSF production. Generally, if a plant's 1982 OCPSF production was less than 50 percent of the total facility production (secondary manufacturer), then only Part I of the questionnaire was completed.

Part I identified the plant, determined whether the plant conducted activities relevant to the survey, and solicited general data (plant age, ownership, operating status, permit numbers, etc.). General OCPSF and non-OCPSF production and flow information was collected for all plant manufacturing activities. This part also requested economic information including data on shipments and sales by product groups, as well as data on plant employment and capital expenditures.

Part I determined whether a respondent needed to complete Parts II and III (i.e. whether the plant is a primary or secondary producer of OCPSF products, whether the plant discharges wastewater, and, for secondary producers, whether the plant segregates OCPSF process wastewaters). For those plants returning only the General Profile, Part I identified the amounts of process wastewater generated, in-place wastewater treatment technology, wastewater characteristics, and disposal techniques. Part II requested detailed 1980 production information for 249 specific OCPSF products, 99 specific OCPSF product groups, and any OCPSF product that constituted more than one percent of total plant production. Less detailed information was requested for the facility's remaining OCPSF and non-OCPSF production. Part II also requested information on the use or known presence of the priority pollutants for each OCPSF product/process or product group. Part III requested detailed information on plant wastewater sources and flows, treatment technology installed, treatment system performance and disposal techniques.

Responses to economic and sales items in Part I pertain to calendar year 1982, which were readily available since the plants were required to submit detailed 1982 information to the Bureau of the Census. This reduced the paperwork burden for responding plants. The rest of the questionnaire, however, requested data for 1980—a more representative production year. The Agency believed that treatment peformance in 1982 would be unrepresentative of treatment during more typical production periods. This is because decreased production normally results in decreased wastewater generation. With lower volumes of wastwater being treated, plants in the industry might be achieving levels of effluent quality that they could not attain during periods of higher production. The year 1980 was selected in consultation with industry as representative of operations during more normal production periods but recent enough to identify most new treatment installed by the industry since 1977. The industry representatives did not assert that significant new treatment had been installed since 1980.

The 2,829 section 308 questionnaires were mailed in October 1983. In February 1984, section 308 follow-up letters were sent to 914 nonrespondents.

A total of 981 OCPSF manufacturers were used in the analysis; 1,529 responses were from facilities not covered by the regulation (sales offices, warehouses, chemical formulators, etc.); 162 were returned by the Post Office; and 159 did not respond. A follow-up telephone survey of 52 nonrespondents concluded that less than 10 percent would be covered by the OCPSF regulations.

In addition, a Supplemental Questionnaire was sent to 84 facilities known to have installed selected wastewater treatment unit operations. Detailed design and cost information was requested for four major treatment components commonly used to treat OCPSF wastewaters (biological treatment, steam stripping, solvent extraction, and granular activated carbon) and summary design and cost information for other wastewater and sludge treatment components. The questionnaires also collected available treatment system performance data for in-plant wastewater control or treatment unit operations, influent to the main wastewater treatment system, intermediate wastestream sampling locations, and final effluent from the main wastewater treatment system. Unlike the General Questionnaire, it asked for individual daily data rather than summary data. Sixty-four plants responded with useful data and information.

The Agency conducted toxic pollutant field sampling activities at 12 OCPSF manufacturing plants between March 1983 and May 1984. Eight plants were sampled between 15 to 20 days each;

three plants, between 10 to 12 days; and one plant for one day. The analytical protocols used to measure the organic

three plants, between 10 to 12 days; and one plant for one day. The analytical protocols used to measure the organic priority pollutants were Method 1624 for volatile organic compounds by purge and trap isotope dilution GC–MS and Method 1625 for semivolatile organic compounds by isotope dilution GC–MS. The field sampling program expands the coverage of priority pollutants, provides an additional basis for estimating wastewater treatment system variability, and increases the candidate toxic pollutant wastewater treatment technologies. In-plant controls sampled included steam stripping, coagulation/flocculation, metals precipitation, activated carbon and extended aeration biological systems; end-of-pipe controls sampled included activated sludge, extended aeration, pure oxygen, and powdered activated carbon (PAC) biological systems; and polishing ponds, filtration and activated carbon units.

B. Economic and Financial

In addition to the economic and financial data collected in the Section 308 questionnaires, EPA also gathered data on the industry from a number of public and private sources. The major efforts are described below. (See *Economic Impact for Notice of Data Availability for the Organic Chemicals, Plastics and Synthetic Fibers Industry* for full citing of sources.)

Macroeconomic and chemical industry profiles were obtained from Data Resources, Inc. Information from 1982 was collected to compare with survey responses received from the industry. Forecasts for 1988 were also obtained from Data Resources, Inc. These forecasts come from the Trendlong macro forecast, linked to the linear programming model for the chemicals and plastics industry. Other macroeconomic and industry profile data were obtained from the International Trade Commission, the Federal Trade Commission, and the Bureau of the Census. Further profile data on the chemical industry were obtained from the *Kline Guide*.

EPA also developed a corporate financial database by purchasing selected data from SEC 10k financial reports for the survey population from Compustat Services, by examining State Industrial Guides and the Moody Corporate Directory. Financial data from Robert Morris Associates and the FINSTAT database developed by the Small Business Administration were used to model plant financial characteristics.

IV. Preliminary Data Analysis—Technical

A. Industry Profile

The OCPSF Industry is large and diverse, and many plants in the industry are highly complex. The industry includes approximately 1000 facilities which generally manufacture products under the OCPSF SIC Groups—SICs 2821, 2823, 2824, 2865, and 2869.

Some plants produce chemicals in large volumes, while others produce only small volumes of "specialty" chemicals. Large-volume production tends toward continuous processes, while small volume production tends toward batch processes. Continuous processes are generally more efficient than batch processes in minimizing water use and optimizing the consumption of raw materials in the process.

Different products are made by varying the raw materials, chemical reaction conditions, and the chemical engineering unit processes. The products being manufactured at a single large chemical plant can vary on a weekly or even daily basis. Thus, a single plant may simultaneously produce many different products in a variety of continuous and batch operations, and the product mix may change frequently.

For the 981 facilities in the OCPSF industry data base, approximately 76 percent of the facilities are designated as primary OCPSF manufacturers (over 50 percent of their total plant production includes OCPSF products) and approximately 24 percent of the facilities are secondary OCPSF manufacturers. Approximately 32 percent of the plants are direct dischargers, approximately 42 percent are indirect dischargers (plants that discharge to a publicly owned treatment works) and the remaining facilities use zero or alternative discharge methods. The estimated average daily process wastewater flow per plant is 1.22 MGD (millions of gallons per day) for direct dischargers and 0.24 MGD for indirect dischargers. The remainder use dry processes, reuse their wastewater, or dispose of their wastewater by deep well injection, incineration, contract hauling, or evaporation or percolation ponds.

As a result of the wide variety and complexity of raw materials and processes used and of products manufactured in the OCPSF industry, an exceptionally wide variety of pollutants are found in the wastewaters of this industry. This includes conventional pollutants (pH BOD, TSS and oil and grease); toxic pollutants (both metals and organic compounds); and a large number of nonconventional pollutants (including the organic compounds produced by the industry for sale). EPA focused its attention on the conventional pollutants and on the 65 toxic pollutants and classes of pollutants required to be addressed in accordance with the court order in *NRDC* v. *Ruckelshaus*.

To control the wide variety of pollutants discharged by the OCPSF industry, OCPSF plants use a broad range of in-plant controls, process modifications and end-of-pipe treatment techniques. Most plants have implemented programs that combine elements of both inplant control and end-of-pipe wastewater treatment. The configuration of controls and technologies differs from plant to plant, corresponding to the differing mixes of products manufactured by different facilities. In general, direct dischargers treat their waste more extensively than indirect dischargers.

The predominant end-of-pipe control technology for direct dischargers in the OCPSF industry is biological treatment. The chief forms of biological treatment are activated sludge and aerated lagoons. Other systems, such as extended aeration and trickling filters, are also used, but less extensively. All of these systems reduce BOD and TSS loadings, and, in many instances, incidentally remove toxic and nonconventional pollutants. Biological systems biodegrade some of the organic pollutants, remove bio-refractory organics and metals by sorption into the sludge, and strip some volatile organic compounds into the air.

Other end-of-pipe treatment technologies used in the OCPSF industry include neutralization, equalization, polishing ponds, filtration and carbon adsorption. While most direct dischargers use these physical/chemical technologies in conjunction with end-of-pipe biological treatment, some direct dischargers use only physical/chemical treatment.

In-plant control measures employed at OCPSF plants include water reduction and reuse techniques, chemical substitution and process changes. Techniques to reduce water use include the elimination of water use where practicable and the reuse and recycling of certain streams, such as reactor and floor washwater, surface runoff, scrubber effluent and vaccum seal discharges. Chemical substitution is utilized to replace process chemicals possessing highly toxic or refractory properties by others that are less toxic or more amenable to treatment. Process change include various measures that reduce water use, waste discharges,

and/or waste loadings while improving process efficiency. Replacement of barometric condensers with surface condensers; replacement of steam jet ejectors with vacuum pumps; recovery of product or by-product by steam stripping, distillation, solvent extraction or recycle, oil-water separation and carbon adsorption; and the addition of spill control systems are examples of process changes that have been successfully employed in the OCPSF industry to reduce pollutant loadings while improving process efficiencies.

Another type of control widely used in the OCPSF industry is physical/chemical in-plant control. This treatment technology is generally used selectively on certain process wastewaters to recover products or process solvents, to reduce loadings that may impair the operation of the biological system or to remove certain pollutants that are not removed sufficiently by the biological system. In-plant technologies widely used in the OCPSF industry include sedimentation/clarification, coagulation, flocculation, equalization, neutralization, oil/water separation, steam stripping, distillation, and dissolved air flotation.

Many OCPSF plants also use physical/chemical treatment after biological treatment. Such treatment is used in the majority of situations to reduce solids loadings that are discharged from biological treatment systems. The most common post-biological treatment systems are polishing ponds and multimedia filtration.

At approximately 9 percent of the direct discharging plants surveyed, either no treatment or no treatment beyond equalization and neutralization is provided. At another 14 percent, only physical/chemical treatment is provided. The remaining 77 percent utilize biological treatment. Approximately 42 percent of biologically treated effluents are further treated by additional controls such as polishing ponds, filtration, or activated carbon.

At approximately 39 percent of the indirect discharging plants surveyed, either no treatment or no treatment beyond equalization and neutralization is provided. At another 47 percent, some physical/chemical treatment is provided. The remaining 14 percent utilize biological treatment.

B. Subcategorization

1. Summary

The Agency has developed revised subcategories based on the new Section 308 Questionnaire responses and field sampling data. The proposed four-subcategory approach for the conventional pollutant parameters regulated at BPT, BOD_5 and TSS, has been replaced by a new approach with eight subcategories. Also, the proposed two-subcategory scheme for toxic pollutants regulated at BAT has not been retained. Rather than establish subcategories for toxic pollutants, the Agency is establishing one subcategory together with a monitoring approach for identifying the toxic pollutants that are discharged by each plant and thus warrant the most rigorous set of controls at the plant. (see Section IV(L)).

Under the revised subcategorization scheme, a plant is classified in accordance with that fraction of its total annual OCPSF production volume (pounds) that is associated with particular types of OCPSF products. The eight subcategories are as follows:

i. *Rayon Fibers*—includes plants in which rayon fibers by the viscose-rayon process constitute at least 95% of total OCPSF production.

ii. *Other Man-Made Fibers*—includes plants in which other man-made fiber products constitute at least 95% of total OCPSF production and plants in which other man-made fiber products plus organic chemicals constitute at least 95% of total OCPSF production.

iii. *Thermosets*—includes plants in which thermosetting resins constitute at least 95% of total OCPSF production and plants in which thermosetting resins plus organic chemicals constitute at least 95% of total OCPSF production.

iv. *Thermoplastics*—includes plants in which thermoplastic materials constitute at least 95% of total OCPSF production.

v. *Thermoplastics and Organics*—includes plants in which thermoplastic materials and organic chemicals constitute at least 95% of total OCPSF production.

vi. *Commodity Organics*—includes plants in which organic commodity chemicals (those produced nationally at a level exceeding one billion pounds per year) constitute at least 75% of organic chemical production and in which plastics production is less than 5% of total OCPSF production.

vii. *Bulk Organics*—includes plants whose production is not classified as either commodity or specialty organics (those produced nationally at a level below 40 million pounds per year) but does include at least 95% organics.

viii. *Specialty Organics*—includes plants in which specialty organic chemicals production constitutes at least 75% of total organic chemicals and in which plastics production is less than 5% of total OCPSF production.

Eighty-nine percent of OCPSF plants can be uniquely assigned to these eight subcategories. Eleven percent cannot be so classified because their manufacturing operations include a variety of major product types, none of which predominate to the extent called for by the subcategory definitions (e.g., a plant with 80% thermoplastics and 20% thermosets). In such cases, the control authority will use a building-block approach (based on flow-proportioning) to derive a plant's limitation from those established in the regulation for two or more relevant subcategories.

2. Relationship of New Subcategorization Scheme to Proposed Subcategorization

At proposal, the Agency established OCPSF effluent guidelines in which industry was divided into four subcategories based on products produced and generic process chemistry/chemical engineering unit operations.

Industry provided comments on this subcategory scheme which, besides stating industry's general displeasure with the subcategories, also discussed the complexity and confusing nature of the subcategories, the relative size of between and within-subcategory variability, and the advantage of focusing attention on effluent BOD.

The revised subcategorization scheme is intended to address these concerns. The Agency decided to focus its attention on OCPSF products rather than the chemical processes used to produce those products. It is clear, however, that the chemical processes found at a plant are closely related to the products produced by the facility. By focusing on products produced, the Agency hopes to conform the subcategorization to the inherent economic structure of the industry as well as the basic wastewater similarities of plants with similar products.

Industry comments on the proposal also objected to the statistical technique used to analyze the data for subcategorization. In particular, these comments emphasized that the proposed subcategories had greater variability within a subcategory than between subcategories. The Agency has subjected the new subcategorization scheme to an analysis of variance to assure that the new subcategories are well-defined and exhibit less within-subcategory variability than between-subcategory variability.

Finally, the new subcategorization gives appropriate consideration to BOD effluent values, which industry comments correctly noted is a relevant

factor in determining suitable OCPSF subcategories.

Generally, specialty chemicals are more complex structurally than either

factor in determining suitable OCPSF subcategories.

3. Detailed Explanation

Using raw materials provided by organic chemical plants, plastic plants employ only a small subset of the chemistry practiced by the OCPSF industry to produce a limited number of products (approximately 200). Plants producing organic chemicals, on the other hand, utilize a much larger set of process chemistry and engineering unit operations to produce approximately twenty-five (25) thousand products.

Further divisions are appropriate within the two broad groupings of plastics and organic chemicals. Within the plastics group, Plastic Materials and Synthetic Resins (SIC 2821) manufacturers can be subdivided into Thermoplastic Materials (SIC 28213) producers and Thermosetting Resin (28214) producers. Rayon manufacturers (SIC 2823) and other Synthetic Organic Fiber (SIC 2824) manufacturers are also both unique. Process chemistry and engineering are consistent with these groupings.

The Organic Chemicals industry (SIC 2865 and 2869) produces many more products than does the Plastic/Synthetic Fibers industry and is correspondingly more complex. While it is possible to separate the organic chemicals industry into product groups, the number of such product groups is large. Moreover, with few exceptions, plants produce organic chemicals from several product groups and thus limit the utility of such a scheme.

For organic chemical production, an alternative to a product-based scheme is a scheme based on the type of manufacturing conducted at a plant. Large plants producing primarily high-volume commodity chemicals (the basic chemicals of the industry, e.g., ethylene, propylene, benzene) comprise the first group of plants. A second tier of plants comprises plants that produce high volume intermediates (bulk chemicals). Plants within this tier typically utilize the products of the commodity chemical plants (first tier plants) to produce more structurally complex chemicals. Bulk chemical plants are generally smaller than those in the first group but still may produce several hundred million pounds of chemicals per year (e.g., aniline, methylene dianiline, toluene diisocyanate). The third group comprises those plants that are devoted primarily to the manufacture of specialty chemicals—chemicals intended for a particular end use (e.g., dyes and pigments). Specialty chemical plants use the products of the Commodity and Bulk chemical plants as raw materials. Generally, specialty chemicals are more complex structurally than either commodity or bulk chemicals. Plants within this group tend to be much smaller, producing tens of millions of pounds of chemicals per year.

Based upon the above, EPA has defined the three organics-based subcategories—commodity, bulk, and specialty—on the basis of total industry production. Commodity chemicals are those chemicals produced by the industry in amounts greater than one-billion lbs./yr. Bulk chemicals are defined to be those chemicals produced in amounts less than one-billion lbs./yr. but more than 40-million lbs./yr. Specialty chemicals are those chemicals produced in amounts less than 40-million lbs./yr. Using these definitions, there are 37 commodity chemicals or commodity chemical groups and 221 bulk chemicals or bulk chemical groups. The remaining organic chemicals are classified as specialty chemicals.

The products and product groups classified under Rayon, Other Fibers, Thermosets, Thermoplastics, Commodity Organics, and Bulk Organics are listed in Tables K–1 through K–6 respectively, of Section IV(K)—Applicability and Definition of the Regulated OCPSF industry. The Specialty Organics are the remaining organic chemicals not listed as commodity or bulk chemicals.

The BPT subcategorization factors (manufacturing product/processes, raw materials, wastewater characteristics, facility size, geographic location, age of facility and equipment, treatability, and nonwater quality environmental impacts) were examined for significance in the development of the revised subcategorization scheme. In general, the revised subcategorization is based primarily on significant differences in wastewater characteristics. Variations in waste characteristics have been utilized to evaluate the appropriateness of using any of the other eight factors as a basis for subcategorization.

The ideal data base for evaluating the need for subcategorization and the development of individual subcategories would include raw wastewater and final effluent pollutant data for facilities which employ only one manufacturing process or multiple product plants which segregate and treat each process raw waste stream separately. In this manner, each factor could be evaluated independently. However, the OCPSF industry is primarily comprised of multi-product/process, integrated facilities. Wastewaters generated from each product/process are usually collected in combined plant sewer systems and treated in one main treatment facility. Therefore, each plant's overall raw wastewater characteristics are affected by all of the production processes occurring at the site at one time. The effects of each production operation on the raw wastewater characteristics cannot be isolated from all of the other site specific factors. Therefore, a combination of both technical and statistical methodologies were used to evaluate the significance of each of the subcategorization factors. The results of the technical analysis were compared to the results of the statistical efforts to determine the usefulness of each factor as a basis for subcategorization. Two major statistical techniques were used to determine an appropriate subcategorization scheme for the OCPSF industry: Analysis of Variance and the Spearman Rank Correlation. The details of the analysis are available in the EPA Public Information Reference Unit.

The analysis concludes that the revised subcategorization scheme is very effective when OCPSF process wasewater flow is the variable of interest. Flow relates to the size and construction costs of a plant's wastewater treatment system.

The analysis also shows that the revised subcategories effectively group plants by production volume (measured as annual pounds of all OCPSF products produced at a plant) homogeneously relative to the inherent variability of production throughout the industry. This indicates that size of plants has been successfully addressed in the subcategorization. Thus plants of similar economic viability are grouped together.

Geographic location (including ambient temperature) and age of facility and equipment were determined not to be appropriate bases for subcategorization of the OCPSF industry.

The analysis shows that the revised scheme is very effective in establishing homogeneous groups based on effluent BOD concentrations, but not as rigorous in establishing groups based on raw waste BOD concentration. As described below, all plants can use some combination of well-designed and operated treatment technology to meet lower effluent BOD targets. The predominant issue relates to the cost of the required treatment technology.

The effluent BOD concentration or treatability of a given wastewater is affected by the presence of inhibitory materials (toxics); availability of alternative disposal methods; and pollutant concentrations in, and variability of, the raw waste load. However, all of these factors can be mitigated by sound waste management,

treatment technology design, and operating practices. Examples of these are:

- The presence of toxic materials in the wastewater can be controlled by in-plant treatment methods. Technologies such as steam stripping, metals precipitation, activated carbon, reverse osmosis, etc., can eliminate the presence of materials in a plant's wastewater which may inhibit or upset biological treatment systems.
- Although plants may utilize deep well injection for disposal of highly toxic wastes to avoid treatment system upsets, other alternative disposal techniques such as contract hauling and incineration are available to facilities which cannot utilize deep well disposal. In addition, stricter groundwater regulations may eliminate the option of deep well disposal for some plants or make it uneconomical for others, forcing facilities to look more closely at these other options.
- Raw waste load variability can be controlled easily by the use of equalization basins. In some plants, "at process" storage and equalization is used to meter specific process wastewaters, on a controlled basis, into the plant's wastewater treatment system.
- Raw waste concentrations can be reduced with roughing biological filters or with the use of two-stage biological treatment systems.

OCPSF wastewaters can be treated by either physical-chemical or biological methods, depending on the pollutant to be removed. Also, depending on the specific composition of the wastewater, any pollutant may be removed to greater or lesser degree by a technology not designed for removal of this pollutant. For example, a physical-chemical treatment system designed to remove suspended solids will also remove a portion of the BOD of a wasewater if the solids removed are organic and biodegradable. It is common in the OCPSF industry to use a combination of technologies adapted to the individual wastewater stream to achieve desired results.

In general, the precent removals of BOD and TSS are consistent across all revised subcategories. It is also possible for plants in all revised subcategories to achieve high percent removals (greater than 95%) for both BOD and TSS. Therefore, based on the consistency of these removal data and the ability of plants in all revised subcategories to achieve high removals of pollutants, it is concluded that subcategorization based on treatability is not justified.

The Agency believes that there are several advantages associated with the revised subcategorization scheme. Plants are assigned to subcategories based on the relative production of OCPSF products using data that must be generated for the Bureau of Census. The procedure is relatively simple to apply to individual plants. Finally, most are uniquely covered by a single subcategory, leaving relatively few plants that need to be addressed by a "building block" approach using two or more subcategories. The Agency solicits comments and additional data related to the revised subcategorization scheme.

C. Technology Basis for BPT Options and Effluent Limitations

The Agency is considering three BPT technology options. EPA may promulgate BPT effluent limitations based on any of these three options. Therefore, we specifically invite comment on each of these.

These options focus again on the primary end-of-pipe technologies used in the industry. These technologies are widely used in the industry to control conventional pollutants. To varying extents, these technologies also remove toxic and nonconventional pollutants. However, it is not possible to calculate consistent removals of specific toxic and nonconventional pollutants across the industry without carefully considering a variety of process controls and in-plant treatment technologies that are more appropriately considered to be BAT controls and technologies. Therefore, the selected BPT technologies are end-of-pipe technologies that are designed primarily to address the conventional pollutants BOD and TSS, supplemented by those in-plant controls and technologies that are commonly used to assure the proper and efficient operation of the end-of-pipe technologies.

Option I: EPA bases the first BPT technology option on biological treatment preceded by the necessary controls to protect the biota and otherwise assure that the biological system functions effectively and consistently. Activated sludge and aerated lagoons are the primary examples of such biological treatment. Other biological systems, such as aerobic lagoons, rotating biological contactors, and trickling filters, are also used effectively at a few plants and data from such plants were also used to develop BPT limitations based on this option.

Option II: The second BPT technology option includes, in addition to Option I technology, biological systems followed by polishing ponds. In some cases, plants originally installed biological systems that had inadequate retention times or were otherwise not designed and operated to optimally treat conventional pollutants. When these plants were required in the late 1970s to upgrade to meet BPT permit limits (established by permit writers in the absence of guidelines on a case-by-case basis, using their best engineering judgment), some chose to add polishing ponds rather than to enlarge or otherwise improve their existing biological systems.

Option III: EPA bases the third BPT technology option on multimedia filtration as a basis for additional TSS control after biological treatment.

After selecting the BPT technology options, EPA proceeded to develop limitations that are associated with those technologies. To do this, EPA first needed to identify the "average-of-the-best" plants that use these technologies.

EPA developed a statistical criterion to segregate the better designed and operated plants from the poorer performers. This was done to assure that the plant data relied upon to develop BPT limitations reflected the average of the best existing performers. Since the data base includes many plants which are poor performers, it is necessary to develop appropriate criteria for differentiating poor plant performance from good plant performance. The criterion selected was to include in the data base any plant with a biological treatment system that, on the average (1) discharged 50 mg/l or less BOD after treatment, or (2) removed 95% or more of the BOD that entered the end-of-pipe treatment system. (Dilution of process wastewater by other wastewater was noted and effluent concentrations were adjusted accordingly.) This criterion reflects the performance level that is generally achieved by well-operated plants in the OCPSF industry that use the recommended BPT technologies.

These are the same performance criteria utilized at proposal. Many industry comments suggested that EPA unreasonably screened the data base for establishing "Average of the Best" BPT technology and suggested that a more liberal indicator of performance, such as 85 percent removal, should be used.

To assess this recomendation, the Agency evaluated the BOD_5 data from the 163 section 308 questionnaire full response plants in the direct discharge data base with biological treatment systems. After adjusting the data for nonprocess wastewater dilution, the median BOD_5 percent removal for all facilities is 95.4 percent and the median effluent concentration is 28 mg/l.

The more liberal editing rule suggested by industry was considered

for excluding plants with poorly operated or inadequate biological

associated with treatment systems with serial unit operations (e.g., combined

assertions, there has not been a substantial overall improvement of

TABLE C–1.—OPTION I BPT LIMITATIONS BASED ON BIOLOGICAL TREATMENT WITHOUT POST-BIOLOGICAL CONTROLS

some subcategories would be pooled. The maximum 30-day average and daily

for excluding plants with poorly operated or inadequate biological treatment systems. Using the industry's suggestion, plants would be retained for analysis if at least biological treatment was in-place and if, on the average, the treatment system removed 85 percent or more of the BOD_5 or discharged 100 mg/l or less BOD_5 after treatment. These criteria would retain 87 percent of all the biological treatment systems reporting BOD_5 data.

The "95 percent or more BOD_5 removal or 50 mg/l or less BOD_5 concentration after treatment" performance editing criteria retains 76 percent of all the biological treatment systems reporting BOD_5 data. The Agency calculated the subcategory BOD and TSS median values for both performance editing rules. Using the 95%/50 mg/l performance edit reduces the average subcategory BOD and TSS median values for Option I treatment technology approximately 10 and 16 percent, respectively, below those obtained using the 85%/100 mg/l edit. Similarly, the average median values for Option II treatment technology are reduced approximately 11 and 4 percent, respectively. The median BOD_5 percent removal for all facilities is 95.4 percent and the median effluent BOD_5 concentration is 28 mg/l. Based upon all these facts, the Agency believes that this "95%/50 mg/l BOD_5" performance editing criteria provides a reasonable determination of "average of the best" BPT performance.

The long-term BOD_5 and TSS averages for each subcategory, shown in Tables C–1 and C–2 for technology Options I and II, are based on the "95% removal/50 mg/l BOD_5" performance edit.

To establish maximum 30-day average and daily maximum BOD_5 and TSS effluent limitations for each technology option, the Agency determined variability factors for biological treatment systems. Daily data for BOD_5 and TSS were available from 69 facilities. Plant data were retained for variability factor analysis based on the following factors: (1) Non-process wastewater dilution was 25 percent or less at the effluent sampling point; (2) The sampling frequency was once or more per week for at least one year; (3) The NPDES permit contained only one set of limits applicable to both summer and winter operating periods; (4) The treatment system did not change during the period of record; and (5) The reported effluent data was uniquely associated with treatment systems with serial unit operations (e.g., combined sampling data from parallel activated sludge and activated carbon treatment systems were deleted). After these edits, data from 23 biological treatment systems were retained to calculate variability factors. The average BOD_5 maximum 30-day average and daily maximum variability factors are 1.41 and 3.91, respectively. The average TSS maximum 30-day average and daily maximum variability factors are 1.46 and 4.74, respectively.

Some plants rely exclusively upon end-of-pipe physical/chemical treatment. Some of these plants have low BOD and thus find physical/chemical treatment more effective in reducing TSS loadings. (Biological systems cannot function unless influent BOD is high enough to sustain their biota) Other plants have determined, based on an assessment of the types and volumes of pollutants that they discharge, that physical/chemical treatment is more economical, easier to operate, or otherwise more appropriate. Many of these plants can control conventional pollutants effectively without using the BPT biological treatment alternatives discussed above. Some plants do not have any end-of-pipe treatment in place at all. For plants that have not already achieved the long-term average BOD and/or TSS costing targets, compliance can be achieved by the installation of the recommended end-of-pipe BPT technologies listed in the costing documentation for plants without in-place biological treatment. In some cases, especially where only TSS noncompliance exists, solids control by physical/chemical means may suffice. For plants that comply with BOD but not with TSS targets, and presently have no biological treatment in place, EPA costed chemically assisted clarifiers, multimedia filters, or polishing ponds depending on existing in-place technology and geographic location.

Some industry commenters objected to the Agency's collection and use of post-1977 data to develop BPT limitations. Contrary to the assertions of some commenters, Congress did not intend that BPT performance would remain static based on performance levels attained before 1977. Congress intended for periodic review of BPT technology and performance. Thus, updated information on the effectiveness of BPT-level technologies may be used by the Agency. Furthermore, contrary to industry assertions, there has not been a substantial overall improvement of conventional pollutant wastewater treatment technology performance between the 1976/1977 and the 1983 Section 308 data collection efforts. A comparison of the BOD_5 performance data for plants within both data sets reveals the BOD_5 treatment improved for approximately 37 percent of the plants, remained about the same (±1 percent removal) for approximately 27 percent of the plants, and deteriorated for the remaining 36 percent of the plants.

Many commenters suggested that the Agency should establish alternative cold weather limitations to accommodate the effects of cold weather conditions on biological treatment removal efficiencies. However, the Agency's assessment of this issue for subcategorization found that effluent BOD quality is statistically independent of location using degree-days as a surrogate for temperature. Furthermore, temperature is only one of several characteristics which affect the operation of the system. Changes in temperature (both seasonal and short term), raw waste load, product mix, flow, food to microorganism ratio, and dissolved and suspended solids, will all have some impact on treatment. Moreover, raw waste loads in the OCPSF industry are variable due to batch operations, product mix changes, and raw materials variations. It is thus difficult to isolate temperature effects from changes caused by variables other than temperature.

Technologies and operating techniques exist which, if properly applied, can overcome temperature effects. Specific means of mitigating temperature effects were discussed in the March 1983 Development Document.

The Agency accounted for any potential ambient temperature effects on biological treatment processes by adjusting engineering costs to accommodate cold weather conditions. These factors adjust biological treatment costs for cold weather design conditions. The Agency also accounted for potential warm ambient temperature effects which may interfere with solids control (e.g., algae blooms) from holding ponds and polishing ponds. Plants in states with average monthly temperature, over 25 °C, had filtration systems costed for solids control rather than polishing ponds.

The BPT effluent limitations for Options I and II are presented in Tables C–1 and C–2, respectively.

An assessment of the long-term BOD and TSS averages in Tables C–1 and C–2, indicates that subcategory effluent quality does not necessarily improve when plants with biological treatment and polishing ponds are included in the subcategory averages. As noted above, these plants may have merely added polishing ponds to an inadequately designed or operated biological treatment system rather than enlarge or otherwise improve their existing biological treatment systems. The performance edits utilized to segregate the better designed and operated plants from the poorer performers was based on BOD performance only. The Agency has not yet conducted a performance edit based on TSS control, but intends to assess TSS performance for all plants prior to promulgation.

For example, in the case of the commodity organic chemicals subcategory, the long-term TSS values are 99 mg/l in both Tables C–1 and C–2. The eleven commodity organic chemical plants that utilize biological treatment (9 without polishing ponds and 2 with polishing) and that reported effluent data are located in North Carolina, Louisiana, and Texas. Application of the performance edit deletes the North Carolina plant and one Texas plant. Therefore, nine Louisiana and Texas facilities (7 without polishing and 2 with polishing) provide the basis for the subcategory averages. The Agency believes that many of these high TSS plant averages are due to periods of high ambient temperatures that may cause algae blooms in holding or polishing ponds. Many industry comments discuss this TSS control problem.

The Agency believes that a well operated biological treatment system even with polishing ponds does not necessarily ensure adequate solids control. In these cases where biological treatment provides inadequate TSS control, additional treatment such as filtration systems should provide the basis for effluent TSS limitations. Filtration has been a well-established technology for many years in both the OCPSF industry and many other industries.

Approximately 11 percent of the plants in the direct discharge data base utilize filtration in combination with either biological treatment or biological treatment and polishing ponds. If EPA decides to use this technology as the basis for final TSS standards, it would do so by deleting from the data base, for TSS purposes, those biological systems that are not followed by adequate physical/chemical solids control systems. Based upon the present data base on the performance of such biological/tertiary solids control systems, this approach would result in the TSS long-term averages and limitations shown in Table C–3. Since the BOD performance edit (95 percent/50 mg/l) retains only 16 facilities with tertiary solids control, TSS data for some subcategories would be pooled. The maximum 30-day average and daily maximum standards were calculated using the TSS variability factors established for BPT Options I and II.

EPA pooled the TSS filtration data for the plastics subcategories—rayon, other fibers, thermosets, and thermoplastics-only. EPA separately pooled the TSS filtration data for the three organic chemical subcategories. (EPA did not pool the data for the thermoplastics and organics subcategory because it has TSS filtration data from five plants in that subcategory.) EPA believes that the pre-filtration (i.e., Option II) TSS levels for plants within each of these broad groupings are within a sufficiently similar range to support pooling the filtration effluent data. EPA requests comments on this pooling approach and suggestions for any alternative approach to using the filtration data.

TABLE C–3.—OPTION III TSS LIMITATIONS (MG/L) BASED ON BIOLOGICAL TREATMENT WITH FILTRATION AND BIOLOGICAL TREATMENT WITH POLISHING AND FILTRATION

Specialty organics	40	58	190

As noted in the engineering costing methodology in section IV(H) of this notice, plant-by-plant model BPT costs were developed based on reported effluent BOD_5 and TSS effluent concentrations and selected costing targets (i.e., predicted effluent limitations used for costing proposes). These costing targets were selected before the actual limits set forth in this notice were set and therefore were designed to encompass a broad range of potential subcategory long-term averages for BOD_5 and TSS. EPA selected three sets of costing targets for plastics and four sets of targets for organics. In fact, the calculated long-term averages for each of the three options discussed above span a much narrower range. (The chief difference among the options is a significant improvement in TSS control for the three organics subcategories by adding filtration in Option III.) The subcategory long-term BOD/TSS averages and the closest corresponding BPT costing BOD/TSS targets are listed in Table C–4.

TABLE C–4.—BPT SUBCATEGORY AVERAGES AND COSTING TARGETS (MG/L)

The Agency has overestimated BPT compliance costs because it used effluent targets for costing purposes that differed from those subsequently presented in the three options. On average, the closest BOD and TSS costing targets for Options I and II were 27 percent and 60 percent below (i.e., more stringent than) the subcategory long-term averages, respectively. Similarly, the Options I and II TSS costing targets are, on average, 36 percent below the Option III subcategory TSS medians.

The BOD_5 and TSS pollutant loadings were calculated in a similar manner to costs. The loadings calculations also correspond to the predicted BOD_5/TSS targets listed in Table C-4; thus the technology options appear to have nearly identical pollutant loadings. For the same reason, the annual incremental BOD and TSS removals were overestimated. The Agency will correct the engineering cost and pollutant loading calculations before promulgations.

The similarity of estimated loadings and costs based upon target levels yields a correspondingly artificial similarity among total annual loadings and costs for the selected Options. For example, EPA estimates that the BPT limitations would result in annual incremental removals (beyond that achieved by current treatment) of 28.1 million pounds of BOD and 74.2 million pounds of TSS for the Option I loading targets and 28.2 million pounds of BOD and 74.4 million pounds of TSS for the Options II and III loadings targets. The corresponding costs of removal are summarized in section V(B) of this notice. The Agency anticipates that actual removals and costs will be lower than these estimates and that refined calculations based upon the actually developed limitations will reveal more substantial differences among the three options. The preliminary economic impact analysis for BPT based upon these cost estimates is summarized also in section V(B) of this notice.

D. Technology Basis for BAT Options and Effluent Limitations

Based on the analyses which are discussed in the following sections, EPA is considering three technology options as the basis of end-of-pipe BAT effluent limitations. In addition, as discussed below, EPA is considering setting prebiological limits for certain volatile and semi-volatile pollutants that are primarily air-stripped rather than degraded in biological treatment systems. EPA may promulgate BAT effluent limitations based on any of these options. Therefore, we specifically invite comment on each of them.

Due to the diversity of priority pollutants in the OCPSF industry, a variety of treatment technologies are employed by OCPSF plants to control priority pollutants as well as nonconventional pollutant discharges. Consequently, the selection of a particular set of BAT treatment technologies is plant-specific since the OCPSF industry is not amenable to any single BAT technology.

The range of technologies used to control priority pollutant discharges encompasses virtually the entire range of industrial wastewater treatment technology. Generally, this technology consists of a combination of in-plant control or treatment of specific wastestreams (sometimes from several different product/processes) by any of a variety of physical/chemical methods, biological treatment of combined wastestreams, and post-biological treatment.

In-plant controls frequently used by OCPSF plants for treatment of individual wastestreams include steam stripping (or distillation), carbon adsorption, chemical precipitation, solvent extraction and chemical oxidation. Biological treatment generally consists of some form of activated sludge (i.e., extended aeration, complete mix, pure oxygen) individually or in combination with other types of biological treatment, such as aerated lagoons, trickling filters, and aerobic and anerobic lagoons. Post-biological treatment for priority pollutants (and nonconventionals) is generally limited to granular activated carbon and multimedia filtration.

It should be noted that although some of the controls or technologies preceding the biological segment of the treatment system are installed for product recovery or to reduce priority pollutants, others are expressly designed into the treatment system to assure compliance with BPT effluent limitations by protecting the biological segment of the system from shock loadings and other forms of interference. Sampling results show that some plants remove certain toxic pollutants very effectively from the wastewater through in-plant control technologies. In these cases, the end-of-pipe systems are designed primarily for BOD_5 and TSS removal. However, other complete treatment systems have integrated both biological and post-biological components with in-plant components to control priority pollutants by utilizing the in-plant technologies as "roughing" controls to reduce toxic pollutant loadings to levels which can be handled by biological and post-biological technologies. It is thus inappropriate to specify any particular technology as a BAT technology in the OCPSF industry. Rather, each plant required to control priority pollutant discharges will employ a combination of in-plant controls and end-of-pipe treatment technologies that result in the desired effluent quality with respect to a wide variety of pollutant parameters of interest.

Based upon these considerations, EPA has refrained from specifying a particular set of controls as the basis for BAT. Rather, priority pollutant control will be based on removals achieved at OCPSF plants using differing treatment configurations. Unlike the BAT editing rules used in the proposed rulemaking, EPA is considering a technology-based editing rule for retaining plant data in calculating BAT limitations rather than a performance editing rule utilizing BPT effluent parameters. These rules are discussed in detail in the BAT effluent limitations portion of this section.

EPA has considered two general approaches for developing BAT effluent limitations. The first approach is concentration-based limitations (with appropriate requirements to prevent the substitution of dilution for treatment) based on end-of-pipe data (supported by performance data for selected in-plant control technologies) that reflect total treatment system performance. The second approach would set mass-based limitations based primarily on an

evaluation of the treatability of individual product/process streams by in-plant process controls, physical/chemical treatment and biological treatment. For the reasons discussed in the preamble to the proposed regulation and in section II of this Notice, EPA has selected the first approach. However, EPA will specify in the regulation that permitting authorities must establish mass-based permit limitations by multiplying the concentration limit by the plan's actual process wastewater flow.

Based on the considerations discussed above, EPA is considering these three end-of-pipe BAT technology options:

Option I—Concentration-based BAT effluent limitations based on the performance of only the biological treatment component, which is equal to the priority pollutant limitations attained when in compliance with BPT effluent limitations.

Option II—Concentration-based BAT effluent limitations based on the performance of the biological treatment component plus in-plant control technologies which remove priority pollutants prior to discharge to the end-of-pipe treatment system. These in-plant technologies include steam stripping to remove volatile and semi-volatile priority polluants, activated carbon for various base/neutral priority pollutants, chemical precipitation for metals and cyanide and possibly multi-stage biological treatment for removal of polynuclear aromatic (PNA) priority pollutants.

Option III—Concentration-based BAT effluent limitations based on the performance of biological treatment, in-plant controls and post-biological activated carbon adsorption for the remaining toxic pollutants.

There are both advantages and disadvantages to each of the technology options. Option I is a low cost option which reduces some toxic pollutants utilizing the technology installed for BTP—biological treatment. (However, some OCPSF facilities can comply with the BPT limitations for BOD_5 and TSS without the installation of biological treatment. These facilities can comply with Option I BAT effluent limitations only by installing the in-plant controls recommended in Option II, thereby incurring greater costs to meet Option I limitations than other discharges would incur.) However, this technology in some cases includes in-plant controls which have been installed to remove toxic pollutants which would interfere with or inhibit the biological treatment system's removal of BOD_5 and TSS. The need for such controls for BPT purposes is likely to vary; thus some BPT plants may not be able to achieve BAT Option I without additional technology at additional cost.

Option II controls reduce large amounts of toxic pollutants from wastewater prior to discharge to surface waters. Furthermore, the installation of in-plant controls under Option II would be particularly effective in reducing the levels of volatile and semi-volatile organic toxic pollutants in all environmental media. A large portion of volatile and semi-volatile organic toxic pollutants are emitted by biological systems into the surrounding air. Thus, while removing them from the wastewater, the typical biological system does not remove these pollutants from the environment but rather transfers a large portion of them to another environmental medium. The in-plant treatment of such pollutants by methods such as steam stripping reduces or eliminates the air emissions that otherwise would occur by the air stripping of the organic toxic pollutants in the biological system. Moreover, the installation of in-plant controls would also reduce the levels of certain priority pollutants which are not air stripped or otherwise removed from OCPSF wastewaters using only biological treatment. For example, the Agency's data base shows that bis(2-chloroisopropyl)ether, 2,4,6-trichlorophenol, and pentachlorophenol are not adequately removed by biological treatment systems. However, bis(2-chloroisopropyl)ether, a base/neutral compound, may be controlled through in-plant steam stripping. Similarly, 2,4,6-trichlorophenol and pentachlorophenol, acid compounds, may be controlled through in-plant carbon absorption systems.

Although more efficient in terms of toxic pollutant removal from all media (water and air) than Option I, Option II has higher costs associated with its implementation. This is also the case for Option III which provides slightly higher removals at even higher costs for some organic toxic pollutants such as 2,4-dimethyl phenol, napthalene, and phenol.

Calculation of Concentration-Based BAT End-of-Pipe Effluent Limitations

For all options, EPA has decided to develop end-of-pipe concentration-based BAT limitations for the entire industry based upon end-of-pipe data that reflect the best available technology. Depending on the option selected, the BAT technology used as the basis for limitations includes combinations of process controls, in-plant physical/chemical treatment and end-of-pipe treatment. The data base includes verification plants, CMA/EPA 5-plant study plants, and recent sampling study plants; the data has been edited both technically and analytically.

Prior to calculating concentration-based limitations, EPA considered whether the industry should be subcategorized for BAT purposes by evaluating the same subcategorization factors which were considered for BPT. EPA has decided to promulgate a single set of BAT limitations which would be applicable to all OCPSF facilities. (However, permits would tailor these requirements somewhat to account for the fact that most OCPSF plants routinely discharge only a subset of the pollutants covered by the BAT regulation—see Section IV(L) of this notice.) The available data for BAT show that plants in differing BPT subcategories can achieve similar low toxic pollutant effluent concentrations by installing the best available treatment components. Since all plants can achieve compliance with the same BAT limitations through some combination of demonstrated technology, the predominant issue relates to the cost of the required treatment technology. EPA has analyzed these costs and their associated impacts, as discussed in section V(C) of this notice. Therefore, the Agency believes that BAT subcategories do not appear to be necessary for effective, equitable regulation. However, EPA will continue to explore the possibility of subcategorizing the industry for BAT purposes and invites comments and supporting data on appropriate approaches.

Although EPA is not subcategorizing the industry for BAT, EPA is considering separate BAT effluent limitations for total zinc (but not other pollutants) for rayon manufacturers. During the comment period on the proposed regulations, raw waste and treated effluent data were submitted which showed elevated raw waste loadings of zinc as much as 100 times higher than other OCPSF facilities' loadings with correspondingly higher effluent levels. However, the Agency believes that in-plant chemical precipitation will significantly lower effluent levels of zinc down to levels comparable to other OCPSF facilities; EPA solicits performance data from rayon plants that employ in-plant chemical precipitation as well as additional comments and information on this issue.

Having concluded that in general only one set of BAT limitations for all OCPSF facilities should be developed, EPA then calculated the BAT effluent limitations for each technology option using data collected from different combinations of

BAT treatment systems during the verification, CMA/EPA 5 plant study, and current sampling program efforts as

verification and CMA sampling programs for a particular pollutant at a

the 99th and 95th percentiles by the respective means of daily and 4-day

multiplying its long-term median value by each of its two corresponding

monitoring costs that would be incurred to comply and demonstrate compliance

For example, in considering the current annual volatile pollutant

BAT treatment systems during the verification, CMA/EPA 5 plant study, and current sampling program efforts as follows:

Option I—BAT effluent limitations will be calculated using sampling data from plants that have been determined to have well-operated biological treatment for the priority pollutants to be regulated. These plants may include in-plant toxic pollutant controls which were installed to ensure the performance of the biological treatment system.

Option II—BAT effluent limitations will be calculated using sampling data from plants included in Option I for certain priority pollutants. For pollutants not adequately controlled by BPT technology, limitations will be based on data from plants that have biological treatment plus in-plant controls and plants that have physical/chemical control technology applied at the end-of-pipe for the remaining priority pollutants to be regulated.

Option III—BAT effluent limitations will be calculated using sampling data from plants included in Options I and II for some pollutants plus, for certain other pollutants, plants that have been identified as have biological treatment, in-plant controls and post-biological activated carbon adsorption polishing.

The following sections discuss the procedures used to calculate the components necessary for the development of BAT effluent limitations.

BAT Data Base Editing—Certain editing rules were utilized in preparing the data base prior to calculation of individual plant long-term averages (LTA) and industry long-term medians (LTM). First, analytically suspect data were returned to the analytical laboratories for confirmation or correction. Next, influent and effluent data were matched by sample date and all non-matching data points were excluded from this analysis. These data points will be included in the analysis prior to promulgation if they can be paired with data that the analytical laboratories confirm or correct. Then, each matched influent-effluent data pair was examined and all pairs which produced a negative percent removal were excluded from the analysis.

It should be noted that certain plants have been sampled in more than one of the BAT sampling programs previously mentioned. For the purposes of calculation plant LTAs and industry LTMs, each sampling program at a particular plant was treated separately and had individual LTAs which are included in the calculation of the LTM for each pollutant (i.e., it is possible that LTAs have been calculated for both the verification and CMA sampling programs for a particular pollutant at a certain plant). This decision was made due to difference in time periods of each sampling program, the different analytical procedures employed, the possibility of changes in product mix and processes utilized during each time period and the fact that different sets of priority pollutants may have been analyzed for the same plant during different sampling program efforts.

Calculation of the Median of Long-Term Means—For each pollutant at each plant in each of the sampling efforts mentioned above, a long-term weighted average (LTA) effluent concentration was calculated using only effluent data points whose corresponding end-of-pipe influent data were greater than or equal to 20 ppb or to 100 ppb depending on the type of technology used to remove a pollutant at a particular plant. For plants using in-plant controls prior to discharge to the end-of-pipe treatment system, the 20 ppb level was selected for the treated pollutant; for other plants, the 100 ppb level was used. These edits were designed to retain in the calculation of the limit for that pollutant only those plants that had treatable levels of a pollutant in the raw waste. The nondetected values at the plant were assigned a nominal detection limit value (using detection limits associated with EPA analytical methods 1624 and 1625. See 49 FR 43234; October 26, 1984). The long-term weighted average was computed by a weighting scheme, which assumed that nondetected values should be weighted in accordance with the frequency with which nondetected values for the pollutant generally were found in the daily-data plants. Then, the pollutant median of the plants' long-term weighted averages was calculated for each pollutant. The amount of data was limited for certain pollutants. Pollutant medians were retained for further analysis only if at least one plant-pollutant combination had three or more influent/effluent data pairs.

Calculation of Daily Maximum and Four Day Variability Factors—After developing long-term medians for each pollutant, EPA proceeded to develop two variability factors for each pollutant—a daily maximum variability factor (VF1) and a four-day variability factor (VF4). These were developed by fitting a statistical distribution to the daily data for each pollutant at each plant; deriving a 99th percentile and a mean of the daily data distributions for each pollutant at each plant; deriving a 95th percentile and a mean of the distribution of the 4-day averages for each pollutant at each plant; dividing the 99th and 95th percentiles by the respective means of daily and 4-day average distributions to derive plant-specific variability factors for each pollutant; and averaging these plant-specific variability factors across all plants to derive VF1 and VF4 for each pollutant.

For certain pollutants, the amount of daily data was limited. For such pollutants, variability factors were interpolated from the variability factors for groups of pollutants expected to exhibit comparable treatment variability based upon a comparison of chemical structure and characteristics. Each pollutant in each chemical group was then assigned a VF1 and VF4 equal to the average of the VF1s and VF4s of any pollutants in the same group.

In response to comments on the statistical aspects of the proposed limitations development, EPA examined several statistical techniques for deriving limitations. The Agency found that a modification of the delta-lognormal procedures provides a reasonable approximation of the underlying empirical toxic pollutant data. The delta-lognormal distribution assumes that the data are a mixture of positive lognormally distributed values and zero values that occur with a definite probability. Consequently, zero concentration values are modeled by a point distribution, positive concentration values follow a lognormal distribution, and the mixture of these values forms the delta-lognormal distribution.

This method provides a reasonable approach for combining quantitative concentration values with information expressed only as a nondetect, which is more qualitative in nature. For the determination of variability factors, the delta-lognormal procedure was modified by placing the point distribution at the nominal detection limit. This approach is somewhat conservative since values reported as nondetect may actually be any value between zero and the detection limit. The detection limit used for each pollutant was the nominal detection limit published by the Agency for analytical methods 1624 and 1625. Assigning the detection limit to non-detected values in calculating both variability factors and long-term medians for this data base tends to result in slightly higher limitations than would be derived if lower values were assumed.

Calculation of BAT Effluent Limitations—Daily maximum and monthly averages based on four observations BAT effluent limitations were calculated for each pollutant by
